KOEHRING

DANDIE Light Mixer

Dandie with steel disc wheels and solid rubber tires; power charging skip, water tank and gasoline engine.

Dandie with steel trucks; power charging skip, water tank and gasoline engine.

EQUIP it to your special needs. Rubber tires to save the time waste of between-job hauls, and to expand your working territory. *Light duty hoist. Low charging platform or power charging skip. Automatic water-measuring tank.*

Most important, you can be sure of full capacity—utmost reliability—and long service life—because this mixer is Koehring built, engineered and constructed to out work, out last anything in the light mixer field. Price? Not the lowest price

—no—but the most remarkable value of all light mixers—and still within the range of light mixer prices.

CAPACITIES

4 and 7 cu. ft. mixed concrete, steam or gasoline power. May be equipped with power charging skip or low charging platform with hopper, light duty hoist, automatic water measuring tank. Mixes mortar as well as concrete.

\$20,000,000 YEARLY ASKED FOR STATE ROAD WORK

A definite income of twenty million dollars a year is recommended in the fourth biennial report of the California highway commission, which has been filed with the governor. The report shows that on June 30, 1922, shortly after the new commission took over its duties, there was a balance available for new highway work of \$21,631,621. On June 30, 1924, all of this had been expended or obligated except \$6,035,316.

The principal policies of the present commission, which it says it believes is a reflection of the coordinated desires of the people, are as follows:

First—The completion of the main trunk line highways, including certain of the most important interstate connections.

Second—The maintenance in high class condition with annual revenues of the improvements already installed.

Third—The reconstruction as fast as available funds will permit on existing constructions dictated by the condition of pavement and the requirements of traffic.

Concerning convict labor it says: "We are as yet unable to show a saving over the cost of similar work done by contract," and it is urged that if more convicts are to be used "it should be by direct legislative appropriation to finance each camp for a two year period, or the highway funds used for the purpose should be relieved to the extent of the actual cost saved to the prison funds, to be placed to the credit of the camp commissary and guarding expense."

Volume of Construction Exceeds That of Last Year—Survey Shows

By A. W. Dickson, Exec. Secy. National Association of Building Trades Employers, Cleveland, Ohio

Judging from the figures showing the total amount of building contracted for in the leading cities of the country from January 1, 1924, to December 1, 1924, this year will far surpass the record of 1923 which of itself broke all previous records. Some authorities states that the increase this year may run as high as 12 per cent over the total value of 1923.

Of the five cities doing more than \$100,000,000 during this period New York heads the list with a total of \$776,261,745; this is an increase of nearly \$69,000,000 over last year. Chicago is second with a total of \$274,778,300; a decrease of about \$33,000,000 under last year. Detroit, which was in fourth place last year has jumped to third with a total of \$150,112,191; an increase of approximately \$31,000,000. Los Angeles, occupying third place last year is now fourth with a total of \$138,233,555; a decrease of about \$14,000,000. Philadelphia is in fifth place with a total of \$133,530,710; an increase of over \$15,000,000.

The combined increases of New York, Detroit and Philadelphia amount to \$115,000,000, while the combined decreases of Chicago and Los Angeles amount to \$74,000,000 leaving a net gain for the five cities of about \$41,000,000.

Of the fifteen other cities for which comparisons have been made, ten show gains, and five losses. The ten showing substantial gains are as follows: Cleveland, San Francisco, Baltimore, Milwaukee, Pittsburgh, Buffalo, Seattle, Dallas and New Orleans. The five cities in which the total value of permits issued under that of the corresponding period last year are St. Louis, Indianapolis, Minneapolis, Kansas City and Atlanta.

The total valuation for these twenty

cities amounts to \$1,972,266,932 as against \$1,902,978,823 for last year an increase of \$69,288,109.

Every indication points to 1925 as a year during which the high record of 1924 will be broken. In practically every large city of the country a number of major projects will be started early in the year and this in addition to an everincreasing demand for residential construction can only mean one thing—namely, that the construction industry is confronted with another busy year.

The labor situation is growing better all the time and there is not nearly the shortage that existed a short while ago. This is largely due to the fact that the apprenticeship training program put into operation soon after the close of the war is beginning to bear fruit.

Much has been said about the inefficiency of labor but contractors are beginning to report that this is rapidly becoming a thing of the past. One large general contracting firm in New York City that specializes in heavy concrete construction work states that their laborers are doing on an average of 30 per cent more work than in 1915 and 30 per cent more than in 1920.

Building costs are expected to remain about where they are. Costs today do not show much variation from last year. Material prices are fairly stable and have not shown much variation during the last few months. This is also true with regard to wage rates. The upward trend in rates was checked late in the summer and since that time have practically remained stationary. Whether or not there will be a tendency on the part of organized labor to make demands for higher rates next spring is problematical. Any such move will no doubt be strongly opposed by the employers.

SUIT FILED TO TEST VALIDITY OF EAST BAY WATER BONDS

A suit to establish the validity of the \$39,000,000 bond issue for the East Bay Municipal Utility district has been filed.

The suit was filed at the direction of the board of directors of the district by Attorney W. J. Locke and "all persons interested or likely to be interested" in the bond issue were made defendants. No specific defendant was named.

The bonds were authorized by the voters of the district at the election on November 4 for the purpose of constructing the Mokelumne river water project to bring mountain water to the consumers of the East Bay district.

The bonds have been approved by several bond experts, but the directors of the district announced their intention of having every step in the proceedings checked by law if possible in order to avoid trouble in the future.

The East Bay Municipal Utility District is the first water district of its kind to be organized in the state, and the directors and the courts have no precedents to guide them in the mat-

ter. It is because of this fact that the steps have been taken to bring the test suit in the superior court.

The suit was assigned to Judge J. G. Quinn for trial, but it is pointed out that Judge Quinn is disqualified to try the case because of his being a taxpayer in the district. Superior Judge J. J. Trabucco of Mariposa county, who has tried many cases in Oakland, will probably hear the case.

SEEK FUND TO COMPLETE CAPITOL EXTENSION BUILDINGS

A request for an appropriation of \$1,300,000 to complete the Capitol extension buildings in Sacramento will be made at the coming session of the Legislature. State Librarian Milton J. Ferguson, who is a member of the Capitol Buildings Commission, announces that this amount will be needed to finish the interior of the two buildings and furnish them. A total of \$1,100,000 has already been spent, inclusive of the cost of the site. If an additional legislative appropriation is secured the buildings will be ready for occupancy early in 1926.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Another triumph for overalls over white collars is reflected in the report that more than 1700 of the 2700 night students at Carnegie Institute of Technology this year are taking courses in the building and machinery trades. The growth in night student enrollment in these trade courses, which is this year about 100% over that of three years ago; gives further evidence, the report suggests, that young men are more and more appreciating the opportunities to win success by the "overall route" rather than through the "white collar" jobs.

Although a majority of the night students enrolled in the trade courses are regularly employed in trades directly or indirectly related to their night studies, attention is called to the fact that surprisingly large proportion of the students are filling "white collar" jobs in the day time. Many of these are working as draftsmen, tracers, clerks, or timekeepers and are taking trade courses, the report points out, either to shift later to work as tradesmen or to familiarize themselves with more skill in craftsmanship in order to progress faster up the ladder of industrial success.

Special significance is seen in the report that 844, or nearly half of the students taking courses in the College of Industries, are enrolled in courses connected with the building trades. This number is also nearly one-third of the total night enrollment for the whole institution.

In the building trade courses the largest group enrollment is reported for the Department of Electrical Equipment and Construction with an enrollment of 174 night students. Next in line is the Carpentry Shop with 121 night students, a registration that taxed facilities to the extent that further enrollments were stopped early in the term. The courses in Plumbing constitute the next highest enrollment in the building trades with 115 students.

Of the courses related to the machinery trades, the classes in the Department of Automobile Maintenance and Operation lead all other in enrollment totals with a registration of 187 night men. Mechanical Drawing has 140 enrolled. 64 are taking courses in Machine Shop Practice, and other of the shops specializing in machinery courses report large enrollments this year.

Sales of fabricated structural steel in November, 1924, approximated 221,000 tons, against 171,600 tons in October and 140,400 tons in November, 1923, according to Department of Commerce. Sales last month were the highest since March, 1923, when 239,200 tons were sold. November shipments were 166,400 tons, against 202,500 tons in October and 184,600 tons in November last year.

Paul Gober, a resident and general contractor in Alameda, for the past thirty years, died in that city Dec. 28. Gober was a native of Germany and 69 years of age.

Construction of a subway on Miner Ave., Stockton, beneath the crossings of the Southern Pacific and Western Pacific Railroads, has been ordered by the Railroad Commission upon application made by the city of Stockton several weeks ago. The expense of the subway, which will be between \$300,000 and \$400,000, will be borne by the city of Stockton, the Southern Pacific Railroad and the Western Pacific Railroad on a 50, 30 and 20 per cent basis distributed to those in the order named.

Metropolitan Guarantee Building-Loan Association of San Francisco, capitalized at \$100,000, has been incorporated. Directors are: H. M. Toy, W. E. Bouton, T. M. Gardiner, H. S. Thompson, B. W. Reed, J. H. Roberts, W. M. Willis, et al.

A. C. Rose, associate highway engineer of the United States bureau of public roads, has been transferred to Washington, D. C., where he has been assigned to duty in the editorial division of the bureau. Mr. Rose has been in the Portland, Ore., office since May, 1919. He will be succeeded by R. E. Merrick, associate highway engineer.

Stephen Child, San Francisco landscape architect, has been elected president of the Pacific Coast Chapter of the American Society of Landscape Architects. Mr. Child urged the chapter to support the movement now under way to secure a revised state zoning enabling act whereby a board of appeals would be provided. He also urges support for the regional planning movement in California, which is now well started in Los Angeles, where it is indorsed by the chapter. Similar indorsement was pledged to the newly begun regional planning efforts for San Francisco and the bay district.

Charging that defendants owe him \$3,150 for professional services rendered, Charles McKenzie, San Jose architect, filed suit for that amount against R. L. Wallace and L. W. Bush, Los Angeles contractors. McKenzie claims that the defendants became indebted to him for \$4,650, but paid him \$1,500 and still owe him \$3,150. Attorney Louis O'Neal represents the plaintiff.

The Western Safety Manufacturing Co., announces the removal of its warehouse and offices from 247 Minna street to 1264 Folsom street, San Francisco. The company manufactures "Westco" safety and knife switches, metal switch and cut out boxes and safety switch panels with cabinets.

The annual meeting of stock holders of the Basalt Rock Co., Inc., will be held in the Chamber of Commerce Bldg., Napa, on January 5, according to an announcement of H. Morris, secretary of the company.

Oakland building for the year 1924 will total approximately \$31,000,000. It is expected the December total will approximate \$3,150,000.

California Patents

(Special Correspondence)

The following information is compiled by Munn & Co., New York, patent and trade mark attorneys.

William Robertson, of Los Angeles. **CONCRETE BLOCK-MAKING MACHINE.** This relates to machines for making concrete blocks suitable for use in building, and the object is to provide a novel and efficient machine which may be operated either by hand or power, and by which, block-molds when filled can be quickly moved to pressing position. Mr. Robertson assigns one-third of his patent to Henry C. Shippee of Los Angeles, and one-third to Joseph H. Collins, of Silver Lake.

John A. Carr, of Los Angeles. **DETACHABLE VALVE STEM.** This invention has for its principal object the provision of simple and efficient means for detachably securing a valve stem to a base, whereby the stem will be rigidly held in place and will stand longitudinal pull away from the base, thus making it possible to use a valve stem or element made of one material, such as brass, and a base of another material, such as cast iron. Mr. Carr assigns his patent to Martin Iron Works.

Fenn H. Palmer, of Los Angeles. **ANTI-REVERSING PUMP HEAD.** This invention is applicable to the pump heads of various forms of pumps having revolving blades such as propeller pumps and centrifugal pumps. It is customary to run pumps of this character by electric motors and gas engines, and the power is applied to a pulley fixed to the propeller shaft of the pump.

Antone F. Triguero, of Orcutt. **SASH LOCK.** This provides a device which may be readily applied by anyone to the sashes of a window and which will serve to lock the sashes in such a manner as to prevent the lower sash being raised or the upper sash lowered by anyone, although one within the building may readily adjust the sashes.

Hachiro Ishimoto, of Marysville. **IRRIGATION DEVICE.** The object of this invention is to produce a device capable of being moved over the land for the purpose of scraping dirt into a mound as is employed in irrigation work. This device is simple in construction and cheap to manufacture.

Arthur Brunner, of San Francisco. **FUSE PLUG.** This invention provides a plug for electrical circuits such as interior house wiring, which is so constructed that when one fuse has been destroyed by an overload of current others are available without the necessity of substituting another plug.

George F. Voight, of Oakland. **FURRING NAIL.** This provides a furring element carried by a driven element, for securing and spacing the grille, a predetermined distance away from the surface of the wall to which the plastic material is to be applied.

Benjamin R. Dexter, of Oakland. **CABINET IRONING BOARD AND SEAT.** This provides a cabinet in which an ironing board and seat are positioned the back of the seat acting as the brace for the board.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

WOULD HAVE STANDARD SIZE FOR SAND LIME BRICKS

When the Sand Lime Brick Association holds its annual meeting in Torchton February 3 and 4, there will be placed before its members a proposal for the adoption of a standard size. This proposal, which will be offered by H. Ross Colwell of the Division of Simplified Practice is a result of a series of surveys conducted among the manufacturers of this commodity which disclosed that at present there are being manufactured sand lime bricks in five lengths, five thicknesses and four widths, or 100 possible combinations of size.

Some of the manufacturers and distributors, taking a leaf out of the book of the common brick manufacturers and concrete brick makers, asked the cooperation of the Division in securing the acceptance of a standard of dimensions which call for a length of 3 1/4 inches, a width of 3 1/4 and a thickness of 2 1/4 inches. This is virtually the same as the standard for common rough face and concrete brick, each of which formerly were made in many size variations.

It is pointed out by the manufacturers who sought the cooperation of the Division in placing this subject before the association that use of a standard set of dimensions would make it infinitely easier for architects, contractors and others, and that there would be important economies to the industry. This claim, it is declared, has been borne out by the experience of the makers of bricks of other materials.

PORTLAND BUILDERS TO OPEN TRADE SCHOOLS

Classes in bricklaying, carpentering, plastering, painting and sheet metal work are to be opened in Portland, Ore., in the near future, according to a plan being worked out by a special commission representing the Association of Building and Construction, in co-operation with the Portland school board. It is expected that a school building soon will be made available for holding the classes. According to the plan which is being developed, apprentices in the various trades will be given four hours' instruction each week at this school in addition to the practical work on actual jobs. The various contractors hiring apprentices are planning to co-operate by giving each an opportunity to attend the classes. Charles D. James is chairman of the special commission in charge of the plan. A. R. Nichols, state supervisor for industrial education, has been named co-ordinator and V. C. Stetson, secretary.

MASTER PLUMBERS NIGHT SCHOOL

Beginning on January 15th, a night school for members of the Master Plumbers' Association of Alameda County, will be held twice a week in their new home at 538 24th street, Oakland.

Business correspondence, commercial mathematics, bookkeeping and drafting will be the major subjects. Other courses will be added as the need for them grows. The school is open only to members of the association.

Alameda County Builders Make Merry at Annual Christmas Jinks

More than five hundred members of the building fraternity and their friends gathered in the quarters of the Alameda County Builders' Exchange in Oakland, last Monday evening, to celebrate the Fourth Annual Christmas Tree High Jinks and the election of twelve directors.

The festivities were opened with a brief talk by "Duke" Tilden, "California's Lumber King," and president of the exchange. President Tilden congratulated the members of the exchange for the unflinching co-operation shown during the past year. He pointed to the fact that construction in the East Bay Section is rapidly forging ahead. His announcement that building construction in Oakland for the year 1924 will total in excess of \$30,000,000 was greeted with cheers as was his statement that the exchange plans to move into its new quarters within the next few months.

W. E. Whalen, general contractor and past president of the exchange, gave a brief talk on the growth and development of the exchange and congratulated the officers and members for their spirit of co-operation which has been the prime factor in making the exchange a sound and permanent organization.

The report of E. W. Shaw, secretary of the exchange, was greeted with shouts of applause in-as-much as it showed the rapid growth of the organization and reviewed its accomplishments of the past year, closing with a summary of the healthy financial

condition of the exchange treasury.

Following this the election was held to name twelve directors to serve during the year 1925. Directors were elected in the following order: E. M. Tilden, representing lumber dealers; W. J. Digney, mantels and tile; Oswald G. Lawton, general contractors; Herbert Beckwith, brick contractors; George C. Jamieson, building materials; T. D. Sexton, plastering contractors; Carl T. Doell, plumbing contractors; Sam D. North, unaffiliated crafts; F. E. Nelson, cement contractors; G. Walter Spencer, electrical contractors; Jas. B. McKeon, roofing contractors; Joe Torgeon, painting contractors. Others whose names appeared on the ballot were: E. H. Nash, bonds and insurance; R. B. Bunker, brick manufacturers; Geo. J. White, glass and paint dealers; J. E. Ward, lathing contractors; George W. Kaiser, planing mill owners; G. K. Potter, plumbing supplies; E. N. Osborn, sheet metal contractors; A. E. Greenberg, structural steel.

Following the election of officers more than 200 gate prizes costing in excess of \$1,000 were distributed. The drawing of prizes was cause for considerable excitement, one winning a can of paint, another an order for a shave, haircut, shampoo and shine, while others proved lucky at the winning of more expensive prizes.

A high class entertainment was featured under the personal direction of T. D. Sexton, who acted as general manager of the jinks. During the entertainment program a light luncheon was served.

ENGINEER EXAMINATION

The United States Civil Service Commission announces an examination for the position of Junior Engineer will be held throughout the country on Jan. 21. The examination is to fill vacancies in various branches of the Government service, at an entrance salary of \$1860 a year. Advancement in pay may be made without change in assignment up to \$2400 a year.

Examination will be given in the following optional subjects: Bridge engineering, civil engineering, highway engineering, mechanical engineering, and structural engineering.

The duties of these positions are to perform such work as drawing up plans for minor projects, performing field work, making computations, preparing maps, compiling reports, handling technical correspondence, and other related work.

Competitors will be rated on general physics, pure mathematics, practical questions on the optional subject chosen and education, training, and experience.

Full information and application blanks may be obtained from the United States Civil Service Commission, Washington, D. C., or the secretary of the board of U. S. Civil service examiners at the post office or customhouse in any city.

STATE ARCHITECT'S OFFICE TO PREPARE PLANS FOR SCHOOLS

A bill providing for the Ohio State architect's office to prepare school house plans from which boards of education over the State may choose, thus saving architect's fees, will be introduced in the Ohio State Legislature in January by William R. Comings, of Elyria, State senator from the joint 27th-29th district.

"A county in the State has been paying an average of \$50,000 a year for architect's plans for several years," he declares. "Other counties possibly pay more. Many will do so as centralization of country schools spread over the State.

"Under present conditions school buildings are virtually standardized except as to front elevation appearance. The purchase of plans, if good, might still afford individual architects' initiative. The measure would save millions to the taxpayers. Some architects now are wholesaling their plans, but getting retail prices. Duplicating a set of plans is a trifling matter."

FEDERAL RESERVE REPORT

Business conditions in the Twelfth Federal Reserve District, issued under date of December 20, is, in part, reported as follows:

In November, 1924, there were five Sundays, five Saturdays and three holidays. The unusually small number of business days adds difficulty to statistical analysis of commerce and industry. Available data, however, indicate that improvement in business conditions, which has been in progress since mid-summer, continued during the month.

The improvement has recently been chiefly reflected in commodity markets, and prices with few exceptions have moved upward. The general price level, according to the United States Bureau of Labor's index number of wholesale prices, advanced from 151.9 in October to 152.7 in November (1913 prices=100), the latter figure being 5.2 per cent above the low point of last June and 0.4 per cent above the figure for November a year ago. Of particular importance in this district was the further rise in prices of general farm products, the largest part of the district's crops now having been sold on a steadily advancing market, at prices more nearly approximating the general level of all prices that has been the case during the past four years. The upward movement of prices during November was not confined to agricultural commodities and foods, however, non-agricultural commodities participating in the movement more generally than at any time since its beginning five months ago:

Productive activity was well maintained during November. Expansion in the demand for lumber at a time when weather conditions were forcing some curtailment of output has resulted in material increases in the volume of unfilled orders held by lumber mills. Activity in building construction declined by less than the usual seasonal amount from October to November, and the number and value of building permits taken out in anticipation of future construction work has been large. The values of building permits issued in Los Angeles and San Francisco were \$9,700,000 and \$6,300,000, respectively, in November, 1924, compared with \$13,500,000 and \$3,800,000 in November, 1923. If figures for Los Angeles be excluded, the value of permits issued in principal cities of the district was 11.7 per cent greater in November, 1924, than in November, 1923, although not all of the cities included reported increases. The volume of employment in principal industries of the district declined seasonally during November and continued less than one year ago when unemployment figures were unusually small.

LARGEST WOOD STAVE PIPE HAS DIAMETER OF 16 FEET

A contract for 1,300 ft. of what is claimed to be the largest wood stave pipe line ever built, 16 ft. in inside diameter, has just been awarded to the Continental Pipe Manufacturing Co., Seattle, Wash., by the California-Oregon Power Co., Medford, Ore. This pipe will form the connecting link between two rock tunnels near Thrall, Calif., and will be built of continuous creosoted fir staves serving as a power line under a 60-ft. head, carrying water from the Klamath River. The next largest pipe line, according to the manufacturer, is 14 ft. in diameter erected by the company nine years ago.

\$115,000,000 For Public Works in San Francisco Bay Section for 1925

Forecasting an era of unprecedented growth in the bay region, more than \$115,000,000 has been made available for municipal improvements by cities in the area, according to a survey announced by the Oakland Chamber of Commerce.

Heading the list with \$64,217,000, the East Bay cities are followed closely by San Francisco with \$45,689,000. All of this money has been appropriated and the construction guaranteed, says the announcement.

The largest item is for water development, the East Bay having passed a bond issue of \$39,000,000 and San Francisco a supplementary bond issue of \$16,000,000.

Schools are second with a total appropriation of \$25,000,000. Street improvements, sewer extensions and highway developments are listed as important factors in the development program.

Following is a list of the projects and total cost. The figures include work that will either be completed in the latter part of 1924, or begun during the year 1925:

Oakland and Estuary.....	\$64,217,000
Water supply.....	\$39,000,000
Schools.....	11,165,000
Estuary tube.....	4,500,000
Having program.....	4,355,000
Upper San Leandro water project.....	1,260,000
Sewer bonds.....	1,157,000
Highway construction.....	1,100,000
Hospitals & sanitariums.....	875,000
Harbor improvements.....	415,000
Park improvements.....	300,000
Street lights.....	150,000
San Francisco.....	45,689,000
Hetch Hetchy.....	\$10,000,000
Schools.....	12,000,000

NEW HIGHWAY POLICY

The California State Highway Commission, in its biennial report, suggests the adoption of a new policy which is calculated to give the public greater benefits from the highway system, especially that part of it in the more remote sections, where road construction has not progressed. The commission favors the maintenance of travelable state highway routes, whether or not construction has been commenced. This would make large sections, now practically isolated, easy of access and would assist in the development of districts now handicapped by lack of passable roads. Small counties find it too great a drain upon their resources to maintain these roadways. The intention is to eventually make them part of the state system, but when that can be carried out is problematical. If in the meantime the state can put these routes in reasonable condition they can be made to serve until such times as funds are available for their complete reconstruction.—S. F. Chronicle.

EXCAVATING PIPE TRENCH

A novel and interesting method of excavating a pipe trench in locations where the ground-water is near the surface was devised by the plant engineer of the Standard Steel Car Co., Hammond, Ind., where an extensive fire-protective system is being installed. The soil consists of sand with the ground water level 3 ft. below the surface. Excavation for the fire mains in the wet sandy soil by ordin-

ary methods would be expensive and troublesome, requiring braced sheeting and constant pumping. The method used was to drive down well-points about 6 ft. apart along one side of the trench and slightly below the bottom. Parallel to these was laid a 4-in. pipe-header to which the tops of the well-points were connected by short pieces of rubber hose. A 7-in. by 10-in. triplex pump, motor driven, takes suction from the 4-in. line and is able to keep 400 ft. of the trench entirely dry, enabling several gangs of men to work at a time without the use of sheeting or bracing.—Factory Mutual Record.

ENGINEER NAMED

W. A. Gleason, connected with the engineering department of the Port of Seattle for the past six years, has been appointed acting port engineer, and H. W. Davis, former assistant executive secretary and assistant to the chief engineer, was named assistant secretary and assistant port engineer, at a recent meeting of the Port of Seattle Commission. Mr. Gleason's appointment came as a result of the resignation of George F. Nicholson, chief engineer and executive secretary, who has accepted a position with the Los Angeles Harbor Board. In making public the appointments, the commission announced that the office of the chief engineer be abolished and that in its place, the port create the position of port engineer; also that the office of executive secretary be abolished, and name instead an assistant secretary.

Mr. Davies has been with the port since its inception, nearly twelve years ago.

Building News Section

PRATT'S CONCRETE MIX

*Champion
of Sand
Pratt*

WE ALL receive millions.

OF NECKTIES.

FOR XMAS.

SOME ARE pretty.

AND SOME harmonize only.

WITH A crazy quilt.

BUT WE have to wear them.

BECAUSE OUR wife.

OR OUR sweetheart.

OR A rich aunt or uncle.

GAVE THEM to us.

CLARENCE SAND Pratt, President.

OF THE Pratt Building Material Co.

OF SAN Francisco and Marysville.

ALSO OF Sacramento and Prattrock.

AS WELL as Pratteco (Monterey Co.).

IS ONE of the victims.

OF THIS Yuletide indoor sport.

AND WHILE Sandy.

(SOMETIMES CLARENCE).

LOVES ALL his relatives.

RICH OR poor.

SANDY RECEIVED some ties.

THAT WOULD look peculiar.

EVEN ON a person.

LIVING IN an insane asylum.

BUT SANDY, producer.

OF SAND, rock and gravel.

AT THE above cities.

HAS TO wear.

THESE PECULIAR ties.

AND SAY, "I thank you."

Friend husband made a remark about the necktie his wife gave him. This picture taken 30 days after Xmas shows him trying to explain how pretty the tie is—you know the rest.

LOS ANGELES, Cal.—H. A. Brown-ing Lbr. Co., 107 E Washington St., submitted low bid to supervisors at 18.25c ft. for 3000 untreated O. P. piles, 32 to 32 ft. in length; at ship's tackle L. A. harbor; begin promptly or in 30 days as desired; terms 30 days net. Other bids:
J. H. Baxter Co.—18.5c, net cash AST, L. A. harbor; deliv. 30 to 50 days.
Chas. R. McCormick Lbr. Co.—21.25c, AST, L. A. harbor; deliv. installments, final deliv. in 120 days; terms, 30 days net.

Building Brick is Used to Extent of Nine Billion Units

Imagine a substantial brick wall seventeen feet in height, starting at Bellingham, in the extreme northwest corner of the state of Washington, and running the entire length of the U. S. Canadian border, tracing the Atlantic seaboard, around Florida and the gulf, following the Mexican border, thence north along the Pacific to the point of starting.

The common brick production in the United States in 1924 will be sufficient to build such a wall 8 inches in thickness, of ideal construction, along the eleven thousand miles of the U. S. boundary, and seventeen feet in height. Such a wall would consume approximately nine billion brick. The enormous production is the result of co-operative promotion and development on the part of the leading brick manufacturers of the country since the inception of the Common Brick Manufacturers' association, only six years ago.

Depressed by war conditions, the common brick production of the country in 1918 was reduced to less than three billion units. With reports thus far received on common brick for the current year, it is apparent that the record mark of nine billion will be reached by Jan. 1. This does not include other types of brick, such as face brick, common brick and fire brick, but it is the report on common building brick alone.

Chicago remains the largest brick consuming center. By the end of the year the western metropolis will have consumed one and a quarter billion

of common brick. This material has been the popular medium of construction in every type of building from the loop scrapers to the modest cottage in the suburbs.

Greater New York is second in consumption of brick and will come close to the billion mark. Up to the present time New York has consumed six hundred eighty-five million brick from the Hudson river, sixty-three million from Connecticut, sixty million from New Jersey and Long Island plants, and about sixty million imported from Europe, making a total up to the present time of eight hundred sixty eight million. If the present building volume continues through the remaining weeks of the year, the total will not be far short of one billion.

Among the other large consuming centers are Philadelphia, Detroit, Los Angeles, Cleveland, St. Louis, Boston, and Denver. The record breaking total in consumption of brick, however, has been brought about by the marked increase in the use of the material for residential construction in the hundreds of smaller cities throughout the country.

Current reports from 111 manufacturers show increased activities in October over the preceding two months. The stocks of brick on hand have been increased as has the shipments of brick from the yards during the past thirty day period covered by this report. There is a reduction in orders on the books which is a seasonal condition.

CALIFORNIA'S BUILDING FEELING IS MORE THAN TALK

Plans for building and construction in California indicate that 1925 will be a busy year, in the opinion of David L. Hoggan, contractor of Portland, Ore., who recently returned to that city from a visit to California.

"There is a feeling of confidence among members of the building trades in southern California," Hoggan declared, "which points to increased prosperity and a return to normal building conditions. The feeling is more than talk. The preliminary work is being done, although the large volume of work will not be started until later in the season."

BET SUGAR PLANT PROPOSED

Negotiations are under way to establish a beet sugar plant in or near Woodland, Yolo County, according to reports from that section. The plant, according to reports, will cost in excess of \$500,000.

E. V. C.obby, 807 Sheldon Bldg., San Francisco, and R. C. Schuppert, 3757 Broadway, Oakland, have been granted certificate to practice architecture in the State of California.

HIGHWAY MARKER

In its Manual of Standard Signs and markers the Division of Highways of the state of Ohio describes a guard for placement over newly-painted traffic line strips. The paint band which usually is about 4 in. wide is spanned by a 2x6x10-in block with feet 1x2x6-in on either end to raise it from the pavement surface sufficiently so that no part of it touches the newly-applied paint. In the center of the block is placed a 2-ft. rod to which is attached a red flag. These blocks are usually placed about 30 ft. apart so that traffic is kept away from the newly-painted strip.

Disraeli said: "Confidence is a plant of slow growth." The confidence which architects, contractors, and owners everywhere have in Quandt-quality painting and decorating service has been established through the strictest adherence to the highest standards during the past 40 years. Whether the job be large or small, our paramount interest is to achieve the best result and give full value for every dollar expended. Quandt-quality service is a dependable service and will fulfill all your requirements.

DROP IN CEMENT SHIPMENTS

Portland cement shipments declined in November to 10,289,000 barrels from 17,081,000 in October, the record month. Although the smallest since last March, the decrease is seasonal and the total was slightly higher than in November last year, when shipments amounted to 10,251,000 barrels, the Geological Survey reported recently.

Production also diminished, but not to the same extent, as mills are busy replenishing stocks. The November output totaled 13,141,000 barrels, as compared with 14,820,000 in October, and stocks had increased at the end of the month to 8,927,000 barrels from 6,073,000 on October 31.

WHITCO CASEMENT HARDWARE

Makes the Sash Self-adjusting.
No Hinges or Adjusters Are Required.

It is Non-rattling.

All Hardware Is Entirely Concealed.

NOTICE TO BIDDERS

(City of Hanford—Chairs)

NOTICE IS HEREBY GIVEN that pursuant to motion duly made, passed and adopted by the Board of Trustees of the City of Hanford, County of Kings, State of California, on Monday, December 22, 1924, said Board of Trustees will receive sealed proposals or bids for the furnishing and installing of the following items:

Five Hundred (500), more or less, Opera Chairs, with veneer back, roll veneer seat complete with hat rack wires, delivered and installed on floor in the balcony of the Hanford Municipal Auditorium on or before March 15, 1925; also

One Thousand (1000), more or less, Portable Slat Chairs in sections of one, two, three or four, delivered on the main floor of the Hanford Municipal Auditorium in the City of Hanford, County of Kings, State of California, on or before March 15, 1925.

Samples of chairs are to be submitted for inspection by the Board of Trustees of said City.

All bids are to be filed with the undersigned City Clerk of the City of Hanford on or before 8 o'clock P. M. on Monday, January 5, 1925, at which time said bids will be opened.

Further information can be procured from the undersigned City Clerk.

All bids are to be accompanied by certified check for five (5) per cent of the amount of the bid, which check shall be forfeited to the City of Hanford in case of refusal of bidder to enter into contract with said City within ten days after award is made to said bidder.

The Board of Trustees hereby expressly reserve the right to reject any and all bids.

All bids must be sealed and addressed to D. C. Williams, City Clerk of the City of Hanford, California.

Dated this 23rd day of December, 1924.

(SEAL) D. C. WILLIAMS,
City Clerk of the City of Hanford.

NOTICE TO CONTRACTORS

(Mechanical Equipment for Hospital)

SEALED BIDS will be received by Geo. E. McDougall, State Architect, Chief, Division of Agriculture, Forum Building, up to 2 o'clock P. M., Tuesday, January 27, 1925, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor required for the Mechanical Equipment for Cottages 1 and 2 for Inmates, Pacific Colony, near Pomona, Los Angeles County, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

"Mechanical Equipment" includes plumbing, heating and electric work for buildings but does not include service connections. Bids must be submitted on forms prepared and furnished by said Division of Architecture.

Cash, a bidder's bond, made payable to the State of California, or a certified check made payable to the "State Engineer," Department of Public Works, in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of Twenty-five (\$25.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of plans and specifications to the said Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works reserves

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate, 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

the right to reject any or all bids and waive any informality in any bid received.

All bids must be addressed to Geo. E. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked in the envelope: "Proposal for Mechanical Equipment, Pacific Colony."

NOTICE TO CONTRACTORS

(Promenade—Park Commissioners)

SEALED PROPOSALS will be received at the office of the Park Commissioners, Park Lodge, Golden Gate Park, San Francisco, California, not later than twelve o'clock noon, Thursday, January 8, 1925.

For the General Construction of Promenade around the Swimming Pool at the Herbert Fleishacker Playfield, Great Highway and Sloat Boulevard. Said work must be done in accordance with the specifications on file in the office of Assistant Superintendent of Parks and Squares, Earl Clements, at the Bath House, Great Highway and Sloat Boulevard, and must be commenced within five (5) days and completed within sixty (60) calendar days after the date the contract is to be made and entered into therefor.

The amount of bond for faithful performance of contract will be not less than twenty (20%) per cent of the aggregate of the proposal. All proposals offered must be accompanied by a check certified by a responsible bank payable to the Order of the Board of Park Commissioners, for an amount not less than ten (10%) per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of Assistant Superintendent of Parks and Squares, Earl Clements, at the Bath House at the Herbert Fleishacker Playfield, Great Highway and Sloat Boulevard, and all proposals must be made upon such forms, in sealed envelopes marked Bids for Promenade Around Swimming Pool.

The Board of Park Commissioners reserves the right to reject any or all bids.

By order of the Board of Park Commissioners.

B. P. LAMB, Secretary.

NOTICE TO BIDDERS

(Canal Excavation, Etc.—Merced Irrigation District)

Notice is hereby given that sealed proposals for the work and material necessary for the construction of certain canals hereinafter described will be received by the Board of Directors of Merced Irrigation District, in the Garcroft Building in the City of Merced, State of California, at any time up to 10 o'clock A. M., of Wednesday, January 14, 1925, at which time and place all bids so received will be opened in public by said Board. Thereafter, said Board will let said work, either in sections, or as a whole, to the lowest responsible bidder or bidders, but said Board reserves the right to reject any or all bids and readvertise for proposals or proceed to construct the work under their own superintendence.

The work and material for which proposals are hereby invited is divided into eight schedules as follows:

SCHEDULE NO. 1—About 110,000 cubic yards of grading and excavation.
 SCHEDULE NO. 2—About 27,000 cubic yards grading and excavation.
 SCHEDULE NO. 3—About 40,000 cubic yards grading and excavation.
 SCHEDULE NO. 4—About 35,000 cubic yards grading and excavation.
 SCHEDULE NO. 5—About 38,000 cubic yards grading and excavation.
 SCHEDULE NO. 6—About 2000 cubic yards grading and 13,000 sq. ft. concrete lining.
 SCHEDULE NO. 7—Furnishing and laying about 2000 ft. 30-in. concrete pipe.
 SCHEDULE NO. 8—Furnishing 120 M. bd. ft. O. P. lumber and 140 M. bd. ft. W. lumber.

Work is more particularly described in the specifications and plans therefor, which may be seen at the office of the Merced Irrigation District. Copies of the specifications and plans may be obtained at said office upon the deposit of Five Dollars for each copy, the deposit to be refunded upon the return of the specifications and plans in good condition not later than the date of receiving bids.

Any bidder may submit a proposal for doing the work in any or all of the schedules. A bidder to whom a contract for Schedules 1 to 7 may be awarded must furnish bonds as provided by law, to-wit: A bond in the sum of at least one-half cent of the contract price to secure the payment of the claims of materialmen, mechanics and laborers, and a bond in the sum of at least one-fourth of the contract price conditioned upon the faithful performance of the contract. The successful bidder for Schedule No. 8 must provide a bond in the sum of at least one-fourth of the contract price conditioned for the faithful performance of the contract.

Each bid must be accompanied with cash, or a certified or cashier's check payable to Merced Irrigation District, for an amount equal to at least 5 per cent of the amount of the bid as a guaranty that, if the bid is accepted, the bidder will, within five days after its acceptance, enter into a contract with the district in the form attached to said specifications and furnish the bonds aforesaid.

Bids must be on the proposal forms attached to the specifications, and must be in sealed envelopes addressed to the Board of Directors of the Merced Irrigation District, and marked to indicate that each is a proposal for the doing of said work.

Dated at Merced, California, December 23, 1924.

By order of said Board of Directors.
 H. P. SARGENT,
 Secretary of Board of Directors
 of Merced Irrigation District.

NOTICE TO CONTRACTORS

(Main Lateral System—Banta-Carbona Irrigation District)

Sealed proposals addressed to the Board of Directors of the Banta-Carbona Irrigation District, Box "Z," Tracy, California, and endorsed "Proposal for Excavation," Contract No. 8, will be received by said Board at its office, at Carbondale, near the Western Pacific Station, and about three (3) miles South from Tracy, until 8 o'clock P. M. of the 21st day of January, 1925, and at that time and place, will be publicly opened and read.

All proposals must be made on blank forms to be obtained from the Secretary of the Board of Directors, W. Schlossman, Box "Z," Tracy, from the Chief Engineer, W. D. Harrington, Box 621, Tracy, California. Must give the prices proposed, both in writing and in figures, and must be signed by the bidder with his address.

Each bid is to be presented under sealed cover and shall be accompanied by cash or certified check made payable to the President of the Board of Directors of the Banta-Carbona Irrigation District, Henry T. Ohm, for the amount of Two Thousand (\$2,000) Dollars, and no bid shall be considered unless such cash or certified check is enclosed therewith, and, also no bid will be considered unless in

conformity with the specifications. Should the successful bidder to whom the contract is awarded, fail to execute the same, said cash or check shall be forfeited to and become the property of the district, all other cash and checks will be returned to the unsuccessful bidders, who submitted the same.

A common-law bond will be required for the faithful performance of the contract, in a sum not less than fifty per cent (50%) of the estimated amount of the contract, and a further bond in the sum of fifty per cent (50%) of the estimated amount of the contract must be furnished with acceptable sureties, to secure payment of laborers and materialmen.

The Contractor to whom the contract may be awarded, will be required to appear at the office of the district, with sureties, to be him (10) days (not including Sundays), from the date of the notification of such award and the preparation and readiness for signature of the contract, and in case of failure or neglect so to do, he will be considered as having abandoned it, and said forfeit of cash or certified check will operate.

All bids are to be compared on the basis of the Engineer's estimate of the quantities of work to be done as follows:

ITEM NO. 1, 260,000 cubic yards earth excavation.

ITEM NO. 2, Installing Eight (8) Drainage Culverts (Pipe furnished by the district) Complete.

ITEM NO. 3, Extra work, cost plus 10% per cent.

The foregoing quantities are approximate only, being given as a basis for the comparison of bids and the Board of Directors of the Banta-Carbona Irrigation District, does not expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of work, as may be deemed necessary or expedient by the said Board of Directors.

The work to be done in accordance with the plans and specifications, which may be seen at the office of the Secretary, at Carbondale, or at the office of W. D. Harrington, Chief Engineer, Tracy, California, where copies may be purchased for the sum of \$5.00.

The right is reserved to accept the proposal of the lowest responsible bidder or to reject any or all bids.

By order of the Board of Directors of the Banta-Carbona Irrigation District, made this 23rd day of December, 1924.

W. M. SCHLOSSMAN,
 Secretary of the Board of Directors
 of the Banta-Carbona Irrigation
 District.

CRITTENDEN & HENCH,
 Attorneys for Banta-Carbona Irrigation
 District.

NOTICE TO CONTRACTORS

(Grammar School—San Rafael)

Bids shall be entered in accordance with plans and specifications on file with the Secretary of the Board and in the offices of the Architect B. S. Hayne, 2401 Jackson St., San Francisco, Cal.

All bids shall be entered on or before 8 P. M., January 22, 1925, and accompanied by a certified check payable to the Board of Education, San Rafael School District, for the amount of one-half (50%) per cent of the amount of the bid.

A deposit of Twenty Dollars will be required on each set of plans and specifications.

Dated, December 23, 1924.
 OLIVER R. HARTZELL,
 Secretary Board of Education, San
 Rafael School District.

NOTICE TO CONTRACTORS

(Eureka High School, Eureka, Cal.)

Office of the Secretary of the Board of Education, Eureka High School District, of Eureka, California.

Notice is hereby given that the Board of Education of the Eureka High School District of Humboldt County, hereby seal and sealed proposals to be delivered to the Secretary of said Board, Eureka, California, until Tuesday, the 3rd day of February, 1925, at 8 o'clock P. M., at which time said bids will be opened, for the construction and completion of the Eureka High School to the Eureka High School District, located on property described as "Property bounded on the west by J Street, and on the South by 1st North Street, and on the East by J Street, and on the South by 1st North Street, in the City of Eureka, County of Humboldt, State of California."

These bids shall be prepared in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, and in the office of the Architect John S. Donovan, 1916 Broadway, Oakland, California.

On a deposit of Thirty Dollars (\$30.00) complete sets of plans and specifications may be had by any bidder on application to the Architect or to the undersigned Secretary of the Board of Education, City Hall, Eureka, California, and in each case shall be returned on or before bids are received or forfeited within five days thereafter. If the plans and specifications are not returned within said time, or if mutilated the said deposit shall be retained as agreed liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Architect and signed by the bidder and accompanied by a certified check certified by some responsible bank or banker and made payable to the Eureka High School District of the City of Eureka, Humboldt County, California, to be retained by said School District as agreed and liquidated damages for the failure of the bidder to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract and to be forfeited by law. The amount of said check shall not exceed Five Thousand (\$5,000) Dollars but for all bids of less than Fifty Thousand Dollars (\$50,000) said check shall be at least for 10% (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Architect.

Bids will be opened by the Board of said District on Tuesday the 3rd day of February, 1925, at 8 o'clock P. M. in the office of the Board in said City of Eureka.

The Board reserves the right to reject any and all bids.

GEO. B. ALBEE,
 Secretary of the Board of Education.

NOTICE TO BIDDERS

How about bids wanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it?
If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns
of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3340

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to

KOEHRING

DANDIE Light Mixer

Dandie with steel disc wheels and solid rubber tires; power charging skip, water tank and gasoline engine.

Dandie with steel trucks; power charging skip, water tank and gasoline engine.

EQUIP it to your special needs. Rubber tires to save the time waste of between-job hauls, and to expand your working territory. *Light duty hoist. Low charging platform or power charging skip. Automatic water-measuring tank.*

Most important, you can be sure of full capacity—utmost reliability—and long service life—because this mixer is Koehring built, engineered and constructed to out work, out last anything in the light mixer field. Price? Not the lowest price

—no—but the most remarkable value of all light mixers—and still within the range of light mixer prices.

CAPACITIES

4 and 7 cu. ft. mixed concrete, steam or gasoline power. May be equipped with power charging skip or low charging platform with hopper, light duty hoist, automatic water measuring tank. Mixes mortar as well as concrete.

\$33,721,000 TO FINANCE P. G. & E.
IMPROVEMENTS

A construction program calling for the expenditure of \$33,721,000, to accommodate the needs of the growing cities and towns of northern California is announced by the Pacific Gas & Electric Co. Of this amount \$17,821,000 will be spent in 1925.

Adding 1,000,000 Kilowatt hours of electrical energy daily to the company's output, Pit No. 3 Plant on the Pit river in Shasta county, will be in operation by July. Pit No. 4 Plant, to have 125,000 horsepower power house, a four-mile tunnel, a huge diversion dam, three penstock lines, and to cost \$2,500,000, will also be in construction at the same time.

Spending \$905,000 for a new substation in the Shasta Division at Cottonwood, the company plans to bring additional power from the California-Oregon Company. Sub-stations at Red Bluff, Roseville and Livermore will be reconstructed. The largest condenser ever constructed in California will be installed in the Sacramento district.

One million and a half dollars will be spent on new stations in the east bay district alone. San Francisco additions to the Martin Sub-station will cost \$660,000 and new feeder lines will cost \$236,000.

The program for expenditure will be followed in an effort to meet the demands of the ever growing districts of northern California. The company estimates it will have to supply to 35,000 new electricity customers, and 25,000 new gas customers.

The gas department plans to generate 20,000,000 cubic feet daily with new generating equipment, and to lay 600 miles of pipes. And initial outlay of \$5,500,000 will be made.

1924 S. F. Building Totals \$57,852,973

San Francisco in 1924 closed its highest building year with a total of 10,272 building permits granted for improvements involving an expenditure of \$57,852,973.

During the year 1907, when the reconstruction of San Francisco following the earthquake and fire, was fully under way, Louis Bailey, acting chief inspector of the Department of Public Works, reports 6,437 permits were granted for improvements aggregating an expenditure of \$56,578,844.

Operations for the month of December, 1924, totaled \$5,519,031. During that period 763 building permits were granted. In November, 1924, 707 permits were granted the valuation totaling \$6,358,729 and in December, 1923, 746 permits for work costing \$4,952,441.

Following is a segregated list of the December, 1924, operations as compiled by Acting Chief Inspector Bailey:

Class	No. of Permits	Est. Cost
A	3	\$ 354,000
B	4	945,000
C	23	628,000
Frames	367	1,950,172
Alterations	363	359,280
Public Bldgs.	1	370,629
Harbor Bldgs.	2	902,950
Total	763	\$5,519,031

RECLAMATION BOARD APPOINTS FLOOD CONTROL COMMITTEE

The personnel of the executive committee to arrange a revision of the flood-control project of the Sacramento River has been named by A. T. Spencer, president of the California State Reclamation Board, and as decided at the public flood control meeting held at Sacramento, November 15 last, will consist of 20 members who will serve without remuneration and collaborate with the officers of the Reclamation Board.

"The importance of the work to be accomplished by this committee cannot be too strongly stressed," says President Spencer, "for it includes the perfection and operation of a plan whereby the property holders will be ultimately relieved of all but a fair proportion of the assessments now charged against property in the reclamation districts."

The personnel of the committee is: C. R. Boyd, Yuba City; George E. Springer, San Francisco; E. L. Shelley, Ryde; A. C. Harvie, Rio Vista; James Boyd, Willows; C. J. Wescott, Stockton; Peter Huth, Sacramento; J. F. Elliott, Courtland; Carson C. Cook, Stockton; Dr. E. L. Dow, San Francisco; W. F. Dwyer, Sacramento; George E. Robbins, San Francisco; Jesse Poundstone, Grimes; Fred W. Kiesel, Sacramento; I. H. Sanborn, San Francisco; James D. Phelan, San Francisco; Capt. A. E. Anderson, San Francisco; Dan Hadsell, San Francisco; W. E. M. Beardslee, Sacramento and the manager of the Parrot Grant at Dunham.

According to President Spencer the first meeting of the committee will be called at an early date in this month.

The following is a summary of the total number of building permits issued each year and the estimated cost of the improvements undertaken thereunder (the year 1906 covers that period from May 19 to December 31):

Year	No. of Permits	Est. Cost
1906.....	5686	\$34,947,386
1907.....	6437	56,578,844
1908.....	6729	31,668,241
1909.....	5773	26,184,068
1910.....	5690	20,508,556
1911.....	6079	20,915,474
1912.....	6313	23,338,563
1913.....	3156	21,037,264
1914.....	5907	28,177,563

1919.....	5363	15,163,242
1920.....	5626	26,729,992
1921.....	6313	22,244,672
1922.....	8078	45,327,206
1923.....	9556	46,676,079
1924.....	10,272	57,852,973

STEAM CURING PROTECTS CONCRETE TILE, STUDY SHOWS

Reviewing experimental studies of the U. S. Department of Agriculture on the effect of alkali on concrete tile, Thomas H. MacDonald, chief of the bureau of public roads, in his annual report to congress, says, "tests have been begun on cylinders cured in a steam chamber, in water vapor at or near a temperature of 212° F. The tests so far, including year-old specimens of 6 series, indicate that this method of curing greatly increases the resistance to attack. Only the slightest signs of deterioration have been evident in specimens stored in the alkali solution for 90 weeks. Long-time tests will be needed to determine the actual value of this steam curing, which is very different from the ordinary steam curing in commercial tile plants, where a temperature of more than 100° F. in the curing rooms is not often obtained.

THOMAS RYAN, OAKLAND BUILDING INSPECTOR, RESIGNS

Thomas Ryan, for many years building inspector for the city of Oakland, has resigned on account of illness and returned to his civil service rating as a deputy building inspector. He is now absent on sick leave.

Arthur S. Holmes, general contractor in Oakland for more than a dozen years, has been appointed to fill the vacancy by Commissioner Frank Colbourn.

Holmes has the backing of the General Contractors' Association. He has been in business for twenty-six years in Oakland, and a contractor nearly half that time.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Los Angeles' building total for 1924 slipped over the \$150,000,000 mark. Official figures for the year compiled by the city building department show a total of 51,134 permits issued with an estimated valuation of \$150,247,621. While this total is fifty millions less than that for 1923 it is nearly seventy millions more than for 1922 and is quite satisfactory. For December, 1924, the number of permits issued was 3486 with an estimated valuation of \$11,923,361, as compared with 4721 permits with an estimated valuation of \$20,758,194 for December last year, and 3648 permits with an estimated valuation of \$9,754,196 for November, 1924.

It was announced at the annual meeting of the Citizens Committee to Enforce The Landis Award in Chicago that the work of the Committee will continue not only through 1925 but indefinitely. High spots in the annual report are as follows: The Committee has carried free of charge nearly \$500,000,000 worth of insurance. It has placed in employment over 72,000 men. It has registered in its vocational department 877 boys, graduating 550, of whom 305 are actually employed in the trades today. Over 5000 journeymen have attended free evening classes.

A petition to re-open the case involving the New Jersey Painting Company and Local Union No. 26 of Newark has been refused by the Court of Errors and Appeals. It will be recalled that the painting company refused to pay the New York scale on a New Jersey job and the union called a strike to enforce its demands. The contractor secured an injunction restraining the union from continuing its strike.

The joint national drive of the Mason Contractors Association of the United States and Canada and the Bricklayers, Masons and Plasterers' International Union for more apprentices in the bricklaying trade is producing excellent results according to R. M. Gillespie of St. Louis, president of the contractors' association. The total number of registered apprentices on January 1, 1923, was 5409 and on November 1, 1924, was 11,524.

It is reported the Athletic Control Board of the Stanford University at Palo Alto plans to enlarge the seating capacity of the Stanford Stadium from 62,000 to 90,000. J. Pearce Mitchell, a member of the board, admits that preliminary plans for the enlargement have been prepared by Shirley Baker, Stanford '95 stadium engineer, but these have not been submitted to the board.

Bills for the survey and the construction of diverting dams to control the immense volume of volcanic ash which swept down from Mount Shasta into Mud Creek and eventually into Sacramento River and San Francisco Bay have been introduced in the Senate by Senator Shortridge and in the House by Representative Raker.

Palo Alto plans to expend \$375,000 in construction during 1925. Street paving, electroliners and storm sewers in the business section are planned. The paving program will cost approximately \$217,000.

A. J. Pometta of the Martinez-Benicia Ferry Company at Benicia is experimenting with locust piling to counteract the teredo, which has been causing an immense amount of damage to the wharves and piling in San Francisco Bay. The Martinez-Benicia Ferry Company has piling which has been in a little over a year which the marine worm has destroyed. Heretofore the most effective methods to stop them was either to creosote the piling or encase it in concrete. The locust piling experiment is being watched with interest by those who have piling that is susceptible to the ravages of the teredo.

Eight regional Forest Experiment Stations and the Forest Products Laboratory are now in operation, according to the annual report made by the Chief of the Forest Service to the Secretary of Agriculture. In addition, a new Forest Experiment Station is being established in the Pacific Northwest. A station for California is urged by Chief Forester Greeley in his report. The eight Experiment Stations now in operation are located at New Orleans, La., Missoula, Mont., Asheville, N. C., Amherst, Mass., St. Paul, Minn., Portland, Ore., Flagstaff, Ariz., Colorado Springs, Colo.

Work on the building of sewers in Oakland, made possible through the authorization by the voters of the \$1,600,000 bond issue last November will be started in all sections of the city practically at the same time, according to Wm. J. Baeus, commissioner of streets. The departure from the usual procedure of spending the bond money in installments is made because of the acute situation existing in many parts of the city now caused by the inadequacy of the present system.

A measure calling for \$2,500,000 to provide a building to house state offices in Los Angeles will be introduced into the Senate by Senator Chas. H. Lewis of Los Angeles. Lewis says the measure is to provide office space to eliminate the necessity of paying rent for state offices. The city of Los Angeles will furnish a site for the structure if the bill passes the legislature.

By a vote of 15 to 1 the Building Trades' Council of Newark, N. J., demanded strict adherence to the decisions of the National Board of Jurisdictional Awards, the carpenters registering the negative vote. It is understood that any organization hereafter refusing to abide by the decision of the Board will be expelled from membership in the Council.

Delegates of the second district of the American Association of Engineers, meeting in semi-annual session at Los Angeles, endorsed the movement to have one of their profession appointed to the State Railroad Commission. Steps were also taken to introduce before the next legislature a bill providing for the registration of California engineers.

Oakland established a record building year in 1924 with a total of \$31,223,435 of which \$29,831,036 is represented in new construction. The December total was \$3,227,541.

Harlan B. Miller has been appointed bridge engineer of the California State Highway Commission by R. M. Morton, state highway engineer. The new head of the bridge department succeeds H. E. Warrington, who resigned early in the year. Mr. Miller has been engaged in engineering work for nineteen years. He was formerly connected with the bridge department of the New York Central railroad and held a similar position with the state of New York. Mr. Miller assumed the position of acting bridge engineer of the California State Highway Commission a year ago, at the time all bridge work was transferred from the division to headquarters and placed under a centralized department. The department has been considerably enlarged under his direction. Mr. Miller is a graduate of the Case School of Applied Science in Cleveland, Ohio, where he was elected a member of the Sigma Xi, the scientific honor society. He has been with the California Highway Commission for five years.

Willis Polk & Co., architects, announce removal of their offices from the Hobart Bldg. to 277 Pine street, San Francisco, Suite 412. The business will be continued under the firm name of Willis Polk & Company, by a partnership formed between James Mitchell and Austin Moore. Mrs. Willis Polk will have a life interest in the profits of the firm. Mr. Mitchell, who was long associated with the late Mr. Willis Polk, will be in charge of design and construction, while Mrs. Polk's son, Austin Moore, will be business manager.

Suit to collect \$886.33 has been filed at Oroville against J. S. Greaves, construction engineer, and the Thermo-lite and Table Mountain Irrigation District (Butte County) by the Thompson-Diggs Company of Sacramento. The Sacramento firm assert they furnished construction material amounting to over \$800 to Greaves for building work in the irrigation district named in the suit, which has never been paid.

Bids to construct Section One of the Arroyo de la Sacatella storm drain system, covering an area of approximately sixteen square miles, will be considered by the Los Angeles Board of Public Works on February 2. The completed project will cost between \$2,500,000 and \$4,000,000.

Archibald Kerr, former San Francisco contractor, and more recently of Chico, died in Artesia, Butte County, Dec. 28.

Governor Pierce of Oregon has called a conference of the state executives of California, Oregon and Washington to be held in Portland, January 16 and 17 for the development of ports of the Pacific Coast for the handling of timber resources of districts contiguous to water transportation.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

SACRAMENTO MATERIAL DEALERS TO ORGANIZE

Seven representative Sacramento building material men on Dec. 20 conferred with directors of the Stockton Material Dealers Credit Association for the purpose of gaining information relative to the operation and functions of the organization. The Sacramento men contemplate organizing a similar association in Sacramento, having learned the need of rating contractors and other large purchasers of building material, according to the credit they are entitled to.

Sacramento men at the meeting were A. E. Pope of the People's bank; D. G. Nunneley, manager of the Sacramento building material exhibit; W. W. Mott, secretary of the Master Plumbers' association; W. E. Bristol, president of the Carly & Bristol Finance Company; L. H. Chapman, manager of the Sacramento Lumber Company; H. Dixon of the Dixon Plumbing & Heating Company, and Allyn L. Burr, manager of the Allyn Burr Company.

Stockton business men present were Ralph Wilcox, president of the Yolland Ice & Fuel Company; W. H. Falconbury, president of the Falconbury Lumber Company; O. H. Chain, president of the Builders' Exchange; O. H. Miller of Miller-Hays Plumbing Company; Fred Wurster, secretary of the Security Building & Loan Association; Frank Fisher, of Fisher Brothers' Planing Mill; Harvey K. Tackabury, manager of the Allyn Burr Company in Stockton; Francis Viebrook, secretary of Austin Brothers; Charles G. Bird, manager of the Stockton Lumber Company; Robert Inglis, manager of the San Joaquin Lumber Company; Carlton C. Case, of Case & Forslund, lawyers, and Karl A. Perkins, secretary-manager of the Stockton Builders' exchange.

EFFICIENCY OF LABOR

Is labor becoming more or less efficient? This is a question that has been uppermost in the minds of most contractors during recent years. Immediately following the war, labor reached a low point of efficiency due largely to the fact that countless thousands of poorly trained mechanics had gained access to the trades during the stress of war-time construction. Many contractors are now beginning to report that there is a decided tendency on the part of most mechanics toward increased efficiency. One of these is the Turner Construction Company. This concern specializes in heavy concrete construction work and has kept an accurate record of the unit output of labor. It has a record of comparable work on which it has established an index of labor output. Calling the unit output of the years 1915-1916 as 100, the index for the succeeding years are as follows: 1920, index 90; 1923, index 112; 1924, index 120. The figures have been further subdivided by trades for 1924 as follows: labor stripping and handling forms, 166; labor concreting 131; labor placing reinforcement, 118; carpenter work on forms, 103; carpenters and laborers making forms, 98; labor receiving and distributing reinforcing reinforcement, 90 and cement masons 83.

EMPLOYERS CONDEMN FIVE-DAY WORKING WEEK

The Executive Committee of the National Association of Building Trades employers, meeting in the Hotel Winthrop, Cleveland, Dec. 19, adopted a resolution condemning the five-day working week. The resolution follows:

"WHEREAS: The Executive Committee of the National Association of Building Trades Employers in executive session in the City of Cleveland this 19th day of December, 1924, deplores the unjustifiable and uneconomic demands of certain labor organizations in the building trades to shorten the number of working days to 5 days per week, thereby further curtailing by almost 19% the already great shortage of mechanics in the building industry, and the efforts on the part of organized labor to increase wages over the altogether too high wage scale in force throughout the United States today;

"THEY DO HEREBY IT RESOLVED that the interests of the Public and the Construction Industry demand that these efforts be resisted to the utmost."

SACRAMENTO BUILDING TRADES VIA UNION TAX SUIT

The Sacramento Building Trades Council won an important victory when the third district court of appeal handed down a decision reversing the judgment of the superior court of Sacramento County, whereby an injunction was granted some time ago restraining and enjoining the council from collecting a per capita tax of \$1.50 from members of local union No. 162 of the sheet metal workers.

The issues of the controversy date back about two years and involve dual unions representing the sheet metal workers of Sacramento.

The effect of the injunction, which became a live issue before the Building Trades Department of the American Federation of Labor, also was to restrain members of the Building Trades Council from threatening or calling out members of other crafts engaged in the building industry in Sacramento in either shops or buildings in which members of Sacramento Union No. 162 were employed.

ANALYSIS OF BRICKLAYING TRADE NOW AVAILABLE

A complete analysis of the bricklaying trade has been made by the Federal Board of Vocational Education and is now available for distribution. The book contains a vast amount of valuable information relative to the trade and the best methods of setting up the proper kind of an apprenticeship training program. It is divided into four sections and contains an appendix showing the forms used in a number of cities where considerable progress has been made in the training of apprentices. The sections deal with the following subjects: First, organization and plans for apprentice training; Second, classified analysis of the bricklaying trade; Third, courses of instruction and training; Fourth, suggestions to the instructors. Copies of this publication may be procured from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 20 cents per copy.

CLOSE SUCCESSFUL YEAR

The Plasterers' Association of Seattle, Wash., reports closing the most successful year in its history with the advent of 1925. The association has been organized 15 years and it has been the aim of its officials during that time to strive to make an art of what had too often been considered as but a trade. An effort has also been made to curb the irresponsible plastering contractor who, association officials contend, is the worst evil the responsible plasterer has to contend with.

At present there are 20 members of the association who do about 85 per cent of Seattle's plastering.

E. C. McDougal is president of the association, C. W. Blake vice-president, W. A. Allyn, treasurer and S. S. Wilson, executive secretary. Secretary Wilson predicts an exceptionally active year for the association's members during 1925.

CLAY PRODUCTS INSTITUTE IS ORGANIZED IN CHICAGO

A new association, known as the Clay Products Institute, an organization of clay products associations, was recently organized for the purpose of carrying on joint research work for the good of the clay products industry and of the construction industry. Problems that will come before this institute for solution include manufacturing methods of clay products, raw materials, better products, and the structural utility and capabilities of the products. It is probable that suggestions for many valuable activities such as the gathering and the publication of statistics, will come before the group for action. Officers of the Institute are F. W. Butterworth, president; W. P. Whitney, vice president, and J. S. Sleeper, secretary-treasurer. General offices of the Institute are established at room 1409 Conway Bldg., Chicago, Illinois.

BUILDING PERMIT ESTIMATES TO BE CHECKED IN LIMA

Efforts of city commissioners of Lima, Ohio, to get building contractors to give truthful estimates on building permits resulted in the recent passage of an ordinance authorizing a board of review to pass on all estimates.

This board will be composed of three freeholders of the city, preferably architects and builders who are familiar with building costs, who will serve for three year terms, one being appointed each year. They will serve without pay.

For the first board, one will be named for one year, one for two years and the third for three years. They will act upon any and all cases submitted by the city manager and must report within five days as to the fairness of the valuation.

The valuation decided upon by the board will be then be used as a basis for the granting of the permit and for the collection of fees.

It is believed that this action by the city will materially increase the amount of money received from the issuance of building permits.—Building Supply News.

Economic Prospects of the New Year as Viewed by Herbert Hoover

Secretary Hoover in response to many requests for a statement upon the economic prospects of the new year, stated:

A forecast of the business future must be simply a weighting of the economic and political forces in motion. The annual survey of the Department of Commerce shows that the New Year begins with the economic structure of the world upon more solid foundations than at any time since the war. With the exception of a few spots of secondary impatience there has been during the past year a real advance toward social, economic, and political stability throughout the world. The only exceptions are Russia and China, which even before the war contributed less than 2½ per cent of international commerce and of course a part of this continues. Generally the world is producing more goods, there is fuller employment, there are higher standards of living, more assurance of economic stability for the future and more promise of peace than we have seen for many years. The world is by no means free from liability to economic shock, yet the forces today in motion all tend to great promise for the forthcoming year.

In our own country the outstanding economic development of the year has been the very large recovery in agriculture after its two year lag behind the recovery of industry. The farmers have a large measure of losses in the last three years yet to recover, but their outlook is encouraging. There are some secondary difficulties still remaining, particularly in the cattle industry and the effect of the sub-normal corn crop, but the prices of all farm products are gradually moving toward the general average of commodity prices. This improvement in prices of farm products has been paralleled with some decrease in the prices of many industrial commodities, such as fuel, building materials, metals, etc., so that there has been little change in the average of all price levels, and thus the farmers' purchasing power is being remedied in both directions.

While there has been a good deal of adjustment in prices of single commodities during the year, the average wholesale price of all commodities has varied but 3 per cent as between the end of the years 1922, 1923, and 1924. It would thus appear that we are tending to the common level in prices of about 50 per cent over prewar, which seems to represent at least our present economic plane in prices.

The average wage in industry has been stable during the last year, and remains around 100 per cent above prewar, while the cost of living has maintained almost exactly the same level at the end of each of the last three years, 1922, 1923 and 1924, about 72 per cent over prewar. Our labor, therefore, continues to enjoy the highest real wage in its history. There was some unemployment in the middle of the year but it has now been largely overcome.

While there was some slackening of manufacturing production as a whole in the spring due in part to the uncertainties of election and in part to reduction of accumulated stocks, yet there was but little slackening at any time in consumption of major articles as shown by the continued high levels of car loadings, of sales of wholesale and retail establishments and of construction activities. The end of the year finds us with a recovered industrial

production at practically the same levels as a year ago.

Two industries—textiles and northern soft coal—have lagged in recovery. The textiles are suffering in part from sharp competition of foreign imports, and in part from shift in national habits. An improvement may be looked for in the forthcoming year. The condition of the bituminous coal industry in the northern states is unsatisfactory owing to the unusually large stocks accumulated early in the year as a safeguard against possible strikes; to the decrease in industrial consumption during the middle of the year; and to the increased proportional production of the southern states due to lower wage levels. The difficulties in this industry created by strike stocks and mid year dip in industrial activity should soon be overcome.

The construction work of the country has maintained high activity. While the shortage, particularly of housing and business buildings, due to the cessation of construction during the war, has been to a large degree overcome, yet continued high real wages and general prosperity create a demand in excess of that due only to increasing population, because of the insistence of a population of rising standards of living; for more elbow room and better housing generally.

One striking factor in maintenance of increased construction activities is the effect which the automobile is producing in increasing the demand for general prosperity and in causing migration of population and in causing town to new housing in the suburbs. Another effect of these forces is to maintain rents out of line above the general price levels. With our high real wages and little unemployment there is no reason to expect any material change in the course of this industry.

Our railroads have shown continued increase in efficiency during the year, and have now provided services equal to any burden which is likely to be thrown upon them. Motor transportation continues to develop and to enter more and more into the vital economic life of the country—in fact, almost imperceptibly our road improvement programs are taking on the complex of new transportation systems.

Our foreign trade has shown considerable expansion during the year in export, and some decrease in imports. The increase in export figures has been due in some degree to the higher prices of agricultural produce, though chiefly to general expansion in all exports; the decrease in imports has been due in large part to lessening activity in production lines at the middle of the year, thus reducing the requirements for imports of raw material. The total of our exports for the year will show about four billion six hundred millions and our imports about two billion six hundred millions. The merchandise balance will be about one billion dollars in our favor. The net gold imports for the year in partial liquidation of this balance amounts to about two hundred eighty millions.

Our invisible exchange will show larger balances against us than in 1923 because of the greater volume of tourist travel, increased freight charges paid foreign shipping, and above all the largely increased volume of loans and investments to foreign lands, which will probably amount to as much as one billion as against one-third of that amount for 1923.

International trade in the world as a whole shows a larger movement of commodities during the past year than at any time since before the war. But international exchange of goods, measured in quantities, is probably still 10 or 12 per cent below pre-war, although the United States is unique amongst the large combatant nations in having recovered its foreign trade to a point 15 per cent to 20 per cent above pre-war on a quantity basis. One of the by-products hitherto of this lower movement of commodities has been the continued depression of shipping. With the general strengthening of the economic fabric of the world, with the gradual growth in the movement of commodities which is now taking place, together with the fact that there has been but little new ship construction during the last four years, and that the existing shipping is becoming more and more obsolete, it is fair to expect a recovery in the shipping world. The usable surplus tonnage at the present time in the world is probably not in excess of two million tons as against four million tons a year ago.

The year has again been marked by a decrease in federal taxation and by a large discharge of federal debt, which will amount for the year to something in excess of \$900,000,000.

Time and demand deposits in member banks show an increase of about two billion eight hundred millions, and bank clearings for the year were higher than in 1923. The gold reserves have not increased despite imports because of the larger circulation given to gold certificates. Savings continue at a very high rate, as indicated by the increasing savings deposits, the large absorption of bond issues, and the extraordinary expansion in insurance, thus demonstrating that there has been maintained a high state of efficiency throughout industry and commerce, with little evidence of waste, extravagance and speculation. In fact, the most far reaching movement in our economic life today is the larger understanding of its broad problems, the better appreciation of the factors of stability, and the definite progress in the elimination of waste, through more stable employment, through better administrative methods and through the rapid march of scientific discovery. That we are able to maintain wages at 100 per cent above pre-war while the cost of living is 72 per cent, and the average wholesale price of commodities about 50 per cent above pre-war is the very definite proof of increasing efficiency in production and distribution and of the free flow of competitive action.

In the foreign situation the settlement of the conflict over German reparation through the Dawes plan, with its stabilization of German currency and the German budget and the recuperation of employment and production in Germany, is having and will have a far-reaching effect upon the whole of Europe, and it has a considerable influence reaching to our shores. Great Britain shows considerable improvement in all phases of its economic life. The commercial and industrial situation in France, Italy, and Belgium shows steady improvement during the year. Some progress is being attained in these countries towards reduction of expenditure and increased taxation, directed toward the better balancing of budgets and more stable currency. Poland has stabilized her currency. Yugoslavia, Finland, Serbia, Estonia, Lithuania, Sweden, and Norway show

manifest stability in economic and trade conditions and steady progress over preceding years. The Netherlands, Denmark and Spain show some temporary depression during the year due to local conditions which are improving. Austria, Roumania, Bulgaria, Hungary and Turkey do not show the rate of progress of some of the others. Russia makes no real advance. A large part of Europe, however, continues dangerously overarmed and currencies are not yet upon that foundation of stability which will only be reached when they are placed upon a solid basis.

The year has been one of steadily increasing prosperity for the whole of Latin America despite three revolutions. Our sales of export goods to this territory show an increase over the previous year of about 12 per cent. We now enjoy the highest trade with them in our history.

The conditions in Egypt, South Africa, Congo and other parts of that continent show steady improvement with increased productivity and trade. In Asia, the situation in Japan marks the courageous upbuilding from the earthquake disaster. China is much depressed by continued civil war. Conditions in India, in the middle East, have shown a steady economic improvement and subsiding of political and social agitation.

It has been suggested in some press quarters at home and abroad that the result of these favorable factors may be leading our country toward a period of inflation of the character of 1919-20 with its disaster of 1921. It can be assuredly stated that we are on the march of wholesome recovery from the war and there is no present indication of inflation. We only secure inflation when undue expansion of credit finds its outlet in bidding up prices after the plant and labor capacity of the country is employed to the maximum. We have reached no such stage because there is still a margin of labor capacity for enlarged output in the form, however, of more full time employment than from people out of work. As a nation our business men, bankers and public officials have gained enormously during the past four years in understanding of the basic factors which create healthy prosperity as distinguished from over expansion as well as in understanding of their responsibilities in the matter. Our informational services are now upon such a basis as quickly detect dangerous currents. It might be added that holiday season when anyone might think about safeguards from overexpansion is infinitely more comfortable than one fraught with negative problems of repair of economic depression.

Altogether forces in motion both at home and abroad mark solid progress toward peace and toward prosperity for the coming year.

Commodity Survey

Through the courtesy of the National Association of Purchasing Agents we publish a commodity survey covering some of the materials used in construction.

Number of Those Who Believe Price Trend Will Be

	Up	Stationary	Down
Copper	338	107	10
Linsseed Oil.....	118	77	31
Lead	174	124	24
Northern Hard-woods	85	95	5
Southern Hard-woods	71	73	3

Cement	64	164	27

Bricklayer Production in U. S. Higher Than at Any Time—Report Shows

The bricklayers now have the best of the jokesmiths. The artists and paragraphers have had a merry time since the war picturing the opulence of the bricklayer. Now it appears by government documentary evidence that the bricklayer has been laying for the joker—he has been laying brick as never before, in recent years at least.

According to the Monthly Labor Review issued by the United States Department of Labor the bricklayer production in this country is higher than at any time since the introduction of ornamental bonds and joints demanded in modern brickwork. Ethelbert Stewart, Commissioner of the Bureau of Labor Statistics at Washington, recently directed an investigation of labor productivity and costs in certain building trades, in 15 typical cities. He found Birmingham bricklayers at the top in production and those of Indianapolis at the bottom. The average number of brick laid per man per 8-hour day in the 15 cities is 1364. In all except 3 cities, namely Boston, Philadelphia and Indianapolis the production of the bricklayer is far above 1000 per day, while in Birmingham the average bricklayer places 1925 brick in the wall each working day.

	Average Rate of Pay Per Hour	Per Hour of 8 Hrs.	Per Day	Cost of Laying 1000 Bricks
Atlanta, Ga.	\$1.05	185.3	1,482.4	\$6.30
Birmingham, Ala.	1.16	244.0	1,952.0	4.32
Chattanooga, Tenn.	1.46	226.1	1,808.8	6.85
New Orleans, La.	1.01	203.5	1,628.0	5.11
Norfolk, Va.	1.37½	231.8	1,854.4	6.38
Roston, Mass.	1.25	97.7	781.6	12.94
New York, N. Y.	1.76	157.6	1,260.8	11.69
Philadelphia, Pa.	1.53	123.3	986.4	12.66
Chicago, Ill.	1.57	156.8	1,254.4	10.60
Cincinnati, O.	1.43	131.5	1,052.0	11.47
Cleveland, O.	1.50	147.8	1,182.4	10.56
Denver, Colo.	1.50	212.4	1,699.2	7.58
Detroit, Mich.	1.54½	164.0	1,322.0	10.44
Indianapolis, Ind.	1.36-4/5	95.7	765.6	14.47
Minneapolis and St. Paul, Minn.	1.21-1/10	193.2	1,545.6	8.84

"During the days of higher building costs the bricklayer has borne the brunt of the feeling against the building trades in general; for bricklaying is the one trade in which a pat phrase expresses the day's work," recently said Ralph P. Stoddard, secretary-manager of the Common Brick Manufacturers' Association of America. "Every contractor and building superintendent," said Stoddard, "knows that the work of the other trades is not easily measured. Who but an expert knows what is a fair day's work for a plumber, and how can it be expressed except by a lengthy technical statement? But the phrase 'so many brick per day' is on the tip of everybody's tongue, but, fortunately for the bricklayer, his production is checkable to the last single unit.

"An investigation which this Association made," he continued "disclosed no restriction of bricklayer production by the labor organizations. The number of brick a man lays depends upon the skill and energy of the individual, and the ability of the contractor to organize the job and handle men. Bricklayers are doing a fair day's work, in every way comparable with their record in years past.

"These Government Bureau figures confirm our own conclusions and show remarkably high bricklayer productivity," he continued. The table below is from the Monthly Labor Review.

Heavy Lumber Production in 1924

Exceptionally heavy lumber production with unsatisfactory commercial results, and progress in reforestation and permanent lumbering that gives promise of an adequate continuing supply of lumber, were features of the lumber industry in 1924, according to Wilson Compton, manager of the National Lumber Manufacturers Association.

"Measured by volume of production the lumber industry has just come through one of the greatest years in its history," says a statement by Mr. Compton. "We estimate the entire production of lumber in 1924 at between thirty-six and thirty-seven billion board feet, as compared with thirty-eight to forty billion feet last year. Except for 1923, the 1924 lumber output was the largest since 1916.

"As a whole, however, the year was not a satisfactory one to the industry, though it closes in a stronger position than at any other time during the year, with production, shipments and orders virtually balanced. Making allowance

for remanufacture at the mills and local deliveries, shipments have exceeded production. Stocks are lower than a year ago. Prices have been stable and relatively low,—ranging from \$29 to \$33 a thousand for softwood, and from \$40 to \$45 for hardwood,—being about 40 per cent less than the after-war maximum.

"Great progress was made in the direction of reforestation and reproductive lumbering. General activity toward forest replacement awaits the development of organized forest fire protection and the logical readjustment of the still customary although uneconomical methods of taxing forest lands.

"The year 1925 is expected to be a good year in lumbering with the distribution of demand among various regions of the country, and among construction, railroad and farm uses, more nearly approaching a normal balance than at any time during the past four years."

TRADE NOTES

declared by the directors of the California Pottery Company have been placed in the mails, according to an announcement of F. H. Costello, president of the company, who reports a most successful year in 1924, the company having sales amounting to more than \$430,000 with net earnings in excess of \$52,000. The company, according to Costello, is completing the erection of a new office and display building in Oakland and bids are being taken for dryer cars and tracks for the new Niles plant, which will be ready for production to meet the Spring and Summer demand. With the completion of the Niles plant, the company expects to be in a position to increase its earnings fully 25 per cent.

Henry Cowell Lime & Cement Co. of San Francisco has taken over the fuel and lumber business of George H. Cardiff in Santa Cruz. The Cowell company, according to reports, propose to establish a builders' supply depot in the quarters formerly occupied by Cardiff at 530 Pacific Ave., San Francisco. Cardiff will remain as general manager and W. E. Weatherbee as office manager.

Edgar E. Anderson, formerly in charge of the sheet metal department of the Oakland Machinery Company, has opened a shop at 3103 San Pablo Ave., Oakland, and will operate under the firm name of Edgar W. Anderson Company, specializing in fabrication of building sheet metal, heating and ventilation, industrial sheet metal and general jobbing.

Harry Noble, former San Francisco branch manager for the American Radiator Company, has become associated with Vincent Powers, plumbing contractor, and will engage in the heating and ventilating business operating under the trade name of Noble-Powers Co. Offices are maintained at 723 Wells Fargo Bldg., San Francisco.

Asbestosized Cedar Shingle Company has purchased a 2-acre site in Sunnyvale, Santa Clara County, and plans early construction of plant to manufacture chemically treated cedar shingles claimed to be rot-proof and fire retardant.

Shevlin-Hixon Lumber Company of Bend, Ore., plans early construction of a mill at Klamath Falls, Ore., with a capacity of 100,000,000 feet a year. The announcement is made by E. C. Shevlin, a stock holder in the company.

Elmo E. Phillips, former manager for the T. A. Work Lumber Co. of Monterey has purchased the Burlingame Lumber Company of Burlingame from J. N. Mangano.

Chas. Burgess of Brazil, Indiana, was a recent visitor to Reno, Nevada, looking over clay deposits. Burgess announces he will establish a plant in Reno if suitable fire clay can be located.

Dominick Piombo and Paul Cherigori will operate under the trade name of California Concrete Company with headquarters at 8 Avery street, San Francisco.

Valley Brick Company, capitalized at \$20,000, has been incorporated in Sacramento. Directors of the company are: V. J. Persons, T. G. Mapel and Chas. L. Gilmore, all of Sacramento.

King Lumber Company is establishing yards at Shafter, Fellows and Wasco, Kern County.

Important Matters Decided at Jurisdictional Awards Board Meeting

SPECIAL CORRESPONDENCE

One of the best meetings in the history of the National Board for Jurisdictional Awards was held in St. Louis the week beginning December 8. Contractors and labor leaders from a number of important cities were present and demonstrated by their interest in the proceedings that the Board is performing a real service for the industry. Following is a list of the cases heard by the Board and the decisions rendered:

Interpretation of decision of February 21, 1924, covering setting, installing or sticking of artificial stone. A dispute arose on job in Cleveland over the installation of mantels which were cast with a fibrous material. Bricklayers and plasterers contended for the setting of these mantels. The Board decided after reviewing the evidence and the exhibits that the work in question, that of the Moreland Courts Apartment in Cleveland on which this interpretation was requested, was in its nature the setting of mantels and therefore the work of bricklayers.

On the question of the setting of vitrolite and similar opaque glass, consideration was given the evidence submitted in connection with the job in which vitrolite was being used in Chicago and it was decided to refer the subject matter to a special committee to investigate and report back at the next meeting of the Board.

Interpretation of decision on Bisphopie Board and Flaxlinum affecting the installation of Celotex. It was the decision of the Board that Celotex falls clearly within the decision of the Board covering Flaxlinum.

Concrete Slabs—reinforced (pre-cast) for roof tiling a dispute between the bricklayers and tile roofers. It was

the decision of the Board that the Slate, Tile and Composition Roofers have jurisdiction over pre-cast concrete reinforcing slabs for roof tiling when pointed up with or laid upon any preparation of asphalt, roofing cement or other mastics. When laid in cement, lime or gypsum mortars, the work is awarded to the bricklayers. The application for a re-hearing of placing reinforcing rods in concrete construction was referred to a special committee to confer with the contestants in the matter.

Re-hearing of the decision of the Board respecting unskilled labor with special reference to the loading and unloading of material as applied to reinforced concrete construction. It was decided by the Board to amend the decision of August 2, 1920, to read as follows: "It is the decision of the Board that the loading, unloading, carrying and handling of all rods and materials for use in reinforced concrete construction shall be done by the laborers under the supervision of such person as the employer may designate. The hoisting of rods shall be done by laborers except where a derrick or outrigger operated by other than hand power is used. This applies only to the character of the work stipulated therein."

Re-hearing of decision on foremanship over concrete work on walls, foundations and footings below the first floor. Board decided to amend the decision eliminating the words "first floor" and having decision apply to "entire structure—as follows: "In the matter of dispute over concrete construction it is decided that the work shall be done by laborers under the supervision of such skilled mechanic as the employer may designate."

National Forest Timber Business Breaks All Records

All yearly records pertaining to the cut of timber from the 147 National Forests were broken during the calendar year of 1923, states W. E. Greeley, Chief of the Forest Service, in his annual report to the Secretary of Agriculture.

During this period the cut for the first time in the history of the Forest Service exceeded a billion board feet. This amount exceeded the cut in 1922 by 20 per cent and had a 23 per cent greater value, the report says. In speaking of the fiscal year ending June 30, 1924, the report states that both cut and receipts surpassed the calendar year of 1923.

Sales of National Forest timber during the calendar year of 1923 also exceeded all records with a total of over three billion board feet which had a contract value of more than \$9,000,000. Compared with the calendar year 1922 this is an increase of 68 per cent in amount and 70 per cent in contract value.

In commenting on the timber sales made by the Forest Service the report says:

"This increase in the National Forest sales, particularly in the three Pacific Coast States where the volume of current business is heaviest, is striking evidence of the continued and increasing westward movement of the lumber industry from the cut-over regions of the East."

"In one instance a lumber company with its entire organization and most of its employees was bodily moved by special trains from the southern yellow-pine region to Arizona where operations will be continued on National Forests and Indian lands."

Alaska stood sixth among the 24 States and Territories containing National Forest lands in the amount of timber cut during the calendar year 1923. California was first, Oregon second, Washington third, Idaho fourth, Montana fifth, Alaska sixth, Wyoming seventh, Arizona eighth, Colorado ninth, and South Dakota tenth.

All sales of timber from the National Forests take into account the sustained yield principle, thus affording a perpetual supply on the sale area. One of the outstanding sales of the year was made on the Cascade Forest in Oregon. The unit sold embraces 15,700 acres with an average stand of 44,000 feet per acre, 90 per cent of which is Douglas fir. Under the management plans for this sale the timber will be cut at the rate of about 50,000,000 board feet per year.

The average stumpage price received in sales of timber, although governed from year to year by the accessibility and quality of the stumpage placed under contract, is gradually rising, according to the Chief Forester's report.

An indication of this, the report says, is that the average stumpage price received in 1924 stands at \$2.70 per thousand board feet, compared with \$2.20 in 1920, and \$2.08 in 1915.

Despite the increase in the volume of timber sales during recent years, the Forest Service report declares that the present cut is less than one-sixth of the stumpage that can safely be removed from the National Forests every year without depleting the growing stock or endangering future reduction in the volume of business.

California State Highway Body Not in Favor of Day Labor Methods

Remarks of R. M. Morton, State Highway Engineer of California, Before Convention of Contractors' Ass'n. of Northern California

Representing the California Highway organization as State Highway Engineer, I welcome the opportunity here among the Contractors to personally touch upon problems pertaining to our mutual interest. The contractor pits his financial resources, his skill and energy, and his time, against the numberless large and small problems that the engineers so briefly solve by preparation of a set of specifications.

The cities, the counties, the State of California, and indeed all other States, need the contractor. As individuals and wage earners, all of us use and pay for a portion of his products every day, in the houses we live in, the clothes we wear, the food we eat, the lights we read by, the sidewalks we walk upon. We need him for the construction of our highways, railroads, power plants, water systems, buildings, and all other of the human service improvements which our complex civilization demands.

The contractor's share in all of these modern activities is as the manufacturer and seller of a finished product. The general public is the buyer.

Co-Operation Necessary

No system of buying and selling will endure without co-operation trust and respect between the interested parties. That co-operation and trust, however, must be broad enough to include the buyer's or owner's interest, as well as the contractor's. Co-operation should produce for the owner, usually represented by construction projects by the engineer, a first class completed product, conforming to the previously agreed upon specification. Co-operation should produce for the contractor, after an expeditious and effective period of working operations, a payment which includes, in addition to this cost, a reimbursement for his labor, skill and the temporary use of his capital.

As essentials to a contract both parties must be competent to sign a mutually binding document. The buyer must be sure that the seller who offers to deliver the finished product and take his money in payment, is actually able to deliver. The owner who does not satisfy himself regarding the contractor's ability is overlooking the primary legal essential of a contract. Binding contracts cannot be made with minors or with idiots, and even if we do not always so classify him, the person who offers to perform work at less than cost has the semblance of relationship to those other incompetents not permitted by law to sign legal documents.

If the owner does not determine that the other party is legally responsible, he must expect that the finished product in some measure will be deficient from that specified.

California Requirements

Our requirements now for responsibility on the part of the low bidder are:

That he must have liquid assets or other financial backing sufficient to assure all necessary equipment on the job, and to defray the working cost under unfavorable conditions until substantial payments can be made.

He must have some skill gained from performing similar work.

He must have a general reputation for honest dealing.

The price for which he agrees to deliver the finished product must bear investigation as to its sufficiency to permit of fulfilling the contract without skimping on the requirements of the specifications.

He must present a concrete and logical plan for equipping and managing the sequence of the work.

In case his assets are questionable, he must certainly pass all the other requirements.

Some of these matters are not always easy to determine. Skill is relative, and may take wings in the face of hard luck and financial loss. The proper price cannot always be accurately determined, but usually some decision can be reached in conference with the bidder and study of his preliminary cost estimates. We must use average figures when considering cost estimates because labor costs can sometimes be reduced by unusual effort and improved mechanical equipment.

From the contractor's standpoint, opportunity for an expeditious and effective period of working operations should be foreseen by the bidder. Changes in amount of work, delays dictated by the owner or engineer, time limit made too short for consummation of the work without excessive costs, are all features in which the contractor is entitled to preliminary assurance of protection from the owner.

Contractor Should Visualize Work

The preliminary cost estimates, to be used as a basis for the bid, is the feature that requires close preliminary study by the bidder. He should be able to visualize the work in progress, and to search for hidden physical difficulties. He should compare the work in question with completed similar jobs. Upon him falls the responsibility of foreseeing the difficulties and fixing his price. This is the feature which impels men to the contracting business, the gambling with their skill and money against the handicaps placed by nature, and created by man.

The matter of profit too often becomes one of skimping on the work to prevent over-running inadequately figured preliminary estimates. If profit can be obtained only in this manner, the sincere contractor will change his occupation. The contractor is entitled to the aid of the owner in interpreting beforehand the conditions which will surround the work, insofar as it may help him in formulating his cost figures.

If owners and engineers could always be fair and without prejudice, if there could be a fixed standard for determination of these human qualities, and if the contractor would always have sufficient assets, skill, integrity, price, and working plans, a bond on public work would not come into the transaction. The bond requirement is demanded by the special situations surrounding the whole construction business. The best bond for the owner is too sign up with the contractor whose personal word and signed name are as good as his bond. If we could always have this situa-

tion, there would be no need for bonding companies.

Standardize Bonding Practice

The bond is an artificial device demanded and paid for by the owner as an additional assurance that the other party is competent to sign and perform a contract. The practice of bonding companies in furnishing bonds to men of incompetence cannot be understood by the ordinary engineer.

It would seem especially to the interest of bonding companies who write contractors' bonds, that methods be devised to standardize requirements for responsibility. I predict that such a step would have no opposition on the part of the engineers, owners and the general public. The owner often absorbs great loss in work performed by unskilled and underpaid contractors. Between the errors made by the engineer and the inability to completely fulfill on the part of the contractor, he often wastes a large part of the money he desires to invest in a high class completed project.

Highway Manual

Regarding the relation of the engineer to the contractor, our new manual of instructions to employees, now in course of preparation, contains the following:

"Relations with Contractors and other employees must be agreeably maintained. Surfulness or overbearing tendency on the part of construction employees will not be tolerated. The Contractor risks his own fortune on the job, but the State employee risks nothing beyond his salary and good reputation. It is personally profitable sometimes to imagine yourself in the Contractor's position.

"Anticipate the Contractor's difficulties. Advise, but do not try to force him to a certain course of procedure where the contract and specifications permit more than one method. Avoid taking an arbitrary stand on details prior to friendly conference with the contractor or his representative."

Day Labor Not Followed

As stated at the beginning, the Highway Commission needs the contractor. We do not favor day labor methods of construction. We endeavor to limit the day labor methods only to emergency work, to work not susceptible of practical presentation for bids, and to cases where bids are considered higher than the cost of the work when done by our own forces. Where one day labor highway job has been done at less than the preliminary estimate, many more have required additional allotments of funds to complete. The highway authorities are fully aware of this situation, and it is our policy to undertake no work by day labor without adequate and convincing reasons that this is the most practical way to perform it.

The Carpenters' Union of Haverhill, Mass., recently announced a request for a 16 per cent increase effective May 1, 1925, and a five-day week. The present rate is \$1 per hour. Bricklayers of Essex County, New Jersey, will request an increase of from \$12 to \$14 when their two years' contract with employers expires July 12, 1925.

CALIFORNIA PATENTS

(Special Correspondence)

The following information is compiled by Munn & Co., New York, patent and trade mark attorneys.

Alonso D. Stout, of San Diego. **FUEL FILTER, STRAINER AND SEPARATOR FOR INTERNAL-COMBUSTION ENGINES.** This relates to a device for filtering, straining and separating water from the fuel for internal combustion engines, and the object is to provide a device in which the fuel is cleaned ready for use before it reaches the carburetor. Mr. Stout assigns one-half of his patent to Leon H. Stout.

Herbert E. Kammerer, of Los Angeles. **ELECTRICAL SWITCH BOX.** This relates to electrical switch boxes and more particularly to that type of box which is provided with a door adapted to be locked in order that access to the switch may be had only by an authorized person. It has suitable, switch controlling handle extending outside of the box.

Monta J. Moore and Mathey T. Meagher, of Los Angeles. **POLISHING MACHINE.** This invention relates to a machine for polishing spherical bodies, and is especially adapted for polishing marble. This device is equipped with coating plates, which will roll the bodies about various axes and will rub the surfaces of the bodies so as to polish them.

Daniel W. Blackwell, of San Diego. **BOLT APPARATUS FOR DOORS AND WINDOWS.** This relates to bolt apparatus for securing and locking doors, windows and screens, and the object is to provide an apparatus which will securely hold the door, window or screen in a closed position.

John L. Wheeler, of Pittsburg. **SANITARY TOILET-SEAT ATTACHMENT.** This relates to improvements in sanitary toilet seats in which an apertured paper web is provided with regular spaced apertures arranged to be successively registered with the seat aperture.

Charles M. Mardel, of Oakland. **JIB CRANE.** This relates to jib cranes and an object of the invention is to provide a crane particularly adapted for setting heavy concrete ribs in tunnel construction or analogous work. This jib crane is characterized by extreme flexibility, whereby the handling of the suspended body especially in close quarters is greatly facilitated. Mr. Mardel assigns one-half of his patent to San Francisco-Sacramento Railroad Company.

Carl F. Braun, of San Francisco. **TUBE-EXPANDING TOOL.** This is a tube expanding tool which will quickly expand the tube within the opening through which it passes, at the same time insuring that the tube will not be buckled, will not be objectionably distended at points along its length, and that it will draw the metal of the tube in a manner to prevent crystallization or rupture of the wall.

David M. Berry of Oakland. **THICKENING FILTER.** This filter comprises a tank adapted to hold the material to be filtered, a filter drum rotatably arranged in the tank and means for directing a jet of the material to be filtered against the filter drum to dislodge the cake thereon.

Olof Andersen, of Los Angeles. **OIL BURNER.** This relates to oil burners, and the purpose of this invention is to provide an oil burner, which, in addition to being extremely simple and inexpensive to manufacture, permits perfect combustion to the extent of the complete elimination of carbon in all its forms, and produces maximum heat with a minimum consumption of fuel.

John F. Makowski, of Stockholm. **PLASTER-BOARD-HANDLING APPARATUS.** This provides means for grasping the board firmly for its entire width as it emerges from between the rolls, and for then drawing the board along so that it may be evenly laid on a table. The object is to provide means for insuring that each board will be released from the pulling member at the same instance, so that the ends of the board as they lie in superimposed order on the table will all be in vertical alignment. Mr. Makowski assigns his patent to California Cedar Products Co.

Carey G. Ballard, of Los Angeles. **TOOL-HANDLE WEDGE.** This wedge device is especially designed for use in firmly securing, in proper position upon their handles or shafts, the heads of hammers, hatchets, axes, sledges, mallets and like tools, or, in fact, any tool or article wherein a shaft of wood is positioned in an eye or socket and it is desired to produce a firm, tight and rigid connection.

Everett R. Burnett, of Los Angeles. **INTERNAL-COMBUSTION ENGINE.** This relates to an internal combustion engine of the two stroke cycle type, the principal objects being to generally improve upon and simplify the construction of the existing forms of similar engines. It provides a two stroke cycle engine in which the pre-compression of the gaseous fuel mixture is accomplished through the use of a two diameter piston. Mr. Burnett assigns one-half of his patent to Charles A. Burnett, of Los Angeles.

John A. Zublin, of Los Angeles. **ROTARY WELL DRILL.** This invention is directed to improvements in a rotary drill of the general type shown and described in Mr. Zublin's co-pending application, Serial No. 600,810, titled "Means for forming a well bore," in which an eccentric non-collapsible rotary underreaming drill is provided and is lowered through a well casing and subsequently rotated to form an enlarged bore below the casing.

Edwin B. Binford, of Pasadena. **METHOD AND MEANS FOR FORCING STAIN AND THE LIKE INTO SHINGLES IN BUNDLES.** In staining shingles with creosote or other liquid, it is customary to dip a bundle of shingles bodily down into the liquid in order to stain or coat it. The invention forces the stain into the bundle of shingles when it is submerged therein whereby it is allowed to thoroughly saturate the shingle in the bundle and work the liquid or stain into the innermost portions of the shingles making up the bundle.

John J. McIntyre, of Los Angeles. **HINGE.** This is an improved hinge for mounting windows so that the windows cannot be opened from the outside.

Morris A. Davis, of Los Angeles. **INTERLOCKING BUILDING TILE.** This building block enables the building of a substantially hollow wall with continuous vertical apertures which are separated by continuous vertical webs or walls forming outer and inner, plane and continuous wall faces which are adapted to be plastered over to present any desired finishing surface.

Charles A. Sawyer, of San Jose. **OIL BURNER.** This invention provides a burner in which the air supply to the burning fuel gases is so proportioned and distributed that complete and perfect combustion is secured. It consists of few parts, is economical to manufacture, simple in form and highly efficient in its practical application.

Thomas E. Potts, of Los Angeles. **DOOR CONTROL.** This relates to devices for checking and controlling the movements of doors, and is especially useful in connection with the doors of ranges and ovens. This device is of simple construction and is designed with individual parts so as to eliminate machine finishing.

Lon T. Harrigan, of Los Angeles. **FOOT-CONTROL VALVE FOR HYDRAULIC GOVERNORS.** This invention provides means in which the operator of a motor vehicle can operate a foot valve for the purpose of transferring fluid pressure from the hydraulic governor to the hydraulic braking mechanism.

John P. Lowry, of Los Angeles. **HOSE COUPLINGS.** This coupling is adapted to connect a hose with a valve or other outlet, but it should be understood that this coupling may be used also to connect a plurality of sections of rigid pipe. The object is to provide a simple and effective coupling adapted securely to retain a gasket tight joint suitable for the making of a very ample, the outlet from an oil tank.

John O. Hellmuth, of Pasadena. **REFLECTOR.** This reflector is of such construction that a maximum of light rays are projected on the plane of travel without sacrificing the distance at which the head light functions. The amount of lighting energy is projected along the path of travel rather than reflected in an upward direction and lost.

Henry G. Jahraus, of Los Angeles. **ROTARY DRILL PIPE.** This invention is directed to an improved type of drill-pipe especially adaptable for use in drilling deep wells by the rotary system of drilling. This drill pipe comprises a plurality of pipe sections joined in a manner to withstand greater rotary strain than standard threaded pipe and couplings. Mr. Jahraus assigns one-half of his patent to William R. Mitchell.

Henry H. Lipsey, of Los Angeles. **PISTON PACKING RING.** This is an efficient packing ring which may be applied readily whenever required to form a leak-proof joint. It is a plain two piece piston packing ring consisting of outer and inner ring, the outer ring having the advantage of any single one piece ring and the inner ring making it leak proof.

APARTMENTS

To be Done by Day's Work.

APARTMENTS Cost, \$35,000
SAN FRANCISCO. W Larkin St. 114-6
N Union St.
Three-story and basement frame (12)
apartments.
Owner—W. Props, 1644 Clay St., San
Francisco.
Architect—Baumann & Jose, 251 Kear-
ney St., San Francisco.

To be Done by Day's Work.

APARTMENT Cost, \$30,000
SAN FRANCISCO. Fell & Shrader,
Three-story and basement frame (12)
apartments.
Owner—Hulda J. Petterson, 46 Divisa-
dero St., S. F.
Architect—None.
Contractor—G. Petterson, 46 Divisa-
dero St., S. F.

Owner Taking Segregated Bids.

APARTMENTS Cost, \$500,000
SAN FRANCISCO. NW Sacramento &
Mason Sts.
Eight-story Class A apartment build-
ing, 100x150, (pressed brick and
terra cotta exterior).
Owner—Eugene Fritz, 1401 Masonic
Ave., S. F.
Architect—E. E. Young, 251 Kearny
St., S. F.
As previously reported steel contract
was awarded to the Central Iron
Works, 2050 Bryant St., San Francisco.

To be Done by Day's Work.

APARTMENTS Cost, \$40,000
ALAMEDA. Alameda Co., Cal.
Three-story reinforced concrete steel
and apartment building (5 stories
and 7 2 and 3-room apts).
Owner—Kalisk, 1301 Regent St.,
Alameda.
Architect—A. A. Cantin, 68 Post St.,
San Francisco.

Contract Awarded.

OIL PLANT BLDGS. (3) Cost, \$—
SAN FRANCISCO, Islais Creek.
Three 1-story structural steel frame
corrugated iron exterior oil plant
buildings, approximately 120 x 65.
Owner—General Petroleum Co., 210
Sansome St., S. F.
Architect—Eng. Dept. of Owner.

Structural steel contract for furnishing, delivering and erecting has been awarded to the Judson Mfg. Co., 604 Mission St., S. F. Concrete foundation and firewall contract was awarded to Pan-Pacific Construction Co., Citizens National Bank Bldg., Los Angeles.

Construction will start in about two weeks. The General Petroleum Co. expects to do all construction work except portions above let on contract, including construction of tanks and pipe lines.

To Be Done by Day's Work.
FACTORY Cost, \$15,000
OAKLAND, Alameda Co., Cal. S. Tide-
water St. 165 E Terminal Ave.
One-story frame and galvanized iron
factory building (gravel roof).
Owner—Mercantile Box Co., 320 Mar-
ket St., San Francisco.

Plans have been completed by the
Engineering Department of the owner,
and construction will start very short-
ly under the supervision of O. L.
Seelye, % Mercantile Box Co., who is
one of the owners of the company.

Structural Steel Contract Award.
OIL PLANT BLDGS. (6) Cost, \$700,000
OAKLAND, Alameda Co., Cal. Parr
Terminal.

Six 1-story structural steel frame
corrugated iron exterior oil plant
buildings about 100 x 200 each.
Owner—General Petroleum Co., 210
Sansome St., S. F.
Architect—Eng. Dept. of owner.

Structural steel contract for furnishing, delivering and erecting has been awarded to the Judson Mfg. Co., 604 Mission St., S. F. As previously reported, concrete and foundation contract was awarded to Pan-Pacific Construction Co., Citizens National Bk. Bldg., Los Angeles.

Foundation work has already started. The balance of the work, including construction of tanks and pipe lines will be done by the owner.

SAN BERNARDINO, Cal.—Until Feb. 2, 2 p. m., bids will be received by State Highways Commission, Forum Bldg., Sacramento, to erect maintenance shop and truck shed. Maintenance shop will be one story, wood frame, 60 by 140 ft., covered with corr. iron; reinforced concrete floor and footings and with part of the space finished for office, stock room, etc. Truck shed will be wood frame covered with corr. iron and will have reinforced concrete wash rack at one end and at opposite end will be finished for laboratory. See call for bids under official proposal section in this issue.

SAN FRANCISCO—Mangrum & Otter, Inc., 827 Mission St., have purchased a piece of property in the vicinity of Eighth and Mission Sts., and contemplate the erection of a factory of perhaps six or eight stories. Construction will not start, however, for about one year.

RICHMOND, Contra Costa Co., Cal.—Wallace Snellgrove, Richmond, at \$5689 awarded contract by city council to erect municipal machine shops.

SANTA CRUZ, Santa Cruz Co., Cal.—C. E. Lucore, western representative for the Marr and Colton Co., Warsaw, N. Y., builders of pipe organs, is conferring with Chamber of Commerce regarding erection of plant here. The plant complete will cost approx. \$100,000 including equipment. Buildings will cost approx. \$25,000. Lucore seeks a free site and a \$35,000 investment from Santa Cruz interests in the enterprise. A committee has been appointed to investigate the offer.

NAMPA, Idaho—A. Guthrie & Co., Shilcock Bldg., Portland, Ore., awarded contract by Pacific Fruit Express Co., 165 Market St., San Francisco, for grading in connection with \$1,000,000 project at Nampa. The project covers approx. 75,000 cu. yds. of excavation. Contracts for the erection of 18 buildings of various sizes and type of construction will be awarded shortly.

SAN DIEGO, Cal.—Architect E. M. Hoffmann, G. A. Hansen, Assoc., 408 Spreckels Bldg., are preparing plans for group of shop buildings to be built on block bounded by 14th, 15th, K and L Sts., San Diego Elec. Ry. Co. Group includes 1-story machine shop, paint shop, storehouses, carpenter shop, garages and other buildings.

LOS ANGELES, Cal.—Hamm & Grant Inc., industrial engs., 607 Ferguson Bldg., preparing plans and will erect 2-story and basement, class A mfg. plant and warehouse at s.w. cor. E-4th and Towne, for W. C. Hendrie & Co. Inc., 55x100 ft., reinf. conc. frame and filler walls, flat-slab constr., hollow tile inter partit., elevator, sprinkler. Bldg. designed for add. of 2-story, \$40,000.

SAN DIEGO, San Diego Co., Cal.—W. E. Keir Constr. Co., First Natl Bank Bldg., San Diego, is preparing working plans and has contr. for 6-story class A storage warehouse, at San Diego, for Mottelack Warehouse Co., 100x100 ft., reinf. conc., plas., exter. comm. rfc., cfm. fs, steel sash, loading platform, elec. freight elevator, ornamental iron.

LOS ANGELES, Los Angeles Co., Cal.—Hennessy Bros., Lane Mfg. Bldg., submitted low bid to L. A. county for construction of reinforced concrete warehouse at Mission Road and Alhambra Ave. Bids were taken on (a) 120 ft. floor plan; (b) 140 ft. and (c) 160 ft. Their bids were: (a) \$64,979; (b) \$71,567; (c) \$78,000. Low bidders on other contracts were: Refrigerating plant, York-California Concrete Co., 5651 Santa Fe Avenue, at \$2975; plumbing and steam heating and sprinkler system, see bids of Haverly and W. H. Robinson. Building will be 4-story, fireproof reinforced concrete frame and floor and roof slab, composition roof, hollow tile partitions, elevator, steam heating, etc.

LOS ANGELES, Los Angeles Co., Cal.—Architect J. M. Cooper, 321 Marshall Strong Bldg., is preparing working plans for a one-story and mezzanine floor brick factory building, on Wash-

ington St., bet. Burlington St. and Union Ave., for the Liberty Auto Co.; 70x330 ft., pressed brick facing, composition roofing, steel sash, skylights, wood trusses, cement floors, structural steel, pine trim.

Frost; California Crushed Fruit Co. lessee; 40x90 ft., comp. rfg., cem. and pine fls., steel sash, skylights, steel rolling doors; day work by owner.

AMERICAN LAKE, Wash. — See "Government Work and Supplies," this issue; bids opened for hospital refrigerating plant.

In the Sacramento "Bee" of Dec. 13th, we note that Sandy Pratt, (a San Francisco Rotarian), in his excellent imitation of K. C. B. was so exercised over the publication of income tax details that he forgot to call attention to the clean, sharp sand that gives him his name, so we supply the omission that his business may not suffer. We are personally proud of that sand. Sandy, for as a hydraulic miner we sent a lot of it down the American River that you might make use of it.

Carl Lamus, President of the Sacramento Rotary Club, makes us nervous too. Why don't he set that danged battery down, it's strong enough to stand alone.—James D. Stewart, editor of "Concentrates" of January 6th, 1925, official monthly publication of Rotary Club of Auburn, California.

JIM STEWART is right.

SANDY PRATT has written.

FOR MANY years.

HIS NEAR comedy.

CALLED "PRATT'S Concrete Mix."

AND DECEMBER 13th, 1924.

WAS THE first.

AND ONLY time.

THAT SANDY, producer.

OF CRUSHED rock, clean sand.

AND WASHED gravel.

FAILED TO tell the world.

ABOUT SANDY'S wonderful sand.

OUT OF the American River.

OR SANDY'S Marysville sand.

FROM THE Yuba River.

YOU KNOW, Jim Miner Stewart.

THEY PAY K. C. B.

TO WRITE his stuff.

SANDY PRATT, president.

OF THE Pratt Building Material Co.

HAS TO buy this space.

AND BESIDES Sandy.

HAS TO advertise his goods.

NOW ABOUT Carl Lamus.

AND HIS handful.

OF STORAGE batteries that appear.

IN THE Sacramento "Bee."

SANDY HOPES the Rotary Club.

AT SACRAMENTO.

FINES PRESIDENT Carl Lamus \$5.00.

FOR THE crippled children fund.

FOR THIS free ad.

"I THANK you."

Jim Miner Stewart of the Auburn Rotary Club mined (sieved gold) on the American River, so Sandy Pratt, producer of sand, crushed rock and washed gravel could "mine" American River sand (gold) as it comes down stream at Sacramento.

POWER PLANTS

STOCKTON, Cal.—Joaquin Co., Cal.—City Engineer Walter B. Hogan is preparing plans for one-story fireproof central station to house equipment of police and fire alarm systems; est. cost, \$20,000. Will be erected adjoining new municipal auditorium site at Fremont and Commerce Sts.

LOS ANGELES, Cal.—Until 3 P. M., Jan. 23, bids will be rec. by Pub. Serv. Comm., 207 S. Broadway, for 50 Anderson time switches; spec. P-343-457. Jas. P. Vroman, Secy.

TACOMA, Wash.—Dougan & Chrisman, 168 Thompson Bldg., Portland, Ore., at \$166,470 awarded cont. by city commissioners to erect (Tacoma Terminal) sub-station in connection with Cushman project; contract covering sub-station proper and tunnels for the footings for the outside equipment and for structural steel to support heavy bus connections. O. F. Larson & Son, Tacoma, next low bidder at \$182,268 and J. E. Bonnell & Son, Tacoma, third low at \$197,273.

Tombstone, Ariz.—Election will be held Jan. 13 to vote on a \$25,000 bond issue for elec. light and power plant, and ice plant. R. V. Saunders, city clk.

SPRINGVILLE, Ariz.—Preliminary work has been started on the first unit of a large power project on North Fork of Black river, in southern part of Apache county, and extending into Greenlee county, the territory affected being roughly described as 28 mi. s. of this city. The project, said to contemplate 15,000 h.p. at present, is financed by Commonwealth Power and Light Co. and certain Chicago and Detroit capital. W. H. Rosecrans, Chicago, consulting engr., is in Arizona, accompanied by A. E. Graham of Detroit, one of the directors of the new project. About 30,000 h.p. will be developed on Black river property, and remainder by another major development along San Francisco and Gila rivers, near Clifton, approx. 50 mi. s.w. of first development. It is expected to provide water to irrigate 50,000 ac. The dam to be built on the Black river will be across the North Fork, one mi. n. of a point where the North and East Forks converge. It will be 100 ft. high, 80 ft. wide at bottom and 120 ft. wide at top.

impounding 20,000 ac. ft. Constr. to start April 1. State permit issued in October. The second unit will be a power house several mi. below, water to be conveyed through 6-ft. or larger red cedar pipes dropping 600 ft. en route. The third unit involves a second dam below the power house and a second power plant, with another drop of 600 ft. The Clifton project involv. a dam on the San Francisco river, 6 mi. n. of Clifton, 150 ft. high, 145 ft. wide at bottom and 200 ft. at top, impounding 40,000 ac. ft. Unit No. 2 of this project will consist of a dam on the Gila river of practically the same size of the San Francisco dam, but due to geography of that section, impounding 90,000 ac. ft. These dams will ea. have power plants generating 5000 and 7500 h.p. respectively. Mr. Rosecrans was formerly with the dept. of inter., and assisted in the investigation of the Roosevelt and San Carlos projects.

BERNALILLO, N. M.—Albuquerque Gas & Light Co. is planning to constr. \$1,000,000 power plant at Bernalillo, 13 mi. n. of Albuquerque. Arthur Frager, mgr. Refuse of saw mills will be used for fuel.

PUBLIC BUILDINGS

OAKLAND, Cal.—City council plans installation of system of amplifiers in municipal auditorium; est. cost \$3000.

EXPOSITION PARK, Los Angeles Co., Cal.—The following are low bids submitted for various portions of work on Unit No. 1, Museum History, Science and Art, Exposition Park. Allied Architects Assn., 1136 Citizens National Bank Bldg., Los Angeles, architects.
Miscellaneous Steel and Iron Work—Philip Friedman & Sons, 50th St. and Pacific Blvd., Los Angeles, at \$25,000.
Steel Ceiling, Sash, etc.—Waterhouse Wilcox-Pacific Co., 440 Commercial St., Los Angeles, at \$3066.
Heating and Ventilating—Tiltz Engineering & Equipment Co., 405 S. Hill St., Los Angeles, at \$64,332 (add \$15,638 for additional work as per spec.
Interior Finish, Hardware, Glass—American Cabinet Co., 2419 E. 25th St., Los Angeles, at \$53,543.
Ornamental Metal Work—A. J. Bayer Co., Santa Fe and Slauson Sts., Los Angeles, at \$21,600.

SACRAMENTO, Cal.—Senator Chas. H. Lewis of Los Angeles, will seek a \$2,500,000 appropriation to finance erection of building to house state offices in Los Angeles. The city of Los Angeles will furnish a site for structure, according to Lewis.

PALO ALTO, Santa Clara Co., Cal.—Ray Smith, secy. of Palo Alto Chamber of Commerce, will seek support of Santa Clara County Consolidated, a civic organization, to secure erection of new county jail building for Santa Clara county.

NOTICE TO CONTRACTORS

(Radio Tower—Cavite, P. I.)

SEALED PROPOSALS. Indorsed "Proposals for 210-foot self supporting steel radio tower, Naval Radio Station, Cavite, P. I., Specification No. 5557" will be opened at the Bureau of Yards and Docks in the near future. These specifications may be obtained from the Bureau of Yards and Docks, Washington, D. C., or the Commandant, Mare Island, California. Deposit of a check or postal money order for \$10, payable to the Chief of Bureau of Yards and Docks, is required as security for the safe return of the specifications.

Respective bidders on the West Coast should make application to the Commandant, Navy Yard, Mare Island, Calif., for the bidding data.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

(Shop Building—San Bernardino)

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, California, until two o'clock P. M., Feb. 2, 1925, at which time they will be publicly opened and read, for construction, in accordance with plans and specifications therefor, of a Maintenance Shop Building and Truck Shed in the City of San Bernardino, County of San Bernardino, California.

The Maintenance Shop Building will be a one-story wood frame structure 60'-0" x 140'-0" covered with corrugated iron, reinforced concrete floor and footings and with part of the space finished off for office, stock room, etc. The Truck Shed will be wood frame covered with corrugated iron and will have a reinforced concrete wash rack at one end and the opposite end will be finished off as a Laboratory. The balance of the shed will have no floor.

Cash, a bidder's bond, made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works", in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

Plans and specifications may be had upon application to the California Highway Commission, 515 Forum Building, Sacramento.

A deposit of Twenty-five (\$25.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of plans and specifications to the said Commission in good condition.

Bids must be on forms prepared by the Commission. Attention of bidders is called to "Instructions" on proposal form for full directions as to bidding. The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

NOTICE TO CONTRACTORS

(Eureka High School, Eureka, Cal.)

Office of the Secretary of the Board of Education, Eureka High School District of Eureka, California.

Notice is hereby given that the Board of Education of the Eureka

High School District of Humboldt County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Eureka, California, until Tuesday, the 3rd day of February, 1925, at 8 o'clock P. M., at which time said bids will be opened, for the erection and completion of the Eureka High School for the Eureka High School District, located on property described as "Property bounded on the West by J Street, and on the North by Del Norte Street, and on the East by N Street, and on the South by Trinity Street, in the City of Eureka, County of Humboldt, State of California."

These bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, and in the office of the Architect John J. Donovan, 1916 Broadway, Oakland, California.

On a deposit of Thirty Dollars (\$30.00) complete sets of plans and specifications may be had by any bidder on application to the Architect at his office hereinbefore mentioned or to the undersigned secretary of the Board of Education, City Hall, Eureka, California, and in each case shall be returned or, before bids are received but not later than five days thereafter. If the plans and specifications are not returned within said time, or if mutilated the said deposit shall be retained as a fund to liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Architect and be signed by the bidder and accompanied by a certified check certified to by some responsible bank or banker and made payable to the Eureka High School District of the City of Eureka, Humboldt County, California, to be retained by said School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract or any bond required by law. The amount of said check shall not exceed Five thousand (\$5,000) Dollars but for all bids of less than Fifty Thousand Dollars (\$50,000) said check shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Architect.

Bids will be opened by the Board of said District on Tuesday, the 3rd day of February, 1925, at 8 o'clock P. M., in the office of the Board in said City of Eureka.

The Board reserves the right to reject any and all bids.

Geo. B. ALBEE,

Secretary of the Board of Education.

NOTICE TO CONTRACTORS

NOTICE TO BIDDEES

(Canal Excavation, Etc.—Merced Irrigation District)

Notice is hereby given that sealed proposals for the work and material necessary for the construction of certain canals hereinafter described will be received by the Board of Directors of Merced Irrigation District, in the State Building, Room 17, at Sacramento, California, at any time up to 10 o'clock A. M., of Wednesday, January 14, 1925, at which time and place all bids so received will be opened in public by the Board of Directors. After said Board will let said work, either in sections, or as a whole, to the lowest responsible bidder or bidders, but said Board reserves the right to reject any or all bids and readvertise for proposals or proceed to construct the work under their own superintendence.

The work and material for which proposals are hereby invited is divided into eight schedules as follows: SCHEDULE NO. 1.—About 110,000 cubic yards of grading and excavation.

SCHEDULE NO. 2.—About 27,000 cubic yards grading and excavation.

SCHEDULE NO. 3.—About 40,000 cubic yards grading and excavation.

SCHEDULE NO. 4.—About 35,000 cubic yards grading and excavation.

SCHEDULE NO. 5.—About 38,000 cubic yards grading and excavation.

SCHEDULE NO. 6.—About 2000 cubic yards grading and 13,000 sq. ft. concrete pipe.

SCHEDULE NO. 7.—Furnishing and laying about 2000 ft. 30-in. concrete pipe.

SCHEDULE NO. 8.—Furnishing 120 M. bd. ft. O. P. lumber and 140 M. bd. ft. R. W. lumber.

Said work is more particularly described in the specifications and plans therefor, which may be seen at the office of the Merced Irrigation District. Copies of the specifications and plans may be obtained at said office upon the deposit of Five Dollars, which deposit will be refunded upon the return of the specifications and plans in good condition not later than the date of receiving bids.

Any bidder may submit a proposal for doing the work in any or all of said schedules. A bidder to whom a contract for Schedules 1 to 7 may be awarded must furnish bond as provided by law. A bond in the sum of at least one-half of the contract price to secure the payment of the claims of materialmen, mechanics and laborers, and a bond in the sum of at least one-fourth of the contract price conditioned upon the faithful performance of the contract. The successful bidder for Schedule No. 8 must provide a bond in the sum of at least one-fourth of the contract price conditioned for the faithful performance of the contract.

Each bid must be accompanied with cash, or a certified or cashier's check payable to Merced Irrigation District, for an amount equal to at least 5 per cent of the amount of the bid as a guaranty that, if the bid is accepted, the bidder will, within five days after its acceptance, enter into a contract with the district in the form attached to said specifications and furnish the bonds aforesaid.

Bids must be on the proposal forms attached to the specifications, and must be in sealed envelopes addressed to the Board of Directors of Merced Irrigation District, and marked to indicate that each is a proposal for the doing of said work.

Dated at Merced, California, December 23, 1924.

By order of said Board of Directors.

H. P. SARGENT,
Secretary of Board of Directors
of Merced Irrigation District.

NOTICE TO CONTRACTORS

(Main Lateral System—Banta-Carbona Irrigation District)

Sealed proposals addressed to the Board of Directors of the Banta-Carbona Irrigation District, Box "Z," Tracy, California, and endorsed "Proposal for Excavation," Contract No. 8, will be received by said Board, at this office, at Carbona, near the Western Pacific Station, and about three (3) miles South from Tracy, until 8 o'clock P. M. of the 14th day of January, 1925, at which time and place, will be publicly opened and read.

All proposals must be made on blank forms to be obtained from the Secretary of the Board of Directors, W. Schlossman, Box "Z," Tracy, or from the Chief Engineer, W. D. Harrington, Box 631, Tracy, California, must give the prices proposed, both in writing and in figures, and must be signed by the bidder with his address.

Each bid is to be presented under sealed cover and shall be accompanied by cash or certified check made payable to the President of the Board of Directors of the Banta-Carbona Irrigation District, Henry T. Ohm, for the amount of one Thousand (\$2,000) Dollars, and no bid shall be considered unless such cash or certified check is enclosed therewith, and, also no bid will be considered unless in conformity with the specifications. Should the successful bidder to whom the contract is awarded, fail to execute the same, said cash or check shall be forfeited to and become the property of the Board of Directors, and such check will be returned to the unsuccessful bidders, who submitted the same.

A common-law bond will be required for the faithful performance of the contract, in a sum of at least fifty per cent (50%) of the estimated amount of the contract, and a further bond in the sum of fifty per cent (50%) of the estimated amount of the contract must be furnished with acceptable sureties, to secure payment of laborers and materialmen.

The Contractor to whom the contract may be awarded, will be required to appear at the office of the district, with sureties offered by him and execute the contract, within ten (10) days (not including Sundays), from the date of the notification of said award, and the preparation and readiness for signature of the contractor, and in case of failure or neglect so to do, he will be considered as having abandoned it, and the forfeit of cash or certified check will operate.

All bids are to be compared on the basis of the Engineer's estimate of the quantities of work to be done as follows:

ITEM NO. 1, 250,000 cubic yards earth excavation.

ITEM NO. 2, Installing Eight (8) Drainage Culverts (Pipe furnished by the district) Complete.

ITEM NO. 3, Extra work, cost plus 10 per cent.

For the foregoing quantities are approximate only, being given as a basis for the comparison of bids and the Board of Directors of the Banta-Car-

bona Irrigation District, does not expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase, or decrease the amount of any class or portion of work, as may be deemed necessary or expedient by the said Board of Directors.

The work to be done in accordance with the plans and specifications, which may be seen at the office of the Secretary, at Carbona, or at the office of W. D. Harrington, Chief Engineer, Tracy, California, whose copies may be purchased for the sum of \$5.00.

The right is reserved to accept the proposal of the lowest responsible bidder or to reject any or all bids.

By order of the Board of Directors of the Banta-Carbona Irrigation District, which this 23rd day of December, 1924.

WM. SCHLOSSMAN,
Secretary of the Board of Directors
of the Banta-Carbona Irrigation
District.

CRITENDEN & HENCH,
Attorneys for Banta-Carbona Irrigation District.

NOTICE TO CONTRACTORS

(Steel Rolling Doors—State Board of Harbor Commissioners)

OFFICE OF THE BOARD OF STATE Harbor Commissioners, Union Depot and Ferry House, San Francisco, California, December 22, 1924.

Sealed proposals will be received at this office at or prior to 2 o'clock P. M., Thursday, January 29, 1925, for furnishing and installing Steel Rolling Doors in the China Basin Terminal Building, which is a part of the City and County of San Francisco, in accordance with plans and specifications adopted by the Board of Harbor Commissioners on December 18, 1924, and on file in this office, to which special reference is hereby made.

The work to be done under these specifications consists in furnishing all materials, labor and equipment for installing all steel rolling doors on the first two floors and the door grooves angles on the first floor of the Building for the China Basin Terminal.

The materials to be used in this work consist of the requisite quantities of structural steel, castings, galvanized iron, bolts, chains, paint materials etc.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the cash so mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the San Francisco Harbor Improvement Fund.

Bids will not be considered by the Board unless delivered to the Secretary or to the Assistant Secretary, at the office of the Secretary, Room No. 17, Union Depot and Ferry House, at or prior to 2 o'clock P. M., on Thursday, January 29, 1925, at which time and place the bids will be publicly opened. The Board reserves the right to reject any or all bids and to award the best interests of the State.

Plans and specifications for this work to be had at Room 18, Union Depot and Ferry House, upon depositing \$10.00, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for Installing Steel Rolling Doors in the China Basin Terminal Building."

CHAS. H. SPEAR,
M. F. COCHRANE,
JOHN E. SANFORD,
Board of State Harbor Commissioners.

FRANK G. WHITE,
Chief Engineer.
J. L. Phelps, Secretary.

Addition to Lincoln School	150,000.00

Total \$780,000.00

Suit to collect \$110,214.51 from the estate of the late Dr. Albert Abrams was brought in the superior court, San Francisco, by John Spargo, general contractor building the new Electronic Clinic at Sutter and Larkin streets, San Francisco, an enterprise started before Dr. Abrams' death.

Spargo sues on behalf of himself and various other contractors and Mel J. Schwartz, the architect, demanding money for labor and materials supplied and damages for losses they claim to have sustained by cessation of work on the building.

Spargo asks \$49,144 for himself, \$2772 for the Guilfooy Cornice Works, \$10,805 for Michel & Pfeffer Iron Works, \$9203 for Schwartz, the architect; \$29,160 for C. Petersen Company, who did the "roughing in," and \$9128 for Frank J. Klimm, plumber.

A "Pittsburg" Automatic Gas Water Heater Installed in the Home indicates high quality throughout.

Recommended and specified by all of the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

KOEHRING DANDIE Light Mixer

Dandle with steel disc wheels and solid rubber tires; power charging skip, water tank and gasoline engine.

Dandle with steel trucks; power charging skip, water tank and gasoline engine.

EQUIP it to your special needs. Rubber tires to save the time waste of between-job hauls, and to expand your working territory. *Light duty hoist. Low charging platform or power charging skip. Automatic water-measuring tank.*

Most important, you can be sure of full capacity—utmost reliability—and long service life—because this mixer is Koehring built, engineered and constructed to out work, out last anything in the light mixer field. Price? Not the lowest price

—no—but the most remarkable value of all light mixers—and still within the range of light mixer prices.

CAPACITIES

4 and 7 cu. ft. mixed concrete, steam or gasoline power. May be equipped with power charging skip or low charging platform with hopper, light duty hoist, automatic water measuring tank. Mixes mortar as well as concrete.

REFRACTORY PRODUCTS IN 1923

The Department of Commerce announces that, according to the data collected at the current census of manufactures, the aggregate value of brick, tile, terra cotta, fire-clay products, other clay products except pottery, and nonclay refractories produced in the United States in 1923 was \$331,883,549. This aggregate represents an increase of 36.2 per cent as compared with \$243,593,734 in 1922, and of 69.7 per cent as compared with \$195,600,657 in 1921. The principal items included in the total production as reported for 1923 are as follows: Common brick, 2,296,961 thousands, valued at \$94,213,979 fire brick, 1,129,971 thousands, valued at \$46,449,570; face brick, 2,119,731 thousands, valued at \$38,891,834; sewer pipe, 1,777,584 tons, valued at \$29,102,111; hollow building tile, 3,753,791 tons, valued at \$28,240,714; architectural terra cotta, 138,162 tons, valued at \$16,486,039; vitrified paving brick or block, 538,658 thousands, valued at \$13,032,341; silica brick, 258,388 thousands, valued at \$12,855,667; wall tile, 34,811,231 square feet, valued at \$10,655,584. All these items show substantial increases as compared with either 1922 or 1921.

The numbers of establishments reporting the several classes of products were as follows: Common brick, 1297; vitrified brick or block, 139; face brick, 82; faience or ornamental brick, 15; enameled brick, 40; architectural terra cotta, 33; hollow building tile, 401; paving tile, 23; floor tile, 33; ceramic mosaic tile, 17; faience tile, 25; wall tile, 22; drain tile, 266; sewer pipe, 101; tile lining, 23; fire brick, 248; nonclay refractories, 88.

BUILDING OUTLOOK FROM BANKERS' VIEW

The Anglo & London Paris National Bank issues the following of interest to the construction fraternity:

Although the latter half of December brought the lumbering markets under the slackening influence of the holidays, prices continued firm and some buying was reported. Inquiries for the coming year have been large and manufacturers look forward to an active demand. Most authorities look for some rise in quotations early in the new year.

Confidence in the future outlook is increased by the strength of demand during late November and early December. Orders were consistently larger than in the corresponding weeks of 1923, while production was lower than in the earlier year. Shipments were made at a somewhat greater rate than in the latter part of 1923, but failed to balance the new orders, so that the mills entered the holiday lull with a very comfortable volume of business on their books.

For the first fifty weeks of 1924 new bookings ran in excess of 11,226 million feet, or only 150 million feet less than in the same portion of 1923, while production, at 11,452 million feet, was 659 million under that of the previous year, and shipments at 11,627 million feet, were 528 million feet below 1923. On the basis of these figures it appears that 1924 will fall very little below the high level reached in the year before.

Sales of structural steel during November were remarkably large, not only in comparison with the same season in former years, but with any month on record. The reporting companies showed sales amounting to 204,741 tons, or 85 per cent of their month's capacity, on which basis it is estimated that the entire industry booked orders totaling 221,000 tons.

LARGE STEEL ORDERS RECORDED IN FIVE YEARS

Unfilled orders of the United States Steel Corporation on December 31, made public Jan. 10, show the unexpectedly large monthly increase of 78,787 tons, bringing the total to 4,186,756 tons, the largest since February, 1924, when the bookings were 4,912,901 tons. This tonnage statement was one of the biggest surprises that Wall street has had since the election, not even the most optimistic estimates having exceeded 700,000 tons while conservative and stock market observers looked for an increase of between 500,000 and 600,000.

This was the largest month's increase in five years.

FOREIGN CEMENT SHIPMENTS TO COAST ON INCREASE

Newspaper advices from Portland, Ore., under date of Jan. 7, carry the following message: "Large amounts of European cement are being shipped to the Pacific coast and coast producers are becoming interested. The motor-ship Borzas due here tonight or Wednesday has 24,000 sacks for discharge. The Borglund, due later in the month, has 36,000 sacks. The Theodore Roosevelt, due in February, will also have cement shipments for discharge here."

CITY COMMISSIONER DENIES OAKLAND PAVING "COMBINE"

Denying the existence of a paving "combine" in Oakland, but asserting his desire for free competition, Commissioner W. J. Baccus issued a general statement promising to invite all the paving contractors in California to bid for the East Fourteenth street job.

Baccus' statement follows: "Having in mind the matters suggested by Commissioner Colbourn, more than a week ago I instructed the city attorney to prepare the necessary amendments to the State street law, and, further, if the legislature failed to adopt such amendment, to prepare an amendment to the city charter which would give the council power to adopt ordinances establishing the proposed procedure.

"At present the charter adopts the State law and does not permit the council to ordain its own method for street work.

"Having heard accusations that a 'combine' existed among local street contractors, I have repeatedly sought evidence as to such a combine, but to date I have not found any. To check where the local prices are too high, I have encouraged outside competition.

"To get outside bids, I have drawn the proceedings for the improvement of East Fourteenth street, so that the contract would be for one big job, totaling more than \$500,000.

"I am going to send letters to all big contractors in the State, calling their attention to the size of the paving job on East Fourteenth street."

The East Fourteenth street project involves, in addition to other items, 1,049,181 square feet of grading and 1,014,959 square feet of six-inch concrete paving with a two-inch Warrentite-Bituthitic surface.

PREPARED ROOFING SIMPLIFICATION IS APPROVED

Thirty-five manufacturers of prepared roofing, by joint action, have done away with the sales of "seconds" of shingles made by these companies, as a part of a program of simplification undertaken with the co-operation of the Division of Simplified Practice, Department of Commerce. The report to the Division states that the new program went into effect January 1, and that these manufacturers will offer for sale hereafter only such shingles as bear the Underwriters Label.

The Prepared Roofing Association, with headquarters in Chicago, through its secretary, John Lini, expressed the view that efforts toward the simplification of "smooth rolls" upon which action is temporarily deferred, will be continued.

This action on the part of prepared roofing shingle manufacturers was taken to indicate that home builders are to be assured of greater protection as to the quality of material offered also that improvements in industrial processes have made it possible to offer quality products only, rather than to continue a more general quality classification in marketing.

During 1924 to Nov. 30, 743,192,000 ft. of lumber, 82,567,000 shingles, 16,204,000 lath, 42,856 poles and piles and 24,000 ties were received by water at San Francisco and 108,630,000 ft. of lumber, 3,658,000 shingles and 500 ties came in by rail. The water movement into Oakland was 207,604,000 ft. of lumber.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

R. H. Hubbard, building inspector of Bakersfield, has requested the city council to revise the plumbing ordinance so that all plumbers must pass under the scrutiny of the Bakersfield examining board before being allowed to practice their trade in that city. Under the present ordinance, the inspector points out, it is provided that any plumber who has had five years' experience or has a permit from some large city may work in Bakersfield without passing the examination. The city attorney has been directed to change the ordinance accordingly to the recommendation.

A suit to recover damages aggregating \$16,119 has been started in the Superior Court at San Jose by Mrs. Hope C. Granander, who names as defendants the Kaiser Paving Co., a corporation and Heafey-Moore & McNair, street contractors of Oakland. In her complaint Mrs. Granander alleges she was injured January 8, last year, in an automobile which struck a depression in the roadway which was not lighted or marked and by reason of the defendants' carelessness she suffered bruises and lacerations of the head, face and body.

Senator John Creighton of Bakersfield has introduced into the Senate a bill which would provide \$500,000 to finance a survey of one of the most comprehensive water conservation projects ever attempted in California. State Engineer W. F. McClure is now compiling data to be incorporated in the bill. Included in the project would be the entire watershed of the Sierra Nevada Mountains and every stream whose waters ultimately find their way into the Sacramento and San Joaquin Valleys.

West Coast Porcelain Company of Millbrae, has filed a complaint with the State Railroad Commission against the Southern Pacific Company and The Atchison, Topeka & Santa Fe Railway Company, alleging the collection of excessive charges on fieldspar from Winchester and Ferris to Millbrae, and asking reparation for the alleged excessive charges.

Berkeley plans construction of a subway for suburban trains through the main Shattuck avenue business district, the City of Berkeley to pay \$300,000 of the total cost of construction; the Southern Pacific R. R. Co., \$485,400 and the county of Alameda, \$200,000. Creation of an assessment district to finance the city's share of cost is proposed.

Marking an increase of 36 per cent over work done in any previous year, 20.78 miles of paving, 12.34 miles of sewers and 10.27 miles of sidewalks were constructed in Oakland during 1924, according to Commissioner of Streets Wm. J. Bacon. The city now has 476 miles of paved streets.

Fruit Growers Supply Co., Susanville, Cal., plans construction of additional drying kilns in addition to drying sheds, the latter to be equipped with a monora system. Approximately \$300,000 will be spent by the company for expansion during 1924.

R. C. Holmquist has been granted a plumber's license by the Redwood City trustees. An electrical contractor's license was granted to L. H. Cook.

Harry Chandler, of Los Angeles, and a group of associates plan early construction of a 140-mile railroad from Mexicali, immediately across the Mexican border from Calexico to San Felipe on the Gulf of Mexico. The project is to be undertaken by a new corporation, organized under the laws of Mexico for the completion of plans originally laid down by the Mexican National Railways and later discontinued owing to lack of funds. W. I. Bassetti, formerly construction engineer with the Southern Pacific Railroad, will be in charge of the project as general manager.

Burlingame led the five big cities on the Peninsula in building construction for the year 1924. A total of \$7,244,080 was expended in building operations during the year. Burlingame led with \$2,326,929; Palo Alto was second with \$1,755,745; San Mateo, third with \$1,589,688; Redwood City fourth with \$1,090,468 and South San Francisco fifth with \$481,346. The total for the five cities for the year exceeds by \$531,993 the total of 1923 when the cities showed \$6,712,695 in building activities. Most of the buildings were one and two-story dwellings.

George H. Cecil, for over 20 years a member of the Forest Service and since 1912 District Forester in charge of the National Forests in Oregon and Washington, is being transferred at his request to California and will be assigned as Forest Supervisor of the Angeles National Forest with headquarters in Los Angeles. Cecil succeeds R. H. Charlton who is to be transferred to another assignment in the Forest Service.

After fourteen months in Europe, during which time he made an exhaustive survey of the timber and lumber situation and of the condition of American markets there, Axel H. Oxholm, chief of the lumber division of the Department of Commerce, will arrive in San Francisco about February 1, according to information received at the San Francisco office of the United States Bureau of Foreign and Domestic Commerce.

Regulation of the retail lumber business to the extent that all dealers will be required to mark the standard quality of lumber sold on all bids of sale is demanded in a bill to be introduced by Assemblyman H. F. Sewell of Whittier. This, he says, will stop many unscrupulous dealers from selling poor quality lumber under the guise of first-class material.

Industries engaged in the production of logs and other timber products had an output in 1923 valued at \$1,494,259,321, according to a biennial census report by the commerce department. The figure is an increase of 65.6 per cent over 1921.

Street improvements undertaken in Bakersfield during the year 1924 cost that city \$306,731, according to a report compiled by W. D. Clark, city engineer. Eighteen projects were undertaken during the year.

During the first nine months of 1924, 675,389 bbls. of cement were imported into the customs district of Los Angeles, San Francisco and Hawaii.

ALONG THE LINE

After a business association of eleven years, the architectural firm of Coates & Traver, Fresno, Cal., has been dissolved. H. D. Travers in future will be connected with the firm of Shields, Fisher & Lake, architects and engineers, and the Trewhitt-Shields Company, managers of construction, with offices in the Pacific-Southwest Bldg., Fresno. W. D. Coates Jr., will continue his architectural work in the Lowell Bldg., Fresno, while it is announced that Mr. Travers will be in the Los Angeles office of his new connection.

Edward Flanders, for the past seven years with the architectural firm of Weeks and Day, San Francisco, has become associated to the office of Leonard F. Starks of Sacramento, as associate architect. Flanders, while with Weeks and Day, worked on plans for several of San Francisco's most important buildings. Designs he submitted to the Australian government in the international contest for a design for government buildings there received honorable mention as did his design in the international contest for the Chicago Tribune Building.

August G. Headman, San Francisco architect, is recovering from a serious operation at the St. Francis Hospital. Mr. Headman has been confined to the hospital for the past month, the operation being performed about three weeks ago. His recovery in the first stages of his illness was somewhat doubtful, but at present he is fast gaining strength, according to Mrs. Headman, who reports he probably will be removed from the hospital to his home, 2527 Lyon street, within the next week.

Architect B. S. Hayne, formerly a member of the firm of Norberg & Hayne, Balboa Bldg., San Francisco, has entered the architectural field for himself maintaining offices at 156 Sutter street, San Francisco. Mr. Hayne recently awarded contracts in connection with a grammar school building to be erected in San Rafael at a cost of approximately \$50,000.

Carl H. Peterson, San Francisco contractor and now associated with the firm of Peterson & Eissler, general contractors of Bakersfield, plans to establish permanent offices in that city.

G. B. Scheer, electrical engineer, announces the removal of his offices from 627-628 Chronicle Building to 779 Bryant Street, San Francisco.

Maurice Gilbert will operate under the firm name of Gilbert Electric & Supply Co. with offices at 1174 Phelan Bldg., San Francisco.

Richard Olney, contractor, formerly of Sacramento, has opened offices in the Tribune Tower, Oakland.

Fourth annual convention of the California boiler and elevator inspectors will be held in Fresno in 1926.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

GUNN, CARLE & COMPANY HOLDS CONSOLIDATION BANQUET

To celebrate the consolidation of activities of the two firms following the purchase by Gunn, Carle & Co. of the business of the Pacific Materials Co., on January 1, the personnel of the merged organization held a get-together dinner Jan. 8 at the St. Germain Restaurant, San Francisco. President Chas. W. Gunn, of Gunn, Carle & Co., was master of ceremonies which were, however, entirely devoid of any formality or set speeches. Chas. W. Carle, newly elected president of the Pacific Materials Co., which retains its corporate identity, gave a sketchy report of his visit to a number of big Eastern factories for which products the company is distributor in this territory. Vice-President O. P. Shelley, of the Pacific Materials Co., briefly touched on the merits and purposes of some of the lines handled. Others present were: Earl H. Swing, secretary; H. E. Cleveland, Oakland Manager; Rita Winnefred Kuhl, Esther M. Pearson, Katherine Maguire, Meriam S. Nordeen, Ed. Kramer, James Condon, Delmont D. Henion, Jas. P. Gambini, Chas. A. Wagner, C. F. White and A. L. Calhan.

MASTER PAINTERS CONVENE AND ELECT OFFICERS

California Association of Master Painters and Decorators at its recent convention in San Jose elected the following officers: G. F. Brown, San Francisco, president; Frank Dixon, Sacramento, first vice president; C. G. Warren, San Diego, second vice president; Max Cohen, San Francisco, treasurer; William Woolley, Burlingame, secretary; F. W. von Hacht, Palo Alto, sergeant-at-arms; E. C. Thomas, Oakland, chaplain. The following were selected for the various executive boards: San Francisco—A. D. Sutherland, R. Postler, Frank Kisel, J. F. Provo and B. H. Gurnett; San Jose—Dud Gallischott, and William Loos; Palo Alto—A. Napier, Alameda County—H. D. Van Wye, J. Hurtlage, C. Friberg and C. Sparwasser, San Diego—A. Pearson and J. S. Buland, Los Angeles—H. H. Walsh, H. E. Valk, G. M. Graff and John Kelley. Sacramento—Clyde Simmons and William Triplet.

MASTER PLUMBERS OF U. S. WILL CONVENE IN PORTLAND

The national organization of Master Plumbers will hold its regular annual convention in Portland, Ore., during the month of June. It is expected the meeting will bring 2000 visitors and delegates to the "City of Roses." The Portland Master Plumbers' Association has appointed the following to serve as a committee to work out a program to entertain the delegates on arrival: Chas. J. Kelly, president of the Portland Ass'n., T. J. Rowe, its secretary and Chas. Fullman. The latter will act as chairman of the Convention Committee.

The executive board of the Master Plumbers Association held a meeting in Fresno, Jan. 10, to discuss trade and association conditions.

Co-operation is Aim of S. F. Material Dealers' Association

By The Observer

The Building Material Dealers' Association of San Francisco, comprising members of the building fraternity dealing in products used by cement, plastering and brick mason contractors, held its first meeting for the year on January 6. Each firm member of the association, eight in number, had a representative present. Business conditions for the past year were reviewed and a program outlined to meet the year 1925, which, in the opinion of members of the association, bids fair to be a brisk season for the construction industry in general. One of the important matters up for discussion at this meeting was a method of reaching the public and more particularly the prospective builder and the contractor to educate them as to the purposes of the Building Material Dealers' Association.

"Protection" is the aim of the association—protection for the building owner, the contractor and the material dealer. It is this fact that the association will impress upon those who come within the realms of its dealings.

To broadcast this information a Publicity Committee was appointed and instructed to work out a series of advertisements for the daily newspapers and to bring about a general publicity campaign.

To accomplish our aim it was found that the first step necessary was to get a complete line on every contractor doing business in San Francisco and vicinity," says a member of the association. "It is necessary that we insist on every contractor complying with a strict rule on credit and that his account be paid within a reasonable time so that all invoices will be paid on each building before the lien time expires. This we feel will protect the owner against the so-called 'fly-by-night' contractor and will give the legitimate contractor, the man who has an organization, capable of completing a job in a workmanlike manner and taking care of his obligations when due, an even opportunity to get work."

The publicity committee of the association plans to run a series of advertisements which will explain the purposes of the association in detail and from time to time will issue news stories through the press which will permit the prospective builder and the contracting fraternity in general to become better acquainted with the methods under which the association operates.

Frank L. Hatch, secretary of the association, maintaining offices in the Hearst Building, San Francisco, has been instructed to communicate with owners and contractors of buildings about to undergo construction and advise them as to the purposes of the organization with the promise of additional information on request.

The Building Material Dealers' Association is composed of the following members: Atlas Mortar Co.; Henry Cowell Lime & Cement Co.; Eclipse Lime & Cement Co.; J. S. Guerin & Co.; Lennon Lime & Cement Co.; Howes Lumber Co.; Western Lime & Cement Co., all of San Francisco and San Mateo Feed & Fuel Co., San Mateo.

Sacramento Materialmen Organize Credit Association—Officers Named

Formation of a credit association among the building material dealers and building financiers of Sacramento was effected at a meeting called by those interested in protecting material men, those loaning money on building and likewise protecting reputable contractors from those who attempt to elude payment of material bills.

D. R. Green, credit manager of the W. P. Fuller Company, was named president of the association, which will be known as the Sacramento Building Material Men's Credit Association. Other officers named are W. E. Bristol, secretary, and Curtis Cutter, Lawrence Chapman and Allen Burr, directors. Two other directors are to be named.

A meeting of the membership of the San Francisco Builders' Exchange is called for January 26, 1 P. M., for the purpose of ratifying the report of the Board of Directors on plans for the proposed new exchange building to be erected at Fifth and Minna streets.

The purpose of the association will be to keep the building material men, banks, real estate companies and others who may become members, posted on the financing of all buildings, credit standing of contractors and similar matters. Through this method it is believed unreliable and fly-by-night contractors who have no intention of fulfilling their obligations will be curbed and deserving builders who may be carrying a heavy financial burden assisted in keeping on their feet.

Operation of the association will be withheld until the desired number of members is secured after which an office will be opened and a secretary secured.

Local unions of carpenters in many cities are voting on the question of whether or not to demand a five-day week. The convention of the United Brotherhood at the Indianapolis meeting last September endorsed a resolution favoring the five-day week movement and authorized the locals to take referendum votes on the matter.

TRADE NOTES

Success of American Plan in
S. F. Draws Comment of Eastern Writer

Reorganization and financing of the Yosemite Portland Cement Company is announced in "Hit and Quarry," a New York trade publication. According to the announcement, the company is incorporated for \$1,650,000. Plans originally contemplated will be carried out, it is believed from the Eastern report. A formal statement of the reorganization is expected from the officials of the company in the immediate future. Completion of the plant on the Oakdale Road north of Merced and the employment of 150 men will be the first step in re-organization. Emory Wishon of Fresno, is reported to be a leading member of the re-organized concern.

F. Warren Turner, one of the Far East representatives of the W. P. Fuller Company of San Francisco, died in Shanghai, Jan. 7. Death was due to paralysis. Turner was one of the best known graduates of Stanford University. He took an active part in University athletics, acting as coxswain of one of the varsity crews, and also served as assistant graduate manager. After graduating from the University in 1908 as a mining engineer, he entered the service of W. P. Fuller & Co., with whom he had been connected continuously since. Turner was 43 years old.

Peralta Cement Company of San Francisco, has filed application with the U. S. Engineer's Office, San Francisco, seeking authorization to dredge materials from the southern arm of San Francisco Bay on the eastern edge of the channel, about three miles northeast of San Mateo Point. It is proposed to dredge approximately 4,000,000 cubic yards of material from an area of 2900 square feet.

O. D. Fairfield, formerly connected with the Empire Planing Mill of San Francisco, is reported to head a corporation planning early construction of a sash and door and planing mill plant in San Carlos, San Mateo County. A five-acre site is available. The plant with equipment will present an expenditure of approximately \$100,000.

C. H. Boyd, manager of the Santa Barbara Lumber Company, Santa Barbara, is one of the organizers of the Masterbilt Wall Fixtures Co., which contemplates erection of a plant in Santa Barbara to manufacture house fixtures.

A. E. Johnson and Mariett Johnson have filed articles of co-partnership and will operate under the name of A. B. Johnson Lumber Company with offices at 7 Drumm street, San Francisco.

John Pletz and Muriel Plum will operate in San Francisco under the trade name of Pacific Coast Timber Products Co., with headquarters at 525 Market street.

Pioneer Brick Company of Fresno, has been admitted to membership in the Fresno Builders' Exchange according to Ralph Chrouh, secretary of the exchange.

Michael Howard of San Francisco has been appointed representative for the Phoenix Brass Foundry of Irvington, N. J., to cover the Pacific Coast district.

A. Hess and Co. have been granted a permit by the Redwood City trustees to erect sand and gravel bunkers in Franklin Street, that city.

Says the Boston News Bureau: San Francisco "points with pride" to its record in getting rid of strikes. In 1921 under closed shop conditions there were 22 strikes in the city, entailing a loss to the public of \$22,500,000. In 1922, the first year after the inauguration of the American or open shop plan, the number of strikes was cut in half, and the loss was reduced to less than a quarter of that of the preceding year, or to \$5,375,000. In 1923 the number of strikes was again cut in half and the losses were reduced the same ratio—five strikes and \$2,490,000. And for 1924 up to date there have been just small strikes and the loss totals the relatively negligible sum of \$68,000.

Thus the Industrial Association of San Francisco rounds out the third calendar year of its existence. The association came into existence in the midst of one of the most savage labor struggles in the history of the country. Almost unbelievable conditions roused the business men of the city to action. How the union autocracy was dethroned is one of the epics of the community effort. And now the association cites a long list of reforms and constructive accomplishments, from which we mention the following:

The American plan in the building industry established in the late summer of 1921 has abolished all artificial and autocratic union rules which limit the output and curtail efficiency, including the regulations which had rigidly restricted the admission of apprentices to the various building trades.

The association has maintained free trade schools for plasterers, plumbers, painters, paperhangers, bricklayers,

tailors, molders, tile setters, and others; these have graduated 1000 apprentices and are still training 700.

The association has provided impartial machinery for the establishment of wages in the building trades and for the enforcement of the wages thus arranged. It has settled numerous incipient controversies which otherwise might have brought about serious strife.

The association has established supplementary safety services which have reduced the hazards of industry to the smallest possible minimum. It has maintained a free employment bureau from which more than 20,000 men have been placed. It has effected a plan of employee insurance at low rates, which has become very popular. It has instituted a comprehensive improvement program for foundry operation by means of which the American plan foundries of the city have become the best on the coast and among the best in the United States.

Besides the building industry, the association has effected its plan whole or in part in the lithographic, cigar, shoe, garment, taxicab, metal, warehouse, glass, lumber, hotel and restaurant and candy industries of the city.

It has protected the workers' interests in manifold ways, including the absolute enforcement of the eight-hour day, good wages and working conditions; and it has protected the public in many ways besides the elimination of strikes.

"The only large known city in the Anglo-Saxon world where union and non-union workers in the same craft, work side by side on the same job," is San Francisco.

The city has a right to be proud.

Reports are current at Sonora, Calif., that the Bell Marble Company plans to resume operations at the Bell quarry, near Columbia, Sonora County. The quarry has been abandoned for more than a year. A certified copy of articles of incorporation of the Bell Marble Company was recently filed at Sonora naming directors of the company as follows: Henry F. Boyen, Frank J. Fontes, Edward O'Gara, M. A. Burns and E. Hastings, all of San Francisco. The principal place of business for the company is given as San Francisco.

Articles of co-partnership have been filed in Redwood City for the Redwood Lumber Co., by Homer E. Robinson, Leonard J. Robinson, Jesse W. Kuffel and Cecil L. Davis. The principal place of business for the company is given as La Honda.

Carroll A. Low, sales manager for the Monolithic Portland Cement Co. of Los Angeles was a recent visitor to San Francisco. Mr. Low spent three days in Northern California to further the sale of Monolithic plastic waterproof cement.

John C. Daly of the firm of Stayner & Daly, building material dealers of Salt Lake City, Utah, spent a week in San Francisco as a guest of the Hauser Window Company, which firm he represents in the Salt Lake territory.

Colton Building Corp., capitalized at \$100,000 has been incorporated. Directors are: L. A. Colton, C. N. White, E. M. Colton, E. M. Epstein and C. H. Manning. The principal place of business is San Francisco.

The Monolithic Portland Cement Company of Los Angeles, manufacturers of Monolithic plastic waterproof portland cement, reports a gratifying increase in business during the last year, and announce that at a meeting of the directors, Jan. 2, the regular semi-annual dividend of 4% on preferred and a dividend of 8% on common stock was authorized to be paid during January.

Mongerson Electrical Works of Bakersfield is having a new plant constructed at Nineteenth and Grove Sts., that city. The plant will cover an area of 75 by 150 feet and with equipment will represent an expenditure of \$10,000.

B. A. Newman Co., plumbing contractors, have moved to their new quarters, 320 H street, Fresno. The new plant covers a ground area of 50 by 155 feet and was erected at a cost of \$10,000 exclusive of equipment.

E. W. Lakin, vice-president and managing director of Shelvin, Ltd., of Fort Francis, Ontario, has been named manager of the McCloud River Lumber Company at Yreka. Lakin succeeds F. H. Lambert who died recently.

Regular annual meeting of the Grant Rock & Gravel Co. will be held January 29 in Room 214, Kohl Bldg., San Francisco, according to announcement of Wm. S. Wilsey, secretary of the company.

Tilden Lumber Co. of Oakland, is reported to have purchased the plants of the National Mill & Lumber Co. of Oakland and Los Angeles and the Pacific Tank and Pipe Company.

PUBLICATIONS

"Sharing Management with the Workers" is the title of a recent report prepared by the Russell Sage Foundation. The report suggests a partnership plan which gives the employees of an industrial property a share in management and profits equal in many respects to that enjoyed by the owners. The report is based on a study of the partnership plan of the Dutchess Bleachery, Incorporated, at Wappingers Falls, New York, which in the opinion of the director of the department of industrial studies of the foundation, is one of the most significant of the several hundred current experiments in giving workmen a share in the management of business. The publication of this report reveals that the Russell Sage Foundation has had under way since 1919 a series of investigations covering several plans of employees' representation.

Indiana Limestone Quarrymen's Association, Bedford, Indiana, has issued volume 6 of the Indiana Limestone Library, Series B. While the volume was intended primarily for school building committees and others having to do with the building of school and college structures, it will also be of interest to contractors and architects. It contains an interesting series of illustrations showing the use of Indiana limestone, both as facing and trim, in all types of school and college buildings. The association has also issued Series D Detail and Data sheets showing details of stone cornices in connection with steel frame construction. The data sheets are prepared and published by the architects' service department of the association.

Building Officials' Conference has published the proceedings of its tenth annual meeting held at Louisville, Kentucky, April 8 to 10, 1924. The volume includes progress reports of the committee on construction safety code, of the committee on floor and wall openings, railings, and toe boards, and the report of the committee on building code requirements for lime. One chapter is devoted to the development of standard practice in the design, the fabrication, and the erection of structural steel for buildings. The entire contents of this volume of proceedings will be of unusual interest to contractors, architects, engineers, and builders.

Flax-lin-um Insulating Company, Saint Paul, Minnesota, has published a new catalog on heat insulation for houses. It outlines discussion of thermal transmissions of common types of walls and roofs with and without heat insulation. Charts that show heat losses on bungalows and other types of houses and methods of checking heat flow are included.

The Leach Company, Oshkosh, Wisconsin, will send a copy of its new 7-S Mixer Book to any contractor or engineer who requests it. The new publication contains reports of inspections made by the Robert W. Hunt Company, consulting engineers, on different makes of concrete mixers.

The initial draft of the uniform building code for the Eastbay cities, including Oakland, Berkeley, Alameda, Piedmont, Emeryville, Richmond, San Leandro, Hayward and Albany, will be ready on February 1, according to Horace D. Jones, chairman of the general committee, having the matter in hand. Mark C. Cohn, an authority on building and housing laws, is a consultant in the work.

Patents Granted to Californians

Compiled by Munn & Co., Patent Attorneys

Reuben B. Teeter, of Los Angeles. CASEMENT WINDOW. This invention provides a simple and economical casement window construction which effectively excludes rain and drafts, and may be used with any form or design of casement window without altering it.

William L. Murphy, of San Francisco. FOLDING BED. This folding bed embodies an improved foot frame and means for mounting it. It is capable of being folded to adapt it to be moved through a doorway, and has in the unfolded position stable head and foot frames with the appearance of the head and foot frame of an ordinary bed. Mr. Murphy assigns his patent to Murphy Wall Bed Co.

Gilbert Nahum Hammond, of Pomona. DEVICE FOR FORMING EYES ON METAL STRIPS. This device has a support which is equipped with a combined holding means for the usual pin adapted to be employed in the formed eye and a gauge predetermined by the thickness of the metal strip upon which the eye is formed.

Sarah E. Nolop, of Venice. FLUSH TANK. This relates to means by which the action of float ball is controlled in the flush tank and still not interfere with the action of the valve. The movement of the float ball is limited to a predetermined position.

Wallace E. Day, of San Francisco. SAFETY LOCK FOR ELEVATORS. This contemplates the use of a lock mechanism carried on the frame of the hatchway door and receives a latch member carried by a door. Electrical means is incorporated in circuit with the control mechanism of the elevator motor circuit to be completed. Mr. Day assigns his patent to Spencer Elevator Co.

John F. Makowski, of Stockton. COMPOSITE WALL CONSTRUCTION. This produces a relatively inexpensive wall to which may be applied a surfacing coat of plastic material, such as plaster or cement, the wall structure being such that the surfacing material will not crack or check when applied to it. Mr. Makowski assigns his patent to the California Cedar Products Co.

Mr. Makowski has also obtained a patent on Plaster Lath, which relates to the building art and particularly to wall construction. He has also assigned it to the California Cedar Products Co.

Charles T. McPhalen, of Los Angeles. TRUCK. This truck allows convenient handling of a large slab of concrete for constructional purposes. It provides a truck that may be pushed under a horizontally disposed slab.

Charles D. Davis, of Sacramento. DRAWBEAR FOR TRACTORS. This is especially designed for installation on tractors of the Fordson type, though it may be also adapted for use on other tractors as well. It may be easily and quickly installed on the tractor without having to make any alterations.

Frederick W. Hild, of Los Angeles. UNIVERSAL ROTARY EQUIPMENT FOR EARTH DRILLING. In this system of drilling tools the string is made up of a suitable bit screwed into the bottom of the drill rod which consists of rods or pipes screwed together.

Charles C. Powers, of Big Creek. MAGNETIC MOTOR. This comprises a field magnet with a straight base portion with a large and small hook, the ends or extremities which constitute the magnetic pole pieces between which are located a rotor consisting of an annular iron ring or steel blades projecting therefrom around the circumference.

Arthur H. McMaster, of Los Angeles. ENGINE-POWER-INCREASING DEVICE. This is applicable to practically all forms of fluid pressure engines with reciprocating pistons, the purpose being to materially increase the power that is developed by the engine with which the device is associated.

George Curcutis, of Monrovia. THREE-IN-ONE-VALVE. This provides a simple, practicable, substantial and easily movable valve with means in which either hot or cold water, or a mixture of the same may be dispensed.

Edgar Layton, of Larkspur. FIRE-RESISTANT SHINGLE AND METHOD OF MAKING IT. The object of this invention is to treat a wooden shingle so as to make it resistant to fire, and it provides a fire-resistant material which is durable and flexible and capable of being nailed without cracking or chipping.

Randall M. Dixon, of Stockton. COMPOUND SCREW JACK. This jack is so constructed that a very powerful raising effect will be had, and loads may be lifted through a considerable distance, while at the same time the jack when its parts are fully contracted, will occupy but relatively little vertical space.

Charles H. Gunn and John C. Newcomb, of Oakland. BRACE FOR WASH-TRAYS. This invention produces a bracket which is adapted to co-operate with the present type of plumbing and engages the center partition wall of the tray in such a manner as to hold the trays rigid and immovable so as to obviate conditions.

Alfonso Ditto, of Los Angeles. STONE-CUTTING MACHINE. This construction includes a plurality of cutters arranged for oscillatory movement, and is positioned in spaced relation alongside one another so that a plurality of cuts may be simultaneously made. Ditto assigns his patent to Ventura Bernardo.

David J. Conant, of San Jose. PUMP. This pump bowl is formed so as to greatly simplify the casting, and is so constructed as to be readily assembled with other bowls without additional mechanical complications.

Fred E. Greene, of Oakland. PAVING ROLLER. This is a power-operated paving roller, commonly known as steam rollers, and has for its object to heat the rollers to a temperature where it will be practicable to operate them over freshly laid paving.

Milton H. Schoenberg, of San Francisco. REFLECTING HEATER. This device has a plurality of reflecting surfaces adapted to reflect radiant energy as from heating or lighting elements in which there will be reflected radiant energy in a plurality of beams in separate paths.

Building News Section

APARTMENTS

Contract Awarded.
APARTMENTS Cost, \$44,000
OAKLAND, Alameda Co., Cal. W. Bellevue Ave. 62 N. Grand Ave.
 Three-story 42 room apartment house. Owner—Elinor Oas, 819 Curtis St., Oakland.

Designer and Contractor—C. H. Elrod,
 3532 Telegraph Ave., Oakland.

Additional Sub-Contracts Awarded.
APARTMENTS Approx. \$200,000
SAN FRANCISCO, N. Broadway 121-6 E. Laguna.

Ten-story class A apartments.
 Owner—Nineteen Sixty Broadway, San Francisco.

Architect—Quandt & Bos, Humboldt Bldg., San Francisco.
 Sub-contracts have been awarded as follows:

Metal lathing, plastering, etc. to Peter Bradley, 180 Jessie St., S. F., at \$24,753.

Sheet metal & flues to Western Furnace and Corning Co., 202 Brannan St., S. F., \$3171.

Tile to Rigney Tile Co., 180 Jessie St., San Francisco at \$1128.

Brick to Walter A. Reed, 196 Precita Ave., San Francisco at \$5534.

Bids Being Taken.
APARTMENTS Cost, \$125,000

POWER PLANTS

SEATTLE, Wash.—L. J. Vogter, 3567 E. R. St., Tacoma, seeks permit from the Univ. of Washington for hydro-electric, to appropriate 500-cm. ft. of water on Dosewallips river, tributary to Hood canal; proposed power site is 15 mi. up river from Teha canal in Jefferson county; 50 ft. dam in Pound Canyon 200 ft. long to impound water and a tunnel 2 mi. of steep grade to give 700 ft. head for generator having estimated h. p. of 20,000 is planned. Est. cost, \$2,000,000.

WESTMORELAND, Cal.—Southern Sierras Power Co. will start work shortly on power line from Shasta county through the Yall rail to Westmoreland. Cost, \$34,000. Materials have been ordered and the crew is on the site.

TRINITY-SHASTA COUNTIES, Calif.—Permit has been granted by Federal Power Commission to W. H. Samson, who with C. D. Hill, Corning, Calif., banker, will assist in financing hydro-electric plant and irrigation project Trinity and Shasta Counties, the total estimated cost of which is \$30,000,000. Irrigation features of project includes watering of lands in Tehama, Glenn, Colusa and Butte counties. The project proposes to collect waters of Trinity River and several of its tributaries, notably Stuart Fork and East Fork of Stuart Fork, in a large reservoir in Trinity county, which would have a tunnel bored through the divide as its outlet, allowing the water to flow down to a power house on Clear Creek near French Gulch, in Shasta county. The water would then be sent via Clear Creek and Willow Creek to another reservoir and released through another tunnel to flow down to a second power house on the Sacramento River north of Redding. At points farther south in the valley the added flow in the Sacramento would provide water for irrigation.

SAN DIEGO, Cal.—Lowerison and Wolstencroft, 3995 Oregon St., have started work on brick sub-station at La Jolla for San Diego Elec. Ry. Co.; \$75,000.

ALAMEDA, Cal.—Alameda Co., Cal.—Until Jan. 30, 5 p. m., bids will be rec. by A. D. Goldsworthy, secy. Board of Public Utilities, to fur. and del copper wire for City Electric Dept. Further information obtainable from secy., 1414 Park St., Alameda.

Classrooms and stairs, brick and plas. ext., tile and comp. rf. incl. conc. corridors and stairs, maple fls., folding partit.; \$84,000.

SAN FRANCISCO—Bureau of Architecture, Department of Public Works, has compiled the following report covering the progress being made on plans and specifications for school buildings, contracts for which are yet to be let: Alvarado School (Lick-Noe School) (s.e. Douglass and 22nd Sts.)—Plans completed and bids will be called for as soon as site is purchased.

Anza St. School (Lafayette) (south side Anza St., bet. 36th and 37th Aves) Preliminary plans in progress.

Le Conte School (west side Harrison St., bet. Precita Ave. and Army St.)—Final plans and specifications completed; bids will be called when site is acquired.

Mission High School (18th St., bet. Church and Dolores Sts.)—Plans and specifications in progress.

Mission High School Annex (Dorland and Dolores Sts.)—The land for this annex has not yet been purchased and nothing has been done toward moving old building.

Mission Junior High School (Everett) (10th, Dehon, 17th and Church Sts.)—Prel. plans completed.

Monroe Junior High School (Excelsior, London, Avalon and Madrid Sts.)—Preparation of prel. plans held in abeyance, awaiting further action of Board of Education.

Portola Junior High School (Girard, Bacon, Geettingen and Burrows sts.)—

NOW-A-DAYS TAXIES are as thick.

AS FLIES in summer time.

BUT SANDY Pratt, producer.

OF SAND, crushed rock.

AND WASHED gravel.

NEVER GETS any fun.

IN RIDING in taxis.

SANDY SPENDS his time.

WATCHING THE fast moving meter.

GOING LIKE a skyrocket.

YOU CAN'T watch the scenery.

OR SEE the pretty girls.

BECAUSE EVERYBODY is afraid.

THE TAXIMETER will jump.

FROM THIRTY to forty cents.

AND IF it doesn't jump.

FAST ENOUGH.

THEN SANDY Pratt gets nervous.

AND LIKE everything else.

WHEN THE event is over.

AND YOU thought.

IT WOULD be so terrible.

YOU FIND most.

OF YOUR anxiety.

WAS ALL imagined.

AND WE go through life.

WORRYING ABOUT things.

THAT NEVER happen.

BUT SANDY Pratt, president.

OF THE Pratt Building Material Co.

WITH SAND and rock plants.

AT MARYSVILLE, Sacramento.

PRATTOCK (NEAR Folsom).

AND PRATTO (Monterey County).

KNOWS HOW to save money.

WHEN SANDY rides in a taxi.

FROM THE S. P. depot.

IN SACRAMENTO.

TO SANDY's sand plant.

ON THE American River.

AT THE 12th Street bridge.

SANDY FINDS.

HE CAN save a dime.

BY STOPPING the taxi.

JUST TWENTY feet.

FROM THE sand plant.

THEN THE taximeter.

STOPS AT 80 cents.

INSTEAD OF 90 cents.

ALSO WHEN SANDY.

"TAXIES" FROM the Hotel Senator.

IN SACRAMENTO.

TO THE S. P. train.

SANDY FINDS.

IF HE stops the taxi.

50 FEET from the depot.

THE METER reads 45 cents.

INSTEAD OF 55 cents.

YOU SAVE another dime.

SANDY THOUGHT the legislators.

AND GOVERNOR Richardson.

AND THE newspaper correspondents.

WOULD WELCOME.

SANDY'S "ECONOMY" news.

AND SAY "I thank you."

Miss B. Rockcandy driving a "Rock-away" Taxi made at Prattock (near Folsom), home of Sandy Pratt's rock and gravel-crushing plant. —"Speed limit, 99 miles per hour. Fords do your best."

Prel. plans in hands of Board of Education.

Hawthorne School (east side of Shotwell St., bet. 22nd and 23rd Sts.)—Prel. plans in progress.

Hearst-Moulder School (Oak, Page and Webster Sts.)—Prel. plans in progress.

Henry Durant School (Buchanan and O'Farrell Sts.)—Prel. plans in progress. Galileo High School (additional units, gymnasium and athletic field, in block bounded by Van Ness Ave., North Point Polk and Francisco Sts.)—Plans in progress.

Edison School (west side Dolores St., bet. 22nd and 23rd Sts.)—Prel. sketches in progress.

Everett (Sanchez) School (east side Sanchez St., bet. 16th and 17th Sts.)—Final plans and specifications completed. Contract was let for the moving of the present school and work is practically completed.

PHOENIX, ARIZ.—Archts. Lescher & Mahoney, Bank of Ariz. Bldg., are preparing plans for new 1-story brick high school bldg. at Fort Thomas; 3 classrooms, aud., manual training and dom. science depts., library, showers and lockers; stucco exter., htg. sys.; \$50,000.

8848—Osaka, Japan. Large Japanese importers desire to buy brass scrap, old sheet brass, railings, brass tubes, etc. Samples and quotations are requested. Prices should be competitive with present European source.

8851—Mexico City, Mexico. Manufacturers of langlass desire to send samples and prices to interested San Francisco importers.

Official Proposals

NOTICE TO CONTRACTORS

(Gymnasium and Auditorium—Woodland High School District)

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the Woodland High School District, Yolo County, State of California, in the office of Parish & Wraith in Woodland, at 7:30 P. M. on the 6th day of February, 1925, for the erection and completion of a new Gymnasium and Auditorium Building, to be erected on the High School property in the City of Woodland, according to plans and specifications prepared for the same by W. H. Weeks, Architect.

Bids will be received as follows:

- General Construction.
- Plumbing Work.
- Electrical Work.
- Heating and Ventilating.

Plans and specifications may be seen at the office of the Architect, W. H. Weeks, 369 Pine Street, San Francisco, California, or at the office of the Principal of the High School in Woodland, California.

All bids should be presented on bid forms furnished by the Architect. Each bid must be accompanied by a certified check on some responsible California Bank in a sum not less than five (5%) per cent of the amount bid, made payable to President of the Board of Trustees of the Woodland High School District, for the purpose stated in specifications.

Each bid must be delivered in sealed envelope and addressed to Wm. M. Hyman, Clerk of the High School Board of Trustees, and endorsed: "Proposal for New Gymnasium and Auditorium Building."

The Board reserves the right to reject any and all bids.
(Signed) J. L. HARLAN, President, Board of Trustees of the Woodland High School District, Woodland, Yolo County, California.

NOTICE TO BIDDERS

(City of Eureka—Pipe)

Sealed proposals or bids are hereby invited by the City of Eureka for furnishing ten thousand lineal feet (10,000) of two inch standard black pipe, Random length, or ten thousand feet (10,000) of two inch standard galvanized pipe random length. Also two thousand five hundred feet (2500) of three inch standard black pipe or two thousand five hundred feet of three inch standard galvanized pipe, for use by the Eureka Water Department of Eureka, f. o. b. dock Eureka, Calif.

Delivery to be made within ninety days after award of contract. The said bids will be received in sealed envelopes marked Bids for two and three inch pipe, at the office of the Superintendent of Public Works of the City of Eureka, California, up to the hour of 5 P. M., Tuesday, January 20th, 1925. Bids will be opened by the City Council of the City of Eureka, at 8 o'clock P. M. on the twentieth day of January, 1925. The right is reserved to reject any or all bids.

Dated January 8, 1925.
JOHN GRIFFITH,
Superintendent of Public Works of the City of Eureka.

NOTICE TO CONTRACTORS

(Radio Tower—Cavite, P. I.)

SEALED PROPOSALS, indorsed "Proposals for Tower, Cavite, P. I. Specification No. 5,577, will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., until

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

At 1 o'clock A. M., Feb. 18, 1925, and then the public opened for 210-foot self supporting steel radio tower, at the Naval Radio Station, Cavite, P. I. Specification No. 5,557 and accompanying drawing may be obtained on application to the Bureau of the Commandant, Navy Yard, Mare Island, Calif. Deposit of check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawing and specification. L. B. GREGORY, Chief of Bureau, December 15, 1924.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on February 9, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Los Angeles County, between Arroyo Sequit and Las Flores Canyon (VIL-60-A) about sixteen and three-tenths (16.3) miles in length, to be graded.

Riverside County, a reinforced concrete girder bridge 21 feet wide, across San Geronimo Wash, about two miles east of Banning (VII-RIV-26-C), consisting of five 39 foot spans on concrete bents, and the bridge approaches to be graded and paved with portland cement concrete.

Plans may be seen and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Wilhite, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division

office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,

California Highway Commission.

R. M. MORTON,

Architects—Engineers— City and County Officials

How about bids wanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it?
If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3 3 4 0

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to

KOEHRING

DANDIE Light Mixer

Dandie with steel disc wheels and solid rubber tires; power charging skip, water tank and gasoline engine.

Dandie with steel trucks; power charging skip, water tank and gasoline engine.

EQUIP it to your special needs. Rubber tires to save the time waste of between-job hauls, and to expand your working territory. *Light duty hoist. Low charging platform or power charging skip. Automatic water-measuring tank.*

Most important, you can be sure of full capacity—utmost reliability—and long service life—because this mixer is Koehring built, engineered and constructed to out work, out last anything in the light mixer field. Price? Not the lowest price

—no—but the most remarkable value of all light mixers—and still within the range of light mixer prices.

CAPACITIES

4 and 7 cu. ft. mixed concrete, steam or gasoline power. May be equipped with power charging skip or low charging platform with hopper, light duty hoist, automatic water measuring tank. Mixes mortar as well as concrete.

U. S. CEMENT TRADE SHOWS BIG INCREASE

The production of cement in the United States during the first eleven months of 1924, amounted to 138,424,000 barrels, as compared with 127,350,000 for the 1923 period.

At the present rate of production the cement industry bids fair to exceed the 1923 output, which was the largest in the history of the industry.

Actual shipments of cement for the period under review aggregated 140,102,000 barrels, an increase of 10,683,000 over the same period of the previous year.

Stocks, which were exceptionally large during the first half of the year, as well as during the corresponding months of 1923, have fallen off considerably, amounting to only 8,927,000 barrels in November, 1924, an increase, however, of about 1,36,000 over the corresponding month in 1923.

The imports of cement during the 1924 period under review amounted to 1,833,362 barrels, valued at \$2,825,390, compared with 1,574,213 barrels, worth \$2,793,157, for the first 11 months of the previous year.

In 1923 Norway furnished the United States the largest share, with Denmark second and Canada third, while in 1924 Belgium shipped in the largest amount, with Norway second and Denmark third.

Exports of cement from the United States during the first 11 months of 1924 amounted to \$25,692 barrels, valued at \$2,451,515, as compared with 21,201 barrels, worth \$2,716,262, during the 1923 period—a decrease of 95,495 barrels in quantity and \$264,747 in value. Cuba, Mexico, Colombia, and Venezuela were the best customers for cement during 1924.

History of Portland Cement Industry in U. S. is off Press

Almost coincident with the one hundredth anniversary of the invention of portland cement, which was observed quite generally during 1924 both in England and in America by various interests associated with the construction industry, the International Trade Press, 53 West Jackson Boulevard, Chicago, announces the publication of a "History of the Portland Cement Industry in the United States."

This is the first time any attempt has been made to collect and compile material for a story of the wonderful development wrought through the world because of the widespread acceptance of cement—the basic building material—as typified in concrete.

The History of the Portland Cement Industry is a well printed, profusely illustrated and attractively bound volume with more than 300 pages. Its authors, Robert W. Lesley, John E. Lober, and George S. Bartlett, have collected instructive material in a most interesting and well as for the technical man, the progress of Portland cement since Joseph Aspdin, the humble stone mason of Leeds, England, named the product in connection with his patent of October, 1824.

No other person in the country is better qualified to review the history of portland cement, particularly in the United States, than Robert W. Lesley. Associated as he was some fifty years ago with the pioneer manufacturers of America and very shortly afterward becoming one of these pioneers himself, intimate association with the business of cement making and cement selling through the greater portion of the past fifty years has placed him in possession of an unequalled fund of first hand knowledge of the industry's development.

The "History of the Portland Cement Industry in the United States" is fittingly introduced by a Foreword contributed by Floyd W. Parsons, well known as a member of the American Institute of Mining and Metallurgical Engineers, Academy of Political Science, founder and former editor of Record, author of several standard books on American business and business methods, but perhaps known best to the great mass of intelligent American readers through his conduct of the department in the Saturday Evening Business.

With a trained engineering mind and the natural facility for discussing technical subjects so that the layman can comprehend them, this Foreword contains in small space the romance of the cement industry. Mr. Parsons says: "The Cement Industry of the United States has established for itself a position of such permanence and importance in America's industrial life, that neither arguments nor eulogies are needed to gain public recognition and we may search the whole field of material virtues and yet find nothing that so commands our respect as does permanence."

"Cement means concrete; concrete

means stone; and stone spells eternity, so far as our finite minds can comprehend. The development of methods to manufacture great quantities of synthetic stone has given our present civilization the durability it so much needed. The creation of a great cement industry has removed to life of a coming timber famine. The rapid progress of science and engineering in our country, has been made possible by our cement mills, which have given us the essential material on which to found our prosperity."

Perhaps the average history of industrial life would fail to interest the layman because he cannot picture himself as particularly dependent upon any one industry. The far reaching effect of the ever-growing use of concrete reverses this situation with respect to the history of Portland cement industry. From an annual production of less than 10,000,000 barrels a year but little over a quarter of a century ago to a production of nearly 150,000,000 barrels per year today, makes each human being in this country a theoretical user of nearly one and one half barrels per year.

In the "History of the Portland Cement Industry of the United States" the reader will find interesting stories of its leaders, Saylor, Millen, Shinn, Lesley, deNavarro, Lober, Bartlett and other pioneers. These men not only had faith and courage, but vision and imagination, without which industry lags and the future is hopeless.

The History is divided in convenient chapters covering phases of development, such as processes of manufacture, advances in the mechanical methods, the years through which the industry suffered from the serious effects of ill advised, unwarranted and often the promotion of fake plants.

In a necessarily brief review like this, it is impossible to picture all that awaits the reader of this interesting publication. For example in one of the three appendices, the history of the development of the Portland Cement Association is recorded.

One cannot fail to be impressed in reading this History that the leaders of a great business like cement manufacture are justly shouldered with a great responsibility. Some things we can do without, but we might as well attempt to hide the sun with a sieve as to try to create a high degree of prosperity in our land without an adequate supply of cement. If destiny has decreed that we must do the world's manufacturing, this means we must have more and better highways, more dams, more sidewalks and curbs, and more subways and tunnels, more barns and other farm structures, more machine foundations, more coal bins, offices and factories that will stand unimpaired in the face of driving flames and the destructive action of natural elements. Where one thing is made hundred things today, we will make one hundred things tomorrow.

The "History of the Portland Cement Industry in the United States" may be obtained by remitting \$3.00 to the International Trade Press, Inc., 53 West Jackson Boulevard, Chicago.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The Associated General Contractors of America, meeting in Washington, D. C., Jan. 13, divided attention between suggestions for decreasing unemployment by continuing building operations throughout the year and a proposal to institute an investigation to determine comparative costs of public works when performed by contractors or with public officials in charge of operations. Edward E. Hunt, secretary of the President's conference on unemployment which recommended that the construction industry continue instead of stopping work during the winter, declared that investigation and disclosure that the practice recommended would go far toward relieving crises of unemployment, especially if supported by municipal, state and federal governments.

Union electricians locked out of Santa Barbara shops since last Thursday returned to work Jan. 19 under an agreement by committees from the workmen, the contractors and the Building Trades Council. While neither side claimed a victory, the status of "hire-as-we-please" sought by the contractors was recognized, and as a result a handful of the union men found themselves out of work. One contractor declined to discharge several non-union men brought from out of town to make room for those locked out, another refused to take back all his old employees on the ground that work had fallen off and he could not use them.

Proposed reclamation of 128 acres of Alameda's south shore tidelands at a cost of \$800,000 will be placed before the Alameda city council by a delegation of tidelands property owners supported by the chamber of commerce. According to present plans, owners of the lands will develop the property, receiving some possible financial assistance from the city in construction of a bay shore highway and concrete rip wall.

The superior court of Tuolumne county decided in favor of the plaintiff in an action to quiet title to certain lands embraced in the holdings of the Bell Marble quarries of Columbia. The defendants named in the action were Attorney Wilzinski, as administrator in the estate of George Hale, deceased, and Public Administrator Burden, as administrator of the estates of Herman Wolfe, Peter Murray and Oscar Dellen.

San Mateo-Burlingame Exchange Club has endorsed proposed construction of \$1,000,000 rapid transit and vehicular tunnel through the Santa Morena Mountains, to open up Half Moon Bay territory. The tunnel would be 4,000 feet in length with double track tramway and a two-way highway. A county bond issue is contemplated to finance the project.

Wilbur A. Harrison, St. Helena contractor and builder, has petitioned the Federal Court to be adjudged a voluntary bankrupt. He lists his liabilities at \$2001. John M. Dennis, Oakland building contractor, in asking to be adjudged a voluntary bankrupt, admitted liabilities of \$2711, with assets of \$1870.

Assemblyman Scofield of Los Angeles will introduce a bill which will prohibit the erection of buildings of more than 13 stories in height and will also provide for the creation in cities, counties and incorporated towns throughout the state of districts or zones in which zoning commissions would have sweeping regulatory powers. Zoning commissions under the provisions of the proposed measure, would be empowered to prescribe the space that must be occupied on the lots within the districts by buildings, would have the power to regularly inspect, order and enforce repairs or changes on construction in such buildings. The bill is intended to correct conditions of congestion on the streets in certain areas within cities and promote safety from fire panic and other dangers.

Commissioner Harley W. Brundige has been elected president of the Railroad Commission of California, succeeding Commissioner Clyde L. Seavey, who has held that position for the last two years. Commissioners George D. Squires and Ezra W. Decoto, who were appointed by Governor Friend W. Richardson to succeed Commissioners Irving Martin and James T. Whittlesy, terms expired, have assumed their duties as members of the commission. Commissioner Squires served as Insurance Commissioner of California the last two years and is a practicing attorney. Commissioner Decoto has served a number of years as District Attorney of Alameda County, and is also an attorney of many years experience.

The suit of the United States Government against the Maple Flooring Manufacturers' Association, involving alleged violations of the anti-trust laws, will be argued before the United States Supreme Court for a second time on February 24, under an order issued by the court recently. This case grew out of charges made against the association by the Federal Trade Commission in effect that it was violating the anti-trust laws through its methods of sales, price reports, stocks on hand and similar trade information. The charges of the commission were sustained in the lower federal court.

The Southern Pacific Railroad has been ordered by the State Railroad Commission to pay the McGilvray Raymond Granite Company all charges collected in excess of the rate of 1 1/2 cents per 100 pounds, minimum weight 50,000 pounds, which is found to be the reasonable rate for the transportation of dressed granite moved during the period September 1 to October 15, 1923.

The Fresno Builders' Exchange, at its last regular meeting, reiterated its former policy of welcoming outside competition in the building trade, but condemned any practice of local firms bringing outside builders into Fresno for construction work without permitting local builders to compete for such construction.

Roland McDonald, 31, reported to be a former San Francisco contractor, died in Berkeley, Jan. 14. McDonald is reported to have built the Fort Point barracks and several other large structures in San Francisco.

ALONG THE LINE

The Chester H. Loveland Engineers, Balboa Elder, San Francisco, announce that Mr. F. M. Faude having resigned as chief hydraulic engineer of the California State Railroad Commission, has become associated with the staff of that organization and has taken up the work of consultation and practice in the office. He brings a wide engineering experience and knowledge of the design, construction, operation, accounting and regulation of domestic and irrigation water systems, railroads, reclamation and water supply projects. He has been with the Railroad Commission for seven years, the past two as Chief of the Hydraulic Division.

Andrew M. Jensen, Fresno engineer, has been selected to settle a dispute between Hanford citizens and the California Construction Co. of San Francisco, street paving contractors, regarding the quality of newly laid pavement. Citizens refuse to pay for the work on the grounds "that the pavement is not what it should be." Engineer Jensen will work with Ben Duffield, Hanford city engineer, who in the first stages of the dispute is reported to have recommended to the city trustees that they refuse to accept the pavement.

H. A. Van Norman, city engineer of Los Angeles, has asked the city council to authorize the employment of 116 additional men Feb. 1 to clean up accumulated work of the department. The list includes 20 chainmen, 12 instrument men, 6 junior surveyors, 20 junior civil engineers, 3 assistant engineers, 4 supervisors of surveys, 1 night of way clerk, 9 foremen, 1 superintendent, 10 laborers and 2 field parties to take care of the work on viaducts and bridges.

Heisaburo Kawaguchi, engineer for the electrical bureau of Tokyo, Japan, and Dr. K. Murigaki, city engineer of Kobe, were recent visitors to San Francisco inspecting various municipal projects.

E. E. Welch has been installed as president of the Sacramento Technical Engineers' Union. D. R. Cate was installed as secretary. S. A. Hart, retiring president, was presented with a gold pen, the gift of the organization.

James W. Plackett, architect, formerly located at 2014 Shattuck Ave., announces the removal of his offices to larger quarters in Room 404 Mercantile Bank Bldg., Shattuck Ave. and Center Sts., Berkeley. Phone Berkeley 5932.

M. H. Irvine, city engineer, has been appointed city manager of Alhambra, and the duties of the two positions will be combined. The salary of the city manager has been fixed at \$6000 a year.

State Highway Commission estimates cost of constructing Feather river highway from Oroville to Quincy, via the North Fork routing, at approximately \$7,500,000.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

LOS ANGELES BUILDERS LET CONTRACT FOR NEW HOME

After a comprehensive study of club buildings throughout the United States, plans for a thirteen-story Builders' Exchange Building to cost approximately \$875,000 have been completed by the Los Angeles Builders' Exchange, who have just made final arrangements for the erection of the structure.

Plans for the building, which will be financed by the Builders' Exchange Holding Company, call for one of the finest structures of its kind in the country, according to Emil Brown, chairman of the Los Angeles Exchange's building committee. Walker & Eisen, prominent architects of Los Angeles, who have designed some of the finest of the southern city's height-limit buildings, have completed the plans for the Builders' Exchange Building and excavation work will start at once.

The Los Angeles Builders' Exchange will occupy the top two floors of the building, the remainder being devoted to offices and lofts. These two stories will contain the general offices of the Exchange, assembly halls, buffet kitchen, club rooms and a library. Edwards, Wilsey & Dixon have the contract for the construction work.

LUMBERMEN ELECT

Carl Blackstone has been re-elected president, George Rich, vice-president, Frank Compton, treasurer and Phil Hilditch, secretary of the Seattle Retail Lumbermen's Credit Association. Trustees chosen were Dominick Brace of the Brace Lumber Co., Alvin Schwager of the Nettleton Lumber Co., Frank Compton of the Compton Lumber Co.; J. F. Ranning of the Ranning Co.; George Rich of Colby and Dickinson, Inc.; W. C. Bell of the Bell Lumber Co.; Charles Clark of the Elliott Bay Co. and Lee Farrell of the Farrell Lumber Co.

S. F. INDUSTRIAL ASSOCIATION ELECTS OFFICERS

Francis J. Baker, president of Geo. H. Tay Company, was re-elected president of the Industrial Association of San Francisco at the annual organization meeting of the association's board of directors. Other officers elected at the meeting, and who will serve with President Baker during 1925, were: J. W. Maillard Jr. of Maillard & Schmiedell, first vice-president; Walter Haas, vice-president; Levi Strauss & Company, second vice-president; A. J. Kleinmeyer, vice-president; Pierce Arrow-Pacific Sales Company, third vice-president; Carl E. Heise, district manager Westinghouse Electric & Manufacturing Company, fourth vice-president; D. Lyle Gihirardelli, president D. Gihirardelli & Company, secretary; S. S. Kauffman, president H. S. Crocker Company, treasurer.

S. F. MASONS AND BUILDERS HOLD ANNUAL BANQUET

The annual banquet of the Masons and Builders' Association of San Francisco was held Saturday evening, Jan. 17, at the Richelieu Hotel.

M. B. McGowan, president of the association, opened the evening with a brief talk on the progress of the association in both membership and in accomplishments for the betterment of the industry.

W. W. Dennis of the McNear Brick Company was another speaker, his talk covering conditions in the brick industry at the present time.

A telegram from Wm. H. George, president of the San Francisco Builders' Exchange, was read. Mr. George regretted his inability to attend the banquet and conveyed his wishes for a pleasant evening.

During the evening an entertainment was carried on through arrangements of Henry Larsen and Jas. S. Fennell. Dancing was enjoyed between acts until 12 midnight.

Walter Reed officiated as Chairman of the Banquet Committee.

RICHMOND BUILDERS' EXCHANGE ENJOYS DUCK DINNER

Some 150 members of the building fraternity in the East Bay District attended the duck dinner served by Charlie Brown, Richmond plasterer, in the assembly room of the exchange quarters, Friday evening, Jan. 16.

Brown's celebrated duck stew was prepared by S. C. Rogers and Chief Wimberly, and in the opinion of those present, its flavor exceeded all past efforts of the chefs.

The affair was an informal one, pre-arranged by the spirit of good fellowship for which Brown's dinners are famous. Entertainment was provided by the Black and Tan orchestra from Oakland and some clever singers and dancers.

T. M. Sanford, president of the Richmond Exchange, on behalf of the organization presented Brown with a handsome floor lamp. Sanford announced that the occasion was Brown's birthday, a fact which Brown had kept secret from all except a few of his most intimate friends.

S. Morehead, on behalf of the Oakland Builders' Exchange, presented Brown with a gold pen, declaring the Oakland Exchange, as well as the one in Richmond, appreciated Brown's efforts in behalf of the principals for which the Builders' Exchanges stand.

PORTLAND BUILDERS ELECT

The Master Builders' Association, with offices in the Worcester Building, Portland, Ore., at the regular annual business meeting, elected the following officers: Ray A. Powers, (re-elected), president; Leo N. Hulls, vice president, succeeding Jas. I. Marshall; O. G. Hughton, (re-elected), secretary-treasurer; E. C. Vanderhoof and Jas. I. Marshall named official delegates to the Building Employers' Association. Victor Carlson and L. E. Selberg are the alternate delegates.

ARCHITECTS ELECT

Southern California Chapter, American Institute of Architects, has installed the following officers to serve during the year 1925: D. C. Allison, president; William R. Burns, vice-president; D. J. Sitas, secretary; A. C. Zimmerman, treasurer; Donald B. Parkinson and C. E. Noerenberg, directors.

EXCHANGE DIRECTORS NAMED

Eleven directors have been elected by the Portland, Ore., Builders' Exchange to serve during the year 1925. The new directors are: F. E. Wynkoop, B. T. Allyn, C. C. Fitzhugh, D. L. Hoggan, W. G. Mannan, Thos. Muir, C. Steinger, Robert Wallace, C. Bnke, William Feigensen and William T. Finnegan.

ENGINEERS ELECT

Henry Rieger, city engineer of Phoenix, Ariz., has been elected president of the Phoenix Chapter, American Association of Engineers. B. A. McNelly was elected first vice-president; J. E. Girand, second vice-president and Ralph Hoffman, secretary. Vic Householder was selected as manager for the chapter.

LANDSCAPE ARCHITECTS WILL EXHIBIT WORKS

The second annual exhibit of landscape architecture at Southwest Museum in Los Angeles will be held during February and will be open to all landscape architects of California. Awards will be given for city planning, park planning, residential subdivisions, country clubs, institutional development, cemeteries and residential development. A jury of five members consisting of two landscape architects, an architect and two from allied professions will make the awards.

SANTA CRUZ BUILDERS SEEK TO ORGANIZE EXCHANGE

Fifteen members of the building fraternity in the Santa Cruz district, meeting in the Chamber of Commerce rooms, Santa Cruz, voted in favor of organizing a Builders' Exchange. C. M. Doane, Jack Norton, J. M. Church, Walter Paine and Percy Whitney were appointed a committee to confer with building material firms and contractors with regard to membership in such an organization.

R. W. Chrouch, secretary-manager of the Fresno Builders' Exchange, was present at the meeting and explained in detail the operation of his exchange and stressed the benefits derived by the Fresno construction fraternity through a centralized headquarters, protection from unscrupulous contractors, mutual goodwill and confidence and understanding between contractors, sub-contractors and the men in their employ.

The following is a partial list of firms represented at the meeting: Whitney Bros., C. M. Doane, C. M. Blalock, Twin Lakes Lumber Co., Newhall & Littlefield, Hayward Lumber Co., Hamilton & Church, Wilson & McGranahan, Byrne Bros., Santa Cruz Paint Co., H. A. Brostrom, Walter L. Paine, Martin & Woods, B. Ray Greenfield and J. McKay.

TRADE NOTES

The cost of Fenestra steel basement windows has been reduced approximately fifteen per cent, effective the first of the year. This reduction, according to the Detroit Steel Products Co., manufacturers, has been made possible by two things: (1) More general acceptance of the steel basement window idea on the part of the builders and home owners; (2) Volume production, with a consequent reduction in manufacturing and selling expense.

Negotiations are under way at Pittsburg, Contra Costa County, to lease space at the Junta Wharf for storage of sand, gravel, brick and other building materials to supply the Pittsburg territory, according to R. E. Childs, head of the Pittsburg Construction Co. Childs claims that a survey of local conditions has assured him that the demand for building materials in large quantities is sufficient to justify the venture.

Pacific Northwest Brick Manufacturers' Ass'n. has opened offices at 510 Lewis Bldg., Portland, Ore., with M. B. Reilly, formerly of Chicago in charge. The office was established to afford service to architects, engineers and contractors and to promote the use of brick and hollow tile.

Geo. F. Comstock, former city engineer of Santa Rosa, has purchased the Sonoma county rights to manufacture "Thermotite," a building unit, from the Thermotite Company of San Jose. Construction has been started in Santa Rosa on a plant for the manufacture of the product.

W. T. Alexander and E. W. Berg, formerly of San Francisco, have opened a sheet metal and furnace shop at 121 Main street, Redwood City, and will operate under the name of Redwood City Sheet Metal & Furnace Company. A radiator, fender and auto sheet metal service will also be maintained.

V. Avery Thompson, former city manager of Phoenix, Ariz., has arrived in Los Angeles to enter the contracting business with Claude Fisher in general engineering construction. Mr. Fisher was engaged in contracting at Phoenix for ten years, going to Los Angeles three years ago.

J. E. Wilson, general contractor, formerly engaged in home building activities in Los Angeles, has located in Richmond, Contra Costa County, and contemplates the erection of several homes in Grand View Terrace, that city.

The annual meeting of the Pacific Portland Cement Co., Consolidated, will be held Jan. 30, in room 824, Pacific Bldg., San Francisco, according to an announcement of Harry Battelle, secretary of the company.

The regular annual meeting of the stockholders of the Russ Lumber Co., the Southern California Lumber Co., and the L. W. Blinn Lumber Co., will be held at 3206 Balfour Bldg., San Francisco, Jan. 28.

A. J. Patterson, superintendent of the Sunset Lumber Co., died Jan. 19 at the Aahmes Temple of the Mystic Shrine, Oakland, while playing cards. Death was due to heart failure. Patterson was 55 years old and married.

General Contractors of San Francisco Hold Annual Banquet

BY THE OBSERVER

New Exchange Building

"Together, friends, we ate and drank, And chit-chat had and chuckle—
At stories, pranks and nimble wit,
And jokes and fun a muckle."

And that we did—last Wednesday evening in the French Parlor at the Palace Hotel—as guests of the General Contractors of San Francisco—a body of men organized under the standard of "integrity, responsibility and efficiency."

As general contractors, we view their works every day in the standing buildings and in buildings in course of construction and in viewing these we vouch for "integrity, responsibility and efficiency."

As hosts, we give our hearty approval to the above standards—and more.

We would provide the addition of two words to the standard—Quality and Quantity.

The annual banquet of the General Contractors of San Francisco opened with a hearty greeting extended by the Hospitality Committee of the organization. Following this preliminary the members and guests gathered in the banquet room where an elaborate supper was served. Speeches between plates, were brief and instructive inasmuch as all speakers devoted their talks to matters directly affecting the construction industry, particularly as regards the general contractor and his sub-contractors.

Coburn Is Toastmaster

Ira W. Coburn, general contractor, introduced by John Biller as the coming "political figure" in San Francisco, acted as toastmaster. Coburn occupied his position with ease closing the talk of each speaker with an instructive remark or a snappy story.

John Biller, president of the General Contractor, in a brief talk spoke of the prosperity enjoyed by the building fraternity during the past year and predicted an even greater year in 1925. His announcement that the San Francisco General Contractors had the largest organization of its kind in the United States was greeted with considerable applause.

Ralph McLaren Talks

Supervisor Ralph McLaren, representing Mayor Rolph, who was unable to attend due to the pressure of official business, spoke on the progress made during recent years in the promotion of co-operation between members of the construction industry. Commenting on the \$58,000,000 building program in San Francisco during 1924, McLaren predicted a greater year in 1925, knowing of \$15,000,000 worth of private construction slated to be undertaken in the immediate future in addition to \$9,000,000 to be expended for municipal projects.

CARPENTERS' TRICK ARM LANDS HIM IN SAN QUENTIN

A "trick arm" that could be "broken" at the owner's will, finally helped Mark Upton, a carpenter, to break into San Quentin Prison. The state industrial accident commission so discloses. Upton and Mart Upton, both the same individual, filed claims last November for compensation for broken arms.

When Upton appeared to file a claim he was recognized as Upton who had

asked for compensation the week before. Both claims were for broken arms. The man was arrested, pleaded guilty to perjury and was sentenced to five years in the state prison last November. Examination showed that Upton had a "trick elbow" and that by bending his arm with slight force could make it snap with a sound that could be heard twenty feet away.

The commission found that the same arm had been used on four insurance companies before.

Craft Building Urged

Wm. Mooser, architect, urged that the builders erect a structure to be devoted entirely to the construction trades—for architects, contractors, materialmen, artists and other crafts associated with the building industry. He urged better building laws, favoring the plan of the East Bay building fraternity for a uniform building code for San Francisco and the bay district.

Horace D. Jones, president of the Contractors' and Builders' Association of Alameda County, spoke on the increased building operations in the East Bay district. In Oakland for the year 1925, Jones predicts a \$11,000,000 building expenditure. He outlined the progress of the East Bay construction interests in the preparation of a uniform building code and urged the co-operation of the San Francisco builders to obtain a code that would serve a "metropolitan district."

Other Speakers Heard

Among others who made brief talks were: Louis J. Bailey, acting chief building inspector of the Department of Public Works; Supervisors Angelo Rossi and J. Emmett Hayden; Chas. Compton; Albert J. Evers, secretary San Francisco Chapter, American Institute of Architects; E. J. Simmons, manager and E. G. Lloyd, secretary of the Contractors' Association of Northern California; E. W. Shaw, secretary, Alameda County Builders' Exchange; Geo. T. Bowen; Chas. Wright; Earle B. Bertz, architect and D. B. Farquharson.

Music during the banquet was furnished by a six-piece jazz orchestra. Entertainment was provided by Elmer Gallagher, the insurance agent with his new singing dog. Piano, short story and singing numbers were offered by C. A. Winkelmann; Jack Reis; Ralph T. Goldsmith and others.

Credit for the success of the affair is due to E. T. Thurston, secretary of the General Contractors, assisted by Leroy D. Frasier, D. Stockholm and G. K. Jensen, who comprised the banquet committee.

asked for compensation the week before. Both claims were for broken arms. The man was arrested, pleaded guilty to perjury and was sentenced to five years in the state prison last November. Examination showed that Upton had a "trick elbow" and that by bending his arm with slight force could make it snap with a sound that could be heard twenty feet away.

The commission found that the same arm had been used on four insurance companies before.

PUBLICATIONS

Patents Granted to Californians

Compiled by Muun & Co., Patent Attorneys

"Steel Construction" is the title of a booklet just issued by the American Institute of Steel Construction, which contains the Institute's Standard Specification, and Code of Standard Practice. The introduction of the book consists of a mathematical explanation of the development of the various formulae recommended in the Specification, for the proper reduction of working stresses. Accompanying this explanation is a set of charts which eliminate a vast amount of mathematical calculation in connection with structural steel design. An interesting feature of the booklet is the data given on action of structural steel members under varying conditions. For many years there has existed a pressing need for a structural steel handbook which would assemble, in usable form, data now scattered through the pages of handbooks published by the steel mills, works on engineering, technical magazines and scientific papers. Preparation of such a handbook has been undertaken by the Institute, "Steel Construction" being a forecast of what may be expected when the task is completed. Copies of "Steel Construction" may be obtained from the executive offices of the Institute, 350 Madison Ave., New York, or the engineering department, 1952 Leader-News Bldg., Cleveland, Ohio.

The Hercules Cement Corporation, 1600 Walnut street, Philadelphia, has issued a booklet entitled "How Portland Cement is Distributed," by Morris Kind, president of the corporation. The booklet outlines the advantages to consumers of cement derived from the nation wide location of producing plants and direct distribution from manufacturer to retailer. According to Mr. Kind, scarcely any other industry combines the threefold advantages to the consumer of large scale and widely distributed production, nearby sources of supply, and direct sales from manufacturer to retailer.

Hess Warming and Ventilating Company, 1215 South Western Ave., Chicago, has issued an illustrated catalog of Hess snow white steel cabinets and mirrors. The catalog outlines the merits of the steel medicine cabinet in permanence, cleanliness, and enduring beauty, and illustrates the various styles in which Hess cabinets and mirrors are made, together with complete specifications and prices. Architects and contractors interested in securing copies of the catalog should write the manufacturers.

American Steam Pump Company, Battle Creek, Michigan, is distributing a bulletin illustrating and describing the Barton portable pump. The Barton pump is easily attached to cars, trucks, and tractors and therefore practical for construction and road work, for furnishing water supply on irrigation projects, removing drips from gas mains and also has many other uses.

"Building Economy" is the name of a new monthly published by the Common Brick Manufacturers' Association. "Building Economy" will especially endeavor to encourage home owning, and will include practical advice regarding finance, lot buying, resale value, maintenance, insurance, and other matters vital to the building owner.

Miss E. Graves and Carl C. Severin, of San Francisco. **HIGH-TENSION OPERATING SWITCH.** The object of this invention is to dispose of the dielectric parts of the switch that they may be adapted to not only withstand the destructive electrical stresses to which they are exposed but that they may also successfully withstand the mechanical stresses to which they are frequently subjected.

Robert W. Seyms, of San Francisco. **WATER CONTROL FOR SPRINKLERS.** This invention comprises an automatic water control for use in connection with the sprinkling of lawns, gardens, or ground surfaces generally.

Herman C. Krelpk, of Los Angeles. **DOUBLE-ACTING DOORCHECK.** This is a door check for swinging doors which will automatically hold a swinging door open either way, and which will also hold it closed.

Charles Swan, of San Francisco. **PAVING COMPOSITION.** This relates to compositions for pavements and sidewalks which contain as a binder solid bituminous products, such as asphalt and mineral pitch, and an object of this invention is to increase the toughness, elasticity and durability of such compositions.

Richard A. Finis, of San Francisco. **MULTIPLE-CONTRACT ELECTRIC SWITCH.** This switch is of the push button type adapted to be manually manipulated. It is constructed that depression of the button a certain distance will close a circuit, while further depression of the button will break the circuit and close another one. Mr. Finis has assigned his patent to Hi-Sign Signal Company.

George D. Wernil and William M. Webster, of Los Angeles. **LADDER SUPPORT.** This is an improvement in means for securing steps to side rails of ladders and the like, it provides an interlocked means between the steps and side rails which will resist the lines of forces and stiffen the whole structure.

John G. Dorward, of San Francisco. **DIEP-WELL DOUBLE-ACTING PLUNGER PUMP.** This invention relates to pumps, and especially to a deep well double acting plunger pump designed for installation in wells employing casings of limited area.

Freal A. Nighbert, of Bakersfield. **WINDOW-CLEANING TOOL.** This provides a tool for cleaning and removing foreign matter from smooth or glazed surfaces such as presented by glass, porcelain, enamel and the like by scraping. The object is to so form and construct such a tool that a surface enclosed or mounted in or on a frame can be scraped and cleaned with the tool adjacent and in proximity to the frame without marring or disfiguring the same by contact with or engagement by the cleaning tool.

Harry V. Welch, of Los Angeles. **PROCESS FOR THE RECOVERY OF METALLIC VALUES FROM SLAG.** In patent application No. 408,636 Mr. Welch disclosed a process and means of recovering a portion or all of the valuable metallic constituents at present being discharged in the waste and molten slags from metallurgical reduction works in particular copper and lead smelters, such process being based on the treatment of slag with a halidizing agent. Mr. Welch assigns his patent to International Precipitation Company.

Lewis Degen, of Berkeley. **ELECTRIC SIGNALING MEANS AND SYSTEM.** This device employs a multiple contact relay adapted to operate a local circuit to give a danger signal or to give a code signal, which depends upon the condition of the circuit. Any desired signal may be transmitted from any distant point to a signaling device with accuracy and certainty.

Burton C. Van Emon, of San Francisco. **ELEVATOR DRIVE.** This is an improved drive means for hydraulically operated devices such as, for instance, an elevator. It contemplates economy in operation and efficiency in rapid pressure accumulation and diversion of liquid, and a simple means for reversing the flow to reverse the operation. Mr. Van Emon assigns his patent to James M. Koford.

Ray B. Cox, of Berkeley. **SHELF BRACKET.** This is a simple and effective device formed preferably of sheet metal and of unitary structure capable of being attached at selected points to the sides of a closet or compartment and receives and holds a shelf on it in fixed position.

Reuben C. Baker, of Coalinga. **ELEVATOR SAFETY DEVICE.** This relates to improvements in elevator safety devices in which provision is made for stopping the car in the event of excessive speed or of the failure of the hoisting and lowering mechanism. Mr. Baker assigns his patent to Baker Casing Shoe Co.

Leslie Carl Dutro, of Long Beach. **OIL CUP.** This relates to oil cups and provides an improved construction which is particularly adapted for oiling rapidly moving parts without wasting the oil.

Charles A. Hulquist, of Los Angeles. **ROCK-DRILLING ENGINE.** This pertains more particularly to the mechanism which causes rotation of the drill steel, and an object of the invention is to facilitate beginning of the drilling of the hole. The point of the feed piston rod is set against the floor, and the machine is held upright and the compressed fluid is admitted to the feed cylinder.

WAGE RATE HIGH

The prevailing wage rate throughout the country is the highest in history, according to the Department of Labor. This is not bearish news. The higher the wage the greater the consuming power of the people. High wages are only dangerous when the producer

finds profits getting close to the red line. But industry is showing rapid recovery and there is nothing to worry about over high wages as long as there is no change in the business trend. Incidentally, high wages are in no way interfering with the country's foreign business as exports continue larger than they have been in years.

Building News Section

APARTMENTS

To be Done by Day's Work.

APARTMENTS Cost, \$20,000
SAN FRANCISCO, NW Cabrillo St. and 20th Ave.
Three-story and basement (9) apartments.

Owner—Thos. Quistad.
Architect—Baumann & Jose, 251 Kearny St., S. F.

Completing Plans.

APARTMENTS Cost, \$16,000
SAN FRANCISCO, 22nd and Castro.
Two-story and basement frame and stucco apartment house, containing four 4-room apartments.

Owner—A. McCormick, San Francisco.
Architect—Walter C. Falch, Hearst Bldg., S. F.

Plans will be ready for figures for general contract shortly.

Completing Plans.

APARTMENTS Cost, \$35,000
SAN FRANCISCO, Mission St. and Richland Ave.
Three-story store and apartment house frame and stucco.

Owner—Withheld.
Architect—Mark T. Jorgensen, 110 Sutter St., S. F.

Building will contain large single market on ground floor, two stories above, to contain eight 2 and 3 room apartments, and one 6-room.
Working drawings will be ready for figures latter part of next week.

Contract Awarded.

APARTMENTS Cost, \$25,000
ALAMEDA, Alameda Co., Cal.
Three-story reinforced concrete store and apartment building (5 stores and seven 2 and 3-room apts.).

Owner—L. Kaliski, 1301 Regent St., Alameda.
Architect—A. A. Cantin, 68 Post St., San Francisco.

Contractor—Conrad Roth, Dublin Blvd. Hayward, Cal.

To Be Done By Day's Work.

APARTMENTS Cost, \$20,000
SAN FRANCISCO, W Webster St. 54-6 S Green Street.
Three-story and basement frame (12) apartments.

Owner—Strand & Strand, 163 Parnassus Ave., San Francisco.
Architect—Baumann & Jose, 251 Kearny St., San Francisco.

Completing Plans.

APARTMENTS Cost, \$60,000
SAN FRANCISCO, NW cor. Francisco and Octavia Sts.
Three-story and basement frame and brick veneer apartment house. Garage in basement.

Owner—Chas. A. Johnson, 1903 Laguna St., S. F.
Architect—Baumann & Jose, 251 Kearny St., S. F.

Construction will start under the supervision of the owner in about 2 weeks.

Concrete Contract Awarded—Segregated Figures Being Taken on Other Portions of Work.

APARTMENTS Cost, \$75,000
SAN FRANCISCO, Bush and Hyde Sts.
Seven-story and basement reinforced concrete apartment house containing 42 two-room apts. Garage in basement to accommodate 15 cars.

Owner—J. Greenbach, 180 Jessie St., San Francisco.
Architect—None.

Concrete contract has been awarded to the Mission Concrete Co., 125 Kissling St.

To be Done by Day's Work.

APARTMENTS Cost, \$15,000
SAN FRANCISCO, W Church St. 78 N Hancock.
Two-story and basement frame (8) apartments.

Owner—Mission Realty Co., 2008 Mission St., S. F.
Architect—C. I. Horstmann, 110 Sutter St., S. F.

Working Drawings Being Prepared.

APARTMENTS Cost, \$45,000
SAN FRANCISCO, Vallejo and Gough.
Three-story frame and stucco apartment, containing six 6-room apts.

Owner—Withheld.
Architect—Henry H. Gutterson, 526 Powell St., S. F.

Plans Being Prepared, Segregated Figures to be Taken Shortly.

APARTMENTS Cost, \$125,000
SAN FRANCISCO, SW cor. Octavia and Sacramento Sts.
Six-story steel frame and brick apartment house.

Owner—D. J. Clancy, 285 Kearny St., San Francisco.
Architect—Baumann & Jose, 251 Kearny St., S. F.

Building will contain 30 apts. of 3, 4 and 5 rooms, and will be equipped with all modern conveniences.

SEATTLE, Wash.—Archts. Lawton & Moldenhour, Alaska Bldg., commissioned to prepare plans for 10-story apts., to be erected at Pike St. and Hubbell Place for L. N. Rosenbaum Co. of New York; est. cost \$300,000. H. C. Ewing & Co., Alaska Bldg., Seattle, represent the N. Y. interests in Seattle.

SEATTLE, Wash. — Arch. Wm. J. Bain, Arcade Bldg., has prepared plans for 3-story 112 by 60 ft., masonry apartments to be erected for David Blain at 1420 Boren Ave.; will contain 36 two and three room apts.; est. cost \$100,000.

24 CALIFORNIA STREET
Sutter 5907 San Francisco

LOS ANGELES, Cal.—Arch. William Bruce, 430 Chapman Bldg., has completed sketches for a 11-story and basement, 165x175 ft., class A reinforced concrete co-operative apt. bldg. at Alta Vista Bldg., Sunset Blvd. and Fountain Ave.; 44 apts. with about 352 rms. with servants' quarters in basement; \$1,200,000.

EUGENE, Ore.—Zanillo Bros., 20th and Flanders Sts., at approx. \$150,000 awarded contract to erect 4-story and base, reinforced concrete 62 by 154-ft. apartments for W. C. Elliott of Portland; will contain 49 apts., 1, 2 and 3 rms. F. Manson White, architect, Sherlock Bldg., Portland.

LONG BEACH, L. A. Co., Cal.—Geo. A. Threlkeld, 1256 Cherry Ave., Long Beach, has contr. for 2 bldgs., 2-story, 64-rooms, 16 single and 4 double apts., at 75-59 Lime St., Long Beach, for E. R. Scott, Plans by Lindsay & Schilling, 213 Marine Bldg., Bldg. Long Beach.

41x140 ft., brick walls, ruff, brick facing, terra cotta trim, tile and comp. rig. hdwd. fls., pine trim, tile baths and enclaves, wall heat, gas radi., storage water htr.; \$110,000.

PORTLAND, Ore.—Arch. C. L. Goodrich, Abington Bldg., preparing plans for three-story and basement reinforced concrete apts., to be erected for a Portland capitalist in Hawthorne District; 82 by 90 ft.; est. cost, \$125,000.

BONDS

SAN DIEGO, San Diego Co., Cal.—April election ballot will carry proposition calling for bond issue of \$60,000 to finance 3 new branch libraries. As proposed by library board there would be building at Ocean Heights to cost \$25,000, one at University Heights to cost \$20,000 and another at Ocean Beach; cost \$15,000. This issue was defeated at election 2 years ago.

HUGHSON, Stanislaus Co., Cal.—Election will be called shortly in Hughson Grammar School District to vote bonds of \$60,000 to finance erection of 12-classroom school. Preliminary plans for the structure have been prepared.

MANTECA, San Joaquin Co., Cal.—Election will be called to vote bonds of \$40,000 to finance purchase of site and erection of new grammar school.

MEDFORD, Ore.—Election will be held at once to vote bonds of \$165,000 to finance erection of new high school. Architect not yet selected.

DUNSMUIR, Siskiyou Co., Cal.—Feb. 10 is date set to vote bonds of \$26,650 to finance additions to present school building.

BAKERSFIELD, Kern Co., Cal.—City Supt. of Schools Chas. E. Teach and Chas. H. Biggar, architect, Bank of Italy Bldg., Bakersfield, have prepared preliminary report covering proposed improvements to school building together with estimates of costs. A bond issue for approx. \$350,000 will be called to finance the work. The program of imps. follows: Lincoln school; Four class rooms and a manual training shop; \$25,000. Washington school; Rearrangement of kindergarten and manual training rooms. Eight additional class rooms, domestic science and sewing departments; \$65,000. Williams school; Auditorium, four class rooms, manual training room, domestic science department, additional territory; \$70,000. Hawthorne school; Completion of present building; \$45,000. Emerson school; Four class rooms, rearrangement of auditorium; \$60,000.

Franklin school: Kindergarten, manual training, domestic science, rearrangement of auditorium; \$55,500. McKinley school: Four class rooms; \$20,000. William Penn school: Four class rooms; \$20,000. Roosevelt school: Four class rooms; \$20,000.

DAILY CITY, San Mateo Co., Cal.—Election will be held Feb. 14 in Jefferson School District to vote bonds of \$12,000 of which \$6500 will pay off street and improvements and \$5500 to paint and repair seven school buildings. W. J. Sweeney, Geo. R. Augustin and Louis Nava are trustees of district.

SUNNYVALE, Santa Clara Co., Cal.—Petitions seeking a bond election to finance erection of \$250,000 high school are being circulated in Westside Union High School District. Previous elections were defeated.

CHURCHES

SAN FRANCISCO—Nepage-McKenny Co., 559 Howard St., at \$5438 awarded contract by Beezer Bros., architects, 1915 Steiner St., for electric work on new St. Dominic's church; bids opened Jan. 14. Other bids were: Butte Electrical Equipment Co., \$5780; Victor Le-morse, \$5920; American Electric and Engineering Co., \$6135. C. T. Merchant 130 Jessie St., is general contractor on the project.

RENO, Nevada—Trinity Episcopal Church, Rev. Edward Tannar Brown, rector, has \$17,700 available and \$11,000 pledged to finance construction of new edifice in Reno. Additional funds will be secured at once. Early construction is contemplated. Joseph W. Hall is treasurer of the building committee.

Ready For Figures in About a Week. CHURCH Cost, \$90,000
SACRAMENTO, SE 21st St. and J St. Concrete frame and brick veneer new church with tile roof.

PRATT'S

CONCRETE MIX

Charles J. Sand Pratt

Dr. Howard Shriner Cameron,
New Ben Ali Temple Potentate,
Sacramento, California,
Dear Potentate:

SANDY PRATT, producer.

OF SHARP sand.

SOLICITS YOUR sand business.

WHEN YOUR candidates.

TRAVEL OVER the "hot sands."

YOUR FORMER Potentate.

MR. JOSEPH Banker Stephens.

GAVE SANDY an exclusive contract.

ON ALL the "hot sand."

USED BY Ben Ali Temple.

NOW, MR. New Potentate.

PLEASE REMEMBER.

THAT SANDY Pratt, President.

OF THE Pratt Building Material Co.

CAN FURNISH you sand.

OUT OF the American River.

AT SACRAMENTO.

OR THE Yuba River.

AT MARYSVILLE.

AND MR. New Potentate.

SANDY, CONFIDENTIALLY, might say.

THAT "PRATTCO Amber" Sand.

FROM PRATTCO (Monterey County).

TWO MILES from Hotel Del Monte.

IS SO hard.
THAT SAND blasters.
USE "PRATTCO Amber" sand.
TO CUT steel, granite.
AND OTHER hard substances.
AS WELL as grinding marble.
AND IF your candidates.
DON'T SAY Sandy's sand.
IS HARD and sharp.
THEN ASK Frank Atkinson.
AND FONTAINE Johnson.
AS THEY are lawyers.
AND KNOW everything.
"I THANK you."

Photo of Ben Ali Temple, goat, nat travels over the "hot sands," furnished by Sandy Pratt, president of the Pratt Building Material Co., with sand producing plants at Marysville, Sacramento and Pratto (Monterey County). This is a "rocky" mountain goat from Pratto (near Folsom), home of Sandy's rock and gravel producing plant.

Official Proposals

NOTICE TO CONTRACTORS

(Alameda County—Hospital)

Office of the Clerk of the Board of Supervisors, Alameda County, Calif.
Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, at his office, until Monday, February 9th, 1925, at 10 o'clock A. M. (the day when said bids will be opened and the contract awarded) for the completion of the Tile Marble, Metal Plinths and Elevator Work at the Highland Hospital, Oakland, Alameda County, California.

The above specified work is divided into the following departments:

Department No. 6—Tiling.
Department No. 7—Marble work.
Department No. 8—Elevator work.
Department No. 10—Metal Plinths.
Complete plans and specifications for each of the above specified departments are on file in the office of the County Clerk in the Hall of Records Building, Oakland, California, where copies may be obtained by depositing with the County Clerk the sum of Fifty (\$50.00) Dollars for each of said Departments. Contractors will be restricted as to the length of time these plans and specifications may be retained to ten (10) days. Contractors failing to return said plans and specifications within said time limit will forfeit their deposit to the County of Alameda.

Each bid must be accompanied by a check for at least ten per cent of the amount of the bid or proposal, certified to by some responsible bank, and made payable to Geo. E. Gross, Clerk of the Board, to be forfeited to the County of Alameda as ordered and liquidated damages should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the Contract. The Board reserves the right to reject any of said bids.

Dated: January 12, 1925.
GEO. E. GROSS,
Clerk of the Board of Supervisors of Alameda County.

Specification No. 5,957 and accompanying drawing may be obtained on application to the bureau or to the Commandant, Navy Yard, Mare Island, Calif. Deposit of check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawing and specification. L. B. HEGORY, Chief of Bureau, December 15, 1924.

NOTICE TO CONTRACTORS

(Lyon County—Nevada State)

Sealed proposals will be received by the undersigned until 2:00 P. M., February 4, 1925, for constructing a portion of the State Highway System in Lyon County between Smith's Corner and West County Line, work consisting of grading, construction of culverts and placing a gravel surface.

Plans may be examined and form of proposal, contract and specifications secured at the office of the undersigned. These also may be examined at the county clerk's office in Yerington, and the division engineer's office in

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

Reno, Elko or Las Vegas and the district office of the Bureau of Public Roads, Bay Building, San Francisco, California. A cash deposit of Fifteen Dollars (\$15.00) with the undersigned is required for a copy of plans, which will be refunded on their return in good condition, provided that they are returned within thirty (30) days after the opening of bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of five per cent of the bid.

Each bidder must accompany his bid with a certificate from a surety company duly authorized to do business in this state stating that such surety company will provide said bidder with a bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for the faithful performance of the provisions of the contract and specifications.

Right is reserved to reject any or all bids.

GEO. W. BORDEN,
State Highway Engineer,
Carson City, Nevada.
(Jan. 19-21-23-25-28-30)

NOTICE TO BIDDERS

(City of Corcoran—Pipe)

12 ft. 6 inch Cast Iron Pipe Class "B" Bell & Spigot.

1—8in.x8in.x6in.x6in. Cross.
1—6in.x6in.x4in. Tee.
(This pipe to be in 16 ft. lengths.)
All Tees and Crosses to have all bell ends.

All bids must state price per ft. f. o. b. Corcoran.

Each bid must be accompanied by a certified or cashier's check in a sum of

not less than 10 per cent of the amount bid, payable to the City of Corcoran as evidence of good faith on the part of the bidder.

The Board of Trustees reserves the right to reject any and all bids, or to accept the bid considered by them best for the said City of Corcoran, Corcoran, California, January 16, 1925.

(SEAL)

JAS. C. CONDON,
Clerk of the City of Corcoran, County of Kings, State of California.

NOTICE TO CONTRACTORS

(Building Alterations—Mare Island)

The Bureau of Yards and Docks invites attention to the fact that it will open proposals, in the near future, on Specification No. 5934, Alterations to Building M-24, Navy Yard (Marine Barracks), Mare Island, California. The work consists of an enclosed second-story frame porch over the existing porch, two wood frame stairways leading from the new porch to the ground, steel fire escape, interior woodwork and electrical work.

In the event that this work is of interest to your firm you should forward immediately to the Bureau of Yards and Docks, Navy Department, Washington, D. C., or to the Commandant, Navy Yard, Mare Island, Calif., a check or postal money order for \$10, payable to the Chief of Bureau of Yards and Docks, as security for the safe return of the drawing and specifications, which will be forwarded as soon as available.

Prospective bidders on the West Coast should make application at the Navy Yard, Mare Island, Calif., for the bidding data.

NOTICE TO CONTRACTORS

at the office of the Architect, W. H. Weeks, 369 Pine Street, San Francisco, California, or at the office of the Principal of the High School in Woodland, California.

All bids should be presented on bid forms furnished by the Architect. Each bid must be accompanied by a certified check on some responsible California Bank in a sum not less than Five (5%) per cent of the amount bid, made payable to President of the Board of Trustees of the Woodland High School District, for the purpose stated in specifications.

Each bid must be delivered in sealed envelope and addressed to Wm. M. Hyman, Clerk of the High School Board of Trustees, and endorsed: "Proposal for New Gymnasium and Auditorium Building."

The Board reserves the right to reject any and all bids.

(Signed) J. L. HARLAN, President, Board of Trustees of the Woodland High School District, Woodland, Yolo County, California.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on February 9, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Los Angeles County, between Arroyo Sequit and Las Flores Canyon (VTLA-60-A), about sixteen and three-tenths (16.3) miles in length, to be graded.

Riverside County, a reinforced concrete girder bridge 21 feet wide, across San Geronimo Wash, about two miles east of Banning (VTLR-Riv-26-C), consisting of five 30 foot spans on concrete bents, and the bridge approaches to be graded and paved with portland cement concrete.

Plans may be seen and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the office of the Division Engineer at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willets, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection

of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS.

California Highway Commission.
R. M. MORTON,

State Highway Engineer.
W. F. MIXON, Secretary.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

(Shop Building—San Bernardino)

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, California, until two o'clock P. M., Feb. 2, 1925, at which time they will be publicly opened and read, for construction, in accordance with plans and specifications therefor, of a Maintenance Shop Building and Truck Shed in the City of San Bernardino, County of San Bernardino, California.

The Maintenance Shop Building will be a one-story wood frame structure 60'-0" x 140'-0" covered with corrugated iron, reinforced concrete floor and footing, and with part of the space finished off for office, stock room, etc. The Truck Shed will be wood frame covered with corrugated iron and will have a reinforced concrete wash rack at one end and the opposite end will be finished off as a Laboratory. The balance of the shed will have no floor.

Cash, a bidder's bond, made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works", in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

Plans and specifications may be had upon application to the California Highway Commission, 515 Forum Building, Sacramento.

A deposit of Twenty-five (\$25.00) Dollars will be required on plans and

specifications, the deposit to be returned immediately on the return of plans and specifications to the said Commission in good condition.

Bids must be on forms prepared by the Commission. Attention of bidders is called to "Instructions" on proposal form for full directions as to bidding.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,

OFFICIAL PROPOSALS

(Continued from Page 19)

banker and made payable to the Eureka High School District of the City of Eureka, Humboldt County, California, to be retained by said School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract or any bond required by law. The amount of said check shall not exceed Five Thousand (\$5,000) Dollars

but for all bids of less than Fifty Thousand Dollars (\$50,000) said check shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Architect.

Bids will be opened by the Board of said District on Tuesday the 3rd day of February, 1925, at 8 o'clock P. M. in the office of the Board in said City of Eureka.

The Board reserves the right to reject any and all bids.

GEO. B. ALBEE,
Secretary of the Board of Education.

NOTICE TO CONTRACTORS

(Steel Rolling Doors—State Board of Harbor Commissioners)

OFFICE OF THE BOARD OF STATE Harbor Commissioners, Union Depot and Ferry House, San Francisco, California, December 22, 1924.

Sealed proposals or bids will be received at this office at or prior to 2 o'clock P. M., Thursday, January 29, 1925, for the purpose of installing Steel Rolling Doors in the China Basin Terminal Building, on the waterfront of the City and County of San Francisco, in accordance with plans and specifications adopted by the Board December 18, 1924, and on file in this office, with which special reference is hereby made.

The work to be done under these specifications consists in furnishing all materials, labor and equipment for installing all steel rolling doors on the first two floors and the door groove angles on the first floor of the Building for the China Basin Terminal.

The materials to be used in this work consist of the requisite quantities of structural steel, castings, galvanized iron, bolts, chains, paint materials etc.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the San Francisco Harbor Improvement Fund.

Bids will not be considered by the Board unless delivered to the Secretary or to the Assistant Secretary, at the office of the Secretary, Room No. 17, Union Depot and Ferry House, at or prior to 2 o'clock P. M., on Thursday, January 29, 1925, at which time and place the bids will be publicly opened.

The Board reserves the right to reject any or all bids deemed for the best interests of the State.

Plans and specifications for this work to be had at Room 18, Union Depot and Ferry House, upon depositing \$10.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for Installing Steel Rolling Doors in the China Basin Terminal Building."

An ordinance licensing contractors is pending before the city trustees of Watts. It would require outside building contractors to pay a quarterly license of \$50, or \$200 a year, and local contractors a license of \$3 per quarter, or \$12 a year. Penalty proposed for violation of the ordinance is a fine not to exceed \$300 or 30 days in jail, or both.

STEEL AND IRON PRODUCTION CONTINUES TO CLIMB

Steel production in the United States in 1924 is estimated in excess of 36,500,000 tons, or some 7,600,000 tons less than the 1923 output, while the 1924 production of pig iron fell some 9,000,000 tons below that of 1923, or about 31,100,000 tons. The December output of steel was about 3,120,000 tons, with the industry as a whole operating close to 75 per cent of capacity. This compares with an output of 3,100,000 tons in November and October. The mills of the United States Steel Corporation averaged 76 per cent in December, but pushed this average up to 83 per cent at the close of last week. The Illinois and Inland Steel companies are operating at close to 90 per cent.

Pig iron production in December is estimated at about 2,800,000 tons or in excess of 90,000 tons a day, as against 83,656 tons daily in November, an increase of some 17 per cent. The Sloss-Sheffield Steel & Iron Co. and the Tennessee Coal, Iron & Railroad Co. will each blow in a furnace this month. It is estimated that the unfilled tonnage of the United States Steel Corporation will show a gain of close to 60,000 tons in December.

Iron and steel exports in November totaled 129,564 tons, or 15 per cent below October, while for the first 11 months of 1924 they aggregated 1,675,677 tons, as compared with 1,829,926 tons during the corresponding period last year, according to the latest reports of the Department of Commerce. There were 14,515 tons of steel rails exported in November, as against 13,241 tons in October.

An amendment to the plumbers' license ordinance of Inglewood, pending before the city trustees, would require master plumbers to give a surety bond of \$1000 in addition to putting up a cash bond of \$100 and paying a yearly license fee of \$60 as now required.

From Diatomaceous Earth to Building Flooring and Shingles

A new plant now under construction for the Rock Products Co. at Emeryville, Calif., will be in operation within a month and shipments to this plant of lava-baked diatomaceous earth from the company's deposits near Verdi, Nev., will begin during the present month. The first shipment will consist of two carloads of the raw material, quarried from the deposit and ground in the company's mill at Reno. The Rock Products Co. is a Nevada corporation organized to manufacture building and interior finishing materials from a rare quality of diatomaceous earth found in a large deposit near the main highway, nine miles west of Reno.

W. J. Walmsley, former manager of the Pacific Portland Cement Co.'s plaster mill and gypsum mine near Mound House, Nev., left that company's service to assume the management of all operations of the Rock Products Co. and will have full charge of the latter company's plants and mine properties. C. E. Clough of Reno is president of the corporation and the directors include former Judge F. H. Norcross, Paul Butler, inventor of the Butler formula used by the company, and T. O. Ward.

Describing the operations of the company, Engineer Walmsley said that the building material products to be manufactured would have a wide field, filling demands that could be met by no other products. Flooring and shingles made of this material will give service and stand strains beyond anything possible with other materials, while these products can be manufactured and marketed at a cost meeting any competition and in some cases considerably below any competing products.

The deposit, in the form of a large conical hill, is composed of a form of diatomaceous earth declared by geologists to be unique, having been subjected to intense heat and pressure when covered by a flow of lava. The lava has been eroded, but fragments are still found on the hill. J. C. Jones, professor of geology at the Mackay School of Mines of the University of Nevada, and other expert authorities who have examined or analyzed the material, declare its character to have been altered by heat and pressure and that this is the only instance within their knowledge of a deposit of

diatomaceous earth having been in contact with molten lava. Analyses show its composition to be 9 per cent silica, with the remaining content iron and aluminum.

In mining the product from the deposit, tunnels and open cuts can be driven into the hill and the rock broken by caving or glory-holing. In this manner a single miner can break down 200 tons daily, so soft and easily broken is the rock. Manager Walmsley points out that 200 tons of the rock is sufficient to produce 133,000 feet of average flooring, with a retail value ranging from \$12,000 to \$25,000, according to the size of the job, character of finish and other details. The company's two plants will be devoted at first to the manufacture of flooring and shingles. A floor of this material has been installed lately in the library at the county courthouse at Reno.

Other factory products that will be made in future include building and insulating bricks, tiling, wall-board, drain and sewer pipes, insulation for wires and pipes and decorative finishing materials. The finished product is a non-conductor of heat, cold and electricity and it does not shrink, expand or warp by exposure to changes in temperature. The Butler formula is based upon the chemical reaction of oxides and chlorides, added sal-ammoniac acting on the iron oxide present in the raw material, acting with the added calcined magnesite as a binding agent. Shingles of this material are declared to be better and cheaper than slate and these, as well as other products, can be sawed with a common saw or drilled without checking. Coloring is introduced as desired in the mixture.

Factory practice involves pulverizing to 100 mesh after which the material is air-floated by a fan of whip design and goes to the mixer. Water, chemicals, calcined magnesite and coloring are added and the mixture, having the consistency of batter, is poured in molds and vibrated to remove air bubbles. After 24 hours it is ready for the market. The surface reproduces exactly the surface of the mold, a glass or glazed mold giving an onyx effect. Material from a large part of the deposit requires no added coloring, as it is stained a dark reddish color by the iron oxide.—Nevada Mining Press.

OREGON FACES ERA OF PROSPERITY SAYS STATE LABOR CHIEF

Indications in the industrial life of Oregon point to a prosperous year for 1925, says a statement issued by Oregon State Labor Commissioner C. H. Gram. Farming and labor conditions as well as the factory industries are touched upon in the statement.

"An optimistic feeling pervades the industrial life of Oregon and employers generally are confident that 1925 will be a prosperous year," says the statement. "Indications are that there will be a greater demand for skilled labor in the next 12 months than was required this year."

"It is conservatively estimated that building construction will be greater by 15 per cent in 1925 in Portland than 1924 and it is safe to say this ratio of increase will prevail throughout the state. It is also expected that building craftsmen will have increased opportunities of employment but it is anticipated that there will be sufficient mechanics within the state to take care of the building program."

"There will be a slight decrease in

state highway construction in 1925 compared with 1924. About five million dollars will be expended by the state in constructing roads in Oregon the coming year. The expense of construction of the state roads is defrayed by money heretofore appropriated. In addition new county roads are planned to be built next year, financed by bond issues approximating in cost two million dollars, also two million dollars to be expended for market roads is contemplated as a part of the county road building program.

San Francisco Civil Service Commission will hold examination on February 7 for asphalt workers. Receipt of applications closes Feb. 3. Offices of the commission are located at Room 151, City Hall.

Charles E. Hilgartner, second vice-president and treasurer of the Hilgartner Marble Company of Los Angeles, died Jan. 8 at Albuquerque, N. M., where he had lived for the last two years.

SEEKS INFORMATION ON "SHORT LENGTHS" IN LUMBER

In compliance with the wish of the Central Committee on Lumber Standards, the National Lumber Manufacturers Association has undertaken the collection of information on this subject through the good offices of the various regional associations. Arthur Upson, lumber standards advisor of the National Lumber Manufacturers Association, has written to the secretaries of the various regionals enclosing a suggested form of questionnaire, which, upon being approved by them, is now being distributed to their members. Accompanying the copies of the questionnaire form are circular letters pointing out that the general conference on lumber standards held last April requested a survey of production and uses of short length yard lumber;

that the results of this survey of production must be ready for analysis about March 1, and that if exact information is not already available approximate estimates will be sufficient.

The questionnaire consists of nine questions. The first inquires as to what percentage of the total production of yard and shed stuff, not including timber, consisted of short lengths during 1924. It is further desired to learn the relative distribution of these short lengths among different items. Other questions cover such subjects as the commercial distribution of short lengths; principal items bought by the retail trade; practice regarding requiring retailers to take a specified amount of short lengths whether any short lengths are included in orders calling for 10, 16, or 20 foot lengths; average difference in price per thousand and between short lengths and long

lengths, and average difference in price between selected long lengths and random lengths.

With regard to the building material situation, S. W. Strauss & Co., says: "The new year started with upward tendencies in the general material situation. Material prices in December showed a trend toward higher levels, except on Portland cement. Several grades of lumber were quoted ten per cent above November prices. Steel, at the mill was a bit firmer in December, but warehouse prices remained practically unchanged. In New York prices of starting materials were somewhat higher. In other cities most starting material remained at November levels."

A "Pittsburg" Automatic Gas Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all of the leading architects, plumbers and builders.

Consider the high merit of the "Pittsburg" coupled with "Pittsburg Perfect Service."

Dandie with steel disc wheels and solid rubber tires; power charging skip, water tank and gasoline engine.

Dandie with steel trucks; power charging skip, water tank and gasoline engine.

EQUIP it to your special needs. Rubber tires to save the time waste of between-job hauls, and to expand your working territory. *Light duty hoist. Low charging platform or power charging skip. Automatic water-measuring tank.*

Most important, you can be sure of full capacity—utmost reliability—and long service life—because this mixer is Koehring built, engineered and constructed to out work, out last anything in the light mixer field. Price? Not the lowest price

—no—but the most remarkable value of all light mixers and still within the range of light mixer prices.

CAPACITIES

4 and 7 cu. ft. mixed concrete, steam or gasoline power. May be equipped with power charging skip or low charging platform with hopper, light duty hoist, automatic water measuring tank. Mixes mortar as well as concrete.

KOEHRING COMPANY

Congress of March 3, 1879.

STEEL OUTPUT SHOWS GAINS FOR DECEMBER

Orders for steel castings booked during December were in greater volume than in either the previous month or December, 1923.

December production and shipments of steel sheets by independent mills increased over both the previous month and a year ago while sales, although less than in November, increased over December, 1923. Stocks of sheets at independent mills as of December 31, 1924, represented an increase over the inventory at the end of the previous month but were less than stocks a year ago while unfilled orders increased over both comparative periods.

Orders booked for structural steel during December represented 80 per cent of capacity as against 83 per cent in November and 79 per cent a year ago. Shipments by fabricators during December represented 82 per cent of capacity as compared with 64 per cent in November and 66 per cent in December, 1923.

NEW COURSE FOR MOLDER APPRENTICES STARTED

The night course for new apprentice molders who have been recently employed in a number of American Plan foundries, is now being conducted by the San Francisco Association. This class meets once a week and devotes itself exclusively to those technical problems in foundry work which are not directly connected with the manual elements of the trade, and both employers and instructors are enthusiastic at the progress that is being made.

Engineering Construction in 1924 Exceeded All Records—Survey Shows

Engineering construction projects in the United States broke all yearly records in 1924. Engineering News-Record, New York, reports in a survey just announced. The total money value of such operations for the year, these including public works and building operations of public utilities companies, is given at \$2,002,533,000. The 1923 record was \$1,899,254,000.

Heaviest gains were noted in water-works, sewers, streets and roads, commercial buildings and in scattered and unclassified operations such as stadiums, tunnels, wharves and grain elevators. Unclassified projects, which involved in face value minimum of \$25,000 in each case, totaled in value to \$205,000,000, as against a valuation of \$182,000,000 in 1923.

Gains recorded were found in three major sections of the country. These were New England, the middle Atlantic states and the South. The greatest increase, 24 per cent over 1923, was in the middle Atlantic states. The chief loss, 11 per cent, was in the middle West.

In actual physical construction placed under contract, the months whose records exceeded those of 1923 were February, May, July, August, October, November and December. Although there was a distinct falling off in November, that month was the heaviest since 1915, when costs were less than half.

"The year just past makes a record not only in money value of contracts awarded," Engineering News-Record comments, "but it also has set a mark in actual physical volume of engineering construction placed under contract. In terms of the 1913 dollar, 54 per cent more construction was definitely authorized than in that first per-war year."

Contracts included in the total of engineering projects were computed on the basis of a \$15,000 face value mini-

mum for water-works, dredging, excavation and irrigation; \$25,000 for other public works; \$40,000 for industrial buildings and \$150,000 for commercial buildings.

Values of the contracts which go to make up the 1924 total include \$61,445,000 for water-works; \$74,553,000 for sewers; \$68,564,000 for bridges; \$26,829,000 for excavations, drainage and irrigation; \$415,216,000 for streets and roads; \$204,969,000 for industrial buildings; \$234,905,000 for commercial buildings; \$38,855,000 for federal government work and \$177,167,000 for unclassified operations involving engineering service.

Expenditures for physical expansion of industry dropped in 1924 below the total for 1923, in which year industry spent \$600,000,000 for new factories, power development, machine shops, foundries and extensions in the process industries. Last year not quite half a billion dollars were spent. There are signs of a revival.

The last month of 1924, the study shows, developed a remarkable recovery and closed the strongest December on record with its construction volume 8 per cent greater than that of 1922, the nearest competitor. The December total of industrial construction was 50 per cent greater than that of December, 1923.

Opening of 1925 finds the construction industry facing the immediate prospect for bids on huge public and private works. Outstanding among these undertakings are the \$18,000,000 dam at Los Banos, Cal., for the San Joaquin valley water storage district; \$9,000,000 irrigation project for the board of water engineers, state of Texas; \$6,000,000 university group for Duke university, Durham, N. C.; \$3,000,000 sewage treatment plant for Akron, O.; \$3,500,000 jail for Wayne county, Michigan; \$2,500,000 power plant for Dallas, Texas.

MAGNESITE MINES AT LINDSAY TO BE DEVELOPED

The development of the magnesite mines east of Lindsay, Tulare County, with the building of a calcining plant, are the prospects for the immediate future following the sale by Sam Bagges and the S. F. Cochrane estate of their holding of one of the El Mirador hillsides. The consideration is said to have been \$20,000.

The property was sold to a Southern California man by the name of Parberry, who is expected in Lindsay at once to commence operations. It is possible the ore will be calcined in Lindsay.

Outcroppings of magnesite have been found in a number of places in the hills just east of Lindsay and it is said there are the possibilities of an enormous mining industry.

The product has long been used in lining steel kilns, but more recently in the manufacture of high grade imitation marble, flooring, stuccos, etc. The demand has grown steadily since the war, when the high prices paid stimulated prospecting and a number of claims were staked in this vicinity.

52 WEEKS LUMBER PRODUCTION

West Coast Lumbermen's weekly reports on production, orders and shipments, for the fifty-two weeks of the past five years, are as follows:

	Production	Shipments
	Lumber—Ft.	Lumber—Ft.
1924	4,813,061,724	4,930,220,058
1923	5,254,884,617	5,351,425,647
1922	4,387,742,637	4,096,673,877
1921	2,788,953,643	2,826,270,465
1920	3,824,022,479	3,268,183,538

From the above it will be observed that the production for 52 weeks in 1924 was 8.41 per cent less than for the same period in 1923; 9.69 per cent greater than 1922; 72.58 per cent greater than in 1921; and 25.86 per cent greater than in the 52 weeks of 1920.

Orders for 52 weeks in 1924 have been 6.60 per cent less than in 1923; 17.17 per cent greater than in 1922; 68.85 per cent greater than in 1921, and 68.11 per cent greater than in the 52 weeks in 1920.

Shipments for the 52 weeks in 1924 have been 7.87 per cent less than in 1923; 20.35 per cent greater than for the same period in 1922; 74.44 per cent greater than in 1921; and 46.38 per cent greater than for the 52 weeks of 1920.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Manufacture of cement and cement products by the State Department of Public Works utilizing the labor of convicts is proposed in a bill introduced into the Senate by Senator Inman, author of the measure. The bill provides that convicts would be paid \$50 a month for their work and would enjoy other benefits, including the establishment of a recreational fund. Part of the money due the convicts would be withheld to assure good behavior and to guarantee against escape from the factory. The bill, the author declares, will not be opposed by organized labor interests due to their belief that continued opposition to employment of convicts in industry is useless and that cement manufacturing is the best one to be accepted for convict labor owing to the difficulty of obtaining outside labor for this kind of work.

Motorship freighter Buenos Aires has docked at Oakland and is discharging 1000 tons of Norwegian cement. This shipment marks the largest consignment to arrive in Oakland. Following the initial cargo more than a year ago the cement has been coming in increasing quantities. According to reports from the East Bay district hardly a ship arrives from northern European port but carries a part shipment of cement.

Oakland labor officials charge that the Eastbay Industrial Association is responsible for 50 per cent of the unemployed in Oakland as a result of misleading advertisements in outside newspapers during the summer months. A statement disclosing the facts in the case is signed by A. M. Thompson, president, Wm. A. Spooner, secretary and S. W. Lore, chairman of the executive board, Central Labor Council.

A bill by Assemblyman Percy West of Sacramento would require pawnbrokers and second hand dealers to require a satisfactory written proof of ownership or right to sell or pledge builders' tools before they would be permitted to accept such tools as pledges or purchase them. The bill is aimed to halt the general theft of tools from buildings under construction.

Buckley Logging Company, of Tacoma, Wash., has been awarded the sale of 49,000,000 feet of timber in the Rainier National Forest, according to the Federal District Forest Office at Portland, Ore. The sale was made on a bid of \$3 a thousand for fir, which largely dominates, and 75 cents for other varieties. Some white pine, cedar and hemlock is included in the sale.

Alfred Clarke Root, former manager of the Kaweah Limestone Products Company, Lemon Cove, Calif., has been adjudicated bankrupt, following his voluntary filing of a petition. Liabilities of \$94,375.57 and assets of only \$500 are shown on the petition.

W. H. Bacaus, street commissioner of Oakland, announces the completion of plans for sewer construction under the recently voted \$1,147,000 sewer bond issue. The largest project is the West-ern Waterfront job, estimated to cost \$400,000.

Bids will be considered by the Alameda County Supervisors March 23 for all underground work in connection with proposed estuary tube project for which the county has voted \$4,496,000 in bonds to finance. Alternative bids are being taken for pre-cast concrete type of construction and a steel tube subway reinforced with concrete. The former will cost approximately \$3,900,000 and the latter \$4,200,000, according to estimates of County Engineer George A. Poyer. The pre-cast concrete type of construction is favored.

Efforts will be made to have the State Legislature pass a bill permitting formation of a district for reclamation of the Islais Creek Basin, San Francisco, which has hung fire for five years, but which is now expected to result in tremendous industrial development of San Francisco tidewater lands. The district is expected, under authority of the proposed law, to bond itself for approximately \$1,125,000 to finance construction of a seawall and reclamation of the low territory.

The railroads of the United States were again the heaviest consumers of steel during 1924 according to data compiled by the "Iron Trade Review." They consumed 27.5 per cent of the finished steel produced in 1924 as compared with 30.5 per cent in 1923. The roads bought 7,395,000 gross tons of steel in 1924. Of this \$70,250 tons went for railroad bridges and buildings, 2,957,680 tons for railroad track work and 3,345,023 tons for railroad cars and locomotives.

Los Angeles capitalists are reported to have purchased 126 acres of land in the vicinity of San Rafael from the Remillard Brick Company of San Francisco for \$70,000 and 146 acres of the George P. McNear property below Scheuten Park, Marin county, for \$81,000. The deal was closed through J. J. Moran, Oakland real estate operator, according to reports. Reports are to the effect that a rock crushing plant will be erected on the sites.

H. Wentworth, formerly connected with the Hammond Lumber Company at Terminal (Southern California) has been named manager of the Santa Cruz yards of the Homer T. Hayward Lumber Company. C. H. Griffen Jr., who was manager of the Santa Cruz business, has been appointed general manager of all yards of the Hayward Company in the northern section of the state.

The Portland Chapter, Associated General Contractors of America, will stage the 1925 convention for the Pacific Northwest branch at the Multnomah Hotel, Portland, Feb. 27-28. The executive board of the branch will meet at the same place on the 26th.

The Carpenters' Union of Lynn, Mass., on Jan. 26, refused to accept a raise in wages from \$1.10 to \$1.25 an hour, deciding to work for the 1 per amount because of a business depression.

Wm. E. Morris, former city engineer of Portland, Ore., died suddenly in that city Jan. 21. Death was due to heart trouble.

ALONG THE LINE

H. G. Butler of San Francisco has been named a consulting engineer for the Sacramento Municipal Utilities District and will be paid a retaining fee of \$250 for maximum of five days service during the month. Extra days in the employ of the district will be paid for at the rate of \$50 a day, unless he appears on behalf of the district before the railroad commission or a court, at which time he will receive \$75 a day. Engineer Butler's first step will be to furnish a report to the district directors on steps necessary to secure power distribution for the district and a thorough analysis of distribution as it now exists, with recommendations as to the best course of procedure.

Electrification of the Southern Pacific peninsula lines and the establishment of a terminal at Twelfth and Mission streets, is reported to be slated for discussion among high officials of the railroad company who will be in conference in San Francisco early this week.

Edwards Brothers, of Los Angeles, have sub-let a 10.8 mile highway contract in Shasta county to the Nevada Contracting Company of Fallon, Nevada. The work will cost in excess of \$400,900 and will be financed by the California State Highway Commission.

George F. Nicholson, new chief engineer of Los Angeles harbor, has assumed his duties. J. W. Ludlow, former harbor engineer, whose resignation was accepted to take effect Jan. 1, has been appointed assistant harbor engineer.

A special meeting of the Sacramento Architects and Engineers Club will be held in that city Jan. 29 to discuss the subject of advertising and promoting the architectural and engineering professions. The meeting will be followed by a buffet luncheon.

B. S. Cooper of San Diego has been named by Governor Richardson to succeed Wm. B. Gross, term expired, and Gross named to succeed Ed. Willoughby, resigned, on the San Diego Harbor Commission.

Frank B. Rea has been appointed electrical engineer of Berkeley at a salary of \$225 per month. The appointment was made on recommendation of City Manager John N. Eddy.

J. E. Johnston, Stockton contractor, will start work at once on a \$115,000 street paving program in Chico, for which he recently was awarded a contract.

Assemblyman Combs of Napa seeks \$100,000 appropriation to finance state scenic highway from Calistoga, Napa county, to Middletown, Lake county.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

CONSTRUCTION INDUSTRIES WILL BANQUET AT LOS ANGELES

Preparations are under way for the construction industries banquet to be held at the Biltmore Hotel, Los Angeles, Feb. 10. The Construction Industries Joint Committee, which has been functioning for more than six months in a campaign to combat construction of public works by day labor, is sponsor for the affair, which has been planned to show the unity of the construction industry in matters of vital interest to it. This committee comprises representatives of the Associated General Contractors of America, Southern California Chapter, Contractors' Association of Northern California, Builders Exchange of Los Angeles, Electrical Contractors and Dealers' Association, Contracting Plasterers' Association of Southern California, Heating and Piping Contractors' Association, Merchant Plumbers' Association, Master House Painters and Decorators' Association, and Surety Association of Southern California.

Arrangements for the banquet, which is to be informal, are in the hands of a committee composed of Ralph Homann, chairman; Lynn S. Atkinson, Jr., chairman of the joint committee, who is arranging for the speakers; H. W. McGee in charge of entertainment; E. W. Hokom, who is looking after the attendance; Paul F. Langworthy, publicity, and Melville Dozier, Jr., manager of the joint committee.

A large number of invited guests will be entertained at the banquet, including state, county and city officials, members of the legislature, bankers and leaders in professional and public life. Attendance will be limited by the capacity of the Biltmore hotel ballroom.

CEMENT ASSOCIATION APPOINTS PORTLAND DISTRICT ENGINEER

Charles E. Nims has been appointed district engineer for the Portland Cement Association at Portland, Ore., with offices in the Gasco Bldg. Mr. Nims is a graduate of the Leland Stanford University, Class of 1902. Following a number of years of diverse engineering experience which included construction work in Alaska, private practice in Seattle, location and construction work with the Pacific and Eastern railroad in southwestern Washington and county engineer, Pacific county, Washington, he became assistant engineer with the Washington state highway department, serving in this capacity from 1919 to 1921, inclusive. In 1922, Mr. Nims joined the forces of the Portland Cement association as field engineer in Oregon.

BUILDERS ELECT OFFICERS

George Moore has been elected president of the Builders' Association of Palo Alto, succeeding E. C. Jacobson. Other officers elected were: Vice-president, E. Balsbaugh; treasurer, H. E. Hansen. C. S. Price was appointed acting secretary.

The association will hold a social in the Cardinal Hotel, Palo Alto, the latter part of this month.

STEEL INDUSTRY IN CALIFORNIA HAS STATE ORGANIZATION

The first annual conference of representatives of the steel industry in California came to a close Jan. 24 following a three-day session at Del Monte. The conference was held under the direction of the San Francisco and Los Angeles Chamber of Commerce and the California Development Association.

The outstanding development of the session was a decision to form a statewide clearing house for producers, distributors and principal users. A committee was named to bring about closer co-operation between the various groups in the steel industry.

One of the resolutions adopted called for a policy favoring the use of American, Pacific Coast and California steel products, if price, quality and service warrants such a decision. A second resolution adopted called for a restricted importation of foreign steel products where such importations injure California trade. The final resolution adopted called for a complete survey of the steel resources of the state, an extensive publicity campaign to benefit California steel products and an invitation for the co-operation of other Pacific Coast states in building up the industry.

SCULPTURED REPRESENTATION TO HONOR LUMBERMEN

A sculptured representation of Friendship, which represents two manly looking fellows grasping hands, is to surmount the fountain in the patio of the Lakeside Club, which is the famed golf resort of the Olympic Club of San Francisco.

Haig Patigian, the sculptor, is now molding the figure under a commission from Mrs. John R. Hanify and Mrs. E. A. Christensen, widows of the two lumber millionaires and members of the club, who lost their lives two years ago during a storm while yachting on San Francisco bay.

Hanify and Christensen were lifelong friends.

President William F. Humphrey and the directors of the club formally voted to accept the offer of the two ladies this week and also to have framed a letter of thanks, copies of which are to be embossed and given the two women.

ENGINEERS NAME OFFICERS

J. C. Boyd has been elected president of the Sacramento Chapter of the American Society of Civil Engineers. J. B. Brown was elected first vice-president and Everett N. Bryan, second vice-president. Norman Silsbee was elected secretary. The officers were installed at the seventy-fifth luncheon meeting of the chapter.

ARCHITECTS ELECT

The Oregon Chapter, American Institute of Architects, has elected the following officers to serve for the ensuing year: Folger Johnson, president; O. R. Bean, first vice-president; Jamison Parker, secretary; Geo. Foote Dunham, treasurer; Chas. D. James, John V. Bennes and Jos. Jacobberger, trustees. Chas. D. James is retiring president.

HOME BUILDING CLUB ORGANIZED AT SACRAMENTO

Temporary organization of a 1925 Home Building Club, to be composed of Sacramentans who are planning on the erection of a home during the coming years, has been perfected.

Temporary officers were elected and plans set on foot for the perfection of a permanent organization on the evening of February 3rd. This meeting will be held in the rooms of the Builders' Exhibit, 910 Ninth St., Sacramento.

D. G. Nunneley was elected temporary chairman; P. B. Garrett, vice chairman, and Glenn Woodruff, secretary.

The organization meeting was devoted to a discussion of the aims and purposes of the club. It was explained by Nunneley that the club was for the sole purpose of obtaining information regarding building costs, methods and plans for the benefit of the members. It is planned later to invite architects, builders and real estate men to address the meetings.

ENGINEERS NAME DIRECTORS

The Santa Barbara Chapter, American Association of Engineers, has appointed a Board of Directors to serve during the current year. The Board will consist of the officers of the chapter, and Owen H. O'Neil, chairman of the civic committee; Kenneth Wright, chairman of the social committee, and J. H. Kincaid, chairman of the committee on economics. Officers of the chapter who also will be on the board are E. M. Gleason, Jr., president; U. S. Grant, vice-president; George D. Morrison, secretary-treasurer. Morrison also was selected chairman of the employment committee.

The annual banquet of the chapter will be held on January 21 at the Arlington Hotel, Santa Barbara, when the engineer who has done the greatest bit of civic work in recent years will be the guest of honor. Wives of the engineers also have been invited to attend.

COAST PLASTERERS TO MEET

The third annual Pacific Coast conference of the Master Plasterers' Association will be held in Oakland, Feb. 23-24-25. T. D. Sexton of Oakland is president of the conference. Other officers are: W. G. Mannan, Portland, first vice president; George F. McGriff, Los Angeles, second vice president; A. Knowles, San Francisco, third vice president; Alex Mennie, San Francisco, treasurer; and W. F. Breuer, secretary.

Among topics to be discussed are improved building laws, segregation of bids and the wider use of plaster and better plastering.

PORTLAND BUILDERS ELECT

Following officers were elected by the Builders' Exchange of Portland, Ore., to serve for the ensuing year: Thomas Muir, president; B. T. Allyn, vice-president; Robert Wallace, secretary; F. E. Wynkoop, treasurer. The directors, besides the newly elected officers, are: C. M. Buehke, C. W. Fitzgibbon, W. T. Finnegan, C. C. Fitchugh, D. L. Hoggan, W. G. Mannan and C. M. Stelinger.

(Continued on Page 8)

TRADE NOTES

New Vogue of Mill Construction

Interlocking Tile Corporation is the new name of the firm formerly known as the Denison Interlocking Tile Corporation. The change is in line with a campaign inaugurated by the company to eliminate the word "Denison" in connection with the firm's interlocking tile. Originally, interlocking tile was known as Denison Interlocking Tile, having been invented by William C. Denison, of Cleveland. Subsequently, another tile was produced by others that has been exploited as Denison tile, and considerable confusion has resulted among architects, contractors, and dealers. Interlocking Tile Corporation insists that it has and always has had a perfectly clear right to the use of the word "Denison," but as a protection to the trade has concluded to drop the word "Denison" and hereafter refer to its products exclusively as Interlocking Tile.

Milton Ruggles, consulting industrial engineer and architect, formerly a member of the firm of Ruggles & McKee, dissolved in July, 1924, with a desire to be of professional service to manufacturing interests planning to locate in Oakland or adjacent Pacific Coast cities or contemplating new developments in the East Bay district, has opened offices at 1723 Webster St., Oakland. Mr. Ruggles will advise on building sites, furnish reports, designs or estimates for proposed structures or equipment and take full charge of building construction. Mr. Ruggles is a member of the American Society of Mechanical Engineers and an associate member of the American Association of Engineers and has handled many industrial projects in the East and Middle West.

J. W. Bender of the Bender Roofing Company and Harry J. Oser have purchased a thirteen-acre tract of land in Third street and Paul avenue and plan to lay out the area for industrial plants. The purchasers will operate under the name of the New Industrial District Construction Company. The land is served by the Southern Pacific railroad and is ideal for factory locations.

Fred Selander, for twelve years San Francisco branch manager for the Kayneer Manufacturing Co., and for the past three years connected with the Pacific Builders Supply Co., has left for Los Angeles to engage in the building material business. He extends an invitation to his Northern California friends to visit his place of business at 515 South Hewett Street when in the south.

Raymond Concrete Pile Company of California, capitalized at \$50,000, has been incorporated with the principal place of business as San Francisco. Directors are: M. M. Upson, A. C. Everham, C. R. Blyth, R. L. Shurtleff and Burke Corbet.

The Monterey Bay Redwood Co., capitalized at \$1,350,000, has been incorporated in San Francisco. Directors are: C. R. Wayland, D. M. Gregory, C. R. Gordon, A. DeMartini and Winfield Dorn.

Mario F. Guaraldi, Erbest D'Arigo and Odoardo Pardi will operate under the trade name of Acme Concrete Co., with headquarters at 3108 Geary street, San Francisco.

The marked return to favor of mill construction for factories and warehouses is accounted for by the facts regarding such construction. These are summed up in the sixth chapter of the National Lumber Manufacturers Association's notable fire prevention series, which is a part of the cumulative work on "Lumber and Its Utilization," the technical classic on this subject.

The demand for mill construction has occasioned a widespread desire among architects, engineers, industrial executives, building officials, contractors, and others, for complete and authoritative information on the subject. Accordingly the engineers and architects of the National Lumber Manufacturers Association have made a careful study, from which results the present chapter on "Fire-Safe Industrial Buildings" and the following one on "Details of Heavy Timber Construction." The former is now ready for distribution in booklet form. It is being sent to all persons who have applied for the previous chapters of "Lumber and Its Utilization" as well as to certain professional lists. A copy will be forwarded gratis, on application, to manufacturing companies, interested professional men, and industrial executives. It is in no sense an advertising publication but is purely technical and educational.

The booklet points out modern heavy timber construction is "a new type which has only recently reached its present high state of development."

UNSKILLED BRICKLAYERS LAY 3000 BRICKS PER DAY TO GUIDES

A new way of building brick houses quickly and independently of the regulations of union bricklayers, has been devised at Tonbridge, England, where a considerable number of houses have already been erected by a big construction company under this new plan. It has been found that bricklaying can be carried out under this plan, by unskilled laborers or ex-service men without previous training. In a demonstration recently at Tonbridge unskilled men were laying bricks on a cottage in course of construction at the rate of from six to ten a minute, or about 3000 per ordinary working day.

The system is standardized. When the site of a house has been arranged, uprights, preferably of angle iron, are fixed on the ground level at the four corners, and upright tee pieces are fixed between these at intervals of ten feet or at shorter distances where required. These uprights are fixed quite plumb and form the building line of the house. Boards, usually ten feet long by seven inches deep and one inch thick, slide into these angle and tee uprights and form the face against which the bricks are laid.

Bricks placed against the inside of these boards will be perfectly plumb, being laid against the straight building line. The joints of each row of bricks are crossed, and as soon as three rows are laid another board is slipped into position and another three rows of bricks laid against it, and this procedure is adopted up to the full height of the building.

Concrete slab, it is claimed, can be laid in an equally rapid and efficient way by this process. One house a week, it is stated, could easily be put up from foundations to roof by eight men, with one skilled supervisor, in this way.

For that reason many industrial executives, architects, and engineers have not realized that it may supply precisely the type of industrial construction to meet their peculiar requirements. Among the advantages claimed for heavy timber construction are: economy of fixed investment; rapidity of building; independence during erection of seasonal weather conditions; slow-burning or fire-resistance quality. (It is said to be decidedly superior to incombustible building under some conditions, and the statement is made that such a building is liable to be destroyed by fire but once in 2000 years); and the essential flexibility of the material and type, making minor alterations and adjustments easy and inexpensive. Other advantages claimed for mill or heavy-timber, slow-burning construction are: (1) It is peculiarly adaptable to changes; (2) It offers more convenient surfaces for the attachment of machinery, shafting, and pulleys; (3) It encourages improvements in operation because it does not require expenditures for changes which exceed in value the expected benefits; (4) Automatic sprinkler equipment is easily adjusted and economically maintained; (5) The floors have a resiliency that makes faster machine operation possible without the damaging effect of impacts ruining the machines; (6) Overloaded floors are easily discernable and the load may be redistributed before rupture takes place allowing structural members to spring back to normal position.

L. A. BUILDING RECORD OPENS YEAR WITH BRISK START

Los Angeles' building total for 26 days of January, 1925, was \$7,476,363, the estimated value of 2620 projects for which permits were issued. For the corresponding period in December, 1924, the number of permits was 2657 with an estimated valuation of \$8,985,897, and for the first 20 days of January, 1924, the number of permits issued was 331 with an estimated valuation of \$7,506,343. A permit for the Elks' clubhouse to be erected at Sixth and Park View Sts. at an estimated cost of \$1,308,000, is included in the total for the current month. Conditions for building continue favorable, prices of materials generally being at a low level and there being no shortage of labor. Advances in prices of some materials, chiefly steel, have been noted within the last two months, but there is no prospect of any immediate general advance in building commodities. Forecasts by eastern economists indicate a continuance throughout 1925 of approximately the same volume of construction which prevailed during 1924.—Southwest Builder and Contractor.

LANDSCAPE CONTRACTS LET TO WEST COAST NURSERY

The West Coast Nursery Co., 526 Powell street, has been awarded a contract by W. Vonsen of Petaluma to lay out and furnish material for a picnic grounds in that city. The work will cost approximately \$4500 and will include an English garden, a pool, sprinkler system, lawns and installation of park benches.

The same firm reports having secured a contract from I. L. Brown of Hillsborough, San Mateo County, for garden work involving a pergola, lily pond, fountain, sprinkler system and lawns. This contract will run approximately \$3500.

Walter A. Hoff is landscape engineer for the West Coast Nursery Company.

PUBLICATIONS

"History of the Portland Cement Industry in the United States" is the title of a book just published by the International Trade Press, Incorporated, Chicago. This volume, written by Robert W. Lesley, first president of the Portland Cement Association, makes available for the first time, in 1 book, a complete history of the inception of the industry. It describes the original cements, mills, and methods of manufacture, and recounts the work of the pioneers who made it possible for the industry to reach the point that it has reached today. Original patents, first discoveries, and a great many other interesting facts are contained in the volume. The history of the Portland Cement Association, a record of cement production and prices since 1870, standard specifications and tests for portland cement, etc. The book may be secured for \$3 from the publishers.

Underwriters' Laboratories is distributing a report on hollow concrete building units, jointly submitted by the American Concrete Institute, the Concrete Products Association, and the Portland Cement Association. The report describes the program, procedure, and outcome of a series of fire exposures and other tests of hollow concrete building units. The work was done at Underwriters' Laboratories by its staff. Nineteen fire tests, 6 of them on 10- by 11-foot panels, were made and a total of 18 variables of form, composition, and process were investigated. The report closes with practical recommendations based upon a classification method of national standing.

"Productivity Costs in Common Brick Industry," by William F. Kirk, is the title of Bulletin 356 issued by the bureau of labor statistics, United States Department of Labor.

The annual business number of the Seattle Daily Journal of Commerce was issued on January 24. The annual is truly a credit to the publishers, for it covers the Pacific Northwest like a blanket with regards to developments in financial, shipping, industrial, real estate, construction and general business during the year 1924. Articles by leaders of the Pacific Northwest with regards to past and future business conditions are featured in the annual.

FEDERAL CONSTRUCTION COMPANY INVOLVED IN SUIT

Suit to have himself declared a one-third owner of the \$1,500,000 Federal Construction Company has been brought in the San Francisco Superior Court by E. Ehrhart, who claims to have been one of the original incorporators of the paving company, which has handled some of the largest contracts in the State and which is now in the hands of a receiver.

Ehrhart had his attorneys, Myrick, Deering & Scott, bring three separate actions. One is to dissolve the partnership between himself and the other owners of the company. Another alleges that he was defrauded by W. F. Hanrahan, one of his partners, when he led him to believe several months ago that the concern was insolvent and had a receiver appointed.

The third suit is to restrain W. H. McCarthy, receiver, and all persons claiming an interest in the company from disposing of any of its property, and alleges that on July 12, 1924, W. F. Hanrahan and Joseph A. Dowling, two of his partners, agreed that he, Ehrhart, was entitled to a one-third interest.

Plans Laid to Fight Proposed Gas Tax to Finance State Highways

If the legislature should enact over wide spread protest an amendment increasing the present gasoline tax from 2 cents to 3 cents per gallon the legislation will be held up by referendum and submitted to a vote of the people, according to Senator Will R. Sharkey, of Contra Costa. Senator Sharkey declares he has been informed that plans already have been laid by opponents of the proposed tax increase to send the issue to the people for decision.

"As far as I have been able to ascertain," said Senator Sharkey, "there is growing in California the same sort of protest against increased motor vehicle taxation as developed in Massachusetts last year and resulted there in the people voting down a 2 cent gasoline tax by a majority of 270,000."

"The gasoline tax is the poor man's burden. When one considers that the motoring public in 1924 gasoline taxes amounting to more than \$14,000,000, motor vehicle fees totaling \$7,160,000 and that bus and stage line receipts amounted to \$600,000, a total of \$21,760,000, there is ground to believe that the motorist is paying more than his share of taxes. With registration of motor vehicles increased by 20 per cent in 1925, revenues for 1925 will be: gasoline tax \$16,800,000; motor vehicle collections, \$8,592,000; bus and stage line receipts \$600,000; which, with Federal highway aid amounting to \$2,750,000, will make a grand total of \$28,742,000. On the basis of an estimated 15 per cent increase for 1926 the revenues for that year for highway purposes would amount to \$29,800,800, all of which the long suffering motorist, excepting of course, Federal aid, will have to pay.

"Owing to the approach towards the point of saturation with respect to motor vehicle registration, it is quite possible that the percentage increases for 1927 and ensuing years will be lower. Nevertheless, fixing the increases for 1927 and 1928 at 10 per cent and for the years from 1929 to 1935 at 5 per cent, and using the 1925 revenues as a base, the total gasoline tax revenues for the next 10 years, under the existing law, would be \$263,803,422. Registration fees during that period would bring in \$134,916,599. Add to this for the 10 year period the sum of \$33,500,000 representing Federal highway aid and bus and stage revenues and the State would have for highway purposes for the 10 year period a total of \$432,220,021, or an average of over \$43,000,000 annually. I, for one, can see no reason why the California motorist should be called upon to pay during the next 10 years a total of \$131,901,711 additional, as represented by the proposed 1 cent gas tax increase, and \$50,311,080 additional in the same period as represented by the proposed \$2 increase in flat registration fees."

State's Mineral Production in 1924 Sets New High Record

The total value of the mineral production of California for the year 1924 is conservatively estimated by the statistical division of the State Mining Bureau under the direction of Lloyd L. Root, State Mineralogist, to have been approximately \$358,745,000.

This estimated total of \$358,745,000 is an increase of nearly \$15,000,000 over the 1923 production which in turn surpassed the previous record value of the year 1921. This increase in value is due in part to petroleum which, although decreasing some 23,000,000 barrels in quantity, it is estimated will show an advance in total value for the year because of the higher prices per barrel prevailing during 1924.

As the demand for building materials continued active during 1924, nearly all items of the structural group will show increased quantities and total values, especially crushed rock, sand and gravel. Magnesite shipments decreased about 15 per cent in quantity, and the market price dropped off somewhat, owing to increased imports from India. The demand for this material for stucco and other plastic purposes is showing a healthy growth. There were no notable changes in the general status of the miscellaneous "industrial" group, nor among the salines. Demand for architectural terra cotta and tile has caused increased shipments of pottery clays of all grades. Preliminary reports indicate that most of the salines group will show increases for 1924.

The estimated quantities and values of building materials for 1924 are as follows: 28,320,000 (11,800,000 bbls.) cement; 17,000,000 crushed rock, sand and gravel; 10,200,000 brick and hollow building tile; \$704,000 (64,000 tons) magnesite; \$2,000,000 other structural materials, including granite, lime, marble, etc.; \$6,000,000 miscellaneous "industrial" minerals (including asbestos, barytes, pottery clays, dolomite, feldspar, gems, graphite, diatomaceous earth, limestone, lithia, mineral water, shale oil, silica, talc, etc.

PACIFIC COAST OUTLOOK IS BRIGHT SAYS PUBLICATION

"Business Conditions," the weekly publication of the Alexander Hamilton Institute, cites the growth of the demand for West Coast lumber and conditions:

"The outlook in the lumber industry is for improvement over 1924. Lumber prices should average higher and sales should be larger. The price of Douglas Fir, the chief species of lumber cut on the Pacific Coast, are lower than a year ago. But the price trend last year was downward while now it is upward."

The publication then cites prices and consumption for three years past.

Discussing building, it points out the great activity that has been current and allays apprehensions of a possible slump by stating that the Pacific Coast, particularly California, is gaining in population so rapidly that there is little danger the great amount of new housing will not be absorbed. It continues:

The Pacific Coast, with only 5 per cent of the country's population, did twelve per cent of the country's building last year. The heavy volume of construction work continues one of the prominent features in the situation. Building was somewhat smaller in 1924 than in 1923 but was far ahead of 1922. Los Angeles was primarily responsible for the 1924 loss.

California Patents

(Special Correspondence)

The following information is compiled by Munn & Co., New York, patent and trade mark attorneys.

William Wesley Hicks, of San Francisco. **ELECTRIC HEATER.** This electric heater produces a more or less uniform temperature throughout the room, instead of concentrating the heat in one particular locality. It distributes the heat produced by radiation and by convection.

George A. Noble, of Marysville. **CONCRETE MOLD.** This mold is of the type used in the erection of walls, buildings and like structures, and especially to a sectional, separable type of mold adapted for hollow wall structures.

Harry T. Atkinson, of Oakland. **SWINGING WINDOW.** This mechanism will permit of any one of the sashes to be positioned differently from the others, the preferred method of doing this by means of a clutch or releasable connection between the sash and the travelling bar. Mr. Atkinson assigns his patent to Universal Window Company of Oakland.

Scott E. Campbell, of Los Angeles. **REINFORCED CEMENT TILE STRUCTURE.** This is an improved cement tile block of reinforced character arranged so that the tile block when employed for forming a wall structure or the like may be interlocked and connected together and firmly held in staggered relation, whereby the laying of the tile may be facilitated and a fireproof, rigid structure provided.

Pliny E. Holt, of Stockton. **SPRING-MOUNTED ROLLER FOR TRACTORS.** The object of this invention is to cushion the track and thereby to relieve the main frame of the usual shocks and jars incident to the operation of the tractor. Mr. Holt assigns his patent to Holt Manufacturing Co. of Stockton.

James A. Moon, of Los Angeles. **CONVERTING DEVICE FOR WALL BEDS.** This is a device of extremely simple, durable and efficient construction adapted for converting ordinary bedsprings into a folding or wall bed and which is adjustable to accommodate standard forms of spring frames of various dimensions.

Charles J. Schenck, of Runnington. **PUMP PLUNGER.** This comprises an apertured connecting barrel surrounded by interfitting sections radially movable and an apertured liner shiftable in the barrel to adjust the pressure against the inner sides of the interfitting sections.

Clyde F. Moran, of Southgate Gardens. **COMBINATION TOOL CASE.** This case is commodious enough to carry all the tools necessary for a workman to use on a big job, it may be separated into a main compartment, which may be locked and left in any safe place.

John C. Pelton, of Pasadena. **APPARATUS FOR PRODUCING CONCRETE CASINGS.** This comprises a buoyantly supported mold flask, means for projecting a mold form into and out of the flask, and means for agitating this flask.

ORGANIZATION NEWS

(Continued from Page 5)

SACRAMENTO MATERIAL DEALERS NAME OFFICERS FOR CREDIT ASS'N

Permanent organization of the Material Dealers' Credit Association of Sacramento County has now been effected and it will soon begin supplying members with credit information covering the building field.

An explanation of the functions of the association is given by W. E. Bristol, vice president of the association. He said:

"The Material Dealers' Credit Association of Sacramento County, recently organized with practically all reputable building materials dealers as members, will undoubtedly fill a long-felt want and will be of assistance to all worthy contractors as well as dealers. The organization was not formed to hamper in any way the building industry, but to place worthy contractors on a credit rating basis which will tend to protect them against unscrupulous competitors. Further, if, as may often happen, a worthy contractor becomes involved, this association will undertake to arrange for a creditors' meeting. It will have as its purpose the devising of some plan by which the affairs of the contractor can be straightened out.

"The association has been organized to benefit all in the business and in no way to injure dealer or contractor. Coordination of the building industry of Sacramento County is what its purpose really is."

The officers of the association are: D. H. Cron, credit manager W. P. Fuller Company, president; W. E. Bristol, of Carly-Bristol Company, vice president; J. S. Spelman, former president Superior Lumber and Fuel Company, secretary-manager; C. H. Cutter, Cutter Mill and Lumber Company; Allyn L. Burr, roofing supply and contracting company; L. H. Chapman, manager Sacramento Lumber Company, directors. V. L. Hatfield and W. H. Hatfield, attorneys.

JAMIESON RETURNS FROM FIVE NEGLECT

The annual convention of the American Institute of Architects, recently adjourned at Seattle, seems to have failed to give this waiting, watching, waiting world one blamed thing of progress or comfort. Oh yes! there was much about the Gothic, the Greek, the Renaissance and other worn designs, but no inspiration, no moral uplift, no practical plans for the laity of 1925. Huh! What the folks wanted from the professional builders was direction on matters like these:

Cardboard bungalows that wouldn't bleed in the first rain!

Kitchenette in which cold corned beef and potatoes could be chopped up for hash simultaneously.

Where to put fresco on a garage.

A six-room house that would accommodate a Ford, without using the dining room or attic.

A place to hang Dad's bootjack and make it ornamental.

A back door with inlaid hole through which to throw the cat out and not let the flies in.

Some contractors' estimates that come within 97 per cent of the final cost.

But you never need to expect much from Institutes, anyhow. They stick to the technical, professional, aesthetic and other hifalutins and rarely deliver even crumbs to the hot polloi. (Editorial in S. F. Daily News).

WASHINGTON STATE ARCHITECTS ELECT OFFICERS

Daniel R. Huntington, former city architect of Seattle, has been elected president of the Washington State Chapter, American Institute of Architects. Mr. Huntington succeeds James Schnack, Seattle architect. Other officers elected include: Harlan Thomas, first vice president; Henry C. Bertelsen, second vice president; Paul Richardson, secretary; Carl Siebrand, treasurer. Architect A. H. Albertson was chosen a member of the executive committee for the three-year term and H. A. Moldenhour a committee member for the one-year term. Earl N. Dugan was named a delegate to the national convention from Tacoma, with Ellsworth Story and F. A. Narare delegates to the national convention from Seattle.

PORTLAND CONSTRUCTION INTERESTS TO HOLD DINNER-BUSINESS MEET

The annual dinner-business meeting of the Association of Building Construction (A. E. C.) of Portland, Ore., will be held in the main dining room of the Portland Chamber of Commerce, Jan. 30, according to V. C. Stetson, secretary of the organization.

Principal business at the meeting will be the election of directors, for which nominations were made at the December meeting. Officers will be named by the newly elected directors at a meeting some time in the near future.

A report of the arbitration committee will be presented by Charles Holbrook, who has just returned from the east, where he attended a meeting of the building managers' association. Developments in the apprenticeship plan, as sponsored by the association, will be presented by C. D. James.

Ellis F. Lawrence, president of the association, will be chairman of the meeting. H. E. Henneman is in charge of the arrangement committee. Assisting him are Secretary Stetson and C. D. James.

ENGINEERS NAME COMMITTEES

The Sacramento Section, American Society of Civil Engineers, has named the following committees to serve during the ensuing year:

Public relations—Edward A. Hyatt, Jr., chairman; Paul Bailey, W. S. Caruthers, Joseph W. Gross, Carl Maughmer, T. H. Stanton, Jr.

Program—E. N. Bryan, chairman; R. C. St. John, Drury Buel, ship canal—F. D. Talbot, chairman; Fred Grumm, Paul Bailey.

Technical council—J. C. Boyd, Norwood Silsbee, C. S. Pope.

The officers of the society are: Jos. C. Boyd, president; J. Burdette Brown, first vice president; Everett N. Bryan, second vice president, and Norwood Silsbee, secretary-treasurer.

The National Automatic Sprinkler Fitters Association announces that they have made a five year agreement with the Sprinkler Fitters Union of Chicago in behalf of their members doing business in the Chicago territory. The agreement runs until May 31, 1930, and is underwritten by the United Association of Plumbers and Steam Fitters, with which organization the Sprinkler Fitters are affiliated.

APARTMENTS

To be Done by Day's Work.

APARTMENTS Cost, \$27,500
SAN FRANCISCO. SW Guerrero and
Liberty Sts.

Three-story and basement frame apart-
ment house (10 apts.)

Owner—E. Ellingson, 85 Liberty St., San
Francisco.

Architect—C. O. Clausen, Hearst Bldg.,
San Francisco.

Segregated Figures Being Taken By

APARTMENTS Cost, \$—
SAN FRANCISCO. Green and Webster
Street.

Six-story reinforced concrete apart-
ment house (35 2-room and 3-room
apts.)

Owner—Matthies & Gale, 180 Jessie St.,
San Francisco.

Architect—E. H. Denke, 1317 Hyde St.,
San Francisco.

Working Drawings Being Completed; Ready For Figures in About a Week.

APARTMENTS (2) Cost, \$50,000 ea.
SAN FRANCISCO, 25th and Bartlett
Sts.

Two 2-story and basement frame and
stucco apartment houses, contain-
ing 21 2- and 3-room apartments
each.

Owner—James Welch, 1 Northwood
Drive, San Francisco.

Architect—Baumann & Jose, 251 Kear-
ny St., San Francisco.

Construction will start shortly under
supervision by owner.

To be Done by Day's Work.

APARTMENTS Cost, \$34,000
SAN FRANCISCO. NW 4th and Par-
nassus Aves.

Three-story and basement frame (24)
apartments.

Owner—Fred Warden, 1575 11th Ave.,
San Francisco.

Architect—J. C. Hladik, Monadnock
Bldg., San Francisco.

To be Done by Day's Work.

APARTMENTS Cost, \$20,000
SAN FRANCISCO—SE FIFTEENTH
and Lydia Sts.

Two-story and basement frame (16)
apartments.

Owner—E. V. Lacey, 180 Jessie St.,
San Francisco.

Architect—J. C. Hladik, Monadnock
Bldg., San Francisco.

Figures Being Taken on Preliminary Drawings.

APARTMENTS Cost, \$45,000
SAN FRANCISCO. Dolores bet. 15th &
16th Sts.

Three-story apartment house, frame
and brick veneer construction.

Owner—J. C. Bernal,
Designed—Norman W. Mohr, 4405 20th
St., San Francisco.

Building will contain 12 3-room
apartments and will have elevator and
steam heating facilities.

Ready For Figures Monday.

APARTMENTS Cost, \$18,000
BERKELEY. Alameda Co., Cal. Clare-
mont and College Aves.

Two-story frame and stucco apartment
house, containing one store, and
four 2- and 3-room apartments.

Owner—James Davis, Oakland.
Architect—Wm. H. Ratcliff, Jr., Mer-
cantile Bank Bldg., Oakland.

Plans Being Figured.

RESIDENCE Cost, \$25,000
BERKELEY. Cal. North Berkeley.

Two-story and basement frame and
stucco residence, Spanish style.

Owner—Harry Unna.
Architect—W. H. Ratcliff Jr., Mercan-
tile Trust Bldg., Berkeley.

Completing Plans — Owner To Take Figures Soon.

APARTMENT Cost, \$13,000
SAN FRANCISCO. South side Duboce
Ave. West of Valencia.

Two-story frame and stucco apartment
containing four 3-room apartments

Owner—Wm. M. Garvey, 156a Russ St.,
Architect—Richard R. Irvine, Call Bldg.,
San Francisco.

Owner Taking Figures.

APARTMENTS Cost, \$30,000
SAN FRANCISCO. No. Filbert St., W
of Van Ness Ave.

Three-story frame and plaster apart-
ment house containing six 4-room
apartments.

Owner—Ben Liebman, 407 11th Ave.,
San Francisco.

Architect—Richard R. Irvine, Call
Bldg., San Francisco.

Owner Taking Figures.

APARTMENTS Cost, \$38,000
SAN FRANCISCO. Cal. No. Filbert St.
and West of Van Ness Ave.

Three-story frame and plaster apart-
building (seven 2-room and five
3-room apts.)

Owner—Ben Liebman, 407 11th Ave.,
San Francisco.

Architect—R. R. Irvine, Call Bldg., San
Francisco.

Contracts Awarded.

APARTMENTS Cost, approx. \$45,000
SAN FRANCISCO. Eddy St. nr. Van
Ness Ave.

Four-story reinforced concrete apart-
ment (15 2-room apts.) house.

Owner—George Foss, 1120 Market St.,
San Francisco.

Architect—E. E. Young, 2002 Califor-
nia St., San Francisco.

Contracts awarded are:
Concrete—Mission Concrete Co., 125
Kissling St., San Francisco.

Plumbing—Higgins & Krause, 720 Te-
hama St., San Francisco.

Electrical work—American Electric Co.

Bids Being Taken.

APT. HOUSE Cost, \$40,000
SAN FRANCISCO. Page St. near Gough
Street.

Three-story frame and stucco apart-
ment house containing 12 2 and 3-
room apartments.

Owner—I. Zimmerman, 1956 Howard
St., San Francisco.

Architect—C. O. Clausen, Hearst Bldg.,
San Francisco.

TAFT, Kern Co., Cal.—Architects
Edelman & Barnett, 726 H. W. Hellman
Bldg., Los Angeles, are preparing plans
for a two-story brick store and apart-
ment building at Taft for San Orloff,
6 stores and 10 single and double apart-
ments; 50x135 ft., composition roofing,
pressed brick and art stone facing,
sunse glass, copper store fronts, cement
and hardwood floors, gas radiators,
khum water heaters, tiled baths and
drainboards, wall beds, incinerator,
skylights.

Segregated Figures Being Taken.

APARTMENT HOUSE Cost, \$12,000
OAKLAND. Alameda Co., Cal. 3771
Park Blvd.

Two-story frame and stucco apart-
ment house, containing four three-
room apartments.

Owner—Mrs. B. L. Madsack, Oakland,
Cal.

Architect—Willis Lowe, 631 Market
St., S. F.

SAN FRANCISCO—The erection of
an eight-story community apartment
house is contemplated on the north
side of Jackson street west of Laguna
by M. V. B. MacAdam Co., Inc. Ar-
chitect—C. A. Meussdorffer, Humboldt
Bank Bldg., San Francisco.

The drawings are in a very preli-
minary state at the present time, definite
decision as to the final style of con-
struction, size, etc., having not yet
been reached. Construction will prob-
ably not start for some months.

LOS ANGELES, Cal.—Chas. W. Kreis
& Son, 1410 Sunset Bldg., has com-
pleted plans and have gen. contr. for
3-story fireproof brick bldg., 97x60 ft.,
containing 4 stores, 20 apts., at 1441
Sunset Blvd.; \$50,000. Owner's name
withheld. Sub-bids are desired. Conc.
found., brick walls, cem. store fls.,
hwd. apt. fls., O. P. trim, tile baths,
gas radi., incinerator, storage water
str., comp. fl.

LONG BEACH, Los Angeles Co., Cal.
—Architects and Engineers Hugo R.
Davies, 1010 Farmers and Mer. Bank
Bldg., Long Beach, and Harvey H.
Lockridge, 311 Markwell Bldg., Annex,
Long Beach, have been commissioned
to prepare plans for 10- and 14-story
"own-your-own" apartment building
on the property of E. A. Eastman, 1058
E. Ocean Blvd., Long Beach. Cost, \$1-
000,000.

BONDS

TRACY, San Joaquin Co., Cal.—Elec-
tion will be called at once to vote
bonds of \$18,000 to finance purchase of
two school sites and one-room addi-
tion to present grammar school.

UKIAH, Mendocino Co., Cal.—Until
February 10 bids will be rec. by W.
H. Prather, county clerk, for purchase
of \$4000 bond issue of Comptche School
District; proceeds of sale to finance
school improvements.

PESCADERO, San Mateo Co., Cal.—
Election will be held shortly in Pesca-
dero High School District to vote
bonds of \$50,000 to finance additions
to present structure.

Douglas Woodhams & Co.

J. C. LYNN

24 CALIFORNIA STREET
Sutter 5907 San Francisco

GARBERVILLE, Humboldt Co., Cal.—Garberville School District will vote direct tax Feb. 29 for \$2,269 to finance erection of new school. E. R. Linser, L. A. Robertson and J. P. Thomas, trustees of dist.

CHURCHES

Contract Awarded.
CHURCH
FRESNO, Cal. Harvey & Thesta.
Frame church building.
Owner—Church of Brethren, Harvey & Thesta, Fresno.
Architect—None.
Contractor—L. H. Whitlow, 3325 Grant, Fresno.

Bids Being Taken.
Cost, approx. \$15,000 (1st unit)
OAKLAND, Alameda Co., Cal. 54th & Gaskill Sts.
Frame and stucco church (first unit) gymnasium and Sunday School rooms.
Owner—Golden Gate Presbyterian Church Oakland.
Architect—Wythe, Elaine & Olson, 1800 Telegraph Ave., Oakland.
Bids are being taken for a general contract.

ALHAMBRA, Los Angeles Co., Cal.—Architect C. F. Skilling, 430 Bradbury Bldg., Los Angeles, is completing working plans for a brick church building at the northwest corner of Main and Almansor Sts., Alhambra, for First Methodist Episcopal Church; auditorium and balcony to seat 1000, classrooms, Sunday school assembly hall, gymnasium, kitchen, social hall, rest-rooms, etc.; auditorium building, 50x95 ft., educational building, 65x140 ft., pastor's study and board building, 65x70 ft., all buildings to be connected by colisters, plaster exterior, tile roofing, art stone trim, gas heating, basement, water heater, art glass, pine and hardwood trim, hardwood and cement floors, ornamental iron work, tile and marble work.

GILROY, Santa Clara Co., Cal.—Christian Science Church is planning erection of new edifice, 50 x 75 ft., site occupied by old Hanna House. Prel. plans for the structure are being prepared.

BERKELEY, Alameda Co., Cal.—The Third Church of Christ Scientist is contemplating the erection of a church in Berkeley and Architect Henry H. Gutterston, 526 Powell St., San Francisco, will draw plans for same as soon as it is definitely decided what style of architecture will be followed, and what funds are available, etc. Construction will not start for some time.

GARDENA, Los Angeles Co., Cal.—Architects Alfred W. Rea and Chas. E. Garstang, 905 Trust & Savings Bldg., are taking bids for community house and gymnasium at Gardena for Methodist Episcopal Church of Gardena. Separate bids on general work, plumbing, wiring and plumbing. Building will be L-shaped, 2-story and basement, 113x120 ft., frame and plaster construction, clay tile roofing, pine trim. Cost, \$65,000.

MARYSVILLE, Yuba Co., Cal.—Working drawings are being completed for proposed Methodist church to be erected at Eighth and D streets. Rev. J. H. Westervelt is pastor.

EL SEGUINDO, Los Angeles Co., Cal.—Architects Alfred W. Rea and Chas. E. Garstang, 905 Trust & Savings Bldg., have been commissioned to prepare plans for a new Methodist church at El Segundo. Preliminary plans will be prepared at once. Building will be brick construction.

LOS ANGELES, Los Angeles Co., Cal.—Darrall Condey Co., 520 Marsh-Strong Bldg., awarded contract at \$145,000 for all work except interior decorating for a temple at the northwest corner of Central Ave. and First street for Hongwanist Buddhist Temple. Plans are being prepared by Architect Edgar H. Cline, 307 Ferguson Bldg. Excavating will be started immediately. Dimensions, 200x124 ft., 2-story, 17 stories, social hall and private's living in first story, auditorium, offices and living rooms in 2nd story, balcony to auditorium and living rooms in 3rd story; brick construction, pressed brick and stucco exterior, terra cotta trim, tile ornamentation, composition roofing, pine trim, heating and ventilating.

PORTLAND, Ore.—Architect Jacob-berger & Smith, Railway Exchange Bldg., Portland, are erecting St. Mary's Catholic and parish house in block bounded by 17th, 18th, Church and Davis Sts.; est. cost, \$200,000. Cathedral of brick and stone construction, 187x116 ft.; auditorium seating 1500 persons.

PORTERVILLE, Tulare Co., Cal.—Preliminary plans are being prepared for new church, school and parish house for St. Anne's Catholic Church, according to announcement of Rev. Patrick Daly, pastor; will be erected in block bounded by Morton, F. Harrison and G Sts.

FACTORIES AND WAREHOUSES

Segregated Bids Being Taken.
WAREHOUSE Cost, \$—
SAN MATEO, San Mateo Co., Cal. SE cor. Griffith and Third Aves.
Three-story reinforced concrete warehouse, 50 x 80.
Owner—Frederick J. Smith Furniture Co., 3rd Ave. and E St., San Mateo.
Architect—Mitchell & Jackson, San Mateo.

Bids are being taken by the architects for reinforcing steel, plastering, electrical work plumbing, fabricated steel, maple flooring, etc.

Construction shortly under the supervision of the architects.
Immediately upon the completion of this building, an addition of a three-story sales and building display room, with mezzanine floor and rest rooms—reinforced concrete construction, size 50 x 165 will be constructed.

Steel Sash and Plastering Sub-contract Awarded. Cost, \$315,950
WAREHOUSE
SAN FRANCISCO, China Basin.

Two-story reinforced concrete terminal warehouse (building designed for 6 stories).

PRATT'S CONCRETE MIX

Champion
of Sand
Pratt

SO K. C. B. is back.

TO SAN FRANCISCO.

WRITING STORIES.

FOR THE EXAMINER.

LIKE HE used to.

WHEN SANDY Pratt, president.

OF THE Pratt Building Material Co.

PRODUCER OF crushed rock.

CLEAN SAND and washed gravel.

USED TO see him.

AND TAKE him.

TO THE Rotary Club luncheons.

AND EVERYTHING.

ON WEDNESDAY, last.

HE WROTE about the Exposition.

AND WHEN the lights.

WENT OUT.

AND THE moistened eyes.

AND SANDY Pratt.

cried WITH the rest.

WHEN THE lights went out.

ON THE last night.

OF THE great 1915 fair.

AND K. C. B.

WE ALL love you.

WE LIKE your stuff.

AND SANDY Pratt writes.

LIKE YOU only.

IN THE way the printer.

SETS UP the type.

FOR SANDY is a producer.

OF SAND, rock and gravel.

AND NOT a writer.

SANDY PRINTS below.

ONE OF your old pictures.

WHEN YOU lived among us.

"I THANK you."

This picture appeared in the Examiner in 1915 and shows K. C. B., famous writer, wheeling an elderly lady, "with silver threads on her head," all over the Panama-Pacific Exposition grounds. Sandy Pratt, producer of sand, crushed rock and washed gravel, hopes K. C. B. stays in San Francisco forever.

How about bids wanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it?
If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3 3 4 0

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to

Official Proposals

STATE OF CALIFORNIA CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on February 24, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: Ventura County, a reinforced concrete girder bridge across Ventura River near Ventura, (VII-Ven-2-D) consisting of one 30-foot and three 60-foot spans with approach fills.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work here contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on forms furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission,
R. M. Morton,
State Highway Engineer.

W. F. MIXON, Secretary.
Dated: January 26, 1925.

NOTICE TO BIDDERS

(Pipe and Fittings—Santa Cruz)

- 2—12 inch x 12 inch Cast Iron Crosses.
- 12—12 inch x 6 inch x 6 inch Cast Iron Cross.
- 1—14 inch x 12 inch Cast Iron Reducer.

Pipe to be not less than 12 foot lengths.

Pipe and Fittings to be delivered f. o. b. Santa Cruz. Delivery to be made within 60 days after award of contract.

Said proposals or bids will be received at the office of the City Clerk in the City Hall, Church Street, in the City of Santa Cruz, up to the hour of 9 o'clock A. M., on Thursday the 5th day of February, 1925, and the same

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

will be opened by said Council at 9:30 A. M. on the same date.

All proposals or bids must be in writing, give the total amount of bid submitted and must be accompanied by a certified check or bond for ten per cent of the amount bid, payable to the City of Santa Cruz.

The Council of said City reserves the right to reject any and all bids.

S. A. EVANS,

City Clerk.

Dated January 24, 1925.

NOTICE TO CONTRACTORS

(Board of Park Commissioners—San Francisco)

SEALED PROPOSALS will be received at the office of the Park Commissioners, Park Lodge, Golden Gate Park, San Francisco, California, not later than 12 o'clock noon, Wednesday, February 4, 1925.

For the alteration, addition and repairs at the Exposition Yacht Harbor in the Marina at the foot of Scott and Divisadero Streets, San Francisco, Cal. Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Park Commissioners, and must be commenced within five (5) calendar days and completed within sixty (60) calendar days after the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance of contract will be not less than twenty (20) per cent of the aggregate of the proposal.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Board of Park Commissioners, for an amount not less than ten (10) per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application to the office of the Board of Park Commissioners, Park Lodge, Golden Gate Park, and all proposals must be made upon such forms in sealed envelopes marked Bid for the Alteration, Addition and Repairs to Yacht Harbor.

The Board of Park Commissioners

reserves the right to reject any or all bids.

By order of the Board of Park Commissioners.

B. P. LAMB,
Secretary.

NOTICE TO CONTRACTORS

(Alameda County—Hospital)

Office of the Clerk of the Board of Supervisors, Alameda County, Calif. Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, at his office, until Monday, February 9th, 1925, at 10 o'clock A. M. (the day when said bids will be opened and the contract awarded) for the completion of the Tile Marble, Metal Plinths and Elevator Work at the Highland Hospital, Oakland, Alameda County, California.

The above specified work is divided into the following departments:

Department No. 6—Tiling.

Department No. 7—Marble work.

Department No. 9—Elevator work.

Department No. 10—Metal Plinths.

Complete plans and specifications for each of the above specified departments are on file in the office of the County Clerk in the Hall of Records Building, Oakland, California, where copies may be obtained by depositing with the County Clerk the sum of Fifty (\$50.00) Dollars for each of said Departments. Contractors will be restricted as to the length of time these plans and specifications may be retained to ten (10) days. Contractors failing to return said plans and specifications within said time limit will forfeit their deposit to the County of Alameda.

Each bid must be accompanied by a check for at least ten per cent of the amount of the bid or proposal, certified to by some responsible bank, and made payable to Geo. E. Gross, Clerk of the Board, to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the Contract. The Board reserves the right to reject any and all bids.

Dated: January 13, 1925.

GEO. E. GROSS,
Clerk of the Board of Supervisors of Alameda County.

NOTICE TO CONTRACTORS

(Building Alterations—Mare Island)

The Bureau of Yards and Docks invites attention to the fact that it will open proposals, in the near future, on Specification No. 5034, Alterations to Building M-34, Navy Yard (Marine Barracks), Mare Island, California. The work consists of an enclosed second-story frame porch over the existing porch, two wood frame stairways leading from the new porch to the ground level and interior woodwork and electrical work.

In the event that this work is of interest to your firm you should forward immediately to the Bureau of Yards and Docks, Navy Department, Washington, D. C., or to the Commandant, Navy Yard, Mare Island, Calif., a check or postal money order for \$10., payable to the Chief of Bureau of Yards and Docks, as security for the safe return of the drawing and specifications, which will be forwarded as soon as available.

Prospective bidders on the West Coast should make application at the Navy Yard, Mare Island, Calif., for the bidding data.

MONTHS' WORLD TOUR

Walter Jamieson, a member of the
firm of Reagle & Jamieson, damp-
proofers and white-washers, returned
Sunday, January 25, from a five months'
tour of the principal cities throughout
the world. Jamieson admits the world
is somewhat out of place and harbors
some wonderful cities, but the city by
the "Golden Gate" is the final draw-
ing attraction in his estimation.

ROMAN PAINT COMPANY SELLING PAINT JOBS ON MONTHLY PAY PLAN

The Roman Paint Manufacturing Co.,
Inc., of San Francisco and Oakland, an-
nounces the inauguration of a new
method of financing the painting of all
building property by the use of the ac-
cepted monthly payment contract plan.

"This arrangement," says Con Ro-
man, "has gained great favor among
the home owners, inasmuch as it
places within the means of all the
opportunity of beautifying and preserv-
ing their investment. The plan is
merely a continuance of one of the
most successful and popular forms of
financing today, as a very large per-
centage of homes are both bought and
furnished on the installment basis.

"The huge depreciation loss to build-
ing property occasioned by neglect to
repaint is making itself felt to the
vast majority of home owners who are
not situated financially to enable them
to expend at one time the full contract
price." Roman continues, "with the
results that as a local manufacturer
we felt it our duty to arrange the
means of all owners to provide for
adequate protection of their invest-
ment on a monthly payment plan."

The Roman Paint Manufacturing
company believes this to be one of the
most progressive steps made in the
paint business during recent years to
make possible the much needed devel-
opment of civic pride so often advocat-
ed in the slogan: "Clean Up—Paint
Up; Keep Our City Clean!"

Contract blanks covering the month-
ly payment plan, as prepared by the
company, are obtainable on applica-
tion from the San Francisco or Oakland
offices of the company.

RESIDENTIAL BUILDING IN LOS ANGELES SUMMARIZED

During the last four years 79,643
residential buildings, including dwell-
ings, flats, apartments and hotels, esti-
mated to cost \$322,338,331, were
erected in Los Angeles, according to
the annual report of the city building
department. Nineteen twenty-three
was the big year for this class of con-
struction with a total of 25,861 build-
ings with an estimated cost of \$115,-
565,844. Following is the record by
years:

Year 1921

SAN FRANCISCO FIRM IS LOW ON AMERICAN FALLS DAM

Special Correspondence

The Utah Construction Company, Phelan Bldg., San Francisco, submitted the lowest bid to the U. S. Bureau of Reclamation to construct the American Falls Dam at American Falls, Idaho.

The bid is \$1,281,600. The project involves approximately 50,000 cubic yards of excavation; 60,000 cubic yards of earth embankment; 28,000 cubic yards of rock excavation; 115,000 cubic yards of concrete; 1,100,000 pounds reinforcing steel; 1,200,000 pounds structural steel and 1,700,000 pounds of cast iron gates.

Other bidders on the project were: Atkinson & Atkinson, \$1,319,235; Strange & McGuire, \$1,354,457; James Heyworth, \$1,380,000.

BILL LEWIS A BENEDEICT

Bill Lewis of the Lewis Roofing & Asbestos Works has put over some big contracts recently and attributed his success to the fact that he thinks for himself and has no partner in business.

However, Bill like the rest of us— took the grand fall and realized the fact that he needed someone to help him think and further—that a partnership is essential in or out of business.

Hence, in a very silent way, Bill took the short, long and shaky walk up the center aisle in December and today, in his own words, is a "man of responsibility."

Good luck Bill—may all your troubles be "little ones."

LEGAL NOTICE INFORMATION

G. R. Holcomb, Title Examiner, 3885 5th Ave., Sacramento, has prepared a list of all legal notices required by law to be given in California, in alphabetical arrangement; together with a synopsis of the laws governing the time and manner of their publication, posting and service. The list was originally prepared for use of California newspapers and is very useful. A glance will disclose what legal notices must be given in California and the time and manner of their publication, etc. The price for the list of \$5.00.

Reports to the National Lumber Manufacturers Association from 348 of the larger commercial sawmills of the country indicate that 1925 is opening promisingly in the lumber industry.

A "Pittsburg" Automatic Gas Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all of the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

KOEHRING

DANDIE Light Mixer

Dandie with steel disc wheels and solid rubber tires; power charging skip, water tank and gasoline engine.

Dandie with steel trucks; power charging skip, water tank and gasoline engine.

EQUIP it to your special needs. Rubber tires to save the time waste of between-job hauls, and to expand your working territory. *Light duty hoist. Low charging platform or power charging skip. Automatic water-measuring tank.*

Most important, you can be sure of full capacity—utmost reliability—and long service life—because this mixer is Koehring built, engineered and constructed to out work, out last anything in the light mixer field. Price? Not the lowest price

—no—but the most remarkable value of all light mixers—and still within the range of light mixer prices.

CAPACITIES

4 and 7 cu. ft. mixed concrete, steam or gasoline power. May be equipped with power charging skip or low charging platform with hopper, light duty hoist, automatic water measuring tank. Mixes mortar as well as concrete.

LUMBER DEALERS PROTEST CHANGE IN S. F. BUILDING LAW

Lumber dealers, some of whom operate fleets of ships between San Francisco and the Northwest, have flooded the Board of Supervisors' offices with protests against the proposed building law amendment which would permit the use of wire mesh and plaster sheathing in the building of homes in San Francisco.

The dealers say that the amendment would result in cheapened construction, create fire and accident hazards, and also result in a great loss of shipping and other business. The present building code requires the use of wooden sheathing.

The Goos Bay Lumber Company, in a communication to the Supervisors stated "we maintain at all times a fleet of barges used to take care of this business in the San Francisco market, and if the ordinance should pass, we would suffer considerable monetary loss." Other firms stated that an Eastern company is attempting to introduce the wire mesh and plaster substitute, and that it will work great hardship on local companies. Among those writing letters of protest were: Paramo Lumber Company, Redwood Sales Company, Hart-Wood Lumber Company, Northwestern Redwood Company and the Booth-Kelly Lumber Company. The building law amendment is scheduled to come before the Supervisors on February 9 on final passage.

"BOTTLE NECK" STATE HIGHWAY TO BE WIDENED

With the widening of the Peninsula Highway completed between San Bruno and the southern boundary of San Mateo County, engineers of the California Highway Commission are now giving their attention to the one remaining weak spot—the situation in Colma and southward along the cemeteries for approximately a half mile. Studies of Peninsula traffic, following the recently completed widening, show that congestion is now due almost entirely to the presence of interurban car lines on the state highway right of way south of Colma.

This is the expression of Chairman Harvey M. Toy, who recently announced plans of the commission for additional work north of San Bruno.

Discussing the commission's plans, Toy said:

"The fact that tracks of the United Railroads occupy a portion of the state highway right of way in the vicinity of the cemeteries, is the most difficult problem we have to face on the entire Peninsula. The width of roadway not occupied by the tracks is not sufficient to handle existing traffic and the acquiring of additional rights of way is complicated by the presence of the cemeteries.

"Specifications are being prepared for the widening of 4.25 miles of the highway from San Bruno northward to the cemeteries, but final plans for the widening on the section immediately south of Colma cannot be made until the problem of wider rights of way and the car track situation are cleared up. However, this will not delay the work farther south.

"We have determined to overcome this difficulty if it is within our power to do so. We are hampered by the lack of a comprehensive plan for the development of the Peninsula which dates back to the days before improved highways and widespread ownership of motor vehicles.

"The Peninsula Highway should be 100 feet wide, without railroad tracks, car lines, or other obstructions, from the heart of San Francisco at least as far south as the Santa Clara County line. That is impossible now, but we will do the best we can under present conditions to put to its greatest use the existing highway.

"Bids will be called for in the near future for the widening work to be done south of the cemeteries. In the meantime, studies are being made of the Colma situation which we hope may bring about a possible solution."

STATE HIGHWAY TO BE WIDENED IN YOLO COUNTY

Bids will be opened by the California Highway Commission, March 2nd for the placing of flush concrete shoulders on the Westside state highway from Putah Creek, the southern boundary of Yolo County, to Woodland and from the Davis Y to Davis; in all, 12.83 miles.

From Putah Creek to Woodland, the present fifteen-foot pavement will be widened to twenty feet, and from the Davis Y to Davis to twenty-seven feet. Yolo County has agreed to participate the cost of the latter part of the widening. Because of increased traffic, the sections to be widened have become dangerous and numerous accidents have occurred in recent months.

The work will be financed from gasoline tax funds and is one of the first jobs to be advertised on the 1925 program in the northern part of the state. Completion of this section will leave very little fifteen foot pavement between Sacramento and Oakland.

Present plans for future widening between Davis and Sacramento, as announced by State Highway Engineer R. M. Morton, call for a twenty-seven foot pavement. Because of increasing traffic it is not believed economical to widen the highway to a lesser width.

1925 WILL BE BIG PAVING YEAR FORECAST INDICATES

Telegraphic forecasts to the Asphalt Association from thirty-seven state highway commissioners and forty city engineers of cities of 100,000 population or over indicate that the year 1925 will be the greatest year for the paving of streets and highways in the entire history of the good roads and good streets movement. From a study of the replies J. E. Pennybacker, General Manager of the Association, estimates the 1925 paving at fully 20 per cent over 1924 which latter year was itself a record breaker.

Among the outstanding paving programs are those of Alabama with a 100 per cent increase over 1924, Missouri with at least a 60 per cent increase, South Carolina with 47 per cent, Texas will construct a much larger mileage while Illinois sets 1500 miles as the anticipated program for the year. Michigan on the other hand, anticipates a sharp reduction of about 25 per cent, Wisconsin of about 40 per cent and Iowa about 10 per cent from the 1924 record. These replies relate only to state highways.

RUBBER PAVING MAY BE USED IN SAN FRANCISCO

Rubber paving blocks in place of concrete and cobbles are being considered by City Engineer M. M. O'Shaughnessy, who has been making a study of the rubber paving idea at the request of Timothy Reardon, president of the Board of Public Works. Reardon has given considerable study to the idea and points to the success of the rubber paving blocks in use on the Michigan avenue bridge at Chicago.

"Wonderful reports about the desirability of rubber are coming from Chicago," Reardon states. "The Michigan avenue bridge was paved with rubber recently. Some 60,000 autos pass over this bridge every 24 hours and yet the rubber paving blocks are as sound today as when they were put in."

N. Y. LATHING FOREMEN STRIKE

Refusal of lathing contractors in New York to grant an increase from \$63.25 a week to \$75 has resulted in a strike of metallic lathing foremen. In many instances the journeymen lathers left the jobs at the same time the foremen quit. Contractors have announced that as long as the men are on strike they will not arbitrate the dispute. The strike has a greater effect on building operations in New York than the walk-out of the same craft would have any place else, as the metal lathers in that city have jurisdiction over the placing of reinforcing bars in reinforced concrete construction.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

What will California motorists think of this?

Over in England, so Albert E. Jull, member of the New Zealand Highway Board tells Chairman Harvey M. Toy of the California commission, they tax automobiles about \$5 per horse power which brings the annual payment to the government on a Ford car up to something like \$105. The result has been the building of machines with as low as seven horse power.

Jull, who has been inspecting California highways and those of other states on his way home from London, does not think much of the taxation scheme of his mother country and is going back to New Zealand to advocate a gasoline tax patterned after the California law to replace the present ad valorem duty on tires. Improved highways, he points out, prolong the life of tires, and, by removing the duty, trade in this commodity will be encouraged and more automobiles will be owned in his country.

Jull recently visited Canada. The gasoline tax in Quebec has proved so popular that the neighboring province of Ontario is considering its adoption.

The visitor, who has been the guest of Chairman Toy for several days, declared California motor vehicle taxes about equal to a dog license in Great Britain. They cannot be considered a tax, he said, but an investment in one of the greatest assets California has, her incomparable system of highways.

On January 5, 1925, apprentice schools for painters and electricians were opened in Cleveland under the auspices of the Board of Education, contractor associations, and unions of the two trades, in co-operation with the Building Trades Employers Association. Schools for the training of bricklayers, carpenters and plumbers have been in operation for some little time and one for plasterers is now being organized.

One of the features of the annual convention of the Associated General Contractors of America, held in Washington, was an address by President Coolidge. The President suggested to the delegates means of extending their public service, one by co-operating with the government in relieving unemployment and another by the adoption of uniform contract forms.

A poll of state governors by the New York World as to the probable action their legislatures may be expected to take on ratification of the Twentieth Amendment or so-called "Child Labor" Amendment indicates that it will likely fail of ratification.

The Pacific Elevator and Equipment Company plans early construction of a one-story reinforced concrete machine shop in Rausch street near Howard Street, San Francisco. The structure will contain a mezzanine floor and will cover an area of 75 by 112 feet.

Fresno county grand jury will be asked by Fresno Chapter, American Association of Engineers, to readjust the salaries of deputy county surveyors.

Chas. E. Ashburner, city manager of Stockton, recommends a \$3,000,000 bond issue to finance Stockton's deep water project.

The phenomenal growth of the asphalt paving industry during the period 1918 to 1924 inclusive was emphasized at the Annual Meeting of The Asphalt Association held in Chicago, January 8th, by the report of the Secretary showing that while in 1918 a total of 52,600,000 square yards of asphalt pavement was laid in the United States, the comparative figures for 1924 were 118,800,000 square yards or an increase of 125%. The outlook for paving in 1925 was shown to be most encouraging as evidenced by seventy-three telegraphic reports from state and city engineers comparing the yardage laid in 1924 with the anticipated yardage laid in 1925. Many states and cities reported an anticipated increase of more than 100% in paving activity while the general average indicated at least a 20% gain over the past year.

The next meeting of the National Board for Jurisdictional Awards will be held in Washington beginning March 9th. Labor will be represented on the Board by two new delegates to take the places of Geo. F. Hedrick, newly elected President of the Building Trades Department, and Thomas R. Preece, former Vice President of the Bricklayers, Masons and Plasterers International Union. The place vacated by Mr. Hedrick will be taken by J. P. Noonan, President of the International Brotherhood of Electrical Workers, while that of Mr. Preece will be filled by Walter Price of the Bricklayers. The resignation of W. J. Spencer as Secretary of the Board was tendered at the last meeting but action on same will be deferred until the next session.

G. H. Ward, former president and general manager of the Ward Lumber Company at Modesto, is not entitled to an accounting of the deal whereby he turned over his property to that company and the United Bank & Trust Company, according to a decision of Superior Judge J. C. Needham of Modesto. Defendants were Harry L. Say, T. H. Kewin, E. C. Peck, the Kewin Lumber Co. (formerly the Ward Company), and the United Bank & Trust Company. Ward virtually wrecked the lumber company, said the court in its opinion and the action of the defendants to save the corporation "was the natural action which businessmen would take under the circumstances."

Coast Rock and Gravel Company of San Francisco has filed a complaint with the Railroad Commission against the Southern Pacific Company and the Western Pacific Railroad Company alleging that defendant carriers have collected excessive rates on crushed rock shipped from Fair Oaks to Bradford, and asking reparation for all sums collected in excess of 3 1/2 cents per 100 pounds.

Senator Moore, of Navajo county, Arizona, has introduced bill in Arizona State Legislature seeking \$250,000 appropriation to finance state owned cement plant.

Voters of Porterville, Calif., at recent election failed to endorse the city manager plan of government.

TRADE NOTES

Merger of Harris-Hull, Inc., Clarke Rock & Gravel Corporation, Roscoe Rock & Sand Co. and Sherman Building Material Company under the name Harris & Hull, Inc., is announced. The object is to unify production and distribution in the interest of better service. The Los Angeles office of the consolidated business is at 3326 San Fernando Road.

Following a quarter of a century in business, the West Side Lumber Company of Sonoma, has disposed of its holdings in Tuolumne county, to the Crossett Lumber Company, a concern with forest acreage and large mills in the south and the northwest.

Benjamin Electric and Manufacturing Co. has opened new offices, displayrooms and warehouse quarters at 448 Bryant Street, San Francisco. Miles F. Steel is manager of the company for the Pacific Coast territory.

Peninsula Construction Co. has been formed in Redwood City and will engage in the cementing contracting business. Those interested in the company are: Manuel J. Soto, Jr., Antoine Verra and Manuel J. Soto, Sr.

Tilden Mill & Lumber Co. of Oakland has purchased additional property at Santa Fe Ave. and West Eighth St., Hanford, for yard expansions at the Lucerne Lumber Company, recently purchased by the Oakland concern.

Salinas Valley Pipe Company has leased 2-acre site near Soledad, Monterey County, and will establish a plant for the manufacture of concrete pipe.

The J. Godeau Lumber Company, operating near the headwaters of Pescadero Creek, San Mateo County, plans to establish a saw mill on Pescadero Creek near San Jose's Rest.

Gladding-McBean Co. has purchased approximately 60,000 square feet of property in Harrison street near Ninth, San Francisco, and will establish a display yard and distributing depot.

Chas. Izmirian of New York has leased the sheet metal shop of J. F. McGowan & Co. at 150 A St., San Mateo. J. F. McGowan will devote his entire time to the plumbing business.

Long Beach Lime & Putty Company of Long Beach, Alexander Foster, president, plans early construction of fire-proof warehouse at Pico and Commercial streets, that city.

The Buchanan Lumber Co. of San Francisco has been incorporated with a capital stock of \$250,000. Directors are: C. R. Buchanan, N. Peters and Ralph Coffey.

Logan & Davis, contracting painters, have opened new quarters in the Phil Varner Building in North Main Street, Petaluma.

Jas. G. Yates will operate under the firm name of James G. Yates Paint Company with offices at 470-490 Treat Avenue, San Francisco.

A. A. Cantin, architect, has moved from 110 Sutter Street to larger quarters in the Flat Iron Bldg., San Francisco.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

BUILDERS OPPOSE HIGHER GASOLINE TAX

Representatives of the Richmond Builders' Exchange will attend a convention of the National Association of Builders' Exchanges, to be held in Los Angeles February 24, 25, 26. A communication from the national association, requesting the names of the members of the local exchange who will attend, was read last night by L. C. Dexter, secretary.

The exchange adopted a resolution emphatically opposing the proposed increase in the state gasoline tax. A bill is now before the legislature that would increase the tax from 2 to 3 cents per gallon.

A. Waring, of the contracting firm of Waring & Plmm, presented the exchange with music rolls for the player piano. E. H. Higgins, first vice president, presided at the meeting in the absence of P. M. Sanford, president.

BUILDERS IN NEW QUARTERS

The Stockton Builders' Exchange has moved from 110 North Sutter Street to more commodious quarters at 20 North San Juan Street, Stockton. The new quarters are in the center of the banking district of the city and are larger than those previously occupied by the exchange. Extensive alterations were made to afford a spacious general meeting room, committee meeting rooms and several private offices. A feature of the new quarters is a material display section which can be viewed by the passing pedestrians.

NORTHWEST BUILDERS ORGANIZE

Formation of the Northwest Conference of General Building Contractors, an organization which will embrace Oregon, Washington and Idaho, was perfected at a recent meeting in Tacoma, of representatives of master builders' associations and individual contracting firms of the Northwest. The meeting was held in the offices of the Tacoma Master Builders' Association, Tacoma Building.

The announcement issued before the meeting said it was partly for the purpose of deciding on a standard wage scale for the building industry the coming year, but, according to the statement given the press after the meeting, only minor changes in conditions of the building industry were taken up and the question of wages was left entirely to a committee which was appointed to make a study of the whole industry and suggest a code of ethics and a system of inter-relations in the building industry itself.

CLEVELAND TRADES VOTE AGAINST FIVE DAY WEEK

The president of the Cleveland Building Trades Council has announced that there will be no concerted efforts on the part of the unions in the central body to put into operation the five day week this year. The Council itself did not vote on the measure, but a majority of the locals have voted against making the demand. The plumbers and lathers have already demanded the five day week, but it is believed that since the majority of the trades are opposed to it that these two unions will not press the issue.

Capitol City Architects and Engineers to Adopt Code of Ethics

A special meeting of the Architects and Engineers Club of Sacramento was held in the Building Material Exhibit, that city, Jan. 29. R. A. Herold, architect, presided.

The meeting was held to formulate plans to promote the welfare of the club and the architectural and engineering professions. This was discussed from many angles with the result that the chairman was directed to confer with the officials of "KGO" radio broadcasting station with regards to the club being given an Educational Evening to talk on architecture and its benefits and advantages to the public.

R. A. Herold, Jens C. Petersen and Arthur Memmler were appointed a committee to arrange for the election of officers to be held Feb. 5 in the Ex-

hibit Hall, 910 Ninth St., Sacramento. A committee consisting of Arthur Memmler and D. H. McMillin was appointed to see what courses were given in architecture in the schools and to offer the assistance of the club in any way it could be used.

A plan was discussed to establish a code of ethics, this to be gone into thoroughly at next meeting. Those taking part in the discussion were Frederick S. Harrison, Jens C. Petersen, Clarence Cuff, Harry De Haven, Carl E. Berg, J. W. Dutton and R. C. Younger, Paul Daum, Harold Woodhams and W. J. Long, Albert Keating, Earl Ryan, D. H. McMillin, S. F. Devlin, L. G. Mapel, Arthur Memmler.

The meeting closed with a buffet lunch.

Meeting Held at Sacramento to Consider State Flood Control

The initial meeting of the citizens executive Committee on state flood control appointed by A. T. Spencer, president of the California State Reclamation Board, was held in Sacramento Wednesday, January 28. There were present George E. Springer, San Francisco; E. L. Shelly, Ryde; A. C. Harvie, Rio Vista; Jas. Boyd, Willows; C. J. Westcott, Colusa; J. P. Elliott, Courtland; Carson C. Cook, Stockton; B. S. Crittenden of Tracy; Dr. E. L. Dow, San Francisco; W. P. Dwyer, Sacramento; George B. Robbins, San Francisco; Jesse Poundstone, Grimes; Fred W. Kiesel, Sacramento; J. U. Pearson, Marysville; I. H. Sanborn, San Francisco; Dan Hadsell, San Francisco; W. E. M. Beardslee, Sacramento; Senator F. S. Boggs, Stockton; M. J. Boggs, Colusa; and Thomas McCormack, Rio Vista of the Executive Committee, and the following members of the State Reclamation Board: A. T. Spencer, Pres., Geo. Atherton, Stockton; I. L. Borden, San Francisco; W. H. Buster, Colusa; Daniel McCormack, Rio Vista; J. H. Stephens, Sacramento; and E. S. Wadsworth, Sutter City.

After President Spencer had briefly outlined the purpose and objects to be accomplished by the committee and how it was planned the committee would co-ordinate and co-operate with the State Reclamation Board in carrying out the flood control program as drawn by the U. S. Debris Commission in collaboration with the State Reclamation Board, Stephen W. Downey, attorney for the Board, read and explained the various legislative measures that had been introduced in the State Senate by Senator F. S. Boggs of Stockton, and in the Assembly by Assemblyman B. S. Crittenden of Tracy. Mr. Downey explained that before it could be hoped to secure the approval of Congress to the revised plan it would be necessary to indicate by the adoption of appropriate legislation by the California Legislature that the State was behind the plan and ready to assume its share of the hur-

den. Mr. Downey drew attention to the fact that the plan contemplates a redistribution of costs which will reduce the burden now placed on the landowners, and that the proposed legislative measures will fit into the general scheme of operation recommended by the U. S. Debris Commission which it is expected Congress will ratify November next.

The program of construction as agreed upon by the State and Federal authorities was also gone into at length by a member of the engineering staff of the Reclamation Board.

The formation of a State Flood Control Association, with the present Executive Committee as a nucleus, was advocated by A. T. Spencer, and by motion Spencer was made temporary chairman and C. E. Springer, of San Francisco, temporary secretary. The chairman was authorized to appoint a Legislative Committee of five to work with him and the secretary to define a plan of co-operative action and procedure in order to adequately support the State Reclamation Board in its present undertaking, and to report at a meeting of the Executive Committee to be held February 10 at Sacramento. At the February meeting it is expected that a permanent organization will be formed and discussion opened on the various measures presented at this session of the Legislature.

Later President Spencer announced the personnel of the Legislative Committee to be: E. L. Shelly, C. J. Westcott, Thomas McCormack, W. P. Dwyer, and F. W. Kiesel. Commenting on the meeting of the Executive Committee, Spencer stated: "I am at a loss to sufficiently express my gratitude to the members of this committee of citizens for the splendid spirit displayed by their very evident earnest desire to assist myself and the members of the Reclamation Board in solving the various problems of flood control which now confront the State. I was surely pleasantly surprised when I found that of the 22 committeemen appointed 20 responded to the call."

ELECTRICAL MACHINERY PRODUCTION IN 1923

The Department of Commerce announces that, according to the data collected at the biennial census of manufactures, 1923, the total output of electrical machinery, apparatus, and supplies in the United States during that year was valued at \$1,304,650,999, an increase of 59.4 per cent as compared with \$818,415,159 in 1921, the last preceding census year.

Of the total for 1923, \$184,510,010 was contributed by insulated wire and cable, \$127,212,066 by motors and parts (not including controllers and automotive starters), \$124,630,467 by batteries, \$90,857,998 by telephone apparatus, \$71,967,458 by incandescent lamps, and \$67,002,084 by household apparatus and appliances.

Of the 1671 establishments reporting for 1923, 256 were located in New York, 212 in Illinois, 195 in Ohio, 161 in New Jersey, 159 in Pennsylvania, 130 in Massachusetts, 98 in California, 65 in Connecticut, 59 in Indiana, 58 in Michigan, 57 each in Missouri and Wisconsin, and the remaining 164 in 27 other States and the District of Columbia.

Illinois; the leading State in this industry reported products valued at \$211,366,206; Pennsylvania was second, with \$201,117,706; New York third, with \$192,224,937; Ohio fourth, with \$174,329,350; Massachusetts fifth, with \$117,575,926, and New Jersey sixth, with \$103,755,136.

PATCHING PLASTER IN SMALL QUANTITY IS MARKETED

To meet the requirements for materials for home-repairing, and to make it possible for painters, decorators and home-owners to do small patching jobs without the expense of buying large quantities of plaster, the United States Gypsum Company is putting on the market "Red Top Patching Plaster" in 2½-pound cartons. It is ready-mixed, subject to quality-control at the factory, so as to require the addition of water only before it is applied. It has been formulated to work easy, to spread far and to set after ample time has been allowed for smoothing the surface. It is adapted to filling fine cracks or larger wall-defects. Plaster of Paris and other substitutes used by decorators and householders for such work do not make permanent repairs. This material makes a chemical bond with the old plaster. By making the patch homogeneous with the old plastering it safeguards against reappearance of the crack or hole. It makes the patch uniform in appearance with the rest of the wall and its equal in strength and durability. It eliminates the necessity of dealers handling "broken bags."

PRATT BUNKERS AT SACRAMENTO LEASED TO ATLAS MORTAR

Clarence F. Pratt, president of the Pratt Building Material Company, reports leasing of the company's sand and rock bunkers at Fifteenth and A streets, Sacramento, to the Atlas Mortar Company of San Francisco.

The bunkers have been operated during the past five months by the Ehret Rock & Gravel Company, and constitute one of the largest units of this nature in Superior California.

The Atlas Company has been supplying the building trade in San Francisco for many years with ready-mixed mortar. It will be the purpose of the Sacramento plant to retail crushed rock, gravel and sand from the bunkers, and in addition manufacture and distribute ready-mixed mortar to local builders.

Edward Oden of San Francisco will go to Sacramento to become resident manager of the company.

Program for National Convention of Builders Exchanges in Los Angeles

An outline of the program for the fourteenth annual convention of the National Association of Builders' Exchanges to be held at the Biltmore hotel in Los Angeles, Feb. 23 to 27, has been prepared by the committee in charge of arrangements, which is headed by George L. Eastman. Delegates will be in attendance from all sections of the country. Eastern delegates will come on a special train over the Santa Fe, arriving at 3:30 p. m., Feb. 23. Following is the convention program as now outlined:

Monday, February 23

Arrival of special train at Santa Fe depot at 3:30 p. m. Delegates to be taken to hotels by reception committee.

During the evening delegates will be transported to one of the large motion picture studios where an elaborate entertainment program will be presented.

Tuesday, February 24

Convention will be called to order by William F. Chew, president of the national association. Invocation by Dr. J. Whitcomb Brougher of Los Angeles.

Gov. Richardson, Mayor Cryer and Godfrey Edwards, president of Los Angeles exchange, will officially welcome the delegates.

Robert K. Cochrane of Pittsburg, Pa. will respond for the delegates.

The committee for nomination of officers for the ensuing year will then be appointed.

Address by Rex E. Goodcell, collector of internal revenue, on "A Battle Royal and Won."

Afternoon Session

Presentation of resolutions. President's report, William F. Chew, of Baltimore, Md.

Treasurer's report, Thomas L. Davis, Youngstown, O.

Executive committee report, E. F. Stokes, Baltimore, Md.

Board of control report, E. F. Stokes, Baltimore, Md.

Report of committee on lien laws. Virgil C. Dibble, Columbia, S. C., and discussion of subject by delegates.

Report of committee on building and housing. William F. Chew, Baltimore, Md., and discussion by delegates.

During the afternoon the women visitors will be taken on auto tour of city, and during the evening will attend

theater party at Grauman's Egyptian, Hollywood.

Wednesday, February 25

Morning Session

Presentation of resolutions.

Report of bulletin committee, E. F. Stokes, Baltimore, Md.

Report of committee on standard documents, C. G. Norman, New York City, and discussion by delegates.

Report of committee on finance, Max Bauman, New York City, and discussion by delegates.

Report of committee on quantity survey, John Dahlman, Milwaukee, Wis., and discussion by delegates.

Afternoon Session

Nomination and election of officers. Open forum, subjects by members of secretaries' conference.

7 P. M.

Annual banquet and dance, Ballroom, Biltmore, Godfrey Edwards, president of Los Angeles Exchange, toastmaster.

Thursday, February 26

Morning Session

Presentation of resolutions.

Report of committee on cost data, Charles William Bernhardt, Atlanta, Ga., and discussion delegates.

Report of committee on industrial education, Robert Cochrane, Pittsburg, Pa., and discussion by delegates.

Report of committee on legislation, I. H. Scates, Baltimore, Md., and discussion by delegates.

Address by Sylvester Weaver, president of Weaver Roofing Company, on "Construction Industry of the West."

Afternoon Session

Selection of convention city for 1926.

Introduction of new officers.

Appointment of zone directors and announcement of board appointments, standing committees and state commissioners.

Friday, February 27

Automobile trip to Los Angeles harbor and tour of the harbor on city excursion boat. Luncheon at Southern California Yacht Club.

Automobile tour of Long Beach, Signal Hill oil field, returning to Los Angeles through orange groves and walnut orchards in afternoon.

During the evening delegates will be at leisure to visit with Los Angeles friends.

Building Decline Predicted in 1925

Building construction approximated \$5,341,400,000 in the year 1924, a decline of about \$600,000,000, compared to 1923, according to a survey of the building industry in the United States completed by the Copper and Brass Research Association. The survey indicates that the housing shortage practically has been overcome, and that the prospects are for a \$4,000,000,000 building year in 1925.

More than \$16,000,000,000 was expended on construction during the past three years in the effort to make good a shortage which in 1920 represented \$10,750,000,000 of building requirement. This tremendous activity has resulted in the progressive reduction of the shortage until now it is estimated at \$750,000,000. A year from now it will be reduced to \$400,000,000.

The year 1924 has seen an unusual increase in the total spent for housing. In 1923 this represented about 40 per

cent of the total. For 1924 the total spent for housing was \$2,681,900,000, or 50.1 per cent. Business buildings represented 12.4 per cent and industrial structures 9.8 per cent.

There are several indications that the building industry is slowing down. In large cities projects and contracts awarded are closer together than ever before, and throughout the country the ratio of projected work to contracts awarded is reported to be at present about 1.35, showing a steady decline from a high of 1.87 in January, 1924, and from 2.07 in 1921.

The shortage has been mostly in housing. The best indication of a sufficient supply or a surplus of housing is to be found in reduced rents. To date there has been practically no reduction. But in order to keep rents at present figures, landlords in some localities are offering two or three months rent free. The housing shortage has been practically overcome.

PUBLICATIONS

The Federal Board for Vocational Education, Washington, D. C., has published Bulletin Number 95 of the Trade and Industrial Series Number 27. The title of the bulletin is "Brick-laying," and it contains an analysis of the trade of bricklaying together with suggestive courses of training for apprentices and journeymen workers. Although the bulletin is written primarily with the thought of meeting the needs of training courses organized for employed apprentices, it will also be of interest to employers and employes, as well as to those directly concerned with the supervision and the instruction of trade classes in vocational schools. The manuscript for the bulletin was prepared under the direction of Frank Cushman, chief of the Trade and Industrial Education Service, by G. A. McGarvey, regional agent for trade and industrial education.

"Calcium Chloride As an Admixure in Concrete," by Duff A. Abrams, is the most recent bulletin issued by the Structural Materials Research Laboratory, Lewis Institute, Chicago. It is known as Bulletin 12. This volume is an authorized reprint from the copyrighted proceedings of the American Society for Testing Materials, volume 24, part 2, 1924, wherein was first given the report prepared by Professor Abrams. The bulletin describes a series of very exhaustive investigations carried on by the writer and his staff regarding the effect obtained in different concretes by the admixture of various amounts of calcium chloride, magnesium chloride, and other commercial accelerators. This bulletin should be read and studied by every contractor who does concrete work.

National Lime Association, 918 G Street, Northwest, Washington, D. C., has published a new bulletin entitled: "The Binder in Your Wall." It contains a summary of the latest information on lime mortar. The bulletin is well illustrated and contains material of interest to all who build with brick or stone. The architect will be interested in the short form specification clauses, and the contractor will welcome the handy tables showing the height of solid brick work by courses, and standard units of measure for lime and for other materials.

PERFECTS CONCRETE MIXER

A concrete mixer embodying all the good qualities of the standard market type, with the additional features of lightness (the machine weighs less than 300 pounds) ease of operation and a compactness that enables the mixer to be packed on the running board of an automobile or be hoisted to the top of a skyscraper, the mixer in operation all the while, is the invention of T. E. Corr, residing at 930 Q street, Bakersfield.

The new mixer, according to the inventor, can be easily operated by a 6-year old boy and can be used wherever an ordinary wheelbarrow can be placed in position beneath its discharging vent. Even though extremely light in weight it is claimed that two cubic feet of concrete can be mixed with each batch.

Patents Granted to Californians

Compiled by Munn & Co., Patent Attorneys

William H. Weeks, of Oakland. CHALK RAIL FOR BLACKBOARDS. This is a neat and convenient means for holding chalk beneath a blackboard. One object is to provide a screened holder so as to do away with the chalk dust usually present along the rail of the blackboard.

Clark S. Teitsworth, of Lompoc. SEMIREFRACTORY HEAT INSULATING MATERIAL AND METHOD OF MAKING THE SAME. This has refractory heat insulating properties and at the same time those qualities which give permanency, light weight, and freedom from disintegration, shrinkage and spalling at high temperatures. Mr. Teitsworth assigns his patent to Celite Company, of Los Angeles.

Abraham R. Griesmer, of San Francisco. WATER-PRESSURE EJECTOR. This is particularly adapted for sinking holes in the beds of streams, and for removing dirt from around piers and the like. This is an improvement on Mr. Griesmer's Patent No. 1,459,153, granted on June 19, 1923.

Clemens B. Nagelmann, of Santa Barbara. INTERNAL-COMBUSTION ENGINE. This is an engine with a very simple valve mechanism for admitting motive fluid to the cylinders and exhausting the burnt gases therefrom.

George W. House, of Long Beach. WATER FILTER AND COOLER. This provides a self contained filtering unit adapted to be inserted in a water container and through which the water must pass to the outlet.

Thomas E. Webb, of Stockton. DITCHING MACHINE. The object of this invention is to provide a driving mechanism for the propulsion of the machine along the ground, and for operating the digging structure, so arranged that with a single power plant for both purposes, the speed of movement along the ground may be changed relative to the speed of the digging structure.

Charles H. Gunn, of Oakland. TOILET FLUSH. This gives a quick and adequate supply of water under pressure; one which will be leak-proof, cannot become air bound; is accurate in the amount of water used; and is quickly installed and easily kept in repair.

Sumner B. Sargent, of Huntington Park. PUMP HANGER. This facilitates the employment of cables or rods, at the option of the operator, for connecting the polish rod clamp to the walking beam.

Eric Lindberg, of Berkeley. WASHING MACHINE. This comprises a base plate adapted to be secured to a tub, a wheel journaled on the plate, a rocking bearing connected with this plate, means to rotate the wheel, a rod depending below the plate, and having sliding connection with the rocking bearing, cups on this rod, a crank arm connecting the wheel and rod whereby the rod is reciprocated. Mr. Lindberg assigns one fifth of this patent to Lydia Frances Larson, and two fifths to Albert G. Larson, both of Oakland.

Edward Rutt of Sonoma. RADIATOR. This radiator is provided with a cap having means for locking it in position and also provided with means for admitting air, the air admission means being designed to be closed in cold weather.

Harry C. Schroeder, of Oakland. TOILET-SEAT COVER DISPENSING AND FORMING DEVICE. This device will form a seat cover from the usual type of rolled toilet paper. Mr. Schroeder assigns his patent to Helen M. Bergsma, of Oakland.

Thomas H. Wright, of Los Angeles. SWIVEL TRUCK FOR MONORAIL CARS. This provides an extremely simple and efficient form of driving mechanism, and means for supplying current to the driving mechanism during the movement of the car along the track.

George Hart, of Long Beach. PUMP. This is a reciprocating pump combination in which the suction side of one pump is connected to the discharge side of another pump so as to receive a discharged substance from the attached pump at the full discharge pressure in the line by the operation of the pump receiving the substance from the initial stage pump. Mr. Hart assigns one-half of his patent to Geo. F. Fuller, also of Long Beach.

John Schumacher, of Los Angeles. FURNACE. This is an improved furnace in which the heat units will be thoroughly and effectively conserved, and wherein losses by radiation, convection and conduction, as well as heat losses through the chimney or stack will be minimized or approximately eliminated.

Thomas H. Settle, of San Fernando. RAILROAD CROSSING. This is a rail crossing in which the gap at the intersecting cross rails may be closed by a rotary block to allow the railway cars to pass across the intersection rails without the noise or jar incident to rail crossings of ordinary construction. Mr. Settle assigns one-half of his patent to John P. Muller, also of San Fernando.

Charles E. Ball, of Turlock, and Samuel H. Ball, of Livingston. SCRAPER. This is adaptable for any use which requires the moving of earth or soils, particularly where it is desired or necessary to move the same any considerable distance. Mr. Ball assigns his patent one third to Samuel H. Ball and two thirds to Charles E. Ball.

Morris Kasser, of San Francisco. FLUID HEATING CONTROL SYSTEM. This relates to a system whereby heat may be controlled and thereby avoid abnormal and dangerous conditions. One object is to avoid such occurrences by ensuring that the elements must be completely covered by the liquid before they may be energized.

John Cutler Shedd, of Eagle Rock. INCANDESCENT ELECTRIC LAMP. This provides an electric lamp having a plurality of filaments and means for selectively energizing one or more of the filaments at a time, so as to provide a varying quantity of illumination, according to necessity or expediency. Mr. Shedd assigns one-half of his patent to Adolpho Danziger, of Los Angeles.

George B. Londerback, of Compton. DRILLING BIT. This drilling bit has cutting blades adapted for being advanced obliquely to its axis and means adapted for actuation by frictional engagement with the walls of a drill hole for making the advancement.

Dimensions, 83x60 ft. and 73x60 ft., face brick, cast stone, composition roof, reinforced concrete corridors and stairs, cement and maple floors, gas-steam heating. Cost, \$95,000.

SANDY PRATT IS STILL "DOING IT"

Along about last April, CEMENT, MILL & QUARRY published an interesting story on the fine publicity work accomplished by the Pratt Building Material Co., of San Francisco, in making known its wares; how they were found, produced and marketed.

Nearly everyone on the Pacific Coast knows this company's slogan, "What Sandy Pratt Is Doing." By the same token, Sandy is still at it, and like Johnny Walker of ancient memory, "is still going strong."

Only the other day this journal received the following letter, accompanied by an envelope containing a sample of new washed American River Sand:

San Francisco, Nov. 1, 1924.

Dear Sirs:—

We enclose sample of our New Washed American River Sand. A few days ago we installed a log washer at Sacramento, which absolutely removes all clay, silt, decomposed leaves, twigs, etc., and should you want a hundred carloads of our American River Sand, the hundred cars would be just like this sample—clean, sharp and coarse.

The October rains have been quite heavy on the upper waters of the American River, so that the American River is now flowing quite a stream. This rise of the river has brought in new clean sand, and plenty of it.

You know that we have always washed American River Sand twice—first in the revolving screen and then a second time in the drying tanks, but now we give it a third washing with our new log washer. Formerly some of the dirty water was used to wash the sand in the drying tanks, but now the new log washer picks up all the silt, twigs, dirt, etc., which, with the muddy water, flows in another direction. Consequently, nothing but clean water washes the sand, (already twice washed) in the drying tanks.

When you order river sand for plastering, brick, mortar or concrete, don't say, "Send me river sand," but insist on "Pratt's washed American River Sand," because it is washed three times, besides being screened.

I thank you. "SANDY" PRATT
 If you are familiar with Clarence Sand Pratt's methods of making known his goods, you will easily detect the master hand in the foregoing letter. He makes the buyer aware of just what is needed to produce first-quality sand, told in every day language and free from "engineering." The buyer likes to know these things about the stuff he is buying—particularly when he wants a hundred carloads. It's great stuff! From CEMENT, MILL & QUARRY, November 20, 1924.

IT PAYS to advertise.

SANDY PRATT, producer.

OF SAND, rock and gravel.

THINKS IT pays.

THE ABOVE from a big magazine.

WITH NATIONAL circulation.

SAW FIT.

TO RUN Sandy's letter.

ABOUT HIS wonderful sand.

FROM THE American River.

DEAR READER, try advertising.

HOW WOULD you know.

ABOUT THE new autos.

OR WHAT theatre to attend.

IF YOU didn't.

READ THE ads.

"I THANK you."

This fellow is not a "retailer" (he cuts them off), hence he does not advertise. All retail merchants, like Sandy Pratt, producer of clean sand, crushed rock and washed gravel, believe in advertising. Read above letter if you are in doubt.

FOLSOM, Sacramento Co., Cal.—Until Feb. 13, 1 P. M., bids will be received by Wm. Cruickshank, clerk, Granite Grammar School District, to install oil burning equipment connected with heating furnace now installed in school; equipment to consist of 1,500-gal. oil storage tank. See call for bids under official proposal section in this issue.

LOS ANGELES, Los Angeles Co., Cal.—J. F. Kobler, 932 Rimpau Blvd., submitted low bid at \$43,991 to Los Angeles Board of Education for two-story 12-room Loreto St. school building, 60x119 ft., 3408 Arroyo Seco Ave. Low bidders on sub-trades were: Electric wiring, H. H. Zimmerman, 22 E. 4th St., \$765; painting, M. Becker, \$1750; plumbing, Stoneman & Walker, \$5870; heating and ventilating, Western Hts. Co., \$5263. Plans by Board of Educational Architectural Dept. Face brick, tile and composition roof, hollow tile and frame partitions, reinforced concrete corridors and stairs, cement and maple floors.

Official Proposals

NOTICE TO CONTRACTORS

(Oil Burning Equipment—Granite Grammar School District)

Sealed bids will be received by the Trustees of Granite Grammar School, Folsom, California, to supply and install oil burning equipment to be connected to heating furnace now installed in school building at Folsom, Calif. Equipment to consist of one fuel oil storage tank of 1,500-gallon capacity, constructed of three-sixteenths inch boiler plate, welded and covered with a heavy coat of rust proof paint, the same to be installed underground, top of tank to be at least 24 inches underground, excavations and fill to be made by Contractor. All pipes and connections necessary to completely finish tank and connections to be furnished by Contractor, pipes and connections to be galvanized; connections from tank to burner to be at least 24 inches underground. Fire box of furnace to be lined with high grade fire brick to protect furnace from direct flame of burner.

Steam regulators at top of furnace to be connected with the pressure regulator valve on burner to automatically regulate the fire according to steam pressure.

Specify type and size of burner, with cut of same.

To be completely installed, tested out, and turned over in first class working order.

A certified check of 10% of Contract to the furnished with Bid.

Bids will be opened **February 13th, 1925, at 1 P. M.**, at Folsom Grammar School. Work to commence within ten days after Contract is let, and completed as early as possible.

The Trustee reserve the right to reject any or all Bids.

(Signed)
TRUSTEES OF GRANITE SCHOOL DISTRICT.

WM. CRUCKSHANK,
Clerk.

NOTICE TO CONTRACTORS

(Wharf Repairs—Fort Mason)

OFFICE CONSTRUCTING QUARTERMASTER, Fort Mason, Calif. Sealed proposals will be received here until 11 A. M., Feb. 6, 1925, for driving piles, etc., for repairs to wharves at Fort Mason. Information upon application.

NOTICE TO CONTRACTORS

(Lyon and Washoe Counties—Nevada State)

Sealed proposals will be received by the undersigned until 1:30 P. M., **February 18, 1925**, for constructing a railroad undergrade structure, consisting of steel and concrete, near Pernley in Lyon County.

Also sealed proposals will be received likewise by the undersigned until 2:30 P. M., **February 1, 1925**, for constructing a portion of the State Highway System in Washoe County between Vista and Hated, work consisting of grading and construction of culverts.

Plans may be examined and form of proposal, contract and specifications secured at the office of the undersigned. These also may be examined at the county clerk's office in Yerington, and the division engineer's offices in Reno, Elko or Las Vegas and the district office of the Bureau of Public Roads, Bay Building, San Francisco, California. A cash deposit of Fifteen Dollars (\$15.00) with the undersigned is required for a copy of plans, which will be refunded on their return in good condition, provided that they are returned within thirty (30) days after the opening of

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of five per cent of the bid.

Each bidder must accompany his bid with a certificate from a surety company duly authorized to do business in this state stating that such surety company will provide said bidder with a bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for the faithful performance of the provisions of the contract and specifications.

Right is reserved to reject any or all bids.

GEORGE W. BORDEN,
State Highway Engineer,
Carson City, Nevada.

NOTICE TO CONTRACTORS

(Natorium—City of Richmond)

NOTICE IS HEREBY GIVEN that sealed bids or proposals will be received by the undersigned, Clerk of the City of Richmond, at his office in the City Hall of Richmond, California, up until the hour of 5:00 o'clock P. M. of Monday, **February 16, 1925**, for the construction of a Municipal Natorium in the said City of Richmond, all as described in the plans and specifications for said work on file in the office of the said Clerk of the City of Richmond.

Segregated bids will be received for:—1. General. 2. Filtration Plant. 3. Heating Plant. 4. Plumbing. 5. Steel and Iron Work.

All bids must be submitted upon proposal sheets furnished with the plans and specifications.

Copies of Proposal Sheets and Plans and Specifications for said work will be furnished to prospective bidders upon application to the said Clerk of the City of Richmond at his office in the said City Hall.

Copies of Proposal Sheets and Plans and Specifications for the Heating Plant may also be obtained from Leland & Haley, Consulting Engineers, at their office at 58 Sutter Street, San Francisco, California.

A deposit of Ten (\$10) Dollars will be required for each set of Plans and Specifications, which said deposit will

be refunded upon return of the Plans and Specifications in good order.

Each bid must be accompanied by a certified check, upon a responsible bank, made payable to the City of Richmond, equal in amount to at least ten (10%) per cent of the amount of the total bid.

The Council of the City of Richmond reserves the right to reject any or all bids.

By order of the Council of the City of Richmond.

Dated this 27th day of January, 1925.
A. C. FARIS,
Clerk of the City of Richmond.
(Seal).

NOTICE TO CONTRACTORS

Heating System Alterations—Alameda

Sealed proposals or bids are hereby invited by the Board of Education of the City of Alameda and of Alameda School District of Alameda County, California, and may be filed at the Office of the Secretary of said Board at the City Hall, located at the corner of Oak Street and Santa Clara Avenue, in said city, on or before the hour of 8:00 P. M. of the 17th day of February, 1925, for making changes in the present heating system of the Mastick School, Santa Clara Avenue and Bay Street, Alameda, California.

All of said work shall be done in accordance with the plans and specifications adopted therefor and on file in the office of the Secretary of the Board.

All proposals shall be accompanied by a certified check, or bond in the amount of ten per cent (10%) of the total contract price, conditioned that the successful bidder will enter into a contract within ten days after the same has been awarded to him.

The Board of Education reserves the right to reject any or all bids.

By order of the Board of Education,
Dated January 30, 1925.

C. J. DU FOUR,
Secretary.

NOTICE TO CONTRACTORS

(Islais Creek Reclamation Project)

OFFICE OF THE BOARD OF STATE Harbor Commissioners, Union Depot and Ferry House, San Francisco, California, January 31, 1925.

Sealed proposals or bids will be received at this office at or prior to 2 o'clock P. M., **Thursday, February 10, 1925**, for furnishing necessary materials, labor and equipment for constructing rock levee and making a fill for Islais Reclamation Project No. 2, on the waterfront of the City and County of San Francisco, in accordance with plans and specifications adopted by the Board January 22, 1925, and on file in this office, to which special reference is hereby made.

The work to be done under these specifications consists in furnishing all necessary materials, labor and equipment for constructing rock levee and making a fill for Islais Reclamation Project No. 2.

The work will be let in three separate contracts denoted as Contracts A, B, and C.

Contract A includes the work of constructing a pile frame work for the timber bulkhead.

The material to be used in Contract A consists of untreated Douglas fir lumber, untreated Douglas fir piles and steel bolts and fastenings.

Contract B includes the dredging for the rock levee along the Islais Channel.

The work to be done under Contract C includes the furnishing and depositing of rock for the rock fill levees in-

closing the deposit area for the dredger fill.

The rock to be used in the construction shall be any native rock such as sandstone, serpentine or hard siltaceous shale which will break in a fair assortment of sizes from 3-inches material up to 1000-lb. pieces. Clay, soft shale, laminated shale or air slaked serpentine will not be accepted. If in excess of 15 per cent of the material furnished.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, condition to 2 o'clock P. M., on Thursday, February 19, 1925, at which time and place the bids will be publicly opened.

The Board reserves the right to reject any or all bids if deemed for the best interest of the State.

Plans and specifications for this work to be had at Room 18, Union Depot and Ferry House, upon depositing \$10 for same, which will be returned on receipt of plans and specifications. Bidders are requested to mark envelope containing bid: "Bid for Work on Islais Reclamation Project No. 2."

CHAS. H. SPEAR,
M. F. COCHRANE,
JOHN B. SANFORD,
Board of State Harbor Commissioners.
FRANK G. WHITE,
Chief Engineer.
J. L. PHELPS, Secretary.

NOTICE TO BIDDERS

(School Furniture—Alameda)

Sealed proposals or bids are hereby invited by the Board of Education of the City of Alameda and of Alameda School District of Alameda County, California, and may be filed at the office of the Secretary of said Board at the City Hall, located at the corner of Oak Street and Santa Clara Avenue, in said city, on or before the hour of 8:00 P. M., of the 17th day of February, 1925, for furnishing the following supplies:

- 150 Desks, school, adjustable, set up, "B" size.
- 20 Chairs, "B" size.
- 200 Chairs, portable, single (not in sections).

Samples to be submitted with bid.

Bidder to state time required to complete delivery.

The Board of Education reserves the right to use greater or less quantities than herein stated.

The Board reserves the right to accept or reject all or any part of a bid.

All articles are to be delivered to a. b. Storeroom, or some school building, Alameda, Calif.

Important—All bids shall be clearly and distinctly written, without any erasure or interlineation and the total amount of bid on each article must be carried out. If any bid shall have any erasure or interlineation, it will not be received or considered.

Where aggregate amount of bid is \$500.00 or over, cash or a certified check covering ten per cent of the total, must accompany the bid.

By order of the Board of Education of the City of Alameda and of Alameda School District of Alameda County, California.

Dated this 30th day of January, 1925.

C. J. DU FOUR,

Secretary.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Calif., until 2 o'clock P. M., March 2, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, of which special reference is made of portions of State Highway, as follows:

Yolo County, between Woodland Wye and Woodland (H-Yol-7-A), about eight and one-half (8.5) miles in length; and between Foothill Creek and Davis (X-Yol-6 & 7-A), about four and five-tenths (4.5) miles in length; a total distance of about twelve and eight-tenths (12.8) miles, to be widened with Portland cement concrete and crushed gravel or stone shoulders.

Orange County, a bridge 150 feet long and 30 feet wide across San Juan Creek, near San Juan Capistrano (V-Or-2-A), consisting of three 46 foot and two 21 foot reinforced concrete spans on concrete piers and pile bents.

Plans may be seen and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form on proposal for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,

California Highway Commission.

R. M. MORTON,
State Highway Engineer.

W. F. MIXON, Secretary.

Dated: February 2, 1925.

NOTICE TO CONTRACTORS

(Roof Repairs—Fort Mason)
OFFICE CONSTRUCTING QUARTERMASTER, Fort Mason, Calif. Sealed proposals will be received here until 11:30 A. M., Feb. 8, 1925, for repairs to roofs of three storehouses at Fort Mason, Calif. Information upon application.

NOTICE TO CONTRACTORS

(Mechanical Equipment—Alameda Co.)

Office of the Clerk of the Board of Supervisors of Alameda County, State of California.

Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, at his office, until Monday, March 2, 1925, at 10 o'clock A. M., (the day when said bids will be opened and the contract awarded) for the erection and completion of the mechanical equipment in the Power House for the Highland Hospital of Alameda County, at 14th Avenue and Vallecito Place, Oakland, California.

Complete plans and specifications for the above specified work are on file in the office of the County Clerk in the Hall of Records Building, Oakland, California, where copies may be

obtained by depositing with the County Clerk the sum of fifty (\$50.00) dollars. Contractors will be restricted as to the length of time these plans and specifications may be retained to ten (10) days. Contractors failing to return said plans and specifications within said time limit will forfeit their deposit to the County of Alameda.

Each bid must be accompanied by a check for at least ten per cent of the amount of the bid or proposal, certified to by some responsible bank, and made payable to Geo. E. Gross, Clerk of the Board, to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the contract. The Board reserves the right to reject any and all bids.

Dated: February 2, 1925.
GEO. E. GROSS,
Clerk of the Board of Supervisors of Alameda County.

NOTICE FOR BIDS

Oroville-Wyandotte Irrigation District
Sealed bids will be received by the Board of Directors of the Oroville-Wyandotte Irrigation District at the office of the Board, Oroville, California, until 10 o'clock A. M., February 18th, 1925, for furnishing 172 lineal feet of continuous redwood stave pipe with sills and quarter block or riveted slip joint pipe and fittings and 60 lineal feet of concrete pipe.

Also ditch and trench including about 1000 cubic yards of earth excavation, 1000 cubic yards of loose or soft rock excavation, 2000 cubic yards of solid rock excavation, ditch cleaning, etc.

Contract will be let to the lowest responsible bidder. Plans and specifications can be seen at the office of the Board, Oroville, California.

Contractor proposing to furnish work and pipe will be required to furnish specifications covering work proposed to be done.

W. J. MONRO,
Secretary, Oroville-Wyandotte Irrigation District.

NOTICE TO CONTRACTORS

(Alameda County—Hospital)
Office of the Clerk of the Board of Supervisors, Alameda County, Calif.

Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, at his office, until Monday, February 9th, 1925, at 10 o'clock A. M., the day when said bids will be opened and the contract awarded for the completion of the Tile Marble, Metal Plinths and Elevator Work at the Highland Hospital, Oakland, Alameda County, California.

The above specified work is divided into the following departments:

- Department No. 6—Tiling.
- Department No. 7—Marble work.
- Department No. 8—Elevator work.
- Department No. 10—Metal Plinths.

Complete plans and specifications for each of the above specified departments are on file in the office of the County Clerk in the Hall of Records Building, Oakland, California, where copies may be obtained by depositing with the County Clerk the sum of Fifty (\$50.00) Dollars for each of said Departments. Contractors will be restricted as to the length of time these plans and specifications may be retained to ten (10) days. Contractors failing to return said plans and specifications within said time limit will forfeit their deposit to the County of Alameda.

Each bid must be accompanied by a check for at least ten per cent of the amount of the bid or proposal, certified to by some responsible bank, and made payable to Geo. E. Gross, Clerk of the Board, to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the contract. The Board reserves the right to reject any and all bids.

Dated: January 12, 1925.
GEO. E. GROSS,
Clerk of the Board of Supervisors of Alameda County.

Architects—Engineers— City and County Officials

How about bids wanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it?
If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns
of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3340

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want competition—if you want independent contractors to figure your job—if you want the lowest possible bid—send particulars of your project to

PRATT'S CONCRETE MIX

Clarence J. Sand Pratt

JEAN, JOE Stark and Jack.

THE BOYS of the "Builder."

THE "BUILDER" being.

A NEWSPAPER of wide circulation.

ARE GETTING out an "Annual."

ALL BIG newspapers do it.

IT IS their weekly publication.

CALLED BUILDING & Engineering News.

AND IF the paper mills.

CAN PRODUCE enough paper.

BY THE middle or end.

OF FEBRUARY.

THEN THIS mammoth edition.

WILL BE published.

EVERYBODY is buying space.

IN THIS great edition.

ITS CIRCULATION.

DEPENDS ENTIRELY.

UPON THE capacity.

OF THE ink factories.

AND THE combined output.

OF THE paper mills.

OF THE United States.

ONE OF the main features.

OF THIS edition.

WILL BE a K.C.B.-like story.

CALLED "PRATT'S Concrete Mix."

BY SANDY Pratt, President.

OF THE Pratt Building Material Co.,

PRODUCER of clean, sharp sand.

HARD, CRUSHED rock.

AND WASHED, well-graded gravel.

"I THANK you."

Joseph Mill Valley Odgers, Solicitor General for the mammoth edition of the Building & Engineering News to appear as soon as the paper mills can produce enough paper. Sandy Pratt, producer of sand, crushed rock and washed gravel will write his near comedy called "Pratt's Concrete Mix" for this special edition. Place your orders early for copies before the public finds out that Sandy's story will appear.

TULARE, Tulare Co., Cal.—C. C. Rumble, Porterville, has been awarded cont. at approx. \$3000 for certain C. 1. sewer pipe in connection with the new city sewer system.

RESIDENCE BUILDING ACTIVE

Building in San Francisco, particularly of residences, continues at a high rate. January shows a total of 875 permits, involving an expenditure of \$3,403,623.

Compared with January, 1924, the month just ended shows an increase of 102 permits over the corresponding period a year ago and a gain of \$225,210 over the same period, permits for January 1924 amounting to \$3,178,413.

The increase of residential construction is the outstanding feature of the month's building program.

Each succeeding year has added its quota to the development of San Francisco. In January 1923 only 718 permits involving \$3,205,811 were issued.

In January 1924 the number of permits issued had increased to 773 calling for improvements to the amount of \$3,178,413, while in January of this year 875 permits were granted, amounting to \$3,403,623.

MORE FOREIGN CEMENT ARRIVES

The Danish motorship Tongking, ar-
rived in the Oakland harbor, Jan. 30
with a cargo of 1200 tons of Norway
cement. In addition to the cement the
Tongking carried a cargo of 200 tons
of barbed wire and a considerable
quantity of cast iron pipe. The impor-
tation of cement from Europe has in-
creased considerably during the past
six months. The Buenos Aires brought
in the first small shipment as an ex-
periment.

PROTEST FREIGHT RATES

Union Rock Company and American
Crushed Rock Company, both having
their principal place of business in Los
Angeles, have filed complaints with
the Railroad Commission against the
Acheson, Topeka & Santa Fe Railway
Company alleging that defendant car-
rier is collecting excessive rates for
the transportation of crushed rock
and gravel between points in Los An-
geles county and the plants of com-
plainants at Butler and at Claremont
and between those plants and points
in San Bernardino and Riverside coun-
ties.

**G. P. RICHARDSON IN CHARGE OF
FENESTRA WINDOW SALES**

The sale and erection of Fenestra steel windows on the coast will be supervised, in the future, by G. P. Richardson, now in charge of the Detroit Steel Products Company's Pacific Coast territory.

In his new capacity, Mr. Richardson will have charge of the following sales offices: Seattle, Spokane, Portland, Salt Lake City, Stockton, Oakland, San Francisco, San Jose, Fresno, Los Angeles, San Diego.

Production of Fenestra Sash in the Oakland plant of the Detroit Steel Products Company has increased 100% in the last year and a half.

**CONFERENCE FOR TRAINING
PLUMBING INSTRUCTORS**

A conference for training instructors in the plumbing trade, offered through the cooperation of the University of Pittsburgh, the Carnegie Institute of Technology and the National Trade Extension Bureau of the Plumbing and Heating Industries will be held in Pittsburgh from February 16 to February 28, 1925. The purpose of the conference is to train experienced journeymen plumbers in the art of teaching the subject to apprentices. A booklet containing the course states that it is open to men between the ages of twenty-five and fifty who have had at least five years' experience in the trade and at least a grammar school education.

**LACK OF COOPERATION IS FACTOR
IN BUILDING COSTS**

Lack of cooperation on the part of the various trades in the construction industry is, in the opinion of A. C. Borzner, a Philadelphia architect, one of the contributing factors in the present high construction costs. In an article, in a recent issue of the Philadelphia Record, Mr. Borzner stated that on many jobs mechanics in order to get in their own work will destroy work already done by other trades and that as a result of being obliged to have certain operations done twice, a contractor is compelled to add to his bid a certain amount of money as protection against this vicious practice.

A "Pittsburg" Automatic Gas Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all of the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

KOEHRING

DANDIE Light Mixer

Dandie with steel disc wheels and solid rubber tires; power charging skip, water tank and gasoline engine.

Dandie with steel trucks; power charging skip, water tank and gasoline engine.

EQUIP it to your special needs. Rubber tires to save the time waste of between-job hauls, and to expand your working territory. *Light duty hoist. Low charging platform or power charging skip. Automatic water-measuring tank.*

Most important, you can be sure of full capacity—utmost reliability—and long service life—because this mixer is Koehring built, engineered and constructed to out work, out last anything in the light mixer field. Price? Not the lowest price

—no—but the most remarkable value of all light mixers—and still within the range of light mixer prices.

CAPACITIES

4 and 7 cu. ft. mixed concrete, steam or gasoline power. May be equipped with power charging skip or low charging platform with hopper, light duty hoist, automatic water measuring tank. Mixes mortar as well as concrete.

CONSTRUCTION SUIT SETTLED

Ending a two years' federal court suit by the Warren Construction Co. against the Minarets & Western Railway Company and the Sugar Pine Lumber Company for \$1,200,000, the case was settled out of court by an award of five hundred thousand dollars to the Warren company.

The Warren company filed the suit after the defendants had contested payment for approximately 50 miles of railroad built by the plaintiff for the defendants from Friant to a point near Central Camp. The defendants refused payment for the work because of a dispute over classification of material removed in building the road.

The suit was filed two years ago in the federal court in San Francisco.

HOW REINFORCED CONCRETE WITHSTOOD THE TOKIO EARTHQUAKE

H. M. Hadley, writing in the Seattle, Wash., "State Architect," says of the Tokio earthquake on reinforced concrete:

"The performance of reinforced concrete under the test of earthquake and fire can only be classed as highly satisfactory. A survey of reinforced concrete construction in the Tokio building department under the direction of Y. Nagata, chief engineer, resulted as follows:

Undamaged	78.0%
Partially damaged.....	11.7%
Greatly damaged.....	7.1%
Partially collapsed.....	1.9%
Entirely collapsed.....	1.3%

PRODUCTION OF STEEL WORKS AND ROLLING MILLS IN 1923

The Department of Commerce announces that, according to the data collected at the biennial census of manufactures, 1923, the value of the total output of steel works and rolling mills amounted to \$3,543,471, an increase of 112.9 per cent as compared with \$1,481,659,332 in 1921, and of 11.5 per cent as compared with \$2,828,902,376 in 1919.

Of the 489 establishments reporting for 1923, 186 were located in Pennsylvania, 81 in Ohio, 31 in New York, 30 in Illinois, 25 in Indiana, 19 in New Jersey, 17 in West Virginia, 14 in Massachusetts, 15 in Wisconsin, and 74 in 20 other States. In 1921 the industry was represented by 494 establishments, the decrease to 489 in 1923 having been due to consolidations.

The output, for sale (not including interplant transfers except where specifically mentioned), of the more important classes of products increased as follows: Direct steel castings (including interplant transfers), from 355,976 long tons, valued at \$79,814,499, in 1921, to 1,053,716 tons, valued at \$162,610,726, in 1923; blooms, billets, and slabs (including interplant transfers), from 2,780,601 tons, valued at \$104,184,681, to 7,272,259 tons, valued at \$289,585,127; sheet and tinplate bars (including interplant transfers), from 1,904,754 tons, valued at \$69,622,306, to 4,063,247 tons, valued at \$159,810,719; plates and sheets, other than for tinning, from 2,445,318 tons, valued at \$155,769,748, to 6,426,629 tons, valued at \$255,514,991; merchant bars, iron and steel, from 1,534,618 tons, valued at \$97,300,338, to 5,357,659 tons, valued at \$321,209,495; structural shapes, from 1,141,037 tons, valued at \$55,390,521, to 3,147,674 tons, valued at \$155,194,532; rails, from 2,100,013 tons, valued at \$88,939,321, to 2,727,615 tons, valued at \$113,643,755; pipes and tubes (not including cast-iron pipe), from 1,689,925 tons, valued at \$157,982,222, to 3,022,141 tons, valued at \$287,664,056; wire and wire products, from \$118,062,874 to \$230,959,380; and tin plate and terneplate, from \$92,710,791 to \$114,527,623. Practically all the other products for which statistics are given also show substantial increases in both quantity and value.

The foregoing figures relate exclusively to the output of steel works and rolling mills, and do not, therefore, cover the quantities and values of similar products manufactured by establishments classified in other industries; for example, pipes and tubes, and wire and products, steel castings, and tin plate and terneplate.

S. F. BUILDING SUMMARY

Private building operations in San Francisco for the month of January, 1925, totaled \$3,403,623 an increase of \$225,210 over the valuation of permits for January, 1924. No public construction is incorporated in the activities of the past month.

Following is a segregated list of the January, 1925, operations:		Amount
Class	No. of Permits	
A	1	\$ 500,000
C	24	287,799
Frame	475	2,298,070
Alterations	375	317,754
Total	875	\$3,403,623

"ECONOMY," FIRE-SAFE BRICK WALL, IS NEW INVENTION

A substantial, fire-safe brick wall, that can be built at a cost lower than any other masonry will now in use, is the invention of Wm. Carver, architect of the Common Brick Manufacturers' Association of America. The new wall is to be known as the Economy wall, and as compared with the solid 8 inch wall, which requires 13 brick to a square foot of wall surface, the Economy wall uses only 7 1/4 brick to a square foot.

The wall is particularly designed to displace the unsubstantial brick veneer construction which is used in some parts of the country at a makeshift between all frame and masonry construction. A veneer wall is unsound. It consists of a 4 inch brick wall tied with thin metal strips to frame studding and sheathing. Veneer forms one of the worst fire hazards possible in residential building, because the firemen cannot tell by exterior appearance that it is a sham and often enter the building in case of fire believing that the walls are self-supporting brick construction, only to be crushed by the falling of the thin veneer walls.

The Economy wall is, in the main a four inch brick walls, but with 4 inch pilasters at frequent intervals bonded into the 4 inch wall so that it becomes self-sustaining and substantial. This wall has been tested, and even though the whole interior of a house might burn, these walls will stand secure. The wall also is so planned as to give unusual protection around window and door openings, and to provide a substantial masonry bearing for second floor joists and roof timbers. For small dwellings, garages, and other buildings of light occupancy, the new Economy wall will have advantages over any other construction in use today. Its cost is approximately that of cheapest frame construction; is much lower than brick veneer, and far below the cost of any wall built with hollow pre-cast units. It also affords a much warmer and drier wall than anything yet devised in masonry costing less than the solid brick wall.

BUILDING COSTS SHOWED LITTLE VARIATION LAST YEAR

The ease with which the Construction Industry can adjust itself to an unprecedented demand for building is demonstrated in a review of developments during 1924. Following a year which in itself broke all previous records, the industry entered 1924 with material stocks almost depleted and with an acute labor shortage in the skilled trades. On all sides there were predictions that if as much business developed in 1924 as came out the year before, construction costs would mount. Subsequent events proved that this was not the case and December, 1924 found costs practically where they were the year before. It is true that building costs rose slightly from January to April, but a slight reaction then set in and through the summer months there was a slow but steady downward movement. Throughout the year construction costs paralleled general commodity prices which proves the fact that construction is a basic industry and construction costs may be established as a fair index of the general business situation.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Reduction of building costs throughout the state by the elimination of wasteful practices in construction and the minimization of carelessness and mismanagement are among the purposes to be discussed by the twenty-fifth annual convention of the State Building Trades Council of California, to open at Monterey March 16, according to the call issued by F. C. MacDonald and A. G. Gilson, general president and secretary respectively of the council. The convention will also have for its object the inauguration of a program looking to greater safety for workers in all lines of industry and the establishment of better health conditions generally, according to the notice which explains that "thousands of building trades workmen annually suffer from injury. In all to many cases death occurs from preventable accidents. Death and disease through exposure to poisonous and disease-producing conditions in industry are increasing." About 500 delegates from over the state will attend the convention, together with the officers of the state council, and the 22 members of the general executive board.

A. M. Barton, chief engineer and executive officer of the California Reclamation Board, has been commissioned a major in the engineering corps, Officers Reserve Corps of the U. S. Army. Mr. Barton is a veteran of the world war, having seen active service as a captain of the 117th Engineers, a unit of the Rainbow Division. He has been connected with the engineering staff of the state reclamation board for several years, first as one of the office engineers and later he was selected as chief engineer after the reorganization of the board two years ago.

E. T. Wittenmeyer of the Ohio Stucco Co., Arcade Bldg., Columbus, Ohio, was a recent visitor to the San Francisco Builders' Exchange. Mr. Wittenmeyer spent one week in San Francisco prior to leaving for Los Angeles to attend the convention of the National Association of Builders' Exchanges.

Atmospheric Cooling Co. with main offices in Sacramento, has been incorporated and will engage in the manufacture of cooling towers and appliances. Directors are: Cornelius A. Cole, Hackensack N. J.; Robert A. Van Voorhis, Jersey City, N. J.; and Dal M. Lemmon, Eder D. Gibson and Evan J. Hughes of Sacramento.

City trustees of Gridley, Calif., have adopted an ordinance which requires that all master plumbers be licensed and that all plumbing work be inspected.

Gardner Electric Manufacturing Company plant at 4227 Hollis Street, Emeryville, Calif., on Feb. 5 suffered a \$50,000 fire loss.

Carl Blank, plumbing inspector of South San Francisco, has tendered his resignation to the city trustees, announcing he plans to devote his entire time to his private plumbing business.

Clement P. Whaley, age 58, lumber manufacturer of Missoula, Mont., died in Spokane, Wash., Feb. 8.

Illinois leads with more miles of concrete highways than any other state, with a total of 4105 miles of 18-foot roadway, according to announcement of the Portland Cement Association. Illinois took the lead from California by building 1204 miles of concrete rural highway during 1924, while California built the equivalent of 178 miles of 18-foot pavement, and now has a total mileage of 3466. New York ranks third, with 2795 miles, of which 551 miles were laid in 1924.

The monthly digest of the Common Brick Manufacturers' Ass'n. of America, issued Feb. 1, reporting information compiled January 1, shows 13 manufacturers reporting in California, Nevada and Arizona as follows: 5 plants closed down; burned brick on hand 40,600,000; unburned brick on hand 10,540,000; brick moved from yard during month 22,911,000; orders on books 2,200,000; price per M at brickyard, \$14.50 to \$15.50; price at brickyard Dec. 1, 1924, \$14.50 to \$15.50.

Chas. E. Ashburner, city manager of Stockton, announces that bids will be asked shortly to construct Stockton's flood control dam at Valley Springs. Contractors desiring to submit bids on the work are requested to view the plans on file in the office of W. B. Hogan, city engineer, and to arrange for a visit to the dam site.

Sixty sheet metal workers from the Middle West have arrived in South San Francisco to open up the new plant of the Pacific Sheet Metal Corporation. The workers are experienced in special work. Between 300 and 400 men will be employed in the plant when operations are running to capacity.

Rust-Campbell Company of Los Angeles, proposes to move its plant from Los Angeles and locate in Richmond, Contra Costa County, according to an announcement of E. S. Rust, president of the concern. The firm is capitalized at \$500,000 and manufactures sporting goods, specializing in golf course construction.

Classes in architecture and mechanical drawing have been started in the Santa Rosa high school. The course, it is announced, will be of special value to carpenters as it covers blue print reading and simple building plans.

In the opinion of W. S. Ferguson, president of the W. S. Ferguson Company, general contractors of Cleveland, the building material market will likely maintain the 1924 price level through 1925.

Sterling Chemical Co., Vernon, Calif., plans to establish a \$500,000 plant in San Francisco. The company manufactures kalsomine, dry colors and cold water paints. Company officials are investigating suitable sites.

Weyerhaeuser Lumber Co. of Minneapolis and the Humboldt interests of Spokane, Wash., plan early construction of a \$2,000,000 lumber plant at Lewiston, Idaho.

Marysville contemplates a \$400,000 bond issue to finance erection of a new high school at Knights Park site.

ALONG THE LINE

The Northern California Contractors' Association, with headquarters at San Francisco, has issued a statement placing it on record as in favor of a continuance of the State's highway work. The contractors believe that good roads and an adequate highway system are imperative to California's continued prosperity. The association favors the proposed gasoline tax and increased registration fees as the most practical solution yet offered.

Anton F. Korbel, pioneer California lumberman, died in San Rafael, Feb. 6, at the age of 84 years. Korbel arrived in San Francisco from Bohemia in 1862 and worked as a mechanic. Later with his brother he formed the Humboldt Lumber Company, with camps in Sonoma, Mendocino and Humboldt counties. He built the Arcata, Mad River Railroad, and a town in Humboldt county is named after him.

John Gaillard has resigned as a staff engineer of the American Engineering Standards Committee to take charge of the technical standardization work for the various plants of the American Radiator Company. Mr. S. J. Koshkin, former associate editor of the American Machinist and previously on the editorial staff of the Iron Age catalogue of American Exports, will take over Mr. Gaillard's work.

City of Hanford, at a recent election, failed to endorse the city manager form of government. The vote was 284 in favor and 595 against the measure. The principal objection appeared to be to the city manager provision of the charter as creating too great a centralization of power.

Atkinson-Spicer Co. of Los Angeles has the contract to construct Section one of the Arroyo de la Sacatela storm drain system for the city of Los Angeles. The accepted bid is \$1,306,219.95, comprising \$26,119.95 for street work and \$1,279,500 for the storm drain and sanitary sewer.

H. C. Kayser, who has been identified with Industrial Testing Laboratories, Los Angeles, for many years, has retired from the organization. The remaining personnel of the firm will continue unchanged.

P. M. Sanford, president of the Contra County Builders' Exchange, will represent that organization at the annual convention of the National Association of Builders' Exchanges to be held in Los Angeles, Feb. 24, 25 and 26.

John Nolan, city planning expert, has been employed by the Berkeley city council to assist John N. Eddy, city manager, in formulating a development plan for Berkeley to follow during the next decade.

Fred Pease, city engineer of Porterville, in addition to his regular duties, has been appointed to serve as city purchasing agent.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

SANTA CLARA COUNTY BUILDERS ELECT OFFICERS

The annual meeting of the Builders' Exchange of Santa Clara County was held Feb. 7, at which time the following officers were elected to serve during the year 1925: R. M. Butcher, president; Guy Latta, vice president; Wm. F. Serpa, secretary; Wm. M. Herman, treasurer, and J. Provenzano.

Reports of finance, building figures for 1924, and the outlook for the building industry in 1925 were presented by the executive committee. Routine business was followed by a much appreciated Spanish supper, prepared by the Exchange artists, Bud Gallichotte and Joe Alva.

President Butcher has appointed the following executive committee, and standing committees: Executive Committee—Guy Latta, F. T. Edmans, W. F. Serpa, J. Provenzano, Wm. Loos, Thos. H. Price, W. L. Gilliam, R. O. Summers, K. Morrison, Wm. Herman, Paul Fraser, Geo. Heath, E. H. Galpin, Marshall Elliott. Publicity Committee—F. Schiegner, R. L. Robinson, H. Workman. Finance Committee—L. D. Canfield, M. L. Doane, G. E. Carlson. Membership—Guy Latta, W. F. Serpa, Marshall Elliott. Arbitration and Grievance—F. T. Edmans, K. Morrison, R. O. Summers. House—Wm. Loos, G. E. Baker. Bud Heple. Social—Bud Gallichotte, Joe Alva and Frank Callahan.

EXCHANGE MEETING CALLED TO CONSIDER BUILDING PLANS

An adjourned meeting of the San Francisco Builders' Exchange is called for Monday, February 16, at 1 p. m., in the Exchange Auditorium, for the purpose of receiving and considering propositions to be presented for the New Builders' Exchange Building.

A vote will be taken by the members of the exchange on the propositions presented in addition to considering the plans for organization of the members, insurance, according to R. J. H. Forbes, secretary. The latter plan has received the approval of the exchange directors.

CONCRETE PIPE MEN TO CONVENE AT STOCKTON

A convention of the California Associated Concrete Pipe Manufacturers will be held in Stockton on March 28.

Fred Beerman of the Atlas Rock Company and Fred Spiekerman of the Spiekerman Concrete Pipe Company have been named a committee to make arrangements for the convention. Spiekerman is a member of the executive committee of the organization.

From 75 to 100 concrete pipe manu-

SACRAMENTO ARCHITECTS ELECT

R. A. Herold has been elected president of the Architects and Engineers' Club of Sacramento with headquarters at 910 Ninth street, Sacramento. Other officers elected were: C. H. Kromer, vice-president; A. H. Memmler, secretary and H. W. DeHaven, treasurer. Jens C. Petersen, P. T. Poage and Jas. Dean were elected for the Board of Directors. The regular meeting of the club is the first Monday of each month.

San Leandro Material Dealers Organize

The San Leandro Material Dealers' Association of San Leandro, Alameda County, was organized at a recent meeting of dealers in building materials in San Leandro and vicinity. Increased building activities compelled the dealers to organize in order to protect their varied interests.

The primary purpose of the organization is the mutual exchange of credit information in order to keep credit losses of the members to a minimum. Each member of the association submits a list of his credit customers with the dealers' recommendation as to each customer's credit standing. From these individual lists a master list is compiled showing the combined credit experience of the various dealers with the customer. This master list is then made available to each member. In this manner it is hoped to eliminate

the irresponsibles who have engaged in the building business to the loss of the public and the material dealers alike.

In addition to the exchange of credit information, the dealers propose to pool their interests whenever it becomes necessary to file mechanics' liens, and thus secure the most intelligent co-operation possible in handling these difficult situations.

The following representative dealers compose the association: Cement contractors, Joe Costello, M. A. Lopes, Rose & Oberg; Electrical Supplies and Contracting, L. E. Morgan; Hardware, Leo Brisacher; Lumber Yards, Larsen Bros., San Leandro Mill & Lumber Co.; Plasterer, Louis Hecker; Plumbers, Ambrose Bros.; Lime and Lath, Fred Schmidt.

MILLMEN TO MEET IN L. A.

The next quarterly meeting of the Millwork Institute of California will be held in Los Angeles at the Alexandria Hotel in connection with the third annual convention of the Western Planing Mill and Woodworking Association, according to announcement by H. T. Didesch, managing director of the Institute. The dates for the joint conference are Feb. 18, 19 and 20. The first day will be occupied by the meeting of the western association, and the second and third days will be given over to the sessions of the Institute.

There will be an informal banquet and dance for delegates to the joint conference and their ladies on the evening of Feb. 18. On the following evening there will be a Hoo Hoo competition. At midnight, Feb. 20, the delegates will start for Tia Juana stopping off at San Diego Saturday morning for breakfast and a sightseeing trip. The party will visit Tia Juana Saturday afternoon.

SACRAMENTO MASTER PAINTERS HOLD MEETING

The Master Painters' Association of Sacramento held its regular get-together buffet meeting in the quarters of the Sacramento Builders' Exchange, Thursday evening, Feb. 5.

In addition to discussing topics of importance to the trade the association admitted seventeen new members into the organization which brings the total membership up to 45.

Following the business meeting, a program of entertainment was enjoyed followed by a buffet luncheon.

Conrad Schneider was chairman of the evening and J. H. Blamey in charge of the social program.

SOCIAL POSTPONED

The monthly social of the Contra Costa Builders' Exchange, with headquarters in Richmond, scheduled to take place Friday evening, February 13, has been postponed until February 20. The Master Plumbers of the exchange will "set the tables."

STATE REGULATION OF PUBLIC UTILITIES LAUDED

State regulation of public utilities was lauded recently by Commissioner Seavey of the State Railroad Commission, in a speech before the Sacramento Ad Club.

"It has brought about a regulated monopoly as against a destructive competition," he said. "It has done this because its purpose is not only to regulate rates but to protect the utility and thereby help it to give the public better service. This condition has so stabilized financial investment in the state that many people and much money has been attracted here."

"The growth of public utilities is best evidenced by the fact that in 1923 we allowed \$140,000,000 in new utility securities while in 1924 we allowed \$243,000,000."

REHEARING DENIED

The third district court of appeal has denied a petition for a re-hearing in the case of Robert Greenwood and the Amalgamated Sheet Metal Workers against the Sacramento Building Trades Council after reviewing the case, and reaffirmed previous ruling reversing the decision of the trial court.

The case grew out of internal labor troubles, resulting in the issuance of a restraining order by the superior court to prevent the building trades council collecting a pre capita tax of \$4.50 from the members of the sheet metal workers, Sacramento local No. 162.

BUILDING CONTRACTORS LICENSED

An ordinance licensing building contractors has been passed by the city of Watts, and will go into effect about February 19. Contractors residing in Watts will be required to pay a license fee of \$3 per quarter, or \$12 a year, and contractors residing outside the city will be required to pay a license fee of \$50 per quarter, or \$200 a year. The provision in the original ordinance requiring contractors taking out licenses to also give bond was eliminated.

TRADE NOTES

Sainometal, all metal fire doors are now manufactured for the Pacific Coast exclusively by the U. S. Metal Products Co., 330 Tenth St., San Francisco. Sainometal doors, being constructed of corrugated iron with an asbestos lining will last as long as the building without replacement, according to officials of the company. The doors are offered to supplant the old style wood core, tin covered, firedoors.

W. R. Pickering, controlling owner of the Standard Lumber Company, with a large plant above Sonora, has purchased the Westside Lumber Company's holdings as well as its mill and factory at Tuolumne. Pickering consummated the purchase at the eleventh hour when the deal for the purchase of the Westside concern by the Crossett Lumber Company was declared off. The price involved is not divulged. It is said that the Standard Company will soon build another large mill.

American Plywood Co., capitalized at \$500,000 with the principal place of business at San Francisco, has been incorporated and proposes to erect a plant in Contra Costa county for the manufacture of plywood products and glue from wood pulp. Directors of the company are: Cerf Rosenthal, George Larrabee and W. J. McMillan.

Howden Tile Co. will erect a two-story concrete office, display and sales-room building at the southeast corner of Seventeenth and Webster streets, Oakland. The structure will cost approximately \$100,000 covering an area of 68 by 150 feet.

Kelly Hardware Co. of Modesto has been sold to John W. Henderson and associates of Los Angeles, who assume control Feb. 10. The new firm is known as the Henderson Hardware Company with J. R. Henderson as secretary-treasurer and Otto Arps, manager.

Michael J. and Frank McVeigh will operate under the trade name of McVeigh Construction Company, with offices at 1422 Sixteenth Avenue, San Francisco.

McLean Hardwood Flooring Co., capitalized at \$10,000, has been incorporated in San Francisco. Directors are: R. G. and Patricia McLean and R. H. Anderson.

Dimmer Hardware Co., of San Francisco, capitalized at \$50,000, has been incorporated. Directors are: Eugene and Jennie Dimmer and J. R. Eoff.

AGENCY AVAILABLE

Cruikshank Construction Co., 516 Wilcox Bldg., Los Angeles, seeks sub-agent distributors for the Wilcox Patent Triplex Septic Tank Unit Sewage Disposal System and will be glad to grant an exclusive territory to those who can make good. Address communication direct to Barton Cruikshank, 516 Wilcox Bldg., Los Angeles

CATALOGS WANTED

Catalogs on steel factory building construction wanted. Particularly construction that will permit extensions when demand requires. Address BOX A. B. C., % Building & Engineering News, 818 Mission St., San Francisco.

Slight Increase in January For Pacific Coast Construction

A total of \$39,033,265 in building permits issued during January in 32 principal cities of the seven Pacific Coast States comprised in the S. W. Straus & Co. monthly building survey, indicates a slight increase over the figures for January of last year, an 18% increase over the total for January of 1923 and a 44% increase over January, 1922, although it shows an 8% reduction from the building activity of December, 1924.

The following are the official January, 1925, construction figures reported by building department executives from the various cities comprised in the S. W. Straus & Co. building survey for the Pacific Coast States:

APARTMENTS

Segregated Figures Being Taken.

APT. HOUSE Cost, \$20,000
SAN FRANCISCO, SE Cor. Twentieth
and Church Streets.

Two-story reinforced concrete apart-
ment house.

Owner—Withheld.

Architect—Wm. F. Gunnison, 57 Post St
San Francisco.

Contract Awarded—Segregated Figures
Being Taken.

APARTMENTS Est. Cost, \$100,000
OAKLAND, Alameda Co., Cal. Grand
Ave. near Lenox.

Four-story frame and concrete apart-
ments (30 apts., 2's and 3's) T & G
roof.

Owner—J. K. Calley, San Francisco.

Architect—Jos. L. Stewart, Claus
Spreckels Bldg., S. F.

Contractor—M. C. Ingraham, 165 Fell
Street, San Francisco.

Plans are being slightly revised by
the architect and construction will
start as soon as same are completed.
Mr. Ingraham is taking figures on all
portions of the work.

Sub-Contract Awarded.

APARTMENTS Cost, \$500,000
SAN FRANCISCO, NW Sacramento and
Mason Streets.

Eight-story Class A apartment build-
ing, 100x150, (pressed brick and
terra cotta exterior).

Owner—Eugene Fritz, 1401 Masonic
Ave., San Francisco.

Architect—E. E. Young, 251 Kearny St.,
San Francisco.

The owner has completed contracts as
follows:

Concrete and Carpentry Work—Van-
nucci Bros., 16th and Church Sts.,
San Francisco.

Plumbing and Heating—C. Peterson
Co., 390 6th St., San Francisco.

As previously reported steel contract
was awarded to the Central Iron Wks.,
2050 Bryant St., San Francisco.

Excavating is being done under su-
pervision of Mr. Fritz by day labor.

Green piles—W. A. Hammond Co., Inc., 112 Market St., S. F.

IN SACRAMENTO.

THE "BEE" is holding.

A HORSESHOE Tournament.

SOMETIMES CALLED "Barnyard Golf."

AND THE building world.

IS WELL represented.

IN THE person.

OF ANDY McGuire.

OF McGuire & Henry.

WHO SELL "Pratt's Marysville" sand.

"PRATT'S AMERICAN River" sand.

AND "PRATTROCK" crushed rock.

AND "PRATTROCK" washed gravel.

FROM PRATTROCK (near Folsom).

WHERE SANDY Pratt, president.

OF THE Pratt Building Material Co.

PRODUCES HARD, sharp rock.

ANDY McGuire is the favorite.

AMONG THE builders.

MANY BUILDERS think.

ANDY WILL win.

BECAUSE HIS judgment.

IS ALWAYS good.

MANY PROMINENT architects.

AS WELL as engineers.

AND CONTRACTORS say.

THAT BECAUSE.

ANDY BUYS Pratt's sand.

AND PRATT'S rock and gravel.

SAID (BY Sandy).

TO BE the best.

IN THE West.

ANDY'S JUDGMENT is wonderful.

AND GOOD.

ANDY KNOWS horseshoes.

LIKE HE knows Pratt's sand.

WHEN ANDY was a baby.

HIS FOLKS gave him horseshoes.

INSTEAD OF a rattler.

ANDY USED horseshoe nails.

INSTEAD OF a "teething ring."

WHEN HE cut his first tooth.

ANDY WILL win.

NEXT SUNDAY at Sacramento.

IF SANDY Pratt.

AND THE Sacramento Builders' Exchange.

CAN HELP him.

THEN ANDY will challenge.

THE TOWNS of Prattrock.

NEAR FOLSOM.

AND PRATT CO. (Monterey County).

"I THANK you."

Andy McGuire of McGuire & Henry, user of "Pratt's American River" sand, "Pratt's Marysville" sand and "Prattrock" crushed rock and washed gravel, has been around horses and horseshoes since a baby. Sandy Pratt picks Andy for a winner.

Crescoted lumber—Chas. R. McCormick & Co., 215 Market St., S. F.
Form lumber—Chas. Nelson Co., 230 California St., S. F.
Casting—P. David Co., 21st & Indiana San Francisco.

SAN FRANCISCO, Cal.—Contract was awarded to M. B. McGowan, 180 Jessie Street, at \$5500 for alterations and repairs at Exposition Yacht Harbor in Marino at foot of Scott and Divisadero Streets.

VALLEJO, Solano Co., Cal.—City Eng. T. D. Kilkenny preparing plans to reconstruct Virginia St. wharf involve new deck of untreated timber, substructure of undretreated timber piling and crescoted piling, covering an area of 3,000 feet.

LONG BEACH, Cal.—James L. Frazer, Kress Bldg., Long Beach, awarded cont. at \$27,000 to const. board walk on piles in Seaside Blvd. bet. flood control channel and Tulare Pl.

PUGET SOUND, Wash.—See "Government Work and Supplies," this issue. Bids opened for Navy Yard pier.

LONG BEACH, Cal.—Until 10 a. m., Feb. 18, bids will be rec. by city for 98 lengths of crescoted piling, in lengths of from 24 to 60 ft. Special spec. C-299. Cert. check or bond 10%. C. H. Windham, city mgr.

MISCELLANEOUS BUILDING CONSTRUCTION

MISSION BEACH, Cal.—Sharp & Fellows, Central Bldg., Los Angeles, awarded cont. to const. terminal for San Diego Elec. Ry. at Mission Beach, consisting of open top subway, 450 ft. long, extending from ocean to bay front sections of the amusement dist. under bridges carrying Mission Blvd. and the beach line railway tracks. The firm's contr. includes a 1600-ft. seawall of the parapet type, the parapet forming a guardrail and bench 20-in. high, with cem. esplanade 25 ft. wide. Ornament lights will be placed 100 ft. apart along the wall. The general scheme of the project is to eliminate entirely grade-crossings.

LOS ANGELES, Cal.—City Engr. H. A. Van Norman recommends to bd. of pub. wks. that all bids for proposed incinerator be rejected. He stated that a definite location must be selected before contract is let.

OAKLAND, Cal.—Engineering Dept. of Pacific Tel. & Tel. Co., 333 Grant Ave., San Francisco, has applied to city council for permit to construct covered passageway between the Oakland main building and new buildings for the company in Franklin st. Plans call for bridge starting at 2nd floor of new main building and leading to new and third floors of old buildings; will be concrete and steel construction with plaster exterior; est. cost, \$35,000.

SAN FRANCISCO—Until March 4, 3 p. m., bids will be received by Board of Public Works to pave portion of Civic Center Plaza, estimated cost, \$15,000. This contract covers the base portion only and not the finished surface, the surface work to be undertaken at a later date when additional funds are available. Plans obtainable from Bureau of Engineering, Dept. of Public Works, 3rd floor, city hall.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 813 Mission Street, San Francisco, either by phone, letter, or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

8888—United Kingdom. Manufacturers of cardboard, suitable for box making, desire to quote prices and establish business connections with San Francisco manufacturers or users.

8899—United Kingdom. Manufacturers desire to appoint an agent in San Francisco for the sale of oil stoves, gas rings, food choppers, hearth stands and sets, and general builders' and household ironmongery, etc.

8904—Indore, Central India. Firm desires to purchase match-making machinery through San Francisco manufacturers and machines suitable for manufacture of wooden bobbins.

8909—Vancouver, B. C. Firm desires to receive quotations and full information from San Francisco manufacturers or distributors of burglar alarm systems.

8912 — San Francisco, Calif. Local business man with wide experience is making an extended trip to leading commercial centers of Europe and Asia. He is in a position to undertake commercial transactions for San Francisco business houses.

D-1467—Philadelphia, Pa. Firm wishes to represent in their territory several Western manufacturers.

8921—Chicago, Illinois. Manufacturers of a radio loud speaker desire to enter the export field and are considering the appointment of a San Francisco firm to merchandise their products abroad.

8922 — Brussels, Belgium. Manufacturer of high production automatic scalloping machines (75 meters per hour capacity), and of high speed embroidery machines, desires to appoint an exclusive agent in San Francisco.

8926—Charleroi, Belgium. Established exporters with best local references desire to supply to San Francisco importers window and fancy glass, iron and steel, metals of all kinds, and building materials. Quotations and full particulars will be sent to interested parties.

D-1471—Walla Walla, Wash. Wanted: Ocean going vessel about 150 feet in length for around-the-world cruise; prefer ship with history or of antique design.

D-1472—Athens, Ohio. Manufacturers of parquet flooring desire connection with responsible local firm handling flooring.

Official Proposals

NOTICE TO BIDDERS

(Asphalt Heater—San Leandro)

Pursuant to order of the Board of Trustees of the City of San Leandro, notice is hereby given that said Board of Trustees will receive sealed proposals or bids, up to 8:00 P. M. of Monday, February 16th, 1925, at the office of the City Clerk of the City of San Leandro, in San Leandro, California, for one oil or asphalt heater, mounted on wheels, with spray or pump attachment, and equipped with oil or wood burners, to be of medium capacity of 200 gallons, minimum weight of 1700 pounds, minimum dimensions of length 60 inches, width 30 inches, and maximum dimensions of length over all of 75 inches, and width 35 inches, steel not less than 3/16 inches thick, front wheels 16 inch diameter and 4 1/2 inch tread; back wheels 24 inch diameter and 4 1/2 inch tread; together with all proper and necessary fittings therefor, for the City of San Leandro.

The Board of Trustees reserve the right to reject any and all bids.
By order of the Board of Trustees.
Dated: San Leandro, California,
February 2nd, 1925.

J. J. GILL,
City Clerk.

NOTICE TO CONTRACTORS

(Gordon Valley Pipe Line — City of Vallejo)

SEALED PROPOSALS will be received at the office of the City Clerk, Vallejo, California, until 2 o'clock P. M., February 18, 1925, for the construction of the Gordon Valley Pipe and accessories and furnishing of certain supplies and materials for use in connection therewith.

The work involves:
(a) The furnishing and laying of approximately 115,000 lineal feet of 24 or 32 inch diameter pressure pipe.

(b) The excavation and backfill of approximately 115,000 lineal feet of pipe trench.

(c) The furnishing of air and blow-off valves and stop gates.

(d) The furnishing of 2 24 or 22 inch, and 1 14-inch, Venturi Meters complete.

The work will be subdivided and proposals will be received for separate portions thereof, under forms as follows:

Form "A."

Proposals under this form will cover the furnishing of pipe complete in place, including trenching and backfilling. A certified check or bidder's bond for ten per cent (10%) of the amount bid must accompany the proposal upon this form.

Form "B."

Proposals under this form will cover the furnishing of pipe complete in place, in a trench to be provided by the City of Vallejo. A certified check or bidder's bond for ten per cent (10%) of the amount bid must accompany the proposal upon this form.

Form "C."

Proposals under this form will cover the furnishing of Steel or Iron Pipe, f. o. b., Susan, Cordelia, Creston, Napa Junction and Vallejo, California. A certified check or bidder's bond, for ten per cent (10%) of the amount bid, must accompany the proposal upon this form.

Form "D."

Proposals under this form will cover the excavation and backfill of trench. A certified check or bidder's bond, for ten per cent (10%) of the amount bid, must accompany the proposal upon this form.

Form "E."

Proposals under this form will cover the furnishing of valves. A certified

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion of the fittings, gaskets and castings.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

check or bidder's bond, for ten per cent (10%) of the amount bid, must accompany the proposal upon this form.

Form "F."

Proposals under this form will cover the furnishing of the fittings, gaskets and castings. A certified check or bidder's bond, for ten per cent (10%) of the amount bid, must accompany the proposal upon this form.

Form "G."

Proposals under this form will cover the furnishing of Venturi Meters. A certified check or bidder's bond, for ten per cent (10%) of the amount bid, must accompany the proposal upon this form.

Form "H."

Proposals under this form will cover the furnishing of Meters. A certified check or bidder's bond, for ten per cent (10%) of the amount bid, must accompany the proposal upon this form. Plans, specifications and forms of proposals may be secured from the City Clerk of the City of Vallejo, California, or from the office of A. Kempke, consulting engineer, 401 Hobart Bldg., San Francisco, Cal.

A deposit of twenty-five dollars (\$25.00), required for plans and specifications, which will be refunded on return of same.

The right is reserved to reject any or all bids or to accept other than the lowest as may appear to the best interests of the City of Vallejo.

Dated: February 4, 1925.

(Seal)

ALF. E. EDGE-CUMBE,
City Clerk.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Form Building, Sacramento, Cal., until 2 o'clock P. M. on March 9, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

QUANTITY SURVEYOR

Valuation Engineer

ARTHUR PRIDDLE

683 Mission Street, at Third St.

San Francisco, Cal.

Telephone Douglas 8-4-9-3

General Listing Bureau

Architect's Preliminary Estimates

Shasta County, a reinforced concrete girder bridge across Salt Creek, about six miles south of Antler (11-Sha.-5-C), consisting of one 36 foot, two 42 foot and two 20 foot spans on concrete bents.

Merced County, between Merced River and Buhae (VI-Mer. 4-C & D), about six and four-tenths (6.4) miles in length; five and three-tenths (5.3) miles to be paved with Portland cement concrete and one and one-tenth (1.1) miles to be widened with Portland cement concrete shoulders.

Plans may be seen, and forms of proposals, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

NOTICE TO CONTRACTORS

Heating System Alterations—Alameda

Sealed proposals or bids are hereby invited by the Board of Education of the City of Alameda and of Alameda School District of Alameda County, California, and may be filed at the office of the Secretary of said Board at the City Hall, located at the corner of Oak Street and Santa Clara Avenue, in said city, on or before the hour of 8:00 P. M. of the 17th day of February, 1925, for making changes in the present heating system of the Mastick School, Santa Clara Avenue and Bay Street, Alameda, California.

All of said work shall be done in accordance with the plans and specifications adopted therefor and on file in the office of the Secretary of the Board.

All proposals shall be accompanied by a certified check, or bond in the amount of ten per cent (10%) of the total contract price, conditioned that the successful bidder will enter into a contract within ten days after the same has been awarded to him.

The Board of Education reserves the right to reject any or all bids.

By order of the Board of Education.

Dated January 30, 1925.

C. J. DU FOUR,
Secretary.

Engineering News Section

BRIDGES

VENTURA COUNTY, Cal.—As previously reported, bids will be rec. by State Highway Commission, Forum Bldg., Sacramento, until Feb. 24, 2 P. M., to const. rein. conc. girder bridge across Ventura river, near Ventura, consisting of one 30-ft. and three 60-ft. spans with approach fills. Project involves: 595 cu. yds. Class "A" Portland cement concrete; 820 cwt. reinforcing steel; 310 cu. yds. structure excavation; 275 cu. yds. roadway embankment; removing timber trestle. No progress payments will be made for this work prior to June 1, 1925.

LOS ANGELES, Cal.—County Bridge Engr. Armstrong, 10th floor, Hall of Records, states that timber bridge to be const. over Rio Hondo, on Clara St. in Rd. Foreman Div. No. 107, will consist of 4 60-ft. and 4 38-ft. spans supported by creosoted piles. Bids to be opened by county Feb. 24.

SAN DIEGO, Cal.—McClintic-Marshall Co. (W. B. Kyle), 426 S. Spring St., Los Angeles, awarded cont. city at \$43,749 to const. steel truss superstructure with rein. conc. deck for bridge across San Diego at Old Town.

JACK FARRELL, tall and handsome.

IS THE "Observer."

OF THE Daily Pacific Builder.

AND JACK writes every day.

EXCEPT THE Annual "Builders' Day."

WHEN HE gathers.

HIS LITTLE flock.

OF A wonderful wife.

AND FOUR delightful kiddies.

AND GOES to Santa Cruz.

CAPITOLA OR Big Basin.

SOME PEOPLE "follow the races."

JACK "FOLLOWS the crowds."

TO EACH "Builders' Day."

OTHERWISE HE writes.

AND WRITES.

NOW JACK is writing.

FOR THE mammoth "Annual."

THAT THE "Builder" crowd.

IS ABOUT to publish.

IT IS their weekly.

CALLED "BUILDING & Engineering News."

AND SANDY Pratt, President.

OF THE Pratt Building Material Co.

DOUGLAS 300—"easy to remember."

HOPES JACK writes.

ABOUT SANDY'S wonderful plants.

THAT PRODUCE clean, sharp sand.

AND HARD, sharp rock and gravel.

AT SACRAMENTO, Prattrock (near Folsom).

MARYSVILLE AND Prattco (Monterey County).

JACK FARRELL and Joe Stark.

AND JEAN Cardinal and Joe Odgers.

ALL OF the Daily Pacific Builder.

AND THEIR interesting weekly.

THE "BUILDING & Engineering News."

HAVE BOUGHT all the paper.

WEST OF Twin Peaks.

AND ALL the printers' ink.

AT PRATTROCK and Prattco.

TWO CALIFORNIA cities.

SO YOU must, dear reader.

PLACE YOUR order early.

FOR THE big "Annual."

AND EVERYTHING.

"I THANK you."

This beautiful picture is Jack Farrell, "Observer" of the Daily Pacific Builder, and described in the above story. Jack is a friend of Sandy Pratt, author of this near comedy. Sandy produces sand, crushed rock and gravel.

SAN DIEGO, Cal.—Council declares intent to imp.

National Ave., bet. 16th and 26th Sts. involv. 252,268.88 sq. ft. 5-in. cem. conc. pave. 37 1/2 in. water conn. G St., bet. 18th and 26th Sts., involv. 131,968.44 sq. ft. 1 1/2-in. asph. conc. pave on 2 1/2-in. bitum. base; 255.1 lin. ft. cem. conc. curb.

The bid comprises (1) street work amounting to \$26,719.55 and (2) storm drain and sanitary sewer, \$1,279,500.

RICHMOND, Contra Costa Co., Cal.—City Eng. E. A. Hoffman instructed to confer with U. S. Engineer's office (San Francisco) regarding proposed sewer outlet into Richmond Inner harbor. Early construction of storm sewer system is contemplated by council. Previous estimates for the system prepared by former city engineer H. D. Chapman placed the cost at \$368,800.

L. A. JANUARY BUILDING TOTALS \$11,171,162

During the month of January, 1925, the Los Angeles City Building Department issued 3908 permits with an estimated valuation of \$11,171,162. During December, 1924, the department issued 3486 permits with an estimated valuation of \$11,923,561, while for January, 1924, the number of permits was 5400 and the estimated valuation was \$13,158,526. Class A construction for January, 1925, amounted to \$1,778,000, the total estimated cost of four projects. Class C construction for the month amounted to \$1,569,996, the valuation on 85 permits. Class D, all frame construction, totaled \$6,043,588, covering 2768 permits. Housing operations for January were represented by 1388 permits for dwellings and apartments estimated to cost \$5,731,162, or 35.5 per cent of the total number of permits and 51.7 per cent of the total valuation for the month. These buildings will provide accommodations for 2063 families, or an addition of approximately \$870 to the city's population computed on the basis of the 1920 census average of 4.3 persons to each family.

SURVEY REVEALS HIGH COST OF CITY-MADE ELECTRICITY

Manufacturing electric current costs 33 per cent more in the average municipal power plant in Massachusetts than in the average private power plant in the same state. That is what Dr. E. E. Lincoln of Harvard University found when he made a study of seventeen municipal plants and seventeen private plants.

The Department of the Interior has called for bids for purchase of 31,000,000 feet of timber, mostly yellow pine, on the Spokane Indian reservation in Washington. The receipts from the sale will be added to the tribal funds of the Indians on the reservation. The department fixed a minimum of \$2.75 a thousand feet for yellow pine and \$1 for the other species. Bids will be received by the superintendent of the reservation up to April 15.

KOEHRING

DANDIE Light Mixer

Dandie with steel disc wheels and solid rubber tires; power charging skip, water tank and gasoline engine.

Dandie with steel trucks; power charging skip, water tank and gasoline engine.

EQUIP it to your special needs. Rubber tires to save the time waste of between-job hauls, and to expand your working territory. *Light duty hoist. Low charging platform or power charging skip. Automatic water-measuring tank.*

Most important, you can be sure of full capacity—utmost reliability—and long service life—because this mixer is Koehring built, engineered and constructed to out work, out last anything in the light mixer field. Price? Not the lowest price

—no—but the most remarkable value of all light mixers—and still within the range of light mixer prices.

CAPACITIES

4 and 7 cu. ft. mixed concrete, steam or gasoline power. May be equipped with power charging skip or low charging platform with hopper, light duty hoist, automatic water measuring tank. Mixes mortar as well as concrete.

EARLY STRENGTH NOTED IN OYSTER SHELL CEMENT MANUFACTURE

The Pacific Portland Cement Company, Consolidated, reports that the new Redwood City plant, where oyster shell deposits are being utilized for manufacture of cement, had developed an "early strength" product which it is believed has never before been attained. Through the process in use the company is obtaining a "break" after the setting of the mixture in a twenty-four-hour period, as compared with customary period of seven days. It is indicated that this may revolutionize the industry. Directors of the company have been re-elected, with the officers, and J. H. Colton who was chosen late in November was elected vice-president in charge of operations. He will direct the company plants at Cement in Solano county; the Auburn quarries; the Gerlach, Nev., plant; the newly opened property at Plaster City in the Imperial valley, near the Mexican border, and at Redwood City. From the latter plant, which went into operation December 13, there is now being obtained a shipping production of four to five carloads a day. At maximum capacity production the Company anticipates production of 2500 barrels daily. Property investment in the Redwood City plant, exclusive of the oyster shell deposits, is placed in excess of \$2,000,000. Secretary Battelle announced after the meeting that \$160,000 had been paid in dividends during the year just reported, and that net income had nearly doubled.

7,000 Tons of Belgium Cement For California Highway Project

BY THE OBSERVER

The Santa Barbara Daily News, under date of February 14, carries the following news item under the caption "Belgium Cement Going Into Big Rincon Causeway":

"When completed, the Rincon causeway will have the distinction of having been largely constructed from cement which traveled over 5000 miles, says the Ventura Free Press. It will come from Belgium. Seven thousand tons of this super-fine cement will be shipped from the plant in Belgium to New York, then via the Panama Canal to San Pedro. From San Pedro, it will come to this city (Ventura) by ocean barge, each boat carrying 300 tons. It will be unloaded at the wharf and from there transported to the Rincon work by truck."

"The Observer" may be mistaken but if he remembers correctly the "Big Rincon Causeway" is being constructed for the California State Highway Commission by the J. H. Tillman Company of Portland, Ore., under a contract let in June of last year. The accepted bid on the work was \$382,102.50.

A California state project financed by Californians and constructed chiefly—if not all—of foreign cement. Why?

"The Observer" has no axe to grind for the cement interests but is forced to recall what statewide interests are doing to further the development and sales of Pacific Coast products.

Last month a meeting was held in Sacramento under the auspices of the Industrial and Structural Minerals Division of the Department of Mines and Mining of the Sacramento Chamber of Commerce. The meeting was attended by representatives of the structural industry and organizations interested in mineral development. All sections of the state were represented.

Effort Statewide for Local Materials

The Sacramento meeting marked the first statewide effort made in California to bring together the structural producers and users in an effort to promote the greater use of California building materials and to stop the present extensive importation of these materials into the State from the East and foreign countries, while California's immense deposits lie idle or undeveloped. The conference marked the most important step forward taken in industrial development in California in years.

Undoubtedly those working on the committees appointed, as a result of the Sacramento conference, to further the development and use of California materials, will not be pleased to hear of this Belgian cement deal on a California state highway project. And disappointed they should be for if foreign cement—or any other foreign products that can be manufactured here—are to go into public construction—what possible chance is there to further the use of California materials in private construction?

East Bay Writer Takes Issue

Nothing more can be said of foreign cement than that uttered by Wm. F. Breuer in a recent issue of the East Bay Builder, wherein he says:

"Foreign cement is making its appearance in American markets at a rapid rate. It is offering stiff competition to the domestic cement market.

"In this situation there are grave possibilities affecting not only the domestic and foreign cement producers but the cement craft as a whole.

"It has long been an American policy to patronize home industry and the fact that foreign cement has arrived in America at attractive prices to the purchaser should not, in a large sense, overshadow the fact that it is of foreign manufacture.

"Consider the fact that the domestic cement industry has millions of dollars invested in their plants and offices and yards. Consider the fact that millions of dollars are represented in maintaining payrolls in the numerous cement manufacturing centers.

"Consider the fact that an American product, turned out by American workers, produced under American working conditions, is facing a serious situation to meet the competition of the European and other foreign producers of cement.

"The domestic market is here to serve the American building industry. It looks to support from the domestic users of cement and is entitled to earnest consideration when the cement contractor looks about for this building material.

"Is it good policy to accept foreign cement at its market value and not consider the vast amount of money and resources tied up in the domestic industry which for so long has served the American market faithfully and well?

"The foreign cement is undoubtedly good cement. It is offered at attractive prices to the buyer but it is foreign cement and it is in direct and vital competition with the American or domestic cement industry.

It is time to give heed to the product of foreign plants as against that "There is food for thought in this condition of affairs in the building turned out by the domestic plants."

The cement buyers are urged to consider the things set forth in this review.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The passenger automobiles and trucks now in use in the United States total approximately seventeen and three-quarters million vehicles. This represents a gain in the automobile population of more than two and a half million vehicles in the last year. It is a gain of more than five million vehicles in the last two years. It is a jump of ten million vehicles since the beginning of 1920. The estimate of 17,740,236 cars and trucks is a preliminary figure of the department of commerce. The figures for past years are based on the actual number of state registration as reported to federal public roads authorities.

The Campbell Towne Co. of Oshkosh, Wis., submitted the highest bids to the department of the interior on a stand of 37,000,000 feet of timber comprising the Creek unit of the Klamath Indian reservation in Oregon. Prices per thousand board feet were \$6.11 for pine, \$2.52 for Douglas fir and \$1.01 for other species. The sale of this unit brings the total amount of stumpage up to 2,292,000,000 feet, worth more than \$12,000,000.

Stock holders of the U. S. Gypsum Co., at their annual meeting, approved increases in the capital stock from \$10,000,000 to \$15,000,000, consisting of 750,000 shares at \$2 par. This increase, President Avery says, does not mean any further stock dividends in the immediate future, but is for the purpose of restoring a deficiency in unissued stock in accordance with the established policy of the board.

Sonoma County supervisors endorse proposed 1-cent raise in gasoline tax and an increase on motor licenses from \$3 to \$5, the increased revenue to go to the state for highway purposes, the present gasoline and motor licenses money to be shared as now by the counties.

A recent survey made by the department of labor covering twelve jobs in New York disclosed that it costs slightly more than 1 cent to lay a brick in the wall of a building. The same report estimated the cost of spreading a square yard of plaster on a wall at 39 cents.

San Francisco Bridge Co. has purchased 30 acres of swamp land on the Richmond Inner Harbor, Contra Costa county. For what purpose the lands will be used has not been disclosed by the purchasers.

Election will be held in the Nevada Irrigation District, Nevada County, Calif., March 5 to vote bonds of \$7,250,000 to finance construction of irrigation works.

A campaign to secure the 1926 convention of the American Federation of Labor for Sacramento has been launched by the Sacramento Federated Trades Council.

Unfilled orders of the U. S. Steel Corp., Jan. 31, totaled 5,037,323 tons, an increase of 220,647 tons, compared with the end of the preceding month.

Alexander Pantages announces negotiations are under way for a \$3,000,000 office, theatre and store building in Oakland for the Pantages Circuit.

California State Civil Service Commission, Forum Building, Sacramento, announces examinations will be held in San Francisco, Sacramento and Los Angeles, for the position of Junior Structural Engineer, Grade 3 and Assistant Structural Engineer, Grade 4. The former position pays \$170 to \$230 and the latter \$235 to \$280 per month. Application blanks, which must be filed with the commission on or before March 14, are obtainable from offices of State Free Employment Bureau in various cities of the state or will be furnished by the commission on request at Sacramento.

The average total wholesale price of six standard plumbing fixtures required for a six-room house has increased a little more than 70 per cent since 1912. It is shown in a price compilation announced by the department of commerce. The average wholesale price as reported for January, however, was a decrease from the maximum recorded in June, 1923, which was 93 per cent above the pre-war 1913 average.

The executive committee of the Los Angeles Builders' Exchange has adopted a resolution condemning newspapers and other periodicals throughout the United States that seek to hinder the development of California by publishing libelous articles. The members of the committee have agreed to write open letters to their friends in the East telling the actual facts about California conditions.

A three days' Terra Cotta Institute will be held at the Carnegie Institute of Pittsburgh in Pittsburgh in co-operation with the National Terra Cotta Society on March 17, 18, and 19. The meeting, which is announced as the first of its kind arranged in this country, is being planned for the benefit of architects and the building, terra cotta, and ceramic industries.

United States Gypsum Company's earnings have set a new high record. Net earnings for 1924 are \$7,166,381, equivalent after preferred dividends to \$14.96 a share of 439,348 shares of \$20 par value common stock outstanding. These earnings are the highest in the company's history and compare with \$5,030,922 or \$15.59 a share on 295,884 shares of common in 1923.

Asbestos shipped from the properties of the San Carlos Asbestos Co., south of Holbrook, Ariz., is reported to be selling for \$1,700 a ton, a material advance on the return known for the first shipments. This is for fiber exceeding 1½ inch length, to be used in the manufacture of fireproof fabric for digible airships.

Hachenev Wrench Co., Inc., capitalized at \$100,000, has been incorporated in Portland, Ore., and will engage in the manufacture and selling of all kinds of machinery, tools, etc. Directors are: Frank C. Hachenev, Frank C. Frey and Dr. A. H. Brown, all of Portland.

J. F. Green, former office manager at Dellicker for the Feather River Lumber Co., has been arrested on a charge of embezzling more than \$1,500 of the company's funds.

ALONG THE LINE

The student chapter of the American Society of Civil Engineers at the University of California has planned an extensive trip into the San Joaquin valley for the purpose of visiting some of the outstanding feats of construction to be seen there. The tour will begin Feb. 21 and will include a visit to the irrigation and road projects near Stockton, the sewage disposal plant at Lodi and detailed investigation of the bridge across the Carquinez straits at Antioch.

Forty-six architects will compete for the Le Brun traveling scholarship, given by the New York chapter of the American Institute of Architects. The subject for this year's competition is a municipal building for a town of 150,000 population. Lewis H. Pries of San Francisco won the 1922 award with a design for public baths.

Charged with having robbed the municipal government of more than \$1200 by means of fraudulent salary claims, Harry H. Hannah, city engineer of Eureka, was arrested on a warrant sworn to by Oscar W. Lord, mayor of that city. The engineer was released on \$5,000 bonds, pending his preliminary hearing.

Servicers of the Sacramento Chapter, American Association of Engineers, has been accepted by the Sacramento Chamber of Commerce to collect data regarding traffic and highway accidents to promote safety. The engineers will work in conjunction with the chamber's highway safety committee.

Major W. H. Radcliffe, in charge of construction of the U. S. Veterans' Hospital project at Livermore, has been transferred to San Fernando to supervise construction of the new hospital to be erected by the Veterans' Bureau in that city.

Robert M. Morton, California State Highway Engineer, has been selected by the American Association of State Highway Officials to serve on a special committee which will undertake classifying and numbering all interstate highways in America.

Jas. T. Sayles, street paving contractor of Martinez, has sold his business and equipment to Heafy-Moore & McNair of Oakland, and plans to enter business in the San Joaquin Valley, probably at Stockton.

Charles C. Chapman, of Fullerton, retired capitalist and political figure of the south, has been appointed a member of the State Immigration and Housing Commission by Governor Friend W. Richardson.

San Joaquin county supervisors are on record as being in favor of a gasoline tax to finance construction of state highways.

Samuel Winton Ryland, engineer and bridge builder, died in Stockton Feb. 10. A widow, seven sons and a daughter survive.

ORGANIZATION NEWS

Organisations having a direct connection with the construction industry are invited to submit news for publication in this department.

WAGE-SCALE PROSPECTS IN BUILDING TRADES

Wage scales for labor in 70 per cent of the industrial centres of the United States will remain at 1924 levels throughout 1925, the Engineering News Record reports in analyzing its annual survey, which shows that at least one third of the country expects record breaking building booms this year. The survey divides labor into two groups. One of these, described as the more powerful, takes in the highly organized trades engaged in transportation, mining and construction. For this group the wage tendency has been upward, owing to strength of the unions involved, the urgent demand for the services of the mechanics and the scarcity of apprentices. The second group takes in shop and factory workers, common laborers and unorganized workers. With this group the wage trend is downward.

Among the list of cities where building booms are anticipated, according to the survey, are the following: New York, Chicago, Cleveland, St. Louis, Seattle, Philadelphia, Baltimore, Boston, Dallas, Denver, Minneapolis, Detroit, Pittsburgh, New Orleans and Cincinnati.

OHIO BUILDERS WOULD AMEND LIEN LAW

The Ohio State Association of Builders' Exchanges has drawn up a proposed amendment to the mechanics' lien law of the state of Ohio. Copies of the amendment have been placed in the hands of a special committee composed of C. F. Waltz, Cincinnati, E. H. Latham, Columbus, and Harry Gillett, Cleveland. The proposed revision of the law would modify it in the following respects:

1. By making it unnecessary to get certificates from material men.
2. By granting general contractors 30 days additional time after a lien is filed in which to secure affidavits from subcontractors.
3. By inserting a bonding provision that provides:
 - a. That a general contractor may give bond to pay all bills;
 - b. That an owner may file a bond, thereby guaranteeing that no liens will be filed;
 - c. Other bonding provisions that may be applied to suit the relations between general contractors, subcontractors, and material interests.

L. A. EXCAVATING CONTRACTORS FORM ASSOCIATION

The Excavating Contractors' Association of Southern California has been organized in Los Angeles. Its members operate 53 power shovels in and around Los Angeles. Their aim will be to raise the standards of the business and to foster skill and integrity of members.

Those enrolled in the association are: Roy Butterfield, Calvert & Lowenbruck, J. G. Donovan & Son, Ducey & Attwood, Edwards Bros., Evans Excavating Co., Graham Bros., Inc., B. G. Karn, L. A. Excavating Co., J. R. McKnight, Patterson & Hess, M. S. Ross, Wm. Ruddle, Chas. B. Ryan, E. Schelling, Sullivan & Kirtwan, C. G. Willis & Son, Wilson & Bell.

Building Construction Courses Are Adopted for L. A. High School

The first building construction course to be adopted as a regular four-year high school course has been established in the Roosevelt high school, Los Angeles, under the direction of Thomas Fellows, who expects that 100 students will be enrolled within a few weeks.

Those sponsoring the course are of the opinion that it will be adopted by other schools here and possibly in other cities. The movement has met the approval of the Southern California Chapter Associated General Contractors, who see a possibility of securing young men practically trained for building and construction industry.

The schedule of the course for 1924-1925 at the Roosevelt high school is outlined as follows: The symbols, B9, B10, A10, and etc., refer to semesters, B indicating the first half and A the last half of the school year, and the figures the school year. For example, B9 is the first half of the first year in high school and B10 is the first half of the second year in high school.

Building Construction Course—Building Construction 1—B10. General instruction in selection, storing and use of brick, sand, lime, cement, rock, etc., for various building purposes, utilizing the materials and construction on the school premises. Class, group and individual project work covering the every-day use of concrete and brick from crude work, such as footings up to finished articles that are in common use in modern life.

Building Construction 2—A10. Instruction in form work, scaffolds, equipment, both hand and machine, including combinations of brick and concrete. Construction methods devoted to development of details, showing foundations, floor, walls, beams and plain columns made from concrete in various proportions and finishes.
